Ethnic Studies programs are designed to help students majoring in the liberal arts and sciences develop a sophisticated and broad understanding of ethnicity and its role in contemporary American society. They provide students with the theories and concepts needed to comprehend and interpret relations between and among ethnic groups in the United States. Students are better prepared to live and work in a diverse society when educational institutions foster a positive learning environment in which differences contained within various U.S. communities can be studied not as a social problem, as is often the case, but for their history of struggles and contributions.

The interdisciplinary nature of the ethnic studies program curriculum provides students the opportunity, through academic investigation, to develop a greater understanding of the cultural diversity of the present-day United States and to acquire skills needed in professional and social service fields. This multidisciplinary, comparative approach to contemporary and historical research methodologies provides the basis for students to analyze the diverse social, economic, political and cultural facets of ethnic groups in the United States. Special emphasis is given to new perspectives that recover the history, creative expression of underrepresented groups.

Programs and courses reflect prevailing thought in ethnic studies, draw parallels between various groups in the United States and link the studies of their ancestral origins with current and historical research on race and ethnic relations in the United States. They reflect critical analysis of the dominant perspectives through which ethnic groups have been described and perceived. Also investigated are the intersections of ethnicity with structures of political, educational, gender, business and economic,

social and cultural power, all of which are emphasized through the study of materials and works by and about previously excluded groups. The cultural processes through which ethnic groups have sustained or altered their cultural identities are emphasized, as well as the pressures faced by members of various ethnic groups to maintain traditional values and conform to mainstream U.S. society.

Associate Professors:

Faye Caronan, PhD, University of California, San Diego

Rachel E. Harding, PhD, University of Colorado, Boulder

Clinical Teaching Track Assistant Professor

Katherine Mohrman, PhD, University of Minnesota Twin Cities

Senior Instructors:

Dennis Green, ABD, University of New Mexico

Professor Emeritus:

Donna Martinez, PhD, University of Washington

Ethnic Studies (ETST)

ETST 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

ETST 2000 - Introduction to Ethnic Studies (3 Credits)

Multi-disciplinary survey of contemporary and historical research analyses of the diverse social, economic, political, and cultural facets of African American, American Indian, Asian American, and Latino communities and cultures. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul; Denver Core Requirement, Social Sciences.

ETST 2010 - Introduction to Chicana/o Studies (3 Credits)

This course introduces students to the broad range of the interdisciplinary field of Chicana/o Studies by examining the Chicana/o experience including history, identity, politics, immigration, labor, literature, and popular culture. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade

ETST 2024 - Race and Ethnic Relations (3 Credits)

Surveys race and ethnicity, facts and myths about great populations, and the social and cultural sources of bias and discrimination. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2105 - African American Contemporary Social Issues (3 Credits)

Exposes students to those areas of intellectual, social, cultural, economic, political, and educational concerns relevant to the African American experience. Principally an introductory survey of primary issues currently affecting the African American population. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2115 - Genocide in the 21st Century: Darfur and Beyond (3 Credits)

Introduces students not only to the first genocide of the twenty-first century, in which over 400,000 ethnic Sudanese have been forcibly wiped out and millions displaced, but also studies the root cause of genocide and some of the past genocides. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2145 - The Gullah in Novel and Film (3 Credits)

Explores the history and culture of a distinct group of African Americans known as Gullah/Geechee, whose ancestors were brought to the U.S. as part of a specialized and often illegal slave trade that existed in coastal South Carolina and Georgia. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2155 - African American History (3 Credits)

Surveys the history of African Americans. Study interpretations, and analysis of major problems, issues, and trends affecting the African American population from pre-slavery to the present. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-HI1.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-HI1, History; Denver Core Requirement, Humanities.

ETST 2294 - Race and the Media (3 Credits)

Virtually all Americans are susceptible to the blatant and subtle socializing and conditioning effects of the modern media (film, television, the internet). Explains the variety of cultural values transmitted through the media, with particular emphasis on racial issues. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2400 - Issues in Chicano/a Education (3 Credits)

Historical overview of segregation, landmark court cases and immigration policy in the education of Chicano/as in Colorado and nationally from 1920 to the present. The intersection of these issues in the education of undocumented students is also examined. Cross-listed with TCED 2400. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2496 - American Indian Literature (3 Credits)

Introduces American Indian literature and other expressive forms, with emphasis on their aesthetic, linguistic, psychological, and historical properties, as well as the contemporary social and cultural influences upon native authors and their material. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2606 - The American Indian Experience (3 Credits)

Surveys the relationships between Indian and non-Indian peoples, particularly in the context of the unique interaction between tribes and the federal government. Cross-listed with RLST 2680. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 2840 - Independent Study: ETST (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

ETST 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

ETST 3002 - Ethnicity, Health and Social Justice (3 Credits)

Surveys core issues contributing to racial or ethnic minority differences in health status. Historical and contemporary U.S. health and social policy, including the areas of environmental health, sexual and reproductive health, children and immigrants, are examined. Cross-listed with PBHL 3002. Term offered: fall. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ETST 3010 - Conference Participation (1 Credit)

Max hours: 1 Credit.

Grading Basis: Letter Grade

ETST 3036 - American Indian Cultural Images (3 Credits)

Analysis of images and perceptions of American Indians in American culture, as seen in politics, education, film, photography, advertising, art, literature and the media. Note: Students may not earn credit for this course if they have earned credit for ETST 2036. Term offered: fall, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

ETST 3108 - Chicano/a and Latino/a History (3 Credits)

An historical analysis of person's descendant from Mexico and Latin America. Areas of focus include ethnohistorical backgrounds, current interrelations, and social movements in both rural and urban groups. Other topics include: cultural patterns, identity maintenance, social reforms and problems of national incorporation. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3110 - Indigenous Studies (3 Credits)

Examines how communities in diverse world regions preserve tradition, share knowledge, and respond to influences both within and outside of their immediate environments. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

ETST 3125 - Multiracial Families and Communities (3 Credits)

Examines specific issues related to multiracial, multicultural and mixed heritage families in the U.S., including historical, sociocultural, economic and political factors involved. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3129 - Contemporary Latin American Literature (3 Credits)

The best of contemporary Latin American novels. Examines how U.S. policies in Latin America affect literary creation. Note: Taught in English. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3155 - The African Diaspora (3 Credits)

This course examines historical and contemporary experiences of Africans and people of African descent in various parts of the world – with a special focus on African immigrants in the US, Black Americans with generational roots in the USA, Blacks in Europe and Afro-Latin Americans. The course incorporates perspectives from history, literature, religious studies, visual art, political science, sociology and anthropology in an effort to provide a range of materials that address the diversity and complexity of the experiences of Africans and people of African descent. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3211 - Hip Hop Music & Culture (3 Credits)

Covers the historical trajectory of hip hop music and culture from inception, aims to restructure stereotypes and offer a deeper perspective into how hip hop defines the identities of individuals as well as the consciousness of the masses within society. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3216 - Federal Law and American Indians (3 Credits)

Examines the legal and political history of the U.S. in relation to American Indian Nations. Focuses on specific laws and Supreme Court cases in federal Indian law, with analysis of U.S. policy. There will be some comparison with Indian policies of other countries. Cross-listed with PSCI 3214. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3224 - U.S. Middle East Culture and Religion (3 Credits)

Explores the history and development of the various major religions, cultures, and ethnic groups in the Middle East, their evolution and interaction in the U.S., and the historical impact and influence of the region, which continues to this day. Study of the region is timely and relevant due to U.S. involvement in various conflicts and peace efforts. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3230 - African American Family (3 Credits)

Exploration of the African American family social institution. Emphasis on historical roots and African influence is still enmeshed in the functioning of the family in modern society. Factors responsible for the ability of the family to meet the challenging society. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3254 - Race and Ethnicity in the Inner City (3 Credits)

This dynamic course combines aspects of urban studies and sociology. Contemporary cultural factors of the minority ghetto experience are investigated as elements in urban crisis. Emphasis is placed on possible solutions through government agencies and community organization. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3272 - Global Media (3 Credits)

Introduction to leading issues in the study of transnational media. The course will focus on the global media environment in the early 21st century, diverse countries, a variety of media, and social issues. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

ETST 3274 - Power, Poverty, Culture (3 Credits)

Studies the process that has rendered certain groups poor for generations. Studies African Americans, Whites, Chicanos/as and Latinos/as, and other ethnic groups that have lived in this society in a state of poverty. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3297 - Social History of Asian Americans (3 Credits)

Introductory-level course surveys the social history of Asian American groups from the mid-19th century to the present. Examines immigration patterns, the development of communities, social and economic problems, and anti-Asian movements and activities. Cross-listed with SOCY 3297 and HIST 3297. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3300 - Shamanic Traditions (3 Credits)

Explores shamanic religious traditions across the world. This form of religion, involving spiritism, animism, trance states, and "mind power," is the oldest and most widespread religion in world history. Cross-listed with RLST 3300. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3307 - Selected Topics: Asian Americans (3 Credits)

Examines specific topics on Asian Americans to be selected by the instructor and the students. Detailed study of subjects relating to the Asian American experience and communities. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3350 - Colonial Latin America (3 Credits)

Surveys the creation of colonial empires by Spain and Portugal, 1492-1808. Topics include Native American responses to European incursions, women in colonial society, and slavery in Latin America. Cross-listed with HIST 3350. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3357 - Asian American Literature (3 Credits)

Readings in this course examine the experiences of men and women in different generations; how each group attempts to maintain traditional values in a foreign land, to assimilate, and to forge a new identity. Includes short stories, poetry, essays, and novels by leading Asian American writers. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3365 - Aztlan in the United States: Chicano History from 1821 (3 Credits)

Explores the impact of U.S. rule on the Southwest, paying particular attention to legal, economic, and social changes that created new political and cultural identities in the Southwest. Cross-listed with HIST 3365. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3394 - Literature of Social Protest from an Ethnic Perspective (3 Credits)

The literature of social protest of various ethnic groups is examined from a literary perspective and with reference to political and social theories. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3396 - History of the American Indian (3 Credits)

Indigenous nations in North America comprise hundreds of diverse cultures. This course examines U.S. Indian policy and how indigenous nations responded; how they creatively adapted, and resisted cultural change; and how they continue to persist culturally, socially, and politically. Cross-listed with HIST 3396. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3408 - Social Psychology of Latinos/as (3 Credits)

Exposes students to research on Latinos/as in the areas of intelligence and achievement, language and learning ability, attitudes, perception and motivation. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3567 - Asian American Women (3 Credits)

Examines processes of change in values, roles, and relations of Asian American women, using contemporary and historical readings that address problems such as generational differences, assimilation, and changing roles. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3574 - Topics in Ethnic Studies (3 Credits)

Topics vary from term to term, based upon interest and availability of instructors in specialized areas. Term offered: spring. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

ETST 3616 - Selected Topics: American Indians (3 Credits)

Detailed study of subjects related to American Indian experience and communities. Note: Specific topics to be selected by the instructor and students. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ETST 3697 - Contemporary Asian American Experience (3 Credits)

Examines the contemporary Asian American experience, including the adaptation of new immigrants or refugees, economic and educational problems, ethnic identity, intermarriage, anti-Asian discrimination and other civil rights issues, and recent political activism. Cross-listed with SOCY 3697. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3704 - Culture, Racism and Alienation (3 Credits)

The effects of racism on the personality of participants in racist cultures. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

ETST 3838 - History of the Mexican American in Colorado (3 Credits)

Mexican Americans in Colorado from the 1800's to the present. Topics include founding of Colorado towns, labor strikes, farm worker issues, land and water rights, the Chicano Movement and political power. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 3840 - Independent Study: ETST (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ETST 3842 - Independent Study: ETST (1-3 Credits)

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ETST 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

ETST 3995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

ETST 4000 - Research Methods in Ethnic Studies (3 Credits)

Emphasizes the acquisition of a variety of data or information collection and analytic skills, especially those applicable to historical and social inquiry in ethnic studies. Cross-listed with ETST 5000. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4010 - Problematizing Whiteness: Educating for Racial Justice (3 Credits)

Critical Whiteness Studies provides a deeper analysis of race that accounts for both sides of the race coin: the plight of people of color AND how Whites are complicit. This class looks deeper into how race operates within White contexts and how that impacts people of color so we bridge how Whites AND people of color can work together towards a racially equitable society. Cross listed with EDFN 4001 and EDFN 5001. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4020 - Race, Culture and Immigration (3 Credits)

In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Junior standing or higher or instructor permission. Cross-listed with SOCY 4020, SOCY 5020 and ETST 5020. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ETST 4030 - Race, Religion and Belonging in the United States (3 Credits)

Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources #such as sermons, reality TV shows, court cases and graphic images#as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation#state, thereby constructing the boundaries of the state itself. Cross-listed with ETST 5030, RLST 4030, RLST 5030, HIST 4209 and HIST 5029. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4144 - Indigenous Political Systems (3 Credits)

Surveys political theory and practice in indigenous societies in the Americas. Examines the impact of indigenous political thought on Euro-American politics, especially the U.S. Constitution, and explores the contemporary impact of indigenous people on current politics. Cross-listed with PSCI 4144. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4146 - Indigenous Politics (3 Credits)

Surveys the status of the world's native peoples and nations, and the role of law and politics in the future of indigenous peoples in the global arena. Examines questions of human rights, economic development, and international law and politics. Cross-listed with PSCI 4146, 5145. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4156 - The Arab-Israeli Peace Process (3 Credits)

Critical analysis of Arab and Israeli perspectives on the on-going peace negotiations in the Middle East. Historical background and religious-cultural aspects of current problems. Prereq: Upper division standing. Cross-listed with PSCI 4156. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ETST 4165 - Cultural Diversity Awareness in the Workplace (3 Credits)

This course will analyze the impact and effectiveness of cultural diversity awareness in a variety of workplace settings including educational institutions, businesses, health care organizations, and non-profit organizations. Students will learn how implicit biases and structural inequality impact workplace culture, a work place's productivity, and a work place's ability to fulfill their mission. By the end of the course, students will acquire the skills to advocate for and implement inclusive work place policies. Cross-listed with ETST 5165. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4220 - African-American Literature (3 Credits)

Surveys African-American literature with special emphasis on post-Civil War writing. Cross-listed with ETST 5220, ENGL 4220 and 5220. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4305 - Women of Color Feminisms (3 Credits)

This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the writing, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people of color, especially the politics of identity and representation; structural oppressions and violences; and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, (as well as how these systems of domination intersect), but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with ETST 5305, WGST 4305 and WGST 5305. Max hours: 3 Credits

Grading Basis: Letter Grade

ETST 4411 - Modern Mexico (3 Credits)

Designed to familiarize students with the critical issues of Mexican political, economic and social history. Traces the emergence of independence and the difficult consolidation of an independent nation state. Cross-listed with HIST 4411, 5411. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4457 - American Political Thought (3 Credits)

Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Cross-listed with PSCI 4457, PSCI 5457, and ETST 5457. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4515 - The African American in Politics (3 Credits)

Examines African American politics in the U.S.; the role of African American interest groups, structure and function of African American political organizations, goals and political styles of African American politicians, trends, and the future of African American politics in the United States. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4555 - International Women's Resistance (3 Credits)

Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Cross-listed with PSCI 4555/5555 and WGST 4555/5555. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4558 - Chicano and Latino Politics (3 Credits)

Analysis of the social, cultural, and economic factors that affect political behavior of Latinos. Special attention is paid to the Mexican American cultural heritage and to relations between Mexican Americans and Anglo Americans. Cross-listed with PSCI 4554. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4574 - Special Topics (3 Credits)

Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4616 - Selected Topics: Chicanos/as and Latinos/as (3 Credits)

Examines various contemporary issues in ethnic studies regarding Chicanos/as and Latinos/as. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4710 - Special Topics in Ethnic Studies (1-3 Credits)

Students explore advanced topics in Ethnic Studies. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4726 - North American Indian Art (3 Credits)

Surveys major tribal styles of the North American continent. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4730 - Peoples and Cultures of Sub-Saharan Africa (3 Credits)

Covers various types of societies and civilizations that have existed in sub-Saharan Africa. Explores foragers, pastoralists, agricultural societies, chiefdoms, kingdoms, and empires, as these emerged and interacted with each other. Details their ideas and social orders, including the following topics: race, ethnicity, kinship, politics, economics, religion, magic, witchcraft, sorcery, marriage, age, gender, stratification, art, literature and oral traditions. Also addresses the impact of colonialism, the rise of nations, changes in the post-colonial period, warfare, and the impact of globalism on Africa today. Prereq: Upper division standing. Cross-listed with ANTH 4730 and 5730. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ETST 4768 - Chicano/Chicana Narrative and Social History (3 Credits)

Provides a general, chronological, and thematic introduction to short stories and novels written by U.S. citizens of Mexican descent. Begins with early 20th century narratives by women, continues with the corrido and Post-World War II male writers, and ends with more recent publications by contemporary women writers. Social, historical, and political backgrounds are also emphasized, along with an analysis of the literary techniques and motifs. Cross-listed with ENGL 4768. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4827 - Women and the Law (3 Credits)

Examines the role of the courts in the development of public policy toward women; how the legal system affects the economic power, family roles, safety and political participation of women. Cross-listed with PSCI 4827 and WGST 4827. Max hours: 3 Credits.

Grading Basis: Letter Grade

ETST 4840 - Independent Study: ETST (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ETST 4880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

ETST 4960 - Capstone in Ethnic Studies (3 Credits)
Provides a broad overview of social research methods pertinent to the study of race, ethnicity, gender, and culture. Explores theories concerning "ethnicity and race" as both social construct and constituent feature of people's identities and lived experiences. Ethnic Studies is an interdisciplinary major where students make connections across diverse fields of inquiry; this course provides a structure for integrating an interdisciplinary examination of the intellectual, cultural, and social dimensions of racial and ethnic groups. Cross-listed with ETST 5960. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

ETST 4995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.

Ethnic Studies, BA Introduction

Please click [here \(p. 392\)](#) to see Ethnic Studies department information.

The skills and knowledge that students gain while pursuing a BA degree with a Major in Ethnic Studies at CU Denver are transferable to a variety of careers. In common with other liberal arts graduates, those with a degree in ethnic studies will be trained in creative and critical thinking, complex reasoning, and effective communication. In addition, ethnic studies graduates will have cultural competency skills that are highly valued by employers, who serve increasingly diverse clientele. Other occupations that employ many ethnic studies graduates include: law, teaching, journalism, marketing, community organizing and social work. Ethnic studies graduates also find work in non-profit agencies and in federal, state, and local government agencies.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program and some courses are available online.

Declaring This Major

- Click [here \(p. 63\)](#) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click [here \(p. 93\)](#) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 33 credits in ETST coursework.
- Students must complete a minimum of 16 upper division (3000-level and above) ETST credit hours.
- Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
- Students must complete 15 ETST credit hours with CU Denver faculty.

Required Courses

Code	Title	Hours
<i>Take all of the following required courses:</i>		<i>18</i>
ETST 2000	Introduction to Ethnic Studies	3
ETST 2155	African American History	3

Ethnic Studies Minor

Introduction

Please click here (p. 392) to see Ethnic Studies department information.

The minor in ethnic studies helps students develop a sophisticated and broad understanding of ethnicity and its role in contemporary American society and apply the knowledge acquired in their chosen majors and professions. Ethnic Studies minors develop cultural competency skills that prepare them to live and work in a diverse, multicultural society. These skills are highly valued by employers, who serve increasingly diverse clientele. Ethnic studies minors find employment in a variety of fields including: law, teaching, journalism, marketing, community organizing and social work. Ethnic studies minors also find work in non-profit agencies and in federal, state, and local government agencies.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program and all courses are available online.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 18 ETST credit hours (6 courses).
- Students must complete a minimum of 9 upper-division (3000-level and above) ETST credit hours.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete all ETST course requirements for the Ethnic Studies minor with CU Denver faculty. Transfer courses do not apply.

Required Courses

African American Studies Certificate Introduction

Please click here (p. 392) to see Ethnic Studies department information.

African American Studies is a multidisciplinary and interdisciplinary field examining the histories, cultures, and political and social engagements of people of African descent in the United States. Courses offered through the African American Studies certificate program encourage students to explore a broad range of historical and contemporary issues impacting native-born African Americans as well as African, Caribbean, and Afro-Latin American immigrants to the USA. Our courses address transformations in the social, political, gender, sexual, religious, and ethnic identities of people of African descent; meanings of race and family; social justice movements and activism; literature and cultural expression; and the nature of diaspora in the Black experience.

African American studies is the cornerstone discipline of Ethnic Studies, both in the history of our university and in the larger movement for inclusive educational frameworks in the United States. As a field, it has developed a tradition that weds incisive critical thinking, creative problem solving and a commitment to applied approaches that benefit the larger society beyond the walls of the university.

An African American Studies certificate prepares students to work with racially and ethnically diverse communities in the United States or abroad in a wide variety of careers, including teaching, higher education administration, community organizing, community and government service, journalism and the media, environmental science, non-profit

administration, global economics, health care, legal services, library science, music, publishing, and research.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Additional information about the undergraduate certificate in African American studies may be obtained from the Ethnic Studies department at 303-315-7206 or email: ethnic_studies@ucdenver.edu

Additional information about the African American Studies certificate may be obtained from Ethnic Studies, Plaza Building, Suite 102

American Indian Studies Certificate

Introduction

Please click here (p. 392) to see Ethnic Studies department information.

A 12-credit online program with opportunities in American Indian related internships.

This certificate is designed to appeal to undergraduate students with a background in any major. The certificate is also targeted to nondegree-seeking professionals. Courses will examine historical and contemporary tribal experiences. Students will be encouraged to think critically about the stereotypes of American Indians and tribal governments. A certificate in American Indian Studies offers students an enduring intellectual base to understand both the foundations of America and diversity among tribes with different languages, histories, and cultures. The courses provide students the opportunity to encounter theories posited by a rich history of American Indian intellectuals.

Additional information about the undergraduate certificate in American Indian Studies may be obtained from ethnic studies Plaza Building, Suite 102

Phone: 303.315.7207

Cultural Diversity Studies Undergraduate Certificate

Introduction

Please click here (p. 392) to see Ethnic Studies department information.

The undergraduate certificate in cultural diversity studies is designed to appeal to undergraduate students with a background in any major. It will allow students to demonstrate to potential employers that they possess the multicultural skills and knowledge necessary to succeed in the workplace. Students will enroll in department courses that focus on the historical context in which race and culture have emerged in the United States.

This certificate is also targeted to non-degree-seeking professionals who seek to acquire multicultural knowledge and the skills necessary to ensure their success in professional environments. Students will be encouraged to think critically about race and race relations. Their expanded understandings of the implications of race and culture in work environments will ensure employers that they offer the highest quality employees opportunities in employment or advancement.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Additional information about the undergraduate certificate in cultural diversity studies may be obtained from ethnic studies department at 303-556-6560 or email: ethnic_studies@ucdenver.edu

Program Delivery

- This is an on-campus program and all courses are available online.

Declaring This Certificate

- Please see your advisor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies.

Certificate Requirements

1. Students must complete a minimum of 12 ETST credit hours.
2. Students must complete a minimum of 6 ETST upper division (3000-level and above) credit hours.
3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all ETST credit hours with CU Denver faculty.

Certificate Restrictions, Allowances and Recommendations

1. There are cross-listed courses in a variety of departments, including history, political science and sociology. Any cross-listed course is acceptable, but the student should register for it under the ETST subject code. A complete listing of department offerings and cross-listed courses can be obtained every semester from the Ethnic Studies Department web page or by calling our office for a copy.

Latinx Studies Certificate

Introduction

Please click here (p. 392) to see Ethnic Studies department information

Latinx studies integrates the study of Latinx communities in the United States with analysis of the histories, politics, cultures, and societies of Latin America and the Caribbean. Latinx Studies certificate courses deal with changing political, social, economic and cultural realities, including immigration and transnational communities; gender, racial, sexual, and ethnic identities; social movements; diverse forms of cultural expression; ongoing political and economic restructuring in Latin America; and the challenges of political and economic empowerment for Latinx communities in the United States.

A Latinx certificate prepares students to work with Latinx communities in the United States or abroad in a wide variety of careers, including teaching, higher education administration, community organizing, community and government service, journalism and the media, environmental science, global economics, health care, legal services, library science, music, publishing, and research.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Additional information about the Latinx Studies certificate may be obtained from ethnic studies Plaza Building, Suite 102 Phone:303.315.7207 <https://clas.ucdenver.edu/ethnicstudies/certificate> (<https://clas.ucdenver.edu/ethnicstudies/certificates/>)s Faculty Advisor: Professor Faye Caronan (Faye.Caronan@ucdenver.edu)

Telephone: 303-315-7525

Fax: 303-315-7526

Overview

Undergraduate Information

Geography is a science that focuses on the spatial analysis of human/physical patterns and processes. Geographers attempt to identify the factors affecting the distribution of people and their activities on the

surface of the earth and to provide meaningful solutions to problems faced by societies. This discipline is an ideal major for the liberal arts student, providing exposure to the concepts and techniques utilized in investigating the physical sciences, environmental and sustainability issues, socioeconomic problems and planning policies. The major offers 4 degree options:

1. General Geography
2. Environmental Science
3. Environment, Society & Sustainability
4. Urban Studies & Planning

The program offers a distinctive curriculum that combines a broad and integrative scientific education with state-of-the-art training in geo-spatial analysis (e.g., computer mapping, GIS, remote sensing). The program is designed to provide the student interested in physical, social or environmental geography with the background necessary for obtaining a rewarding career in government (federal, state, local) or private industry, as well as preparing students for graduate study.

Departmental Honors

Departmental honors is a privilege for students who demonstrate exceptional academic performance and promise at CU Denver. The minimum criteria for honors in GES are an overall GPA of 3.3 in all courses at CU Denver (minimum of 30 semester hours for transfer students) and a GPA of 3.75 for all courses taken in the Department of Geography and Environmental Sciences (regardless of the BA option that students are pursuing). A student who meets these criteria shall work with a GES faculty sponsor who agrees to guide an honors thesis. Students must successfully complete and defend an honors thesis that demonstrates independent research, written and presentation skills. Additionally, students are required to sign up for and successfully complete 3 honors thesis credits the semester that they are graduating with honors. Departmental honors will be awarded based on successful completion and defense of the honors thesis, subject to faculty sponsor and committee approval. For more information, please contact the GES undergraduate advisor and/or chair.

Pamela Jansma, PhD, Northwestern University (CLAS Dean)

Professors Emeritus:

Rudi Hartmann, PhD, Technical University of Munich
Wesley E. LeMasurier, PhD, Stanford University
Martin Lockley, PhD, University of Birmingham, England
John W. Wyckoff, PhD, University of Utah

Associate Professors:

Peter Anthamatten, PhD, University of Minnesota
Christy Briles, PhD, University of Oregon
Frederick B. Chambers, PhD, Arizona State University
Rafael Moreno-Sanchez, PhD, Colorado State University
Brian Page, PhD, University of California, Berkeley
Gregory Simon, PhD, University of Washington
Bryan S. Wee, PhD, Purdue University

Assistant Professors:

Benjamin Crawford, PhD, University of British Columbia, Vancouver
Katharine Kelsey, PhD, University of Colorado Boulder
Lisa Kelley, PhD, University of California Berkeley

Associate Professors Clinical Teaching Track:

Matthew Cross, Ph.D, University of Colorado Denver

Assistant Professors Clinical Teaching Track:

Thomas Duster, PhD, University of Notre Dame

Senior Instructors:

Amanda Weaver, PhD, University of Denver

Instructors:

Kirsten Christensen, MSS, MURP, University of Colorado Denver
Yi-Chia Chen, PhD, Louisiana State University

Lecturers:

Richard Ashmore
Tim Connors
Hope Dalton
Richard DeGrandchamp
Amy DePierre
James Fleming
David Murray
Mandy Rees

Geography (GEOG)

GEOG 1102 - World Regions Global Context (3 Credits)
 Analyzes world regions and their global interconnectedness, including the dynamic and complex relationships between people and the world they inhabit. Demographic and cultural (political, economic, and historic) issues are examined as well as interactions between human societies and natural environments. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS2.
 Grading Basis: Letter Grade
 Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS2, Soc Behav Sci: Geography.

GEOG 1111 - First Year Seminar (3 Credits)
 Restriction: Restricted to Freshman level students. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to Freshman level students

GEOG 1202 - Introduction to Physical Geography (3 Credits)
 The science that studies the processes, forms, and spatial or geographic structures of natural systems operating at or near the earth's surface, including weather, climate, and landform processes. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2.
 Grading Basis: Letter Grade
 Additional Information: Denver Core Requirement, Biol Phys Sci - No Lab; GT courses GT Pathways, GT-SC2, Nat Phy Sci: Lec w/o Req Lab.

GEOG 1302 - Introduction to Human Geography (3 Credits)
 Systematic introduction to basic concepts and approaches in human geographic analysis. Term offered: fall, spring. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Additional Information: GT courses GT Pathways, GT-SS2, Soc Behav Sci: Geography.

GEOG 1332 - Topics in Science (1 Credit)
 A series of five-week modules on various topics in physical geography. Section 001. Violent Storms. Analysis of the causes, characteristics, and regional patterns of thunderstorms, tornadoes and hurricanes, emphasizing the hazards associated with each type of storm. Section 002. Elementary Surveying. Introduces the various techniques of running a traverse, location of points by intersection and resection, determination of distance by pacing, chaining, stadia and trigonometry and carrying of elevations. Section 003. Basic Navigation. Introduces the principles of navigation using the sun as the celestial body. Emphasis is on determining latitude and longitude at solar noon. Section 004. Earthquakes. The characteristics, causes, and results of earth movements along faults. Section 005. Waves and Beaches. Analysis of wind-generated waves in the open ocean and the changes that occur as waves enter shallow water, forming surf. The tides and seismic sea waves are discussed for comparison. Repeatable. Max hours: 9 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 9.

GEOG 1602 - Urban Studies and Planning (3 Credits)
 Surveys the process of urbanization, emphasizing the development of American cities, using Denver as an example. Topics covered include: evolution of metropolitan form/land use patterns, cultural landscape formation, city planning and architectural design, and urban social and policy issues. Note: This course is a prerequisite for GEOG 4680 Urban Sustainability: Perspectives and Practice AND GEOG 4640 Urban Geography Denver and the US. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS2.
 Grading Basis: Letter Grade
 Additional Information: GT courses GT Pathways, GT-SS2, Soc Behav Sci: Geography; Denver Core Requirement, Social Sciences.

GEOG 2080 - Introduction to Mapping and Map Analysis (3 Credits)
 Studies major elements in the preparation of thematic maps, including sources of data collection and manipulation of data, and cartographic techniques for display of data. Term offered: fall, spring. Max hours: 3 Credits.
 Grading Basis: Letter Grade

GEOG 2202 - Hazards to Disasters: Perception and Management (3 Credits)

Surveys those physical phenomena that often cause substantial damage when they occur in areas of human settlement. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS2.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS2, Soc Behav Sci: Geography; Denver Core Requirement, Social Sciences.

GEOG 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: sophomore standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

GEOG 3100 - Geography of Colorado (3 Credits)

An analysis of the physical environment, history of settlement, and resource base of Colorado in relation to present economic patterns of the state. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3110 - Geography of North America (3 Credits)

Systematic study of the physical, cultural, economic, and political relationships that shape the landscape of the United States, Canada, Greenland, and the U.S.-Mexico Borderlands. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3120 - Geography of Europe (3 Credits)

An analysis of the physical environment, resource utilization, economic development and cooperation in Europe. A cultural and political geography which focuses on continuity and change in Eastern and Western Europe. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3130 - Central America and the Caribbean (3 Credits)

Surveys the physical environment and cultural development of Central America and the Caribbean Islands. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3140 - Geography of South America (3 Credits)

The physical environment, cultural development, and political instability within the area are analyzed. Influence of the landscape and climate, as well as Iberian cultural and land tenure patterns on historic settlement and modern growth are discussed. Problems associated with population, economics, politics, education, and geography are emphasized. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3150 - Middle East (3 Credits)

Physical, cultural, and economic approach to the arid lands of the Middle East, including Arab land of the Sahara. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3160 - Geography of China (3 Credits)

Geographic survey of the physical, cultural, and economic features characterizing the geography of China. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3232 - Weather and Climate (3 Credits)

Introduces the processes and systems that govern both day-to-day weather and longer-term climate variations. Covers instrumentation and weather forecasting techniques. Prerequisite: GEOG 1202 or ENVS 1042 or (ENVS 1044 and ENVS 1045). Cross-listed with ENVS 3232. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or ENVS 1042 or (ENVS 1044 and ENVS 1045)

GEOG 3240 - Colorado Climates (3 Credits)

Provides a broad overview of the various weather and climate patterns that are found within the state of Colorado. To accomplish this, the state of Colorado will be divided into regions which (hopefully) have a large degree of homogeneity in terms of weather and climate controls. Note: Taught in a seminar style with students giving presentations and reports on their findings about a given region. Note: this course assumes that students have completed GEOG 1202 and/or GEOG 3232. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3401 - Geography of Food and Agriculture (3 Credits)

An overview of food systems and agriculture as they impact an increasingly urbanized planet. We will survey historical food production and preservation, food justice and insecurity, land-use and preservation, as well as local and global systems of distribution and consumption. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3412 - Globalization and Regional Development (3 Credits)

Addresses global political-restructuring and its implications for regional development in the U.S. Both historical and contemporary processes of globalization are examined. Topics include: the environmental basis of American industrial growth, the relationship between technological change and geographical shifts, the rise and decline of Fordism, the transfer of Japanese manufacturing methods to the U.S., the role of regional and national industrial policy, and the social consequences of globalization for labor and communities. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Students will not earn credit for GEOG 3412 if they have already earned credit for GEOG 3411. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

GEOG 3430 - Geography of Tourism (3 Credits)

Geographic analysis of trends in recreation, travel, and tourism, and their economic, social, and environmental impacts. Examines growth and change in resorts and tourist destination areas. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: this course assumes that students have completed GEOG 1302 or GEOG 3411. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3440 - Ecotourism (3 Credits)

The geographic study of a growing segment in contemporary tourism aimed at the provision of low impact travel to fragile, pristine and usually protected areas with the purpose of directly benefitting local communities and ecological conservation. The course surveys leading destination areas for ecotourism worldwide. GEOG 1302, GEOG 3411 or GEOG 3430 recommended. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3450 - Cultural Heritage and Tourism (3 Credits)

The course involves the geographic study of tourism to heritage sites and their management. It is a growing segment in domestic and international travel, and market trends for different types of destinations in heritage tourism are examined in a local, regional and national context. The course discusses heritage planning practices and processes as well as investigates dissonant heritage and dark tourism sites. Prereq: GEOG 1302 or GEOG 3411 or GEOG 3430 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1302 or GEOG 3411 or GEOG 3430 with a C- or higher

GEOG 3501 - Geography of Health (3 Credits)

Offers a critical geographic perspective to human health issues, examining disease distributions, how changing relationships between people and their environments (natural, built, and social environments) influence health, and different approaches to the study of health in geography. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3770 - Geography and Film (3 Credits)

Geographic analysis of past and current film production and distribution systems and the complex relationships between film making and place in feature, documentary and educational film. Note: this course assumes that students have completed GEOG 1302 or GEOG 3411. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 3840 - Independent Study: GEOG (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

GEOG 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

GEOG 3990 - Special Topics (3 Credits)

Investigation of current topics in geography such as analysis of issues (crime, public transportation), techniques (socioeconomic impact analysis), or areas of specialization (climatology). Note: specific necessary prior coursework varies with each topic; students are expected to have completed at least six hours in relevant social or physical science coursework. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

GEOG 4000 - Planning Methods (3 Credits)

This course focuses on the most commonly applied quantitative and qualitative methods used in planning; data organization and management principles; and various ways to collect, analyze, and communicate data as a fundamental component of the planning process.

Prereq: This course is intended for senior level students with a minimum cumulative gpa of 3.0. Crosslisted with URPL 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Senior level or higher with a minimum cumulative GPA of 3.0

GEOG 4010 - Landscape Biogeochemistry (3 Credits)

A holistic approach to studying the role chemical elements play in synthesis/decomposition cycles, and the resultant environment from interaction of the lithosphere with the hydrosphere, atmosphere, biosphere, and pedosphere during geological, and ecological timeframes, together with anthropogenic activities. Prereq: Introductory college-level physical geography or environmental science course or permission of instructor. Prereq: GEOG 1202 or GEOL 1072 or permission from instructor. Cross-listed with GEOL 4010/ENVS 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOG 4020 - Earth Environments and Human Impacts (3 Credits)

Basic concepts describing earth's biomes and physical environment are presented in a systems context. Global warming assessment, from both political and scientific perspectives, is then presented. Model visualization of these concepts to consider human impacts on Earth's biomes is discussed. Earth system viewpoint, having links of Earth's biomes to oceans and atmosphere, completes the course discussion.

Prereq: GEOG 1202 and GEOG 3232. Cross-listed with ENVS 5020, GEOL 4020. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 and GEOG 3232

GEOG 4060 - Remote Sensing I: Introduction to Environmental Remote Sensing (3 Credits)

An in-depth treatment of the use of aerial photographs and other forms of imagery for the analysis of urban-industrial patterns, vegetation, agriculture, landforms, and geologic structure. Prereq: GEOG 2080 with a grade of C or better. Cross-listed with GEOG 5060. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 2080 with a grade of C or better

GEOG 4070 - Remote Sensing II: Advanced Remote Sensing (3 Credits)

Focuses on digital image processing of satellite and aerial images. Students explore the nature of digital image data, gain an understanding of image analysis using PCs, and learn about the use of analysis products in the development of GIS databases. Prereq: GEOG 4060/5060 with a grade of C or better, or permission of instructor. Cross-listed with GEOG 5070. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4060 or GEOG 5060 or GEOL 4060 or GEOL 5060, with a grade of C or better

GEOG 4080 - Introduction to GIS (3 Credits)

Introduces Geographic Information Systems (GIS), including justification, hardware/software, database design, and data conversion. GIS is a computer-based mapping system providing a graphical interface to locational and relational attribute data. Includes hands-on use of a GIS workstation. Prereq: GEOG 2080 with a grade of C or better. Cross-listed with GEOG 5080. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 2080 with a grade of C or better

GEOG 4081 - Cartography and Computer Mapping (3 Credits)

Provides an introduction to the art and science of cartography (map making). Students will learn about design principles, tools and techniques of map production, culminating in the creation of a high-quality map through hands-on exercises. Prereq: GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better. Cross-listed with GEOG 5081. Term offered: spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better

GEOG 4085 - GIS Applications for the Urban Environment (3 Credits)

Takes a more detailed look at basic concepts presented in the introductory GIS course, concentrating on how GIS is used to solve real-world geographic problems. Various GIS applications within both the natural and social sciences are highlighted. The selection of specific topics is flexible, based on the interests of enrolled students. Prereq: GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better, or permission of instructor. Cross-listed with GEOG 5085. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better

GEOG 4086 - FOSS4G Systems Integration (3 Credits)

Focuses on the integration of different FOSS4G (Free and Open Source Software for Geospatial Applications) software and technologies to create geospatial information systems that access data from different sources, storage structures, and formats to provide information to support decision making processes. Prereq: GEOG 4091 or 5091, and GEOG 4092 or 5092. Cross-listed with GEOG 5086. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4091 or 5091, and GEOG 4092 or 5092

GEOG 4090 - Environmental Modeling with Geographic Information Systems (3 Credits)

Applies raster spatial analysis and modeling to study processes and spatial relationships to support decisionmaking in natural and built environments. Prereq: GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better, or permission of instructor. Cross-listed with GEOG 5090. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better

GEOG 4091 - Open Source Software for Geospatial Applications (3 Credits)

Students will master the individual use and integration of a stack of the most powerful Free and Open Source Software for Geospatial Applications (FOSS4G) to analyze spatial problems and create Spatial Data Infrastructures in different technological, socio-economic and organizational settings. Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better, or permission of the instructor. Cross-listed with GEOG 5091. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better

GEOG 4092 - GIS Programming and Automation (3 Credits)

Students will learn the most commonly used programming language to automate GIS geoprocessing tasks and workflows in the latest versions of the most popular GIS systems. Cross-listed with GEOG 5092. Prereq: grade of B- or higher in GEOG 4080 or 5080 or similar course. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: grade of B- or higher in GEOG 4080 or 5080 or similar course

GEOG 4095 - Deploying GIS Functionality on the Web (3 Credits)

Covers the core principles and technologies that allow the deployment of geographic information system (GIS) functionality over the World Wide Web. Hands-on exercises make use of the latest commercial software as well as open source technologies. Prereq: GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better, computer science background, or permission of instructor. Cross-listed with GEOG 5095. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or 5080 or CVEN 5381 with a grade of C or better

GEOG 4150 - Place, Landscape, and Meaning (3 Credits)

Investigates concepts that constitute place and landscape—how they are not just simply "there." Incorporates different schools of thought to help understand why landscapes are objects inseparable from us and open to multiple interpretations and meanings. Note: this course assumes that students have completed an introductory human geography course. Cross-listed with GEOG 5150. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4220 - Environmental Impact Assessment (3 Credits)

The objective of this course is to provide the foundation for understanding the environmental impact assessment process, its legal context, and the criteria and methods for procedural and substantive compliance. Cross-listed with GEOG 5220, URPL 6549. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4230 - Hazard Mitigation and Vulnerability Assessment (3 Credits)

Examines hazard mitigation and its planning and policy implications, emphasizing how vulnerability assessments play an integral role. Students explore how mitigation minimizes the impacts from hazards and use GIS to conduct a local study. Note: this course assumes that students have completed GEOG 2202. Cross-listed with GEOG 5230. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4235 - GIS Applications in the Health Sciences (3 Credits)

Examines how GIS is used throughout the health care industry and public health. Covers environmental health, disease surveillance, and health services research. Students critically review current literature and gain hands-on experience with GIS software. Note: this course assumes that students have completed GEOG 4080 or GEOG 5080 and/or have a background in public health. Cross-listed with GEOG 5235, HBSC 7235. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4240 - Applied Geomorphology (3 Credits)

Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Prereq: GEOG 1202 or GEOL 1072 (required) and GEOG 3232 strongly recommended. Cross-listed with GEOL 4240, 5240 and GEOG 5240. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOG 4251 - Fluvial Geomorphology (3 Credits)

Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 5251, GEOL 4251 and GEOL 5251.

Prereq: Students must have completed GEOG 1202 or GEOL 1072 or have graduate standing or gain instructor approval in order to register for this course. GEOG 3232 is strongly recommended, though not required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072 or graduate standing

GEOG 4260 - Energy and Natural Resource Planning (3 Credits)

This course provides an overview of the issues associated with energy and natural resource planning. Topics include: energy policy; alternative energy development; water resources; extraction/mining; natural resource protection and regulation; resource management, policies, politics, and technologies. Cross-listed with URPL 6510. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4265 - Sustainability in Resources Management (3 Credits)

Sustainability and sustainable development are the dominant economic, environmental and social issues of the 21st century. Follows a multi-disciplinary approach to these concepts. Case studies demonstrate their implementation in different geographical, ecological and socio-economic conditions worldwide. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information.

Prereq: ENVS 1042 OR ENVS 1044 and ENVS 1045 with a C- or higher.

Cross-listed with GEOG 5265. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: ENVS 1042 OR ENVS 1044 and ENVS 1045 with a C- or higher.

GEOG 4270 - Glacial Geomorphology (3 Credits)

Provides an in-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072. Cross-listed with GEOG/GEOL 4270/5270. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4280 - Environmental Hydrology (4 Credits)

Examination of hydrologic processes in relation to climate, soils, vegetation, land-use practices, and human interactions. Natural scientific perspectives emphasized; field and laboratory included. Prereq: GEOG 1202 AND one of: 1) GEOG 3232; 2) GEOG 4240/GEOL 4240/GEOL 5240; 3) GEOG 4010/GEOL 4010/ENVS 5000. Cross-listed with GEOL 4280 and ENVS 5280. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 AND one of: 1) GEOG 3232; 2) GEOG 4240/GEOL 4240/GEOL 5240; 3) GEOG 4010/GEOL 4010/ENVS 5000

GEOG 4300 - Children's Geographies (3 Credits)

This seminar is an interdisciplinary investigation of children, childhood and environment in the context of sustainability and equity. Theoretical and methodological perspectives are applied to understand children's interactions with/in different spaces. Cross-listed with GEOG 5300, ENVS 4300 and ENVS 5300. Restriction: Restricted to students with junior standing or higher or with instructor permission. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students at a junior standing or higher

GEOG 4301 - Population, Culture, and Resources (3 Credits)

Increasing world human populations are examined in the context of regional and global resources. Opposing viewpoints are studied, and students are required to complete a case study of a self-selected issue analyzing viewpoints associated with relevant opposing opinions. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Students may not receive credit for this course if they have already received credit for GEOG 3301. Cross-listed with GEOG 5301. Prereq: Junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

GEOG 4305 - Water Quality and Resources (3 Credits)

Introduces water resources aimed at students with little or no background in the field. This is a broad course covering topics ranging from the physical aspects of water to water politics and international law. While the course is largely a lecture format, discussion of current issues is a significant part of the class. Cross-listed with ENVS 5305. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4335 - Contemporary Environmental Issues (3 Credits)

Provides an overview of environmental challenges facing society today, focusing on how humans impact and change the environment. Opposing views and environmental policy at the local, state, national, and international levels are explored. Cross-listed with GEOG 5335. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4350 - Environment and Society in the American Past (3 Credits)

Overview of the geographical development of North American society from the late 15th century to the mid-20th century. A comparative regional approach emphasizing relationships between natural resource exploitation, cultural landscape formation and environmental change. Cross-listed with GEOG 5350. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4380 - Anthropocene Futures (3 Credits)

We are living in the “Anthropocene”—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity’s intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthropocene in Earth’s evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a “good” Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene. Cross-listed with GEOG 5380, ENVS 4380, and ENVS 5380. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4400 - Regional Economic Systems (3 Credits)

This course offers a comprehensive investigation into regional economic systems; metropolitan economies; regional economic development; regional market assessment; job generation; taxes/spending; and fiscal/economic policies and impacts at the metropolitan, regional, and statewide scale. Cross-listed with URPL 6605. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4420 - The Politics of Nature (3 Credits)

Examines how economic systems, scientific discovery, institutional policies, and environmental knowledge converge to shape the environment and mediate the way societies understand, manage and respond to environmental changes in both the United States and the developing world. Cross-listed with GEOG 5420. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4440 - Science, Policy and the Environment (3 Credits)

Examines the social, economic and political forces shaping scientific discovery and the development and enforcement of environmental policy. Students will examine perspectives on issues such as risk, expertise, uncertainty and objectivity that influence the problem-defining, standard-setting and policy-making process. Cross-listed with GEOG 5440. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4450 - Urban Food and Agriculture: Perspectives and Research (3 Credits)

Provides an overview of research & practices in urban farming. Critically reviews emergent models of local food production/distribution. Compares new practices to traditional agribusiness. Assesses the prospects for solving sustainability problems within the modern agro-food system. Cross-list ENVS 5450. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

GEOG 4460 - Sustainable Urban Agriculture Field Study I (3 Credits)

Provides a field-based overview of urban farm planning & management. Topics: range/land conservation, native/invasive species, water distribution, animal husbandry, government interaction, local markets, community relations, conservation easements and issues pertaining to urban farming. Note: this course assumes that students have completed GEOG 4450. Cross-list ENVS 5460. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

GEOG 4470 - Sustainable Urban Agriculture Field Study II (3 Credits)

Provides a field-based overview of current practices in local agricultural production. Emphasis will be placed on sustainable practices and their most efficient situation. Special consideration will be given to plausible solutions for food insecure communities both local and global. Note: this course assumes that students have completed GEOG 4450 and 4460. Cross-list ENVS 5470. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

GEOG 4480 - Urban Vegetable CSA: Planning, Production&Distribution (3 Credits)

This course outlines the planning, production, and distribution in an active urban vegetable CSA (community supported agriculture) model. It is offered as a part of the GES Sustainable Urban Agriculture Certificate. Cross-listed with ENVS 5480. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4625 - Urban America: Colonial Times to the Present (3 Credits)

Rise of the American city from colonial times to present. Major emphasis on the process of urbanization since 1840: town promotion, the industrial city, immigration, boss politics and reform, urban technology, transportation systems, minorities, city planning, and the future of urban America. Cross-listed with HIST 4225, HIST 5225, WGST 4225, WGST 5225, GEOG 4625. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4630 - Transportation, Land Use, and the Environment (3 Credits)

This course teaches how current transportation modes shape regions and how future transportation technologies might impact us. Topics include policy making and governance; land use interactions with transportation investments; climate change and resilience; energy use; environmental justice; and equity considerations. Cross-listed with URPL 6555. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4640 - Urban Geography: Denver and the U.S. (3 Credits)

Uses a combined lecture/seminar format to explore research themes in urban geography. Topics covered include both historical and contemporary processes of urban development and transformation. Particular emphasis is placed on the U.S. and Colorado’s Front Range. Cross-listed with GEOG 5640. Prereq: GEOG 1602 with a grade of C- or higher or permission from instructor. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1602 with a grade of C- or higher.

GEOG 4670 - Transportation Planning and Policy (3 Credits)

This course examines policy issues in urban transportation planning: how transportation system design and political/institutional contexts shape transportation decision-making; major modes of urban transportation; and the social, environmental, economic, energy, and health impacts of transportation systems. Cross-listed with URPL 6550. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4680 - Urban Sustainability: Perspectives and Practice (3 Credits)
Examines various perspectives on sustainability, including ambiguities and opportunities of sustainability as a conceptual framework. Class also examines what sustainability looks like in practice, using numerous topics such as poverty and urban farming to water and climate change. Cross-listed with GEOG 5680. Prereq: ENVS 1342 or GEOG 1602 with a grade of C- or higher or permission from instructor. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ENVS 1342 or GEOG 1602 with a grade of C- or higher.

GEOG 4700 - Synthesis for Interdisciplinary Science (3 Credits)
Synthesis is an approach in interdisciplinary research and education that links ideas, data and methods. This course develops synthesis skills through the lens of systems theory. It includes exercises for synthetic thinking, examination of integrative tools, and a service-learning project. Cross-listed with ENVS 5700. Breadth and depth training in environmental sciences. Interest in interdisciplinary collaboration. Prereq: Senior standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Senior standing.

GEOG 4710 - Disasters, Climate Change, and Health (3 Credits)
Provides a review of the impacts of disasters and climate change on human health, using a broad framework of preparedness, mitigation, response, recovery, and adaptation. Note: this course assumes that students have completed GEOG 2202 or GEOG 3501. Max hours: 3 Credits. Grading Basis: Letter Grade

GEOG 4720 - Climate Change: Causes, Impacts and Solutions (3 Credits)
Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Prereq: GEOG 3232. Cross-listed with GEOG 5720/ ENVS 4720/ ENVS 5720. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: GEOG 3232

GEOG 4731 - Mountain Biogeography (4 Credits)
This course utilizes the close proximity of the Rocky Mountains to examine altitudinal influences on species distributions. Topics include species patterns and distributions, disturbance, climate impacts, forest management and sustainability. Note: A three-day field trip within Colorado will occur the first weekend of the Fall semester, and is highly encouraged. Prereq: GEOG 1202 or ENVS 1042 or graduate standing or permission from the instructor is required in order to register for this course. Cross-listed with ENVS 5731. Max hours: 4 Credits. Grading Basis: Letter Grade
Prereq: GEOG 1202 or ENVS 1042 or graduate standing

GEOG 4740 - Soil Science and Geography (3 Credits)
Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Cross-listed with GEOG 5740, ENVS 4740, ENVS 5740. Max hours: 3 Credits. Grading Basis: Letter Grade

GEOG 4750 - Beeography: Geography of Bees (4 Credits)
Beeography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries. Prereq: ENVS 1044 and 1045 or BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) or BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Cross-listed with GEOG 5750, ENVS 4750, and ENVS 5750. Max hours: 4 Credits. Grading Basis: Letter Grade
Prereq: ENVS 1044 and 1045 or BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) or BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

GEOG 4770 - Applied Statistics for the Natural Sciences (3 Credits)
Surveys statistical techniques including: quick review of basic statistics, tests for normality and outliers, display of data; simple and multiple regression; ANOVA and its relation to regression. Emphasis on computer or stat-pak analysis and interpretation of statistical results. Prereq: College algebra and GEOG 2080, or consent of instructor. Cross-listed with ENVS 5600. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: MATH 1110 or MATH 1070, and GEOG 2080

GEOG 4840 - Independent Study: GEOG (1-3 Credits)
Independent research primarily for undergraduate majors. Prereq: Permission of department. Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

GEOG 4850 - Understanding And Communicating Field Methods (3 Credits)
Interdisciplinary course that presents a balanced overview of common field methods and how to communicate them effectively to a general audience. Includes hands-on experience with various field methods (e.g., transects, survey design, historical assessment, GIS, etc.) and communication strategies. Note: this course assumes that students have completed an introductory geography or environmental science course. Prereq: Junior standing or higher. Cross-listed with GEOG 5850 and ENVS 4850/5850. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

GEOG 4880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

GEOG 4900 - Colloquium (1 Credit)

Engages students and faculty in discussion of current and pertinent world topics, including specific readings, (guest) presentations, and creation of working research papers, among other items. Students and faculty may work in research groups to accomplish specific goals. Prereq: Junior standing or higher. Cross-listed with ENVS 4900, ENVS 5900, GEOG 5900. Repeatable. Max Hours: 4 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 4.

Prereq: junior standing or higher

GEOG 4940 - Senior Seminar (3 Credits)

Introduces students to the professional literature in the field. Various professionals and faculty lecture about geography/planning research and careers. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOG 4950 - Honors Thesis (3 Credits)

A capstone course designed to promote critical thinking, research methodology, and writing/oral presentation skills. Students design and develop a research project under the supervision of a faculty advisor. Each student gives an oral presentation or defense of his or her thesis at the end of the semester in which they enroll. Note: this course assumes that students have completed GEOG 4940. Prereq: Junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

Additional Information: Report as Full Time.

GEOG 4990 - Special Topics (1-6 Credits)

Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

GEOG 4992 - Advanced Regional Field Study (1-6 Credits)

Directed, hands-on study of concepts involved in understanding geographic regions. Utilizes field observations, field techniques/methods, & data observation, collection, analysis, & interpretation related to the specific region being studied. May include physical as well as cultural phenomena. Note: Instructor permission required. Cross-listed with GEOG 5992, ENVS 4992, ENVS 5992. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

GEOG 4995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with ENVS 4995, ENVS 5995, and GEOG 5995. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Geology (GEOL)

GEOL 1022 - History of Life (3 Credits)

Non-technical study of fossils through time and their relationships to environments through earth history. Includes discussion of evolution and extinction events and current controversies. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 1073 - Physical Geology: Surface Processes (3 Credits)

This survey course develops a basic understanding of surface processes and landforms in geology. It includes one all-day field trip. Students must also take the accompanying laboratory GEOL 1074. No co-credit with GEOL 1072. Prereq or Co-req: GEOL 1074. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or Co-req: GEOL 1074

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec.

GEOL 1074 - Physical Geology: Surface Processes Laboratory (1 Credit)

Introduces the basic scientific approach through investigations, observations, and experiments in surface processes and landforms in geology. Students must also take the accompanying lecture GEOL 1073. Prereq or Co-req: GEOL 1073. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq or co-req: GEOL 1073

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

GEOL 1083 - Physical Geology: Internal Processes (3 Credits)

This survey course develops a basic understanding of physical geology emphasizing the earth's interior, covering internal processes and properties, with plate tectonics as the underlying theme. Includes one all-day field trip. Students must also take the accompanying laboratory GEOL 1084. No co-credit with GEOL 1082. Prereq or co-req: GEOL 1084. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or co-req: GEOL 1084

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec.

GEOL 1084 - Physical Geology: Internal Processes Laboratory (1 Credit)

Introduces the basic scientific approach through investigations, observations, and experiments in internal geologic processes and properties of the earth's interior with plate tectonics as the underlying theme. Prereq or co-req: GEOL 1083. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq or co-req: GEOL 1083

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

GEOL 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

GEOL 1115 - Earth Sciences Content (1-3 Credits)

Covers content areas of undergraduate earth sciences. Topics include physical geology; historical geology; oceanography; meteorology; and astronomy. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 1202 - Introduction to Oceanography (3 Credits)

Surveys modern scientific knowledge of the world's oceans. Intended for non-science students, the course offers a non-quantitative introduction to the major facts and principles of physical, chemical, biological, and geological oceanography. The impact of natural and anthropic events on the marine environment are included. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 1400 - Geology of the National Parks (3 Credits)

Combines lecture and laboratory exercises to help students interpret Earth history using the national parks as examples. Students learn to identify the common rocks and minerals, and how to interpret topographic and geologic maps. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 1840 - Independent Study: GEOL (1-3 Credits)

Repeatable. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

GEOL 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

GEOL 3011 - Mineralogy (4 Credits)

Principles of mineralogy, including crystallography, crystal chemistry, and a systematic study of the more important nonsilicate and silicate minerals. Origins and occurrences of minerals. Note: this course assumes that students have taken physical geology and college-level chemistry. Max hours: 4 Credits.

Grading Basis: Letter Grade

GEOL 3032 - Geology of Colorado (3 Credits)

Introductory course focused on the geology of Colorado. The course is divided into two parts: the first half covers general principles of geology, and the second is devoted to the observation of rock types, structures, and geologic relationships in the field. Discussion of plate tectonics, rock formation, construction and interpretation of geologic maps, the geologic time scale, geologic provinces of Colorado, evolution of major landforms, formation and development of mineral resources of Colorado, and current topics in environmental geology. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 3102 - Dinosaurs Past and Present (3 Credits)

A broad-based, non-technical new look at the world's most popular prehistoric animals. Stresses the rapid and perennial growth of knowledge about dinosaurs and the relevance of such knowledge in the 20th century. Prereq: Introductory geology and/or biology are recommended. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 3411 - Introductory Paleontology (4 Credits)

Studies invertebrate fossils, including a survey of the organic world and its history in the geological past. Includes an introduction to evolution and paleoecology, and discussion of the uses of fossils in geologic correlations. Note: this course assumes that students have taken introductory geology-surface processes or an introductory biology course. Max hours: 4 Credits.

Grading Basis: Letter Grade

GEOL 3421 - Sedimentation and Stratigraphy (4 Credits)

Introduces the principles of sedimentology and stratigraphy. Emphasis is on dynamic processes within sedimentary environments and the resulting stratigraphic record. Prereq: GEOL 1082. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: GEOL 1082

GEOL 3840 - Independent Study: GEOL (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

GEOL 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

GEOL 4010 - Landscape Biogeochemistry (3 Credits)

A holistic approach to studying the role chemical elements play in synthesis/decomposition cycles, and the resultant environment from interaction of the lithosphere with the hydrosphere, atmosphere, biosphere, and pedosphere during geological, and ecological timeframes, together with anthropogenic activities. Prereq: GEOG 1202 or GEOL 1072 or permission of instructor. Cross-listed with GEOG 4010/ENVS 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOL 4020 - Earth Environments and Human Impacts (3 Credits)

Basic concepts describing earth's biomes and physical environment are presented in a systems context. Global warming assessment, from both political and scientific perspectives, is then presented. Model visualization of these concepts to consider human impacts on Earth's biomes is discussed. Earth system viewpoint, having links of Earth's biomes to oceans and atmosphere, completes the course discussion. Cross-listed with ENVS 5020, GEOG 4020. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

GEOL 4030 - Environmental Geology (3 Credits)

Applies geological information to interactions between people and the physical environment. Increasing awareness of its importance in our society means that this is an expanding field as companies are required to address the environmental consequences of their actions. Prereq: Senior standing. Cross-listed with ENVS 5030 and GEOL 5030. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restrictions: Restricted to Senior standing.

GEOL 4111 - Field Methods In Geology (3 Credits)

Introduction to the basic methods of geologic mapping (metamorphic, sedimentary, and igneous rocks), including use of the Brunton compass and Jacob Staff, as well as preparation of measured stratigraphic sections, geologic maps, and geologic cross-sections. Note: GEOL 1072 or GEOG 1202 required, GEOL 3421 strongly recommended. Prereq: GEOG 1202 or GEOL 1072. Cross-listed with GEOL 5111. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOL 4240 - Applied Geomorphology (3 Credits)

Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Prereq: GEOG 1202 or GEOL 1072 (required) and GEOG 3232 strongly recommended. Cross-listed with GEOG 4240, 5240 and GEOL 5240. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOL 4251 - Fluvial Geomorphology (3 Credits)

Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 4251, GEOG 5251 and GEOL 5251.

Prereq: Students must have completed GEOG 1202 or GEOL 1072 or have graduate standing or gain instructor approval in order to register for this course. GEOG 3232 is strongly recommended, though not required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072 or graduate standing

GEOL 4270 - Glacial Geomorphology (3 Credits)

Provides an in-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Prereq: GEOG 1202 or GEOL 1072. Cross-listed with GEOG/GEOL 4270/5270. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or GEOL 1072

GEOL 4780 - Engineering Geology (4 Credits)

Studies geology as utilized in engineering and environmental practice. Emphasizes a conceptual integration of geologic materials, processes, and rates of change as a basis for successful application of geologic knowledge to environmental planning and engineering design projects. Prereq: MATH 2411 and CVEN 2121. Cross-listed with GEOL 5780 and CVEN 4780. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: CVEN 2121 and MATH 2411

GEOL 4840 - Independent Study: GEOL (1-3 Credits)

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

GEOL 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

GEOL 4995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: GEOL 1072 and GEOL 1082. Cross-listed with GEOL 5995. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: GEOL 1072 and GEOL 1082

GEOL 5001 - RM-MSMSP Earth Processes I (4 Credits)

Systematic study of geological concepts, rock and mineral formation, plate tectonics, volcanism and earthquakes, landforms and weathering, historical environmental interpretation. Includes a field component. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: students should obtain permission of project director prior to enrolling in this course. Prereq: Graduate standing. Max hours: 4 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5002 - RM-MSMSP Earth Sciences II - Sedimentology and Paleontology (4 Credits)

Field and lecture course building on Earth Sciences I, which covers internal earth processes. Students learn about erosional processes and how sedimentary rocks are deposited and may be preserved; the different ways fossils are preserved; describing rocks in the field; and collecting, preparing and describing fossils. Provides an overview of the geology of the area so that students can place the detailed studies in context. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: GEOL 5001. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: GEOL 5001

GEOL 5003 - RM-MSMSP Earth Science in Context (4 Credits)

Designed for teachers in the RM-MSMSP program. Topics include global climate change, glaciers, coastal geology, volcanism, and their effects on culture. Monuments such as Florissant Fossil Beds, Ice Core, Cave of the Winds and a quarry will be visited. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: Graduate standing. Max hours: 4 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5004 - RM-MSMSP Research Experience for Teachers - Geology Cohort (1-6 Credits)

A five-week research exploration in which RM-MSMSP teachers will raise their level of relevant scientific understanding by engaging in a "hands-on" workshop, transforming what they have learned into new curricular materials that will improve the scientific abilities of their students and hopefully stimulate them to consider a STEM career. Note: credit may not apply toward any CLAS degree. Prereq: Graduate standing. Max hours: 6 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5030 - Environmental Geology (3 Credits)

Applies geological information to interactions between people and the physical environment. Increasing awareness of its importance in our society means that this is an expanding field as companies are required to address the environmental consequences of their actions. Note: students should be enrolled in the MSSES program to take this course. All other students should consult with the instructor and obtain their permission prior to registering for this course. Prereq: Graduate standing. Cross-listed with GEOL 4030 and ENVS 5030. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5111 - Field Methods in Geology (3 Credits)

Introduction to the basic methods of geologic mapping (metamorphic, sedimentary, and igneous rocks), including use of the Brunton compass and Jacob Staff, as well as preparation of measured stratigraphic sections, geologic maps, and geologic cross-sections. Note: this course assumes that students have completed GEOL 1072 or GEOG 1202.

GEOL 3421 is strongly recommended. Prereq: Graduate standing. Cross-listed with GEOL 4111. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5240 - Applied Geomorphology (3 Credits)

Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 and GEOG 3232.

Prereq: Graduate standing. Cross-listed with GEOG 4240, 5240 and GEOL 4240. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5251 - Fluvial Geomorphology (3 Credits)

Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 4251, GEOG 5251 and GEOL 4251.

Restriction: Restricted to Graduate and Graduate Non-Degree students. GEOG 3232 is strongly recommended, though not required. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5270 - Glacial Geomorphology (3 Credits)

Provides an in-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072. Prereq: Graduate standing. Cross-listed with GEOG/GEOL 4270/5270. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5780 - Engineering Geology (4 Credits)

Studies geology as utilized in engineering and environmental practice. Emphasizes a conceptual integration of geologic materials, processes, and rates of change as a basis for successful application of geologic knowledge to environmental planning and engineering design projects. Note: this course assumes that students have completed MATH 2411 and CVEN 2121. Prereq: Graduate standing. Cross-listed with GEOL 4780 and CVEN 5780. Max hours: 4 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

GEOL 5939 - Internship (1-6 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5950 - Master's Thesis (1-8 Credits)

Prereq: Graduate standing. Repeatable. Max hours: 8 Credits.

Grading Basis: Letter Grade with IP

Repeatable. Max Credits: 8.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time.

GEOL 5995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing. Cross-listed with GEOL 4995. Repeatable. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 6840 - Independent Study: GEOL (1-3 Credits)

Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 6950 - Master's Thesis (1-8 Credits)

Prereq: Graduate standing. Repeatable. Max hours: 8 Credits.

Grading Basis: Letter Grade with IP

Repeatable. Max Credits: 8.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time.

GEOL 6960 - Master's Project (1-8 Credits)

Prereq: Graduate standing. Repeatable. Max hours: 8 Credits.

Grading Basis: Letter Grade with IP

Repeatable. Max Credits: 8.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time.

Environmental Sciences (ENVS)

ENVS 1044 - Introduction to Environmental Sciences (3 Credits)

This survey course develops a basic understanding of ecological relationships and environmental systems. Issues such as the effects of human activities on earth's environment, extinction or diversity, greenhouse effect, hazardous or toxic wastes and human population growth are discussed. Students must also take the accompanying laboratory ENVS 1045. No co-credit with ENVS 1042. Prereq or co-req: ENVS 1045. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or co-req: ENVS 1045

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec.

ENVS 1045 - Introduction to Environmental Sciences Laboratory (1 Credit)

Introduces the basic scientific approach through investigations, observations, and experiments in environmental science. Students must also take the accompanying lecture ENVS 1044. No co-credit with ENVS 1042. Prereq or co-req: ENVS 1044. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq or co-req: ENVS 1044

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

ENVS 1342 - Environment, Society and Sustainability (3 Credits)

Overview of perspectives on environmental issues within the context of sustainable development and taking a systems approach. The focus is on social science approaches to explore the human footprint on the earth, environmentalism, scientific uncertainty, policy creation and social change. Note: This course is a prerequisite for GEOG 4680 Urban Sustainability: Perspectives and Practice. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS2.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS2, Soc Behav Sci: Geography.

ENVS 2939 - Internship (3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: sophomore standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

ENVS 3082 - Energy and the Environment (3 Credits)

For students of various backgrounds who wish to increase their understanding of the environmental and technical issues of supplying the energy demands of our society. Alternative energy sources and conservation are explored as solutions to promote a sustainable society. Note: One college-level science course and MATH 1110 or equivalent are strongly recommended as preparation for optimal student success. Cross-listed with PHYS 3082. Max hours: 3 Credits.

Grading Basis: Letter Grade

ENVS 3232 - Weather and Climate (3 Credits)

Introduces the processes and systems that govern both day-to-day weather and longer-term climate variations. Covers instrumentation and weather forecasting techniques. Prereq: GEOG 1202 or ENVS 1042 or (ENVS 1044 and ENVS 1045) Cross-listed with GEOG 3232. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 1202 or ENVS 1042 or (ENVS 1044 and ENVS 1045)

ENVS 3500 - Topics in Environmental Sciences (1-6 Credits)

Note: Topics may vary from one offering to the next. Repeatable.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

ENVS 4210 - Mining and the Environment (3 Credits)

Mineral resources such as metals have played an important role in human civilization. However, the extraction, processing, and use of metals have left a legacy of damage to the environment and human health. These impacts and their mitigation are examined. Note: this course assumes that students have completed one course in college science or mathematics. Max hours: 3 Credits.

Grading Basis: Letter Grade

ENVS 4300 - Children's Geographies (3 Credits)

This seminar is an interdisciplinary investigation of children, childhood and environment in the context of sustainability and equity. Theoretical and methodological perspectives are applied to understand children's interactions with/in different spaces. Cross-listed with GEOG 4300, GEOG 5300 and ENVS 5300. Restriction: Restricted to students with junior standing or higher or with instructor permission. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students at a junior standing or higher

ENVS 4380 - Anthropocene Futures (3 Credits)

We are living in the "Anthropocene"—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity's intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthropocene in Earth's evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a "good" Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene. Cross-listed with GEOG 4380, GEOG 5380, and ENVS 5380. Max hours: 3 Credits.

Grading Basis: Letter Grade

ENVS 4500 - Topics In Environmental Sciences (1-6 Credits)

Note: Topics may vary from one offering to the next. Note: necessary prior coursework varies according to the topic. Students should consult with the instructor. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ENVS 4650 - Environmental Education (3 Credits)

This course links the theory and practice of environmental education to inform curricular development and pedagogical knowledge. Cross-listed with ENVS 5650 and SCED 5650. Max hours: 3 Credits.

Grading Basis: Letter Grade

ENVS 4720 - Climate Change: Causes, Impacts and Solutions (3 Credits)

Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Prereq: GEOG 3232. Cross-listed with GEOG 4720/ GEOG 5720/ ENVS 5720. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 3232

ENVS 4740 - Soil Science and Geography (3 Credits)

Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Cross-listed with GEOG 4740, GEOG 5740, ENVS 5740. Max hours: 3 Credits.

Grading Basis: Letter Grade

ENVS 4750 - Beeography: Geography of Bees (4 Credits)

Beeography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries. Prereq: ENVS 1044 and 1045 or BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) or BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Cross-listed with GEOG 4750, GEOG 5750, and ENVS 5750. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: ENVS 1044 and 1045 or BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) or BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

ENVS 4840 - Independent Study: ENVS (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ENVS 4850 - Understanding and Communicating Field Methods (3 Credits)

Interdisciplinary course that presents a balanced overview of common field methods and how to communicate them effectively to a general audience. Includes hands-on experience with various field methods (e.g., transects, survey design, historical assessment, GIS, etc.) and communication strategies. Note: this course assumes that students have completed an introductory geography or environmental science course. Prereq: Junior standing or higher. Cross-listed with ENVS 5850 and GEOG 4850/5850. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ENVS 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ENVS 4900 - Colloquium (1 Credit)

Engages students and faculty in discussion of current and pertinent world topics, including specific readings, (guest) presentations, and creation of working research papers, among other items. Students and faculty may work in research groups to accomplish specific goals. Prereq: Junior standing or higher. Cross-listed with ENVS 5900, GEOG 4900 and 5900. Repeatable. Max Hours: 4 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 4.

Prereq: junior standing or higher

ENVS 4992 - Advanced Regional Field Study (1-6 Credits)

Directed, hands-on study of concepts involved in understanding geographic regions. Utilizes field observations, field techniques/methods, & data observation, collection, analysis, & interpretation related to the specific region being studied. May include physical as well as cultural phenomena. Note: Instructor permission required. Cross-listed with ENVS 5992, GEOG 4992, GEOG 5992. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ENVS 4995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education.

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Geography, BA

Introduction

Please click [here](#) (p. 404) to see Geography and Environmental Sciences department information.

The Geography program (within the Department of Geography and Environmental Sciences) offers a BA degree that includes a full range of courses in the fundamentals of geography taught mainly by full-time faculty.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click [here](#) (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 33 GEOG, GEOL or ENVS credit hours.
2. Students must complete a minimum of 24 upper division (3000-level and above) GEOG credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 GEOG, GEOL, or ENVS credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Only 3 credits of Travel Study may be counted toward graduation requirements.
2. Undergraduate students may count up to 6 credit hours of independent study or internship (any combination of GEOG 3840 Independent Study: GEOG, GEOG 4840 Independent Study: GEOG, GEOG 4880 Directed Research, or GEOG 3939 Internship) towards elective credit in the major as approved by the undergraduate coordinator. Students may not receive more than 3 credit hours per independent study section. No more than 3 credit hours of independent study may be taken with the same instructor or in the same term.
3. GEOG 3939 Internship: Community/Professional Experience optional, but highly recommended.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		<i>15-16</i>
ENVS 1044 & ENVS 1045	Introduction to Environmental Sciences and Introduction to Environmental Sciences Laboratory	3-4
or GEOG 1202	Introduction to Physical Geography	
GEOG 1102	World Regions Global Context	3
or GEOG 1302	Introduction to Human Geography	
GEOG 2080	Introduction to Mapping and Map Analysis	3
GEOG 3232	Weather and Climate	3
GEOG 3412	Globalization and Regional Development	3

Geography Subfields

Code	Title	Hours
<i>Take at least one course from each of the following subfields</i>		<i>12</i>

Physical Geography

Code	Title	Hours
GEOG 3240	Colorado Climates	3
GEOG 4010	Landscape Biogeochemistry	3
GEOG 4020	Earth Environments and Human Impacts	3
GEOG 4240	Applied Geomorphology	3
GEOG 4251	Fluvial Geomorphology	3
GEOG 4270	Glacial Geomorphology	3
GEOG 4280	Environmental Hydrology	4
GEOG 4305	Water Quality and Resources	3
GEOG 4720	Climate Change: Causes, Impacts and Solutions	3
GEOG 4731	Mountain Biogeography	4
GEOG 4740	Soil Science and Geography	3

Human Geography

Code	Title	Hours
ENVS 1342	Environment, Society and Sustainability	3
GEOG 1602	Urban Studies and Planning	3
GEOG 2202	Hazards to Disasters: Perception and Management	3
GEOG 3401	Geography of Food and Agriculture	3
GEOG 3430	Geography of Tourism	3

GEOG 3440	Ecotourism	3
GEOG 3450	Cultural Heritage and Tourism	3
GEOG 3501	Geography of Health	3
GEOG 4265	Sustainability in Resources Management	3
GEOG 4300	Children's Geographies	3
GEOG 4301	Population, Culture, and Resources	3
GEOG 4335	Contemporary Environmental Issues	3
GEOG 4350	Environment and Society in the American Past	3
GEOG 4420	The Politics of Nature	3
GEOG 4440	Science, Policy and the Environment	3
GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 4470	Sustainable Urban Agriculture Field Study II	3
GEOG 4640	Urban Geography: Denver and the U.S.	3
GEOG 4680	Urban Sustainability: Perspectives and Practice	3
GEOG 4710	Disasters, Climate Change, and Health	3

Regional Geography

Code	Title	Hours
GEOG 1102	World Regions Global Context	3
GEOG 1302	Introduction to Human Geography	3
GEOG 3100	Geography of Colorado	3
GEOG 3120	Geography of Europe	3
GEOG 3130	Central America and the Caribbean	3
GEOG 3140	Geography of South America	3
GEOG 3150	Middle East	3
GEOG 3160	Geography of China	3

Techniques of Geographical Analysis

Code	Title	Hours
GEOG 4080	Introduction to GIS (highly recommended; pre-req to most of the advanced GISci courses)	3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing	3
GEOG 4070	Remote Sensing II: Advanced Remote Sensing	3
GEOG 4081	Cartography and Computer Mapping	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4090	Environmental Modeling with Geographic Information Systems	3
GEOG 4091	Open Source Software for Geospatial Applications	3
GEOG 4092	GIS Programming and Automation	3
GEOG 4095	Deploying GIS Functionality on the Web	3
GEOG 4220	Environmental Impact Assessment	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4235	GIS Applications in the Health Sciences	3
GEOG 4770	Applied Statistics for the Natural Sciences	3

Geography Electives

Code	Title	Hours
<i>Take six additional credits from the following, not already taken.</i>		<i>6</i>
GEOG 1102	World Regions Global Context	3
GEOG 1111	First Year Seminar	3

GEOG 1202	Introduction to Physical Geography	3	GEOG 4380	Anthropocene Futures	3
GEOG 1302	Introduction to Human Geography	3	GEOG 4400	Regional Economic Systems	3
GEOG 1602	Urban Studies and Planning	3	GEOG 4420	The Politics of Nature	3
GEOG 2202	Hazards to Disasters: Perception and Management	3	GEOG 4440	Science, Policy and the Environment	3
GEOG 2939	Internship	1-3	GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 3100	Geography of Colorado	3	GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 3110	Geography of North America	3	GEOG 4470	Sustainable Urban Agriculture Field Study II	3
GEOG 3120	Geography of Europe	3	GEOG 4480	Urban Vegetable CSA: Planning, Production&Distribution	3
GEOG 3130	Central America and the Caribbean	3	GEOG 4625	Urban America: Colonial Times to the Present	3
GEOG 3140	Geography of South America	3	GEOG 4630	Transportation, Land Use, and the Environment	3
GEOG 3150	Middle East	3	GEOG 4640	Urban Geography: Denver and the U.S.	3
GEOG 3160	Geography of China	3	GEOG 4670	Transportation Planning and Policy	3
GEOG 3240	Colorado Climates	3	GEOG 4680	Urban Sustainability: Perspectives and Practice	3
GEOG 3401	Geography of Food and Agriculture	3	GEOG 4700	Synthesis for Interdisciplinary Science	3
GEOG 3430	Geography of Tourism	3	GEOG 4710	Disasters, Climate Change, and Health	3
GEOG 3440	Ecotourism	3	GEOG 4720	Climate Change: Causes, Impacts and Solutions	3
GEOG 3450	Cultural Heritage and Tourism	3	GEOG 4731	Mountain Biogeography	4
GEOG 3501	Geography of Health	3	GEOG 4740	Soil Science and Geography	3
GEOG 3770	Geography and Film	3	GEOG 4750	Beeography: Geography of Bees	4

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 41 credit hours, including a minimum of 27 GEOG, GEOL or ENVS credit hours and 11 credit hours of ancillary coursework.
2. Students must complete a minimum of 24 upper division (3000-level and above) GEOG credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 GEOG, GEOL or ENVS credit hours at CU Denver.

Program Restrictions, Allowances and Recommendations

1. Only 3 credits of Travel Study may be counted toward graduation requirements.

2. Undergraduate students may count up to 6 credit hours of independent study or internship (any combination of GEOG 3840 Independent Study: GEOG, GEOG 4840 Independent Study: GEOG, GEOG 4880 Directed Research, or GEOG 3939 Internship) towards elective credit in the major as approved by the undergraduate coordinator. Students may not receive more than 3 credit hours per independent study section. No more than 3 credit hours of independent study may be taken with the same instructor or in the same term.
3. GEOG 3939 Internship: Community/Professional Experience optional, but highly recommended.

Required Courses

Code	Title	Hours
<i>Take all of the following required courses:</i>		21-22
ENVS 1044 & ENVS 1045	Introduction to Environmental Sciences and Introduction to Environmental Sciences Laboratory	3-4
or GEOG 1202	Introduction to Physical Geography	
GEOG 1102	World Regions Global Context	3
or GEOG 1302	Introduction to Human Geography	
GEOG 2080	Introduction to Mapping and Map Analysis	3
GEOG 3232	Weather and Climate	3
GEOG 3412	Globalization and Regional Development	3
GEOG 4020	Earth Environments and Human Impacts	3
GEOG 4265	Sustainability in Resources Management	3

Quantitative Methods

Code	Title	Hours
<i>Take one of the following</i>		3
ANTH 4050	Quantitative Methods in Anthropology	3
GEOG 4770	Applied Statistics for the Natural Sciences	3
MATH 2830	Introductory Statistics	3
PSYC 2090	Statistics and Research Methods	4

Geo-Spatial Analysis

Code	Title	Hours
<i>Take one of the following</i>		3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing ¹	3
GEOG 4080	Introduction to GIS ²	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4235	GIS Applications in the Health Sciences	3

¹ pre-req for Remote Sensing II

² highly recommended; pre-req to most of the advanced GIS courses

Environmental Science Elective Course

Code	Title	Hours
<i>Take one of the following</i>		3
GEOG 3240	Colorado Climates	3
GEOG 4010	Landscape Biogeochemistry	3
GEOG 4240	Applied Geomorphology	3
GEOG 4251	Fluvial Geomorphology	3

GEOG 4270	Glacial Geomorphology	3
GEOG 4280	Environmental Hydrology	4
GEOG 4305	Water Quality and Resources	3
GEOG 4720	Climate Change: Causes, Impacts and Solutions	3
GEOG 4731	Mountain Biogeography	4
GEOG 4740	Soil Science and Geography	3

Ancillary Courses

Introductory Biology or Chemistry Sequences

Code	Title	Hours
<i>Take one sequence of either general biology (BIOL 2051 and 2061 with labs) or general chemistry (CHEM 2031 and 2061 with labs). If applying to the MS in Environmental Sciences program, students are advised to take both sequences.</i>		8-9
<i>General Biology</i>		
BIOL 2010 & BIOL 2011	Organisms to Ecosystems (Gen Bio) and Organisms to Ecosystems Lab (Gen Bio)	4
BIOL 2020 & BIOL 2021	Molecules to Cells (Gen Bio) and Molecules to Cells Lab (Gen Bio)	4
<i>General Chemistry</i>		
CHEM 2031 & CHEM 2038	General Chemistry I and General Chemistry Laboratory I	4
CHEM 2061 & CHEM 2068	General Chemistry II and General Chemistry Laboratory II	5

Upper-Division Biology or Chemistry

Code	Title	Hours
<i>Take one upper-division Biology or Chemistry course related to the student's Environmental Science interest.</i>		3
<i>Biology</i>		
BIOL 3074	Human Reproductive Biology	3
BIOL 3104	Behavioral Genetics	3
BIOL 3124	Introduction to Molecular Biology	3
BIOL 3225	Human Physiology	4
BIOL 3244	Human Anatomy	5
BIOL 3330	Plant Diversity	3
BIOL 3411	Principles of Ecology	3
BIOL 3445	Introduction to Evolution	3
BIOL 3521	Vertebrate Biology	3
BIOL 3525	Parasitology	3
BIOL 3611	General Cell Biology	3
BIOL 3621	Introduction to Immunology	3
BIOL 3640	Mammalogy	4
BIOL 3654	General Microbiology	5
BIOL 3674	Endocrinology	3
BIOL 3763	Biostatistics	4
BIOL 3804	Developmental Biology	3
BIOL 3832	General Genetics	3
BIOL 4024	Introduction to Biotechnology	3
BIOL 4052	Advanced Ecology	3
BIOL 4053	Disease Ecology	3
BIOL 4055	Virology	3
BIOL 4064	Cell Biology of Disease	3

BIOL 4126	Molecular Genetics	3
BIOL 4128	Topics in Molecular Biology	3
BIOL 4134	Human Genetics	3
BIOL 4144	Medical Microbiology	3
BIOL 4154	Conservation Biology	3
BIOL 4165	Neurobiology	3
BIOL 4225	Genomics and Bioinformatics	3
BIOL 4250	Mechanisms of Animal Behavior	3
BIOL 4335	Plant Science	4
BIOL 4345	Flora of Colorado	4
BIOL 4415	Microbial Ecology	3
BIOL 4425	Biogeography	3
BIOL 4430	Introduction to Spatial Ecology	3
BIOL 4460	Environmental Toxicology	3
BIOL 4464	Exercise Physiology	3
BIOL 4475	Mechanisms of Human Pathology	3
BIOL 4494	Population and Evolutionary Genetics	3
BIOL 4550	Cell Signaling	3
BIOL 4622	Topics in Immunology	3
BIOL 4634	Biology of Cancer	3
BIOL 4815	Structural Biology of Neurodegenerative Diseases	3
BIOL 4825	Biochemistry of Metabolic Disease	3
BIOL 4835	Biochemistry of Gene Regulation and Cancer	3
BIOL 4974	Advanced Evolution	3
<i>Chemistry</i>		
CHEM 3011	Inorganic Chemistry	3
CHEM 3111	Analytical Chemistry	3
CHEM 3411	Organic Chemistry I	4
CHEM 3421	Organic Chemistry II	4
CHEM 3481	Majors Organic Chemistry I	4
CHEM 3491	Majors Organic Chemistry II	4
CHEM 3810	Biochemistry	4
CHEM 4010	Advanced Inorganic Chemistry	3
CHEM 4110	Advanced Analytical Chemistry	3
CHEM 4121	Instrumental Analysis	3
CHEM 4221	Practical Applications of Spectroscopy	3
CHEM 4310	Advanced Organic Chemistry	3
CHEM 4421	Cannabis Chemistry	3
CHEM 4500	Foundations of Physical Chemistry	3
CHEM 4510	Computational Chemistry	3
CHEM 4511	Physical Chemistry: Thermodynamics and Kinetics	3
CHEM 4521	Physical Chemistry: Quantum and Spectroscopy	3
CHEM 4530	Advanced Physical Chemistry	3
CHEM 4600	Advanced Topics in Chemistry	3
CHEM 4700	Environmental Chemistry	3
CHEM 4810	General Biochemistry I	3
CHEM 4815	Structural Biology of Neurodegenerative Diseases	3
CHEM 4820	General Biochemistry II	3
CHEM 4825	Biochemistry of Metabolic Disease	3
CHEM 4835	Biochemistry of Gene Regulation and Cancer	3
CHEM 4845	Molecular Modeling and Drug Design	3

CHEM 4860 Bioinorganic Chemistry: Bioinorganic compounds in medicine

3

Geography - Urban Studies and Planning, BA

Introduction

Please click here (p. 404) to see Geography and Environmental Sciences department information.

The Geography program (within the Department of Geography and Environmental Sciences) offers a BA degree that includes a full range of courses in the fundamentals of geography taught mainly by full-time faculty.

Geography and urban and regional planning share a common concern for the spatial configuration of the places that we inhabit and enjoy. In recognition of this close association, there is currently an articulation agreement between the Department of Geography and Environmental Sciences and the College of Architecture and Planning that provides students with a mechanism for acceleration through the Master of Urban and Regional Planning (MURP) degree program, if accepted into that graduate program. Those students completing the requirements for an undergraduate planning minor may also be eligible to pursue an accelerated MURP degree and if interested in this option should work closely with the option advisor in the selection of coursework. (Please see the Graduate Catalog for more information on this graduate program.)

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 39 GEOG, GEOL or ENVS credit hours.
2. Students must complete a minimum of 24 upper division (3000-level and above) GEOG credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 GEOG, GEOL or ENVS credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Only 3 credits of Travel Study may be counted toward graduation requirements.
2. Undergraduate students may count up to 6 credit hours of independent study or internship (any combination of GEOG 3840 Independent Study: GEOG, GEOG 4840 Independent Study: GEOG, GEOG 4880 Directed Research, or GEOG 3939 Internship) towards elective credit in the major as approved by the undergraduate coordinator. Students may not receive more than 3 credit hours per independent study section. No more than 3 credit hours of independent study may be taken with the same instructor or in the same term.
3. This option has an articulation agreement with the Masters in Urban and Regional Planning. If interested, students should check with the option advisor early in the program.
4. GEOG 3939 Internship: Community/Professional Experience optional, but highly recommended.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		24-25
ENVS 1044 & ENVS 1045	Introduction to Environmental Sciences and Introduction to Environmental Sciences Laboratory	3-4
or GEOG 1202	Introduction to Physical Geography	
GEOG 1102	World Regions Global Context	3
or GEOG 1302	Introduction to Human Geography	
GEOG 1602	Urban Studies and Planning	3
GEOG 2080	Introduction to Mapping and Map Analysis	3
GEOG 3232	Weather and Climate	3
GEOG 3412	Globalization and Regional Development	3
GEOG 4640	Urban Geography: Denver and the U.S.	3
GEOG 4680	Urban Sustainability: Perspectives and Practice	3

Urban Planning Electives

Code	Title	Hours
<i>Take four of the following Urban Planning courses:</i>		12
GEOG 4000/URPL 5010	Planning Methods	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4265	Sustainability in Resources Management	3

GEOG 4400/ URPL 6600	Regional Economic Systems	3
GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 4630/ URPL 6550	Transportation, Land Use, and the Environment	3
GEOG 4670/ URPL 6555	Transportation Planning and Policy	3
GEOG 4710	Disasters, Climate Change, and Health	3
URPL 5000	Planning History and Theory	3

Techniques for Urban Analysis

Code	Title	Hours
<i>Take one of the following</i>		3
GEOG 4080	Introduction to GIS ¹	3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing ²	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4235	GIS Applications in the Health Sciences	3

¹ pre-req to most of the advanced GISci courses

² pre-req for Remote Sensing II

Environmental Sciences Minor

Introduction

Please click here (p. 404) to see Geography and Environmental Sciences department information.

The environmental sciences minor offers students exposure to the breadth of environmental issues. Students emphasize the natural/physical sciences, and may strategically incorporate the social sciences and humanities.

These program and degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 17 credit hours from the approved courses below.
- Students must complete a minimum of 9 upper-division (3000-level and above) credit hours in the minor chosen from the approved course list below.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete a minimum of 9 credit hours with CU Denver faculty from the list of courses below.

Program Restrictions, Allowances and Recommendations

- Many of the upper-division courses have prerequisites; the student must check the catalog for prerequisite requirements for these courses.
- The four upper-division elective courses for the Environmental Sciences minor cannot be from the student's major discipline, even if the particular course is not counted toward the major.
- Undergraduate students may count up to 3 credit hours of independent study (any combination of ENVS 4840 Independent Study: ENVS and ENVS 4880 Directed Research) towards elective credit in the minor as approved by the undergraduate coordinator.
- The lecture/laboratory sequence can be part of the requirements for the major, but not in the student's major department (i.e., a biology major cannot use the general biology sequence, but could use the general chemistry sequence, which is also required for the biology major).

Lecture/Laboratory Courses

Code	Title	Hours
<i>Take two of the following lecture/laboratory combinations (see Program 8-10 Requirement note 4, above):</i>		
BIOL 2020 & BIOL 2021	Molecules to Cells (Gen Bio) and Molecules to Cells Lab (Gen Bio)	4
BIOL 2010 & BIOL 2011	Organisms to Ecosystems (Gen Bio) and Organisms to Ecosystems Lab (Gen Bio)	4
CHEM 2031 & CHEM 2038	General Chemistry I and General Chemistry Laboratory I	4
CHEM 2061 & CHEM 2068	General Chemistry II and General Chemistry Laboratory II	5
ENVS 1044 & ENVS 1045	Introduction to Environmental Sciences and Introduction to Environmental Sciences Laboratory	4
GEOL 1073 & GEOL 1074	Physical Geology: Surface Processes and Physical Geology: Surface Processes Laboratory	4

GEOL 1083 & GEOL 1084	Physical Geology: Internal Processes and Physical Geology: Internal Processes Laboratory	4
PHYS 2010 & PHYS 2321	College Physics I and Intro Experimental Phys Lab I	5
PHYS 2020 & PHYS 2341	College Physics II and Intro Experimental Phys Lab II	5

Additional Courses

Code	Title	Hours
<i>Take three of the following courses outside of the student's major discipline (see Program Requirement note 2, above):</i>		9-10
BIOL 3411	Principles of Ecology	3
CHEM 4700	Environmental Chemistry	3
ECON 4540	Environmental Economics	3
ENVS 4720 or GEOG 4720	Climate Change: Causes, Impacts and Solutions	3
GEOG 3232	Weather and Climate	3
GEOG 3240	Colorado Climates	3
GEOG 4020	Earth Environments and Human Impacts	3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing	3
GEOG 4090	Environmental Modeling with Geographic Information Systems	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4240	Applied Geomorphology	3
GEOG 4265	Sustainability in Resources Management	3
GEOG 4270	Glacial Geomorphology	3
GEOG 4280	Environmental Hydrology	4
GEOG 4335	Contemporary Environmental Issues	3
GEOG 4350	Environment and Society in the American Past	3
GEOG 4420	The Politics of Nature	3
GEOG 4440	Science, Policy and the Environment	3
GEOG 4731	Mountain Biogeography	4
GEOL 4030	Environmental Geology	3
PSCI 4354	Environmental Politics	3

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/ges/programs/minors/minor-environmental-sciences/>).

Geography Minor

Introduction

Please click here (p. 404) to see Geography and Environmental Sciences department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus or online program.

Declaring This Minor

- Please see your advisor.
- Please click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 GEOG credit hours.
2. Students must complete a minimum of 9 upper-division (3000- level and above) GEOG credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 GEOG credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. The minor is flexible and does not have core requirements. A student can elect to take any GEOG courses as long as they are not being used to fulfill requirements in another degree program in the department.
2. Undergraduate students may count up to 3 credit hours of independent study (GEOG 3840 Independent Study: GEOG, GEOG 4840 Independent Study: GEOG, GEOG 4880 Directed Research/GEOG 3840 Independent Study: GEOL, GEOG 4840 Independent Study: GEOG, GEOG 4880 Directed Research) towards elective credit in the minor as approved by the undergraduate advisor.
3. Students may not double-count courses for the Geography minor and another degree program in the department, the Sustainability Minor, or the GISci Certificate.

Geography Course Options

Code	Title	Hours
<i>Take any 15 credit hours of GEOG courses as long as they are not being used to fulfill requirements in another degree program in the department.</i>		15
<i>A minimum of 9 credit hours must be 3000 or 4000 level.</i>		
GEOG 1102	World Regions Global Context	3
GEOG 1111	First Year Seminar	3
GEOG 1202	Introduction to Physical Geography	3
GEOG 1302	Introduction to Human Geography	3
GEOG 1602	Urban Studies and Planning	3
GEOG 2080	Introduction to Mapping and Map Analysis	3
GEOG 2202	Hazards to Disasters: Perception and Management	3

GEOG 3100	Geography of Colorado	3	GEOG 4440	Science, Policy and the Environment	3
GEOG 3110	Geography of North America	3	GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 3120	Geography of Europe	3	GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 3130	Central America and the Caribbean	3	GEOG 4470	Sustainable Urban Agriculture Field Study II	3

Urban and Regional Planning Minor Introduction

Please click here (p. 404) to see Geography and Environmental Sciences Department information.

The urban and regional planning minor in the Department of Geography and Environmental Sciences provides non-geography undergraduate students the opportunity to pursue studies in the professional field of planning. Geography majors can pursue the urban studies option, so this minor would not be available to these majors.

Geography and urban and regional planning share a common concern for the spatial configuration of the places that we inhabit and enjoy. In recognition of this close association, there is currently an articulation agreement between the Department of Geography and Environmental Sciences and the College of Architecture and Planning that provides students with a mechanism for acceleration through the Master of Urban and Regional Planning (MURP) degree program, if accepted into that graduate program. Those students completing the requirements for an undergraduate planning minor may also be eligible to pursue an accelerated MURP degree and if interested in this option should work closely with the minor advisor in the selection of coursework. (Please see the Graduate Catalog for more information on this graduate program.)

All core courses are offered on a yearly basis.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Please click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 GEOG credit hours.
2. Students must complete a minimum of 12 GEOG upper-division (3000- level and above) credit hours in the minor.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 GEOG credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Although the three core courses may be taken in any order, it is advisable to begin with GEOG 1602 Urban Studies and Planning, since this course familiarize students with many key concepts used in other classes.
2. All undergraduate students, except geography majors, are eligible for this minor.
3. Students interested in applying for the articulated MURP degree program must achieve a grade of B (3.0) or higher in required courses.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		9
GEOG 1602	Urban Studies and Planning	3
GEOG 4640	Urban Geography: Denver and the U.S.	3
GEOG 4680	Urban Sustainability: Perspectives and Practice	3

Elective Courses

Code	Title	Hours
<i>Take two of the following</i>		6
GEOG 4000/ URPL 5010	Planning Methods	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4235	GIS Applications in the Health Sciences	3
GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 4710	Disasters, Climate Change, and Health	3
URPL 5000	Planning History and Theory	3

Geographic Information Science Undergraduate Certificate

Introduction

Please click here (p. 404) to see Geography and Environmental Sciences department information.

Certificate Advisor: Matt Cross

Email: matthew.cross@ucdenver.edu

The Geographic Information Science (GISci) Certificate in the Department of Geography and Environmental Sciences is designed to provide CU Denver undergraduates and graduates, as well as non-degree seeking students interested in professional development, with proficiency in the application of spatial thinking, geographic information science, and geo-technologies in the social and physical sciences, spanning the natural, built and human environments and emphasizing human-environment interconnections. The GISci Certificate core establishes a broad foundation in spatial technologies and methodologies, including geographic information systems, remote sensing, cartography, spatial extensions to database management systems, and statistics. From this base, students can delve into various specialization areas depending on their interests.

Upon successful completion of the certificate, students will be able to:

- articulate and apply basic theoretical underpinnings of spatial analytical principles, methodologies, and techniques;
- effectively utilize at least three different types of software used for spatial analysis;
- apply geospatial thinking, geographic information science, and geo-technologies appropriately; and
- analyze diverse real-world problems that have a spatial dimension and develop alternative solutions to them.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with

their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Certificate

- CU Denver undergraduate students in any discipline or major may be admitted to the program.
- Of the four core requirements, only the statistics class has prerequisites, including algebra and introductory calculus. Because of the technical nature of the GIS and remote sensing course work, however, some mathematical experience is desirable prior to beginning the program.
- Students may begin the program in any semester or during the summer by making arrangements with the GISci certificate coordinator, and completing and signing the Application for GISci Certificate. This application is required to be formally registered in the GISci Certificate program, and must be completed no later than the semester prior to the scheduled completion of the certificate.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies.

Certificate Requirements

1. Students must complete a minimum of 18 GEOG credit hours from the approved courses below.
2. Students must complete a minimum of 15 upper division (3000-level and above) GEOG credit hours.
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all 18 credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. The certificate will be awarded when the student graduates with the bachelor's degree.
2. To obtain the certificate, students must complete five core courses and one elective course from the approved list below, totaling 18 hours.
3. Although the five core courses may be taken in any order, it is advisable to begin with GEOG 2080 Introduction to Mapping and Map Analysis followed by GEOG 4080 Introduction to GIS, since these courses familiarize students with many key concepts used in the other classes.
4. All core courses are offered on a yearly basis. Any alterations to the program **must** be approved by the GISci Coordinator. Any changes to the standard curriculum program must be approved in writing by the GISci Certificate Coordinator and filed with the GISci Certificate Application Form.

5. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the GISci Certificate Program may be used towards one other degree requirement.
6. Please pay attention to prerequisites for specific courses.

Required Geographic Information Science Courses

Code	Title	Hours
Take all of the following		15
GEOG 2080	Introduction to Mapping and Map Analysis	3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing	3
GEOG 4080	Introduction to GIS	3
GEOG 4081	Cartography and Computer Mapping	3
Statistics course approved by GIS Certificate Coordinator.		3

Elective

Code	Title	Hours
Take one of the following		3
CVEN 5382	Geospatial Data Development	3
CVEN 5385	GIS Relational Database Systems (or an elective approved by the GISci Certificate Coordinator)	3
GEOG 4070	Remote Sensing II: Advanced Remote Sensing	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4090	Environmental Modeling with Geographic Information Systems	3
GEOG 4091	Open Source Software for Geospatial Applications	3
GEOG 4092	GIS Programming and Automation	3
GEOG 4095	Deploying GIS Functionality on the Web	3
GEOG 4235	GIS Applications in the Health Sciences	3

- Or an elective course approved by GIS Certificate Coordinator.¹
- ¹ Although only one elective is required to complete the Undergraduate GISci Certificate, it is strongly recommended that additional elective courses are taken to broaden the experience and knowledge of the student in GIS analysis and applications. A three-credit hour internship with a geospatial faculty sponsor is highly recommended.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/ges/programs/certificates/gis-certificate/#learning_outcomes-280).

Sustainable Urban Agriculture Undergraduate Certificate Introduction

Please click here (p. 404) to see Geography and Environmental Sciences department information.

Certificate Advisor: Amanda Weaver
Email: amanda.weaver@ucdenver.edu

The goal of the certificate program is to provide GES students advanced training in sustainable urban agriculture through the integration of university classroom study and field-based practicum conducted at the department's field research station. Requirements for the certificate are therefore divided between on-campus courses and field courses.

Upon successful completion of the certificate, students will:

- Have knowledge of the history of urban farming
- Understand the modern agro-food system
- Participate in sustainable urban agricultural practices

Program Delivery

- This is both an on-campus and field-based program.

Declaring This Certificate

- Please see the certificate advisor.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies.

Certificate Requirements

1. Students must complete a minimum of 12 GEOG credit hours.
2. Students must complete all 12 GEOG credit hours at the upper division level (3000-level and above).
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all 12 GEOG credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. The certificate will be awarded when the student graduates with the bachelor's degree.
2. All core courses are offered on a yearly basis. Any alterations to the program **must** be approved by the certificate advisor.
3. Courses taken within the Sustainable Urban Agriculture Certificate Program may be used towards one other degree requirement.
4. Any changes to the standard curriculum program must be approved in writing by the certificate advisor.
5. Because a certificate is a CU Denver certification of a students' specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU

Denver. Only in rare circumstances will exceptions be made regarding this policy

6. Please pay close attention to prerequisites for specific courses.

Required Courses

Code	Title	Hours
<i>Take the following</i>		9
GEOG 4450	Urban Food and Agriculture: Perspectives and Research	3
GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 4470	Sustainable Urban Agriculture Field Study II	3

Electives

Code	Title	Hours
<i>Take one of the following</i>		3
GEOG 4060	Remote Sensing I: Introduction to Environmental Remote Sensing	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4265	Sustainability in Resources Management	3
GEOG 4335	Contemporary Environmental Issues	3
GEOG 4640	Urban Geography: Denver and the U.S.	3
GEOG 4680	Urban Sustainability: Perspectives and Practice	3
GEOG 3939	Internship ¹	3

- ¹ A sustainable agriculture internship with a local food/urban agriculture community organization.

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/ges/programs/certificates/sustainable-urban-agriculture-certificate/>).

Health and Behavioral Sciences

Chair: Sara Yeatman

Program in Health and Behavioral Sciences

Campus Box 188, P.O. Box 173364

Denver, CO 80217-3364

Overview

Public health is working to protect the environment, identifying sources of illness in population groups, controlling disease outbreaks, evaluating the economic impacts of changing demographics, developing interventions to promote healthy behavior, and producing health policy legislation. Public health draws from a broad array of disciplines, such as the social and behavioral sciences, medicine, nursing, pharmacy, physical therapy, business, economics, statistics, epidemiology, law and biology, and each provides unique insights for the diverse set of activities involved in public health practice.

Undergraduate Information

In response to the tremendous career and research opportunities in public health, the Department of Health and Behavioral Sciences in the College of Liberal Arts and Sciences (CLAS), in collaboration with the Colorado School of Public Health (CSPH), created an undergraduate major in public health. Most core classes for the public health major are team taught with one faculty member from the downtown campus (CLAS) and the other from the Anschutz campus (CSPH).

This degree is designed to accommodate as many student interests as possible. At CU Denver, we are committed to helping students develop their own individualized educational path; we strive to serve the needs of both the student who wishes to specialize in communication strategies for effective public health education campaigns, as well as the student who wants to hasten the translation of the latest bench science technologies into public health practice. To this end, the major consists of both BA and BS tracks.

Two options are available for the undergraduate major in public health: Bachelor of Arts (BA) or Bachelor of Science (BS). After completion of the program, students will have a broad background to serve as the foundation for a variety of career paths, such as immediate entry into public health positions, background training for a professional school (including but not limited to medical, dental, nursing, pharmacy or law school), or the pursuit of an advanced degree such as a master's or Ph.D. in a range of social, behavioral or natural sciences.

Graduate Information

Please go to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/health-behavioral-sciences/>) catalog to read about our graduate programs.

Programs

- Public Health, BA (p. 436)
- Public Health, BS (p. 437)
- Public Health, 5 year BA or BS/ Master in Public Health, MPH (p. 440)
- Public Health Demography Minor (p. 441)
- Public Health Minor (p. 441)

Faculty

Professors:

Karen Spencer, PhD, Indiana University
David P. Tracer, PhD, University of Michigan

Associate Professors:

jimi adams, PhD, Ohio State University
Patrick Krueger, PhD, University of Colorado
Meng Li, PhD, Rutgers University
Ronica Rooks, PhD, University of Maryland College Park
Sara Yeatman, PhD, University of Texas Austin

Assistant Professors:

Jennifer Boylan, PhD, University of Wisconsin-Madison

Visiting Assistant Professors:

Jorge Ivan Ramirez, PhD, Michigan State University

Professors Emerita:

Debbi Main, PhD, University of Colorado

Research and Clinical Faculty:

Hyeyoung Oh Nelson, PhD, University of California Los Angeles
Jean Scandlyn, PhD, Columbia University

The mission of the health and behavioral sciences (HBSC) program is to apply social science theory and innovative research methods to critically address emerging issues in health. The program trains students to confront issues affecting the health of communities and populations by focusing on social determinants of health and diseases. These determinants can be more influential on population health than the health care system.

The program's overarching framework integrates social, cultural and biomedical perspectives to understand the underpinnings of health and the conditions essential for its creation and maintenance. Students and faculty conduct interdisciplinary research on topics including emerging diseases, maternal/child health, substance abuse, health disparities and global health. Graduates are innovative researchers, effective educators and leaders directly engaged in the practice of public health.

Health & Behavioral Sciences (HBSC)

HBSC 5999 - Topics in the Health and Behavioral Sciences (1-3 Credits)
 An in-depth study of selected social science perspectives/theories and their applications to population health. Topics will vary from semester to semester, with a particular emphasis on current, salient population health problems. Prereq: Graduate standing or permission of instructor. Cross-listed with PBHL 4999. Max hours: 9 Credits.

Grading Basis: Letter Grade
 Repeatable. Max Credits: 9.

HBSC 6320 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)

Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HBSC 7320, ANTH 6041. Max hours: 3 Credits.

Grading Basis: Letter Grade
 Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6500 - Women and War (3 Credits)

Appraise women's experiences and selected issues related to war-time service, including women's roles during war, gender-specific policies, military sexual trauma, reintegration, and effects of deployment on mental and physical health. Restriction: Restricted to Graduate and Graduate Non-Degree major. Term offered: summer. Max hours: 3 Credits. Grading Basis: Letter Grade
 Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6840 - Independent Study: HBSC (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade
 Repeatable. Max Credits: 9.

HBSC 7001 - Colloquium Series in the Health and Behavioral Sciences (1 Credit)

Features presentations by core, affiliated and adjunct faculty; alumni; distinguished guest speakers; and students nearing completion of the dissertation. The goal is to expose students to cutting-edge applications of health-related social and biological science research and to introduce students to the research interests of core and affiliated HBS faculty, advanced students, and alumni who they might otherwise not have the opportunity to meet. Note: Required for ALL first and second year students but open to all graduate students and faculty. May be taken up to three times for credit. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Repeatable. Max Hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 3.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7011 - Theoretical Perspectives (3 Credits)

Covers the following subject areas: philosophy and epistemology of the social and behavioral sciences as they are applied in public health and health care contexts; historical perspectives of Western biomedicine and public health; crosscultural perspectives on health systems; class, ethnic, and gender correlates of health and sickness; critical perspectives on Western health and health care models; and the structure and organization of health care systems. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

Typically Offered: Fall.

HBSC 7031 - Human Ecology and Environmental Adaptation (3 Credits)

Focuses on the interplay of biology, environment, culture, and behavior in the causes and exacerbation of disease. The course includes the following topics: health in environmental and evolutionary contexts; models of causation in biomedicine and other medical systems; individual, community, and population manifestations of health and disease; and biocultural interaction in disease process. Specific case studies drawn from contemporary health problems are used to illustrate in detail the nature of these processes. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

Typically Offered: Fall.

HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I (3 Credits)

This course has four principal aims: (1) to provide students a working knowledge of research methodology as applied to field research efforts; (2) to enable students to apply research methodologies to areas of particular interest in the health and behavioral sciences; (3) to expose students to data manipulation techniques common to social science quantitative research; and (4) to teach basic research proposal development techniques. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

Typically Offered: Spring.

HBSC 7051 - Qualitative Research Design and Methods (3 Credits)

Much of the data collected in the social sciences is interview- and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences (3 Credits)

This course introduces students to multivariate regression methods - a set of statistical models that relate an outcome variable to a set of predictor variables. The course emphasizes understanding and applying regression models to address social science research questions. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

HBSC 7071 - Social and Behavioral Perspectives in Population Health (3 Credits)

Population health is an interdisciplinary or multidisciplinary field that focuses on the social and behavioral determinants of health. This course helps students to navigate the assumptions and perspectives of the various disciplines that do population health research. To achieve this, the course draws on literatures from diverse disciplines on topics including the social, economic, environmental, behavioral, political, and cultural factors that shape health, disease, and healthcare access and utilization. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

Typically Offered: Fall.

HBSC 7111 - Applications of the Health and Behavioral Sciences (3 Credits)

The purpose of this course is to help students select and refine a dissertation research topic. Each student, through presentations and discussions of their work, will receive feedback from fellow students and the instructor, and will have an opportunity to improve written and oral presentation skills. Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher or permission of the instructor. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher.

Typically Offered: Spring.

HBSC 7120 - Human Reproductive Technologies and the Law (3 Credits)

Examines the legal, ethical, and social issues that have come about with advances in assisted reproductive technologies (ART). Illustrates how lawyers, judges, bioethicists, legislators, and policy makers have addressed these issues. Prereq: Graduate standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

HBSC 7121 - Dissertation Proposal and Research (6-8 Credits)

Restriction: Restricted to Graduate Level Students admitted into the Health and Behavioral Sciences program. Repeatable. Max hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

Additional Information: Report as Full Time.

HBSC 7161 - Quantitative Methods in Health&Behavioral Sciences II (3 Credits)

This course introduces students to advanced multivariate regression methods (e.g., generalized linear models, survival models, hierarchical models). This course emphasizes the application of advanced regression methods to test social and behavioral science theories related to health.

Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

HBSC 7210 - Human Health and Environmental Pollution (3 Credits)

Examines the roles of technology and society in the etiology and control/prevention of adverse health outcomes associated with releases of toxic substances. Examples come from experience and the literature on occupational cancer and reproductive hazards, occupational and environmental regulation of hazardous wastes, air, and water pollution.

Restriction: Restricted to Graduate and Graduate Non-Degree majors.

Cross-listed with ENVS 6210. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7235 - GIS Applications in the Health Sciences (3 Credits)

Examines how GIS is used throughout the health care industry and public health. Covers environmental health, disease surveillance, and health services research. Students critically review current literature and gain hands-on experience with GIS software. Prereq: GEOG 4080 or GEOG 5080, public health background, or consent of instructor. Cross-listed with GEOG 4235, GEOG 5235. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: GEOG 4080 or GEOG 5080

HBSC 7310 - Environmental Epidemiology (3 Credits)

Provides a basic understanding of the methods used to study the effects on human health of exposures to physical, chemical, or biological factors in the external environment. The course explains the use of epidemiologic methods through a problem solving approach to investigating environmental health case studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. A basic statistics class is strongly recommended for optimal success. Cross-listed with ENVS 6230. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7320 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)

Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights.

Restriction: Restricted to Graduate and Graduate Non-Degree majors.

Cross-listed with HBSC 6320, ANTH 6041. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7340 - Risk Assessment (3 Credits)

The process of determining the likelihood and extent of harm that may result from an activity or event. Topics covered are: hazard identification, dose-response evaluation, exposure assessment, and risk characterization. The subjects of risk management, risk perception, and risk communication are also discussed. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with CVEN 5494, ENVS 6200. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7360 - Toxicology (3 Credits)

Introduces the field of toxicology. Emphasizes the mechanisms by which chemicals produce toxic effects and the methods for assessing toxicity. Note: Designed for students in the environmental sciences and occupational health fields. Restriction: Restricted to Graduate and Graduate Non-Degree majors. One year of college chemistry and one year of college biology are strongly recommended for optimal success. Cross-listed with ENVS 6220. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7400 - Topics in the Health and Behavioral Sciences (3 Credits)

A flexible seminar format for dealing with topics of special interest in the health and behavioral sciences. Topics to be considered vary from semester to semester. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 8990 - Doctoral Dissertation (1-10 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Prereq: Admission to the Health and Behavioral Sciences program. Term offered: fall, spring, summer. Repeatable. Max hours: 30 Credits.

Grading Basis: Letter Grade with IP

Repeatable. Max Credits: 30.

Additional Information: Report as Full Time.

Public Health (PBHL)

PBHL 1001 - Race, Gender, Class, & Health (3 Credits)

Course focuses on the principles, tools, and population approach of social epidemiology as it relates health to race, gender, and class.

Contemporary topics in public health will be used as case studies to illuminate principles and tools both in lecture and in recitation sections.

Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

PBHL 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

PBHL 2001 - Introduction to Public Health (4 Credits)

An overview of the discipline and practice of public health. Includes the history of the field, its population perspective, emphasis on prevention, tools and techniques. General principles of the field are illustrated through contemporary public health case studies. Term offered: fall, spring. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul; Denver Core Requirement, Social Sciences.

PBHL 2052 - Global Demography and Health (3 Credits)

This course examines current issues in population growth, fertility, mortality and migration throughout the globe; introduces basic demographic tools; encourages critical thinking about the causes and consequences of population change. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PBHL 2990 - Topics in Public Health (3 Credits)

An in-depth study of selected social science perspectives/theories and their applications to population health. Topics will vary from semester to semester, with a particular emphasis on current, salient population health problems. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PBHL 3001 - Introduction to Epidemiology (4 Credits)

Introduces the basic concepts of public health and epidemiology, including assessment of disease in the community, the study of causation and association of disease with lifestyle and environmental risk factors, as well as related special topics. We recommend coursework in college algebra or higher as preparation for this class. We have found that students who take this class before completing their math requirements are at a distinct disadvantage in this course, which is math-intensive. Therefore a grade of C or higher in MATH 1110 or equivalent is strongly recommended. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

PBHL 3002 - Ethnicity, Health and Social Justice (3 Credits)

Surveys core issues contributing to racial or ethnic minority differences in health status. Historical and contemporary U.S. health and social policy, including the areas of environmental health, sexual and reproductive health, children and immigrants, are examined. Cross-listed with ETST 3002. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3010 - Human Sexuality and Public Health (3 Credits)

The focus of this course is on human sexuality using a public health lens, examining a number of sexual health issues and their relationship to individual, familial, organizational, and social-level influences. Additionally, we will focus on identifying both primary prevention and intervention approaches to reducing sexual risk factors and increasing healthy behaviors. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3020 - Introduction to Environmental Health (3 Credits)

This introductory survey course focuses on the human health implications of environmental exposures. Topics include pathways of exposure, toxicology, risk assessment, regulations, and policy development. Additionally, environmental equity, ethics, globalization, international perspectives, climate change, sustainability, and activism are considered. Prereq: PBHL 2000 or 2001 with a C- or higher. Note: Students will not earn credit for this course if they have already earned credit for PBHL 2020. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PBHL 2000 or PBHL 2001 with a C- or higher

PBHL 3021 - Fundamentals of Health Promotion (3 Credits)

Provides an overview of the field of health promotion, including an introduction to key theories and methods, as well as exposure to the breadth of programs and diversity of settings through several case studies. Includes attention to health behaviors as contributors to current public health problems and community-based approaches to health promotion in addressing them. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3030 - Health Policy (3 Credits)

Health policies may have a profound effect on quality of life. Accessibility, cost, quality of health care; safety of food, water, and environment; the right to make decisions about our health; these issues are vitally tied to health policies. This course provides a framework for understanding the social, political and economic dimensions of health policy. Prereq: PBHL 2000 or 2001 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PBHL 2000 or PBHL 2001 with a C- or higher

PBHL 3031 - Health, Human Biology and Behavior (3 Credits)

Introduces the multi-factorial nature of human health and well-being. Considers the influences of biology (genetics), behavior, environment, culture and social determinants, and health policy on the nature of disease and health problems from an integrated perspective. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3041 - Health, Culture and Society (3 Credits)

Examines health and illness for individuals, families, and societies from multiple international perspectives, focused on topics such as traditional vs. Western medicine, characteristics of healers and therapeutic relationships, and stigmatized segments of society and their health status. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3050 - Decision Making (3 Credits)

This course discusses current research on decision making/behavioral economics, as well as its application to individual well-being and public policy. You will gain insights on how and why people can be irrational in their daily decisions. Cross-listed with ECON 3050 and PSYC 3050. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3051 - Mental Illness and Society (3 Credits)

This course takes a social and public health—as opposed to medical, biological or psychiatric—approach to understanding mental disorder and society. Course addresses historical definitions of mental illness, social patterns of mental disorder and treatment and experience of mental illness patients, focusing on the U.S. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3070 - Perspectives in Global Health (3 Credits)

Avian flu, disaster relief, aging populations and primary health care are key issues in a world where diseases cross borders rapidly, but health care resources may not. Examines improvements in global health, growing inequalities and social justice in health. Prereq: PBHL 2000 or 2001 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade

Prereq: PBHL 2000 or PBHL 2001 with a C- or higher

PBHL 3071 - Global Topics In Sexual and Reproductive Health (3 Credits)

Surveys trends and determinants of sexual and reproductive health around the globe and in the United States. Examines the social and behavioral determinants of sexual and reproductive health and the influence of policy. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3081 - Health in the City: Urban Health (3 Credits)

This course introduces students to urban health and the various factors of the physical, social and health environments that affect well-being and vulnerability of communities and neighborhoods in cities. Note: This course will include a weekly collaborative assignment, a high-impact educational practice, that foster student engagement with active and problem-based learning. Although not required, it would be helpful for students to have completed a 2000-level course from the undergraduate program in Public Health. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3091 - Live Long and Prosper: Public Health & Aging (3 Credits)

This course provides a broad overview of the interdisciplinary field of public health aging, ranging from individual attitudes and beliefs about aging to policies that aim to maximize health and well-being among older adults. A key focus is on the diversity that exists among older adults and the promotion of healthy aging for all by examining changes to social, behavioral, and biological functioning with age. Note: Although not required, it would be helpful for students to have taken a 2000-level course in public health. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3200 - Human Migration: Nomads, Sojourners, and Settlers (3 Credits)

Explores the relationship between human migration, voluntary and forced, and social organization and culture in the modern world. Case studies include pastoralists, foragers, refugees, immigrants, sojourners, and settlers and their impact on health, culture, identity, ethnicity, tradition and nationality. Cross-listed with ANTH 3200. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3440 - Medical Sociology (3 Credits)

This course covers key issues in population health and emphasizes how sociological perspectives both challenge and augment biomedical perspectives on health and health care. We also discuss the social causes and consequences of race/ethnic, sex, and socioeconomic disparities in health. Cross-listed with SOCY 3440. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 3939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

PBHL 3999 - Special Topics in Public Health (1-4 Credits)

Explores topics in public health. Topics will vary from semester to semester, with a particular emphasis on current topics. Prereq: Junior or senior standing or permission of instructor. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: junior standing or higher

PBHL 4020 - Global Health: Comparative Public Health Systems (3 Credits)

Within a limited period of time, middle and low income countries have experienced dramatic changes that affect the length and quality of peoples' lives. The health indicators for each country reflect a rich and meaningful context within interacting systems of economic, social, cultural patterns, and environmental and social justice. Analysis and contrast of public health indicators such as the millennium development goals develop an understanding of the complexity against a background of change. Prereq: Junior or Senior standing or permission from instructor. Cross-listed with URPL 6349. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

PBHL 4021 - Community Health Assessment (3 Credits)

Introduces applied methods of public health, including: analyzing community-level assessment data, developing a casual model for selected health outcomes, maximizing community participation in the assessment process, developing assessments as a team, and setting the stage for effective intervention and evaluation. Prereq: Upper division standing, a course in statistics, and an introductory course in epidemiology (HBSC 4001, 5001). Cross-listed with HBSC 5021. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 4031 - Ethnographic Research In Public Health (3 Credits)

Qualitative, ethnographic tools for practical applications in public health, including methods of direct observation, informant interviews, focus groups, structured ethnographic methods, rapid assessment and participatory action research. Basic analytic strategies, including review of computer software, coding and data display techniques. Max hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 4040 - Social Determinants of Health (3 Credits)

This course explores social inequalities in physical and mental health, the illness experience, the healing professions, health policy, relations between providers and patients, and the structure, access to, and financing of health care organizations, with some cross-national discussions. Prereq: PBHL 2000 or 2001 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PBHL 2000 or PBHL 2001 with a C- or higher

PBHL 4060 - Evolutionary Medicine (3 Credits)

Evolutionary medicine is a relatively new approach for understanding patterns of human health and disease. In this course, students will learn how human evolutionary history has shaped our susceptibility and resistance to both chronic and infectious diseases. Prereq: ANTH 1303. Cross-listed with ANTH 4060 and 5060. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 1303

PBHL 4070 - Health Disparities (3 Credits)

The purpose of this seminar is to provide students with an understanding of how historical, psychosocial, environmental, and to some degree, biological and genetic factors contribute to inequality in health and health care. Course Prerequisites: PBHL 4040, PBHL 3001, PBHL 2051 with a grade of C- or better. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: PBHL 2051, 3001, and 4040 with a grade of C- or better

PBHL 4080 - Global Health Practice (3 Credits)

A travel-study course that provides students the opportunity to work on global health issues in the context of a supervised internship experience. In addition to a formal internship placement or directed research opportunity, students attend formal lectures and participate in seminars devoted to addressing those health issues most relevant to the country in which the course is being taught. Prereq: Junior or Senior standing or permission from instructor. Cross-listed with ANTH 4080/5080. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

PBHL 4090 - Drug Syndemic (3 Credits)

Psychotropic drugs, both legal and illicit, are a predominant part of our everyday lives. This course examines their use and meaning within cultures, and the social, political and economic issues that surround their production, use and misuse. Prereq: Junior or Senior standing or permission from instructor. Cross-listed with ANTH 4090/5090. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

PBHL 4099 - Capstone Experience in Public Health (3 Credits)

Offers students the opportunity to integrate, synthesize and apply concepts learned throughout the core curriculum of the public health major to real-world issues. The course involves extensive writing and small group presentations on the epidemiological, global, social, environmental, and policy dimensions of current problems in public health. Prereq/Co-req: PBHL 2000 or 2001 and all or all but one of PBHL 2020 or 3020, PBHL 3001, PBHL 3030, PBHL 3070, PBHL 4040 with a C- or better. Students must enroll in that remaining course concurrently with PBHL 4099. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq/Co-req: PBHL 2000 or 2001 and all or all but one of PBHL 2020 or 3020, PBHL 3001, PBHL 3030, PBHL 3070, PBHL 4040 with a C- or better, and take that remaining course concurrently with PBHL 4099.

PBHL 4110 - Public Health Perspectives On Family Violence (3 Credits)

Public health views family violence from a prevention perspective. Our exploration of child abuse, intimate partner violence, and other forms of family violence will complement other disciplinary approaches by focusing heavily on the community and social factors that contribute to abusive relationships. Theories of power and coercion and approaches to researching these issues will be analyzed and discussed through our exploration of the various forms of family violence. Prereq: Junior or Senior standing or permission from instructor. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

PBHL 4200 - The Global HIV/AIDS Epidemic (3 Credits)

Provides a foundation for a critical analysis of HIV/AIDS in global context, concerning topics such as disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power, and culture together with a set of ethnographic texts that explore the epidemic's impact. Cross-listed with HBSC 4200. Term offered: summer. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 4620 - Health Risk Communication (3 Credits)

Acquaints students with contemporary theory, research, and practice in health risk communication. Cross-listed with COMM 4620/5620 and ENVS 5620. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PBHL 4840 - Independent Study (1-4 Credits)

This course requires active independent learning based upon a written curricular outline and agreement with faculty in Public Health who supervise the student's work throughout the semester. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 4.

PBHL 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PBHL 4995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Upper division undergraduate standing and permission of instructor. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PBHL 4999 - Topics in Public Health (4 Credits)

An in-depth study of selected social science perspectives/theories and their applications to population health. Topics will vary from semester to semester, with a particular emphasis on current, salient population health problems. Prereq: Junior or senior standing or permission of instructor. Cross-listed with HBSC 5999. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: junior standing or higher

Introduction

Please click [here](#) (p. 429) to see Health and Behavioral Sciences department information.

The College of Liberal Arts and Sciences (CLAS) and the Colorado School of Public Health (CSPH) together created the undergraduate Public Health program. Public health professionals work to protect the environment, identify sources of illness in population groups, control disease outbreaks, evaluate the economic ramifications of changing demographics, develop interventions to promote healthy behavior and produce health policy legislation. Public health draws from a broad array of disciplines, including a range of social, behavioral, and natural sciences, each provides unique insights for the diverse set of activities involved in public health practice.

Students in the BA program develop a specialty in the social sciences and public health. Graduates with a BA in Public Health will be prepared for pursuit of graduate degrees in a broad range of fields, including the social and behavioral sciences, public health, law, social work, business administration, and health services research. The program is especially appropriate for students intending to pursue careers in public health, as well as health policy and administration.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click [here](#) (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)

- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 43 credit hours, including a minimum of 29 PBHL credit hours and a minimum of 11 credit hours in ancillary coursework.
2. Students must complete a minimum of 16 upper-division (3000-level and above) PBHL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 26 PBHL credit hours with CU Denver faculty, including a minimum of 5 of the following PBHL 2001 Introduction to Public Health, PBHL 3001 Introduction to Epidemiology, PBHL 3020 Introduction to Environmental Health, PBHL 3030 Health Policy, PBHL 3070 Perspectives in Global Health, PBHL 4040 Social Determinants of Health or PBHL 4099 Capstone Experience in Public Health.

Required Courses

Code	Title	Hours
<i>Take all of the following.</i>		23
<i>A minimum of five must be taken at the University of Colorado Denver.</i>		
PBHL 2001	Introduction to Public Health	4
PBHL 3020	Introduction to Environmental Health	3
PBHL 3001	Introduction to Epidemiology	4
PBHL 3030	Health Policy	3
PBHL 3070	Perspectives in Global Health	3
PBHL 4040	Social Determinants of Health	3
PBHL 4099	Capstone Experience in Public Health	3

Quantitative Methods

Code	Title	Hours
<i>Take one of the following Quantitative Methods courses, or another statistics course that has been approved by the undergraduate program director/advisor in advance:</i>		3-4
ANTH 4050	Quantitative Methods in Anthropology	3
BIOL 3763	Biostatistics	4
MATH 2830	Introductory Statistics	3
MATH 4830	Applied Statistics	3
PSYC 2090	Statistics and Research Methods	4

Public Health Electives

Code	Title	Hours
<i>Take six credits of PBHL electives from the following list:</i>		6
PBHL 2052	Global Demography and Health	3
PBHL 3002	Ethnicity, Health and Social Justice	3
PBHL 3010	Human Sexuality and Public Health	3
PBHL 3021	Fundamentals of Health Promotion	3
PBHL 3031	Health, Human Biology and Behavior	3
PBHL 3041	Health, Culture and Society	3

PBHL 3050	Decision Making	3
PBHL 3051	Mental Illness and Society	3
PBHL 3071	Global Topics In Sexual and Reproductive Health	3
PBHL 3081	Health in the City: Urban Health	3
PBHL 3091	Live Long and Prosper: Public Health & Aging	3
PBHL 3200	Human Migration: Nomads, Sojourners, and Settlers	3
PBHL 3440	Medical Sociology	3
PBHL 3939	Internship	1-3
PBHL 3999	Special Topics in Public Health	1-4
PBHL 4020	Global Health: Comparative Public Health Systems	3
PBHL 4021	Community Health Assessment	3
PBHL 4031	Ethnographic Research In Public Health	3
PBHL 4060	Evolutionary Medicine	3
PBHL 4080	Global Health Practice	3
PBHL 4090	Drug Syndemic	3
PBHL 4110	Public Health Perspectives On Family Violence	3
PBHL 4200	The Global HIV/AIDS Epidemic	3
PBHL 4840	Independent Study	1-4
PBHL 4880	Directed Research	1-6
PBHL 4999	Topics in Public Health	4

Additional Electives

Code	Title	Hours
<i>Take three elective credits from either the PBHL list (above) or the following list:</i>		
ANTH 4010	Medical Anthropology: Global Health	3
ANTH 4080	Global Health Practice	3
ANTH/PBHL 4090	Drug Syndemic	3
ANTH 4290	Anthropology and Public Health	3
ANTH 4600	Medical Anthropology	3
COMM 4500	Health Communication	3
COMM 4525	Health Communication and Community	3
COMM 4550	Rhetorics of Medicine & Health	3
COMM 4575	Designing Health Messages	3
COMM 4620	Health Risk Communication	3
ECON 4660	Health Economics.	3
ENVS 1342	Environment, Society and Sustainability	3
ETST 3002	Ethnicity, Health and Social Justice	3
GEOG 3501	Geography of Health	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4235	GIS Applications in the Health Sciences	3
HEHM 3100	Introduction to Health Humanities	3
HEHM 3570	Death & Dying: Social & Medical Perspectives	3
HIST 4345	Gender, Science, and Medicine: 1600 to the Present	3
PHIL 4242	Bioethics	3
PSCI 4215	Women's Rights, Human Rights: Global Perspectives	3
PSCI 4330	U.S. Health Policy	3
PSYC 3262	Health Psychology	3
PSYC 3265	Drugs, Brain and Behavior	3

PSYC 3305	Abnormal Psychology	3
PSYC 3822	Aging, Brain and Behavior	3
SOCY 3440	Medical Sociology	3
SOCY 3570	Death & Dying: Social & Medical Perspectives	3
SOCY 4110	Sociology of Health Care	3
SOCY 4220	Population Change and Analysis	3
SOCY 4290	Aging, Society and Social Policy	3

Biological Sciences Ancillary Courses

Code	Title	Hours
<i>Complete one of the following options.</i>		8

Option 1

Code	Title	Hours
<i>Take two of the following</i>		8
BIOL 1550	Basic Biology: Ecology and the Diversity of Life	4
BIOL 1560	Basic Biology: From Cells to Organisms	4
ANTH 1303	Introduction to Biological Anthropology	4

Option 2

Code	Title	Hours
<i>Take the following</i>		8
BIOL 2010	Organisms to Ecosystems (Gen Bio)	3
or BIOL 2030	Honors Organisms to Ecosystems (Gen Bio)	
BIOL 2011	Organisms to Ecosystems Lab (Gen Bio)	1
or BIOL 2031	Honors Organisms to Ecosystems Lab (Gen Bio)	
BIOL 2020	Molecules to Cells (Gen Bio)	3
or BIOL 2040	Honors Molecules to Cells (Gen Bio)	
BIOL 2021	Molecules to Cells Lab (Gen Bio)	1
or BIOL 2041	Honors Molecules to Cells Lab (Gen Bio)

Introduction

Please click here (p. 429) to see Health and Behavioral Sciences department information.

The College of Liberal Arts and Sciences (CLAS) and the Colorado School of Public Health (CSPH) together created the undergraduate Public Health program. Public health professionals work to protect the environment, identify sources of illness in population groups, control disease outbreaks, evaluate the economic ramifications of changing

demographics, develop interventions to promote healthy behavior and produce health policy legislation. Public health draws from a broad array of disciplines, including a range of social, behavioral, and natural sciences, each provides unique insights for the diverse set of activities involved in public health practice.

Students in the BS program develop a specialty in the natural sciences and public health. Graduates with a BS in Public Health will be prepared for pursuit of graduate degrees in a broad range of fields, including the natural, social, and behavioral sciences, public health, law, medicine, dentistry, pharmacy, nursing, business administration, and health services research. The program is especially appropriate for students intending to pursue careers in public health, as well as primary care specialties in medicine, nursing, or health policy and administration.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Degree Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences General Degree Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 73 credit hours, including a minimum of 26 PBHL credit hours and a minimum of 44 credit hours in ancillary coursework.
2. Students must complete a minimum of 16 upper-division (3000-level and above) PBHL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 26 PBHL credit hours with CU Denver faculty, including a minimum of 5 of the following PBHL 2001 Introduction to Public Health , PBHL 3001 Introduction to Epidemiology , PBHL 3020 Introduction to Environmental Health , PBHL 3030 Health Policy, PBHL 3070 Perspectives in Global Health, PBHL 4040 Social Determinants of Health or PBHL 4099 Capstone Experience in Public Health.

Program Restrictions, Allowances and Recommendations

1. PHYS 2321 Intro Experimental Phys Lab I and PHYS 2341 Intro Experimental Phys Lab II are specifically designed for students in non-Physics majors and can be paired with either PHYS 2010 College Physics I and PHYS 2020 College Physics II or PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based lectures. Students pursuing a second major in Physics should complete PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based and PHYS 2351 Applied Physics Lab I and PHYS 2361 Applied Physics Lab II.

Required Courses

Code	Title	Hours
Take all of the following		23
A minimum of five of the following courses must be taken at the University of Colorado Denver.		
PBHL 2001	Introduction to Public Health	4
PBHL 3001	Introduction to Epidemiology	4
PBHL 3020	Introduction to Environmental Health	3
PBHL 3030	Health Policy	3
PBHL 3070	Perspectives in Global Health	3
PBHL 4040	Social Determinants of Health	3
PBHL 4099	Capstone Experience in Public Health	3

Quantitative Methods

Code	Title	Hours
Take one of the following Quantitative Methods courses, OR another statistics course that has been approved by the undergraduate program director/advisor in advance:		3-4
ANTH 4050	Quantitative Methods in Anthropology	3
BIOL 3763	Biostatistics	4
MATH 2830	Introductory Statistics	3
MATH 4830	Applied Statistics	3
PSYC 2090	Statistics and Research Methods	4

Biological and Physical Sciences Ancillary Courses

Biology

Code	Title	Hours
Take the following		8
BIOL 2010 or BIOL 2030	Organisms to Ecosystems (Gen Bio) Honors Organisms to Ecosystems (Gen Bio)	3
BIOL 2011 or BIOL 2031	Organisms to Ecosystems Lab (Gen Bio) Honors Organisms to Ecosystems Lab (Gen Bio)	1
BIOL 2020 or BIOL 2040	Molecules to Cells (Gen Bio) Honors Molecules to Cells (Gen Bio)	3
BIOL 2021 or BIOL 2041	Molecules to Cells Lab (Gen Bio) Honors Molecules to Cells Lab (Gen Bio)	1

Chemistry

Code	Title	Hours
<i>Take the following</i>		19
CHEM 2031 & CHEM 2038	General Chemistry I and General Chemistry Laboratory I	4
CHEM 2061 & CHEM 2068	General Chemistry II and General Chemistry Laboratory II	5
CHEM 3411 & CHEM 3418	Organic Chemistry I and Organic Chemistry Lab I	5
CHEM 3421 & CHEM 3428	Organic Chemistry II and Organic Chemistry Lab II	5

Math

Code	Title	Hours
<i>Take the following course:</i>		4
MATH 1401	Calculus I	

Physics

Code	Title	Hours
<i>Take the following</i>		10
PHYS 2010 or PHYS 2311	College Physics I General Physics I: Calculus-Based	4
PHYS 2020 or PHYS 2331	College Physics II General Physics II: Calculus-Based	4
PHYS 2321	Intro Experimental Phys Lab I	1
PHYS 2341	Intro Experimental Phys Lab II	1

Public Health Elective

Code	Title	Hours
<i>Take three PBHL elective credits from the following list:</i>		3
PBHL 2052	Global Demography and Health	3
PBHL 3002	Ethnicity, Health and Social Justice	3
PBHL 3010	Human Sexuality and Public Health	3
PBHL 3021	Fundamentals of Health Promotion	3
PBHL 3031	Health, Human Biology and Behavior	3
PBHL 3041	Health, Culture and Society	3
PBHL 3050	Decision Making	3
PBHL 3051	Mental Illness and Society	3
PBHL 3071	Global Topics In Sexual and Reproductive Health	3
PBHL 3081	Health in the City: Urban Health	3
PBHL 3091	Live Long and Prosper: Public Health & Aging	3
PBHL 3200	Human Migration: Nomads, Sojourners, and Settlers	3
PBHL 3440	Medical Sociology	3
PBHL 3939	Internship	1-3
PBHL 3999	Special Topics in Public Health	1-4
PBHL 4020	Global Health: Comparative Public Health Systems	3
PBHL 4021	Community Health Assessment	3
PBHL 4031	Ethnographic Research In Public Health	3
PBHL 4060	Evolutionary Medicine	3
PBHL 4080	Global Health Practice	3
PBHL 4090	Drug Syndemic	3
PBHL 4110	Public Health Perspectives On Family Violence	3

PBHL 4200	The Global HIV/AIDS Epidemic	3
PBHL 4840	Independent Study	1-4
PBHL 4880	Directed Research	1-6
PBHL 4999	Topics in Public Health	4

Additional Elective

Code	Title	Hours
<i>Take three elective credits from either the PBHL list (above), from the following list or another course that has been approved by the undergraduate program director/advisor in advance:</i>		3
ANTH 4010	Medical Anthropology: Global Health	3
ANTH 4080	Global Health Practice	3
ANTH/PBHL 4090	Drug Syndemic	3
ANTH 4290	Anthropology and Public Health	3
ANTH 4600	Medical Anthropology	3
COMM 4500	Health Communication	3
COMM 4525	Health Communication and Community	3
COMM 4550	Rhetorics of Medicine & Health	3
COMM 4575	Designing Health Messages	3
COMM 4620	Health Risk Communication	3
ECON 4660	Health Economics.	3
ENVS 1342	Environment, Society and Sustainability	3
ETST 3002	Ethnicity, Health and Social Justice	3
GEOG 3501	Geography of Health	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
GEOG 4235	GIS Applications in the Health Sciences	3
HEHM 3100	Introduction to Health Humanities	3
HEHM 3570	Death & Dying: Social & Medical Perspectives	3
HIST 4345	Gender, Science, and Medicine: 1600 to the Present	3
PHIL 4242	Bioethics	3
PSCI 4215	Women's Rights, Human Rights: Global Perspectives	3
PSCI 4330	U.S. Health Policy	3

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

This 5-year degree program combines the Bachelors of Art/Bachelor of Science (BA/BS) of Public Health (PBHL) and the Master of Public Health (MPH). These degrees are offered, respectively, at the University of Colorado Denver by the Department of Health and Behavioral Sciences in the College of Liberal Arts and Sciences on the downtown campus, and the Colorado School of Public Health, a joint venture of the University of Colorado, Colorado State University and the University of Northern Colorado. Students will receive both degrees in the program simultaneously at the end of the program.

BA/BS-MPH students may choose any of the MPH concentration areas available across the three campuses. Concentration areas include the five core areas of public health (Biostatistics; Community and Behavioral Health; Environmental and Occupational Health; Epidemiology; and Health Systems, Management and Policy) as well as several other areas such as Maternal and Child Health, Health Communications, Community Health Education, and others.

- To be eligible, students must be declared PBHL majors (BA or BS).
- Ideal candidates will have a GPA of 3.5 or higher, and will have completed a minimum of 12 credit hours toward their undergraduate PBHL degree including:

Code	Title	Hours
Completed with a B+ or higher		
PBHL 2001	Introduction to Public Health	4
BIOL 2010 & BIOL 2011	Organisms to Ecosystems (Gen Bio) and Organisms to Ecosystems Lab (Gen Bio)	4
BIOL 2020 & BIOL 2021	Molecules to Cells (Gen Bio) and Molecules to Cells Lab (Gen Bio)	4

- Complete an application via SOPHAS EXPRESS (**Note:** GREs are not required). Students should apply by the January preferred deadline in their Sophomore or Junior year.
- Upon application, declare a provisional MPH concentration (**Note:** some concentrations may establish additional eligibility criteria).

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Undergraduate degree requirements follow either the BA (found here (p. 436)) or BS (found here (p. 437)).
2. Students in this program will be conferred both degrees (BA or BS, and MPH) simultaneously upon completion of all requirements.
3. Each class must be completed with a grade of C- or higher to count towards the major, and students must maintain a minimum 3.5 GPA in the undergraduate major and MPH courses.
4. The following are exceptions and/or substitutions that are applicable to the BA/BS requirements for students in the BA/BS - MPH program:
5. To facilitate timely completion of the program, students are expected to take 6 credits in each of 2 summers.
6. If students apply late to this program, (including having already completed additional PBHL core requirements), they may not be able to benefit from all of the substitution-based time savings, and therefore may not be able to complete the program in 5 years.

Code	Title	Hours
The following courses serve dual purpose for these degrees.		9
<i>Take the following Introduction to Public Health Course. ¹</i>		
PBHL 2001	Introduction to Public Health	4
<i>Take six credits of graduate level MPH coursework during the undergraduate career. ²</i>		
PBHL 3001	Introduction to Epidemiology or EPID 6630Epidemiology	
PBHL 3020	Introduction to Environmental Health or EHOH 661Occupational and Environmental Health	
PBHL 3030	Health Policy	

or HSMP 660 Introduction to HSMP

PBHL 4040 Social Determinants of Health
or CBHS 661 Social and Behavioral Factors and Health

Complete the following graduate level Quantitative Methods Course³

MATH 5830 Applied Statistics 3

- ¹ Take this undergraduate level course in lieu of PUBH 6600 Foundations in Public Health (2 credit) requirement for MPH program; must substitute 2 credits at graduate level. Other limitations apply.
- ² Two graduate-level Public Health classes will fulfill the undergraduate matched required courses and fulfill the requirements for MPH program.
- ³ Fulfills Quantitative Methods Requirement in the undergraduate degree and counts in lieu of BIOS 6601 Applied Biostatistics I requirement for MPH program.

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/hbsc/degree-programs/5-year-public-health-ba-bs-mph/>).

Public Health Demography Minor Introduction

Please click here (p. 429) to see Health and Behavioral Sciences department information.

The undergraduate minor in Public Health Demography will introduce students to population-based approaches to health and wellbeing. Both demography and public health draw on theories and methods from across the social and behavioral sciences, to understand population level outcomes. Collectively, the courses in the minor will strengthen skills in analytical thinking, critical thinking, and quantitative reasoning, as related to topics including fertility, mortality, migration, maternal and child health, health disparities, and population health.

The minor in Public Health Demography will help to prepare students for graduate training in public health, demography, epidemiology, or biostatistics. Further, the minor will help to prepare students for jobs that require an understanding of population dynamics. Demographic skills are useful in fields including actuarial studies, marketing, consulting, non-profits, and various agencies in the local, state, and federal government.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 17 credits drawn from the approved course lists.
- Students must complete a minimum of 6 upper-division PBHL (3000-level and above) credit hours.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete a minimum of 9 PBHL credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

- Due to substantial overlap in coursework, students who complete the major in Public Health shall not also be awarded the minor in Public Health Demography.

Required Courses

Note: Students should check for prerequisites when enrolling in courses.

Public Health Minor

Introduction

Please click here (p. 429) to see Health and Behavioral Sciences department information.

The undergraduate minor in Public Health is designed to provide students with a basic understanding of the social, cultural, and biological dimensions of health. The minor curriculum provides students with the intellectual and methodological tools needed to understand the joint

bio-cultural determinants and contexts of health, health care and public health.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 24 credit hours from the approved courses.
2. Students must complete a minimum of 12 upper-division (3000-level and above) PBHL credit hours from the approved courses.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 12 PBHL credit hours with CU Denver faculty from the approved courses.

Program Restrictions, Allowances and Recommendations

1. No more than 6 credit hours may be counted toward a major or minor in another department and counted toward the minor in Public Health.
2. Due to substantial overlap in coursework, students who complete the major in Public Health cannot also be awarded the minor in Public Health.
3. Students must complete a minimum of 12 upper-division level credit hours with CU Denver faculty.

General Public Health

Code	Title	Hours

Location: Center for Bioethics and Humanities

Overview

Health Humanities is an undergraduate interdisciplinary minor that highlights humanities and related social science approaches to medicine and health. The health humanities offer insight into the human condition as it pertains to the arts and sciences of healing and deepens understanding of disease and wellness, pain and suffering, personhood, the nature of death and dying, embodied experience, and the limits of technological knowledge. Attention to literature, history, philosophy, rhetoric, and the arts reveals the ethical, cultural, and social contexts of health and medicine.

Who is this minor for?

- **Everyone!** Humanistic studies of health provide an excellent addition to science-based curricula and also a stand-alone program that addresses many current issues and interests.
- **Premed students:** Medical school admissions committees actively seek students with strong humanities and liberal arts backgrounds.

Key Learning Outcomes:

- Students will utilize humanistic perspectives to analyze approaches and practices related to health and medicine.
- Students will critically analyze historical and contemporary connections among health, medicine, and society.
- Students will demonstrate understanding of the historical, cultural, and political contexts of theories and practices related to health and medicine.

Health Humanities (HEHM)

HEHM 3100 - Introduction to Health Humanities (3 Credits)

This course introduces students to the rich field of medical humanities. It examines how various disciplines analyze relationships among culture, society and medicine, and what humanistic approaches can teach us about biomedical theory and health care training and practice. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

HEHM 3570 - Death & Dying: Social & Medical Perspectives (3 Credits)

Focusing on death, dying and bereavement using medical and social perspectives, this course explores how illness, prolonged dying and sudden death impact care providers, families and communities.

Discussion, film, readings and music address the connection of social and medical issues. Cross-listed with SOCY 3570. Max hours: 3 Credits.

Grading Basis: Letter Grade

HEHM 4840 - Independent Study (1-6 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: Permission of instructor. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

HEHM 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Health Humanities Minor

Introduction

Please click here (p. 443) to see Health Humanities department information.

The Health Humanities minor critically analyzes historical and contemporary connections among health, medicine, and society. The minor deepens understandings of disease and wellness, pain and suffering, personhood, the nature of death and dying, embodied experience, and the limits of technological knowledge. Studying literature, history, philosophy, rhetoric, the arts, and related social science fields, HEHM students explore the human dimensions of medical practice and how they interact with lived experience, revealing the ethical, cultural, and social contexts of health and medicine.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see you advisor. Students declaring a minor in HEHM must have at least a 2.5 over GPA.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours taken from the approved courses.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours in the minor taken from the approved courses.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty taken from the approved courses.

Program Restrictions, Allowances and Recommendations

1. Students may only count **one** relevant transfer course toward their elective requirements for the minor.
2. Students may double count no more than two courses from their major or University General Education Core toward the minor elective requirements.
3. Students may take any of the courses from the capstone list as upper division electives.
4. Upper division level electives may carry prerequisites that must be completed before enrolling.

Required Course

Code	Title	Hours
<i>Take the following required course</i>		3
HEHM 3100	Introduction to Health Humanities	3

Upper Division (3000-level and Above) Electives

Code	Title	Hours
<i>Take three of the following from at least two different disciplines: ¹</i>		9
ANTH 3666	Anthropology of Death	3
ANTH 4600	Medical Anthropology	3
COMM 4500	Health Communication	3

COMM 4525	Health Communication and Community	3
COMM 4550	Rhetorics of Medicine & Health	3

History

Chair: Christopher L. Agee

Program Assistant: Tabitha Fitzpatrick

Undergraduate Advisor: William Wagner

Graduate Advisor: Ryan Crewe

Office: Student Commons Building, 1201 Larimer St., Room 3102

Telephone: 303-315-1776

Fax: 303-315-1780

Overview

The special responsibility of historical studies is understanding the past. History courses integrate many branches of knowledge, cutting across the lines of the social sciences and the humanities, and even the natural sciences. Identifying forces of stability and processes of change, history students develop their research, writing and analytical skills, which serve them well beyond their university years.

Undergraduate Information

Please click here (p. 455) for more information about the requirements for the Major in History.

Please click here (p. 463) for more information about the requirements for the Minor/Online Minor in History.

Please click here (p. 465) for more information about the requirements for the Immigration Studies Certificate.

Internships

Students may qualify for internships to earn credit and experience. Students may pursue internships in public policy, law, social work, community organizing, journalism, teaching, and a variety of other job fields. Students interested in pursuing an internship in their chosen job field should speak with the Undergraduate Advisor. Students interested in working in historical institutions can apply for positions with the Center for Colorado and the West, Colorado State Historical Society, Historic Denver, Denver Museum of Nature and Science, the Colorado Railroad Museum, and the National Park Service.

Honors Program

Students with a cumulative GPA of 3.5 or higher in their upper-division history classes are encouraged to submit their HIST 4839 History Seminar thesis papers to achieve a degree awarded with Latin honors: *cum laude*, *magna cum laude* or *summa cum laude*. Eligible students will submit their thesis papers to the Undergraduate Advisor for review by the Undergraduate Honors Committee.

Historical Studies Journal

Since 1983, CU Denver students in history have published this illustrated journal showcasing the most outstanding original research done each year by history students.

History (HIST)

HIST 1016 - World History to 1500 (3 Credits)

Surveys the rise of civilizations and their interactions from prehistoric to modern times. The emphasis is on the understanding of the various styles or characteristics of civilizations within a global context. Term offered: fall, spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-HI1, History.

Typically Offered: Fall, Spring.

HIST 1026 - World History Since 1500 (3 Credits)

Surveys the interactions of the world's civilizations in modern times. The emphasis is on understanding the concept of modernization within a global context. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-HI1, History.

HIST 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

HIST 1211 - Western Civilization I (3 Credits)

Introduces ancient Mediterranean civilization and the birth of Europe.

Covers topics on economics and society, political organization, intellectual history, and art from 3000 B.C. to A.D. 1500. Term offered: fall, spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

HIST 1212 - Western Civilization II (3 Credits)

Introduces modern European civilization and its spread over the world. Covers topics on economics and society, political organization, intellectual history, and art from A.D. 1500 to the 20th century. Term offered: fall, spring. Max Hours: 3 Credits.

Surveys the historical development of the modern Latin American countries, beginning with the independence movements of the early 19th century. Emphasizes the 20th century issues and problems that have characterized these countries and affected their relations with the United States. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3469 - Intro to East Asia: To 1800 (3 Credits)
This course introduces the history of China, Japan and Korea to 1800 focusing on political, economic and social changes. It is designed for lower division undergraduates with no background in Asian history. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3470 - Intro to East Asia: Since 1800 (3 Credits)
This course introduces the history of China, Japan and Korea from 1800 to the present, focusing on political, economic and social changes. It is designed for lower division undergraduates with no background in Asian history. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 3480 - Introduction to European History (3 Credits)
This course examines the major events and influences that have shaped modern Europe, including monarchies, the Enlightenment, the Industrial Revolution, the rise of political ideologies, the French and Russian Revolutions, capitalism, imperialism, and two World Wars in the twentieth century. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: spring, summer, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

Typically Offered: Fall, Spring, Summer.

HIST 3481 - Ancient Greece (3 Credits)
A history of the Greek-speaking world, from the Bronze Age depicted in Homer's epics to Alexander the Great and the Hellenistic Kingdoms. The course addresses the political, intellectual, socioeconomic, and military history of the eastern Mediterranean, with an emphasis on Greece. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3482 - Rome: City and Empire (3 Credits)
Pagan Rome from its earliest beginnings to the rise of Christianity. Emphasis is on the military, socio-economic, and political history of Rome, its empire in Italy, and its domination of the Mediterranean World (ca. 800 B.C. to A.D. 300). Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 3484 - British Isles to 1714 (3 Credits)
A sampler of the rich, diverse, and dramatic history of the peoples of the British Isles. State formation, economic and social change and cultural values are several of the themes threaded through this survey course. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3485 - British Isles Since 1714 (3 Credits)

This course examines the dramatic rise of the British industrial, commercial, and political empire during the 18th and 19th centuries and its equally dramatic decline in the 20th century. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3486 - Renaissance and Reformation (3 Credits)

Explores the late 13th through middle 17th centuries when European art and culture changed dramatically, and when Europe was torn by explosive ideological conflicts and religious upheaval. Cross-listed with RLST 3486. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3487 - Medieval Europe (3 Credits)

Surveys the general history of Europe from the fall of Rome to the opening of modern Europe. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 3488 - Tudor-Stuart England (3 Credits)

England's rise from obscurity in 1487 to the dawn of her age of European and world dominance in the early 18th century. Family life and popular culture as well as Henry VIII, Queen Elizabeth, Parliament, and Cromwell. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3500 - African History in Novels and Films (3 Credits)

Introduces modern Africa through the eyes of creative artists. Various topics, such as childhood, religion, and colonialism, are presented from various points of view--African and non-African. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 3601 - Colorado History (3 Credits)

Presents the story of the people, society, and culture of Colorado from the earliest Native Americans, through the Spanish influx, the fur traders and mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the tourists, and the modern twentieth-century state. Term offered: spring, fall, summer. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring, Summer.

HIST 3606 - Science, Technology, and Society in the Modern World (3 Credits)

Examines the relationships among science, technology, and society from the early 19th century to the present. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

HIST 3616 - Global History of Energy (3 Credits)

Explores the history of human energy use on local, national, and international scales, examining its social, political, and economic effects, and its implications for the environment. Cross-listed with HIST 5616. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 3706 - Age of Revolution (3 Credits)

Examines revolutions in selected societies around the world during the period from 1750 to 1950. The specific revolutions chosen may vary, but representative upheavals in both the Western and non-Western worlds are examined. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

HIST 3810 - Topics (3 Credits)

Topics in history with varying subtitles reflecting course content.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

HIST 3840 - Independent Study: History (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

HIST 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have 15 hours of HIST courses completed with a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: spring, summer, fall. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: 15 hours of HIST courses with a 2.75 GPA in HIST courses

Typically Offered: Fall, Spring, Summer.

HIST 3995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education.

Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

HIST 4027 - Enlightenment and Revolution (3 Credits)

In this course students explore the relationship of ideas and events in Europe during the 17th and 18th centuries. Modernizing trends in the European economy, religion, science, states and international affairs leading up to the French Revolution. Cross-listed with HIST 5027. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Examines 19th and 20th century British history, addressing social, cultural, and political themes. Explores industrialization, state growth, and imperialism; relationships between race, gender, and class; and the ways in which colonizers and the colonized experienced empire. Cross-listed with HIST 5051. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4055 - The Atlantic Slave Trade: Africa, Caribbean and U.S. (3 Credits)

Presents a broad overview of the slave trade in the Atlantic World, including discussion of the slave plantation, the creation of Caribbean societies and the consequences of independence from Britain. Cross-listed with HIST 5055. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4062 - Modern France, 1789 to the Present (3 Credits)

Considers the shaping of modern France from the 18th century Bourbon Monarchy and aristocratic society to today's liberal democracy, in which multiculturalism, globalization and supranational institutions call into question the very nature of French identity. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with HIST 5062. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4071 - Modern Germany (3 Credits)

Surveys the major political, institutional, social, economic, and cultural developments that have occurred in Germany since the late 18th century. Cross-listed with HIST 5071. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4074 - Post-War Germany (3 Credits)

Historical survey of Germany since the second world war, with an emphasis on culture and society. Cross-listed with HIST 5074. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4075 - Travel Stories and Origins of Cultural Anthropology (3 Credits)

Examines the early history of cultural anthropology by means of classic travel literature. Cross-listed with HIST 5075. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4076 - History of Modern Science (3 Credits)

Surveys the history of science from the 18th century to the present. Treats all disciplines, from physics to physiology, in an attempt to understand how the natural world came to dominate our sense of ourselves. Cross-listed with HIST 5076. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4083 - Russia Since 1917 (3 Credits)

Studies the development of the Soviet Union from its formation in the October Revolution, through the Civil War, the new economic policy, industrialization, collectivism, the Stalinist purges, up to the present. Cross-listed with HIST 5083. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4086 - Eastern Europe (3 Credits)

Studies the countries of Eastern Europe from their origins in the Middle Ages to the present. Cross-listed with HIST 5086. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4133 - Management of Material Culture and Museum Collections (3 Credits)

This course provides in-depth knowledge of the rudiments of material culture documentation, preservation and management. While we have designed this class for those interested in working in history museums, this is also appropriate for those students who want to learn the place of artifacts in studying history. Cross-listed with HIST 5133. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4201 - Core Themes in U.S. History (3 Credits)

This course surveys major themes in U.S. history. Cross-listed with HIST 5201. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4209 - Race, Religion, and Belonging (3 Credits)

Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources #such as sermons, reality TV shows, court cases and graphic images as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation#state, thereby constructing the boundaries of the state itself. Cross-listed with ETST 4030, ETST 5030, RLST 4030, RLST 5030 and HIST 5209. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4210 - The American Revolution (3 Credits)

The crisis of the British Empire in North America from the end of the French and Indian War to the ratification of the American Constitution. Topics include the emerging economy, constitutional arguments against Britain, the conduct of the war, and the definition of a republic. Cross-listed with HIST 5210. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4212 - Civil War and Reconstruction (3 Credits)

Begins with the causes and outbreak of the American Civil War, describes the military conflict and the social aspects of the war, examines the federal efforts to reconstruct the southern states, and protect the rights of Black citizens after 1865. Cross-listed with HIST 5212. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4213 - The Gilded Age and Early 20th Century Challenges: U.S. History, 1865-1932 (3 Credits)

Topical study of major events in America, including Reconstruction; the rise of industry and the workers' response; westward expansion and the plight of Native Americans; urbanization and immigration; agrarian upheaval; Progressivism; World War I; the challenges of the 1920s and the onset of the Great Depression. Cross-listed with HIST 5213. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4216 - History of American Popular Culture (3 Credits)

Explores American popular culture from the early 1800s to the present. By tracing the development of various entertainment media, including theater, music, movies, and television sitcoms, this course probes how popular culture both reflected and shaped American values and behavior. Cross-listed with HIST 5216. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

HIST 4217 - Consumer Culture (3 Credits)

This interdisciplinary course examines the dynamics of the consumer culture in the context of social, economic, and technological history. The analysis begins with 17th century European origins, and continues through recent world developments, emphasizing the U.S. since 1800. Note: Open to all students. Cross-listed with HIST 5217. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4219 - Depression, Affluence and Anxiety: U.S. History, 1929 to the Present (3 Credits)

Examines major developments, focusing on the causes of the Depression and efforts to combat it; World War II and postwar readjustments; the Cold War and challenges of world leadership; unparalleled prosperity; Civil Rights movement; the Vietnam War; and economic uncertainties amidst general prosperity. Cross-listed with HIST 5219. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4220 - U.S. Foreign Policy Since 1912 (3 Credits)

The main thrust is the emergence of the U.S. from isolation toward full-scale participation in the affairs of Europe and other areas. Special attention is given to U.S. intervention in two world wars, the Cold War, and the over extension of U.S. commitments since 1960. Cross-listed with HIST 5220. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4222 - U.S. Society and Thought to 1860 (3 Credits)

Major topics include the evolution of Protestantism from Puritans to Transcendentalists; humanitarian reforms such as abolition, temperance, and women's rights; European influences on American thought; the effect of industrialization on the development of class society; and American nostalgia for agrarian life. Cross-listed with HIST 5222. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4223 - U.S. Society and Thought Since 1860 (3 Credits)

Topical survey of the main currents of American thought and their impact upon society. Topics include American philosophy, literature (extensively), art, music, immigration and urbanization, technology, extremism of both left and right, and education. Cross-listed with HIST 5223. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4225 - Urban America: Colonial Times to the Present (3 Credits)

Rise of the American city from colonial times to present. Major emphasis on the process of urbanization since 1840: town promotion, the industrial city, immigration, boss politics and reform, urban technology, transportation systems, minorities, city planning, and the future of urban America. Cross-listed with HIST 5225, WGST 4225, WGST 5225, GEOG 4625. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4226 - Capitalism in America (3 Credits)

Explores the social, cultural, and political history of American capitalism from colonial times. Topics include entrepreneurship, labor, territorial and trading expansion, industrialization, the rise of corporations, economic cycles, technological developments, and the role of the state, all within global contexts. Cross-listed with HIST 5226. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4227 - American West (3 Credits)

Introduces the diverse peoples, places, and approaches to the development of the trans-Missouri West from prehistoric times to the present. Cross-listed with HIST 5227. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4228 - Western Art and Architecture (3 Credits)

Introduces art and architecture of the American West, emphasizing their historical context. Students are required to do book reports and a research paper. Course includes walking tours and museum visits. Cross-listed with HIST 5228. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4229 - Colorado Historic Places (3 Credits)

Introduces community architecture, folklore, and history for all students. Students learn how to survey, describe, and designate significant historical structures and districts. Cross-listed with HIST 5229. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4230 - Women in the West (3 Credits)

Focuses on ways in which women, from the mid-19th century through the mid-20th century, of different races, classes, and ethnic background, have interacted and been active participants in the development of the Western states. Cross-listed with HIST 5230 and WGST 4230/5230. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4231 - History in Museums (3 Credits)

This core course for the museum studies area of public history introduces students to the theory and practice of museum operations. It covers the basics of museum administration, museum collection and preservation, and museum interpretation from both theoretical and practical points of view. Cross-listed with HIST 5231. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4232 - Historic Preservation (3 Credits)

Introduces the history, methodology, and goals of historic preservation. Guest speakers, field trips, research projects, and book reports. Cross-listed with HIST 5232. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4234 - History at Work: Public and Community History (3 Credits)

An overview of history outside the academic setting. Students have the opportunity to learn about jobs through on-site visits and presentations made by people engaged in a wide variety of occupations in history other than teaching. Cross-listed with HIST 5234. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4236 - Colorado Mining and Railroads (3 Credits)

Focuses on the transportation network that shaped the inland West, and its key role in the extractive industry that gave Colorado its start and nourished the highest state through adolescence. Cross-listed with HIST 5236. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4238 - U.S. History Through Fiction (3 Credits)

Explores American history through novels, based on the idea that fiction offers a superb "window" through which to view the past, especially to understand the texture of American society. Cross-listed with HIST 5238. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4240 - National Parks History (3 Credits)

Introduces how the National Park Service uses history to identify, designate, preserve, and interpret America's most outstanding historic and natural history sites. After tours of NPS sites, students select from a wide range of projects. Note: Open to all students. Cross-listed with HIST 5240. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4242 - Oral History (3 Credits)

Trains public history students in the collection of oral history interviews. Students master core readings on the theory, practice, and ethics of oral history. Cross-listed with HIST 5242. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4243 - Public History Administration (3 Credits)

Introduces students to the skills, practice, and ethics of public history administration. Cross-listed with HIST 5243. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4244 - Interpretation of History in Museums: Exhibits and Education (3 Credits)

This course allows students to gain in-depth knowledge of historical interpretation through exhibits and education in a museum setting. This class is designed for those preparing to work in history museums but is also appropriate for teachers and others who want to learn how museum programs interpret history with artifacts and other historical materials.

Cross-listed with HIST 5244. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4245 - Heritage Tourism (3 Credits)

History and historic sites have become big business in 21st century tourism. The heritage tourism industry is explored in this introductory course for all interested students focusing on how academic history and historians can partner with tourism and recreation interests. Cross-listed with HIST 5245. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4261 - Data: A User Manual (3 Credits)

Teaches the technical skills of data collection, processing, analysis, and visualization, along with the history and ethics of how societies, corporations, and governments have used and abused data over time. Cross-listed with HIST 5261. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4303 - Sex and Gender in Modern Britain (3 Credits)

Examines modern British history by focusing on sex and gender as central aspects in people's lives. Considers the ways gender shapes the realms of politics, economics, society and culture in Britain from the 18th century to the present. Cross-listed with HIST 5303 and WGST 4303/5303. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4306 - Survey of Feminist Thought (3 Credits)

Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women's characteristics, experiences, and capabilities have been understood and challenged. Cross-listed with ENGL 4306, 5306, HIST 5306, WGST 4306, 5306. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4307 - History of Sexuality (3 Credits)

Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political and economic history. Cross-listed with HIST 5307 and WGST 4307/5307. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4308 - Crime, Policing, and Justice in American History (3 Credits)

Focuses on changing legal and cultural definitions of crime, the role of the police, the evolution of punishment in theory and practice, and the role of mass culture in shaping the social history of crime and justice. Cross-listed with HIST 5308. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4345 - Gender, Science, and Medicine: 1600 to the Present (3 Credits)

Examines the ways science and medicine have both shaped and been shaped by ideas about gender. Pays particular attention to the relationship between scientific/medical ideas about the sexes and the social organization of gender. Cross-listed with HIST 5345 and WGST 4345/5345. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4347 - History of Biology (3 Credits)

Examines the development of modern biology from the mid-18th century to the present. Students will look at intellectual, methodological, institutional and social contexts in an attempt to answer the question of how biology became the "pre-eminent" science. Cross-listed with HIST 5347. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4348 - Mind and Malady: A History of Mental Illness (3 Credits)

Examines the history of mental illness from the mid-18th century to the present, focusing on the institutionalization of the mentally ill, the origin of psychiatry, the development of models of mental illness and the evolution of clinical treatment. Cross-listed with HIST 5348. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4411 - Modern Mexico (3 Credits)

Designed to familiarize students with the critical issues in Mexican political, economic and social history. Traces the emergence of independence and the difficult consolidation of an independent nation state. Cross-listed with HIST 5411, ETST 4411. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4412 - Mexico and the United States: People and Politics on the Border (3 Credits)

Examines the convoluted relations between these two republics, focusing on diplomatic, cultural, and social interactions. Cross-listed with HIST 5412. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4414 - Nationalism and State Building in Latin America, 1750-1850 (3 Credits)

Explores the problems of nationalism and post-colonial state building by examining the late colonial and early national periods of Latin American history. The course discusses the impact of the enlightenment, the events of the Wars of Independence, and the quandaries faced by the new nations. Cross-listed with HIST 5414. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4415 - Social Revolutions in Latin America (3 Credits)

A theoretical framework and an empirical basis for understanding the large-scale social movements that have influenced the course of Latin American nations. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with HIST 5415. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4416 - The Age of Imperialism (3 Credits)

Examines causes, character, and consequences of imperialism in the industrial era (ca. 1840-1975). Through intense study of selected cases, students gain an understanding of the different dynamics and varieties of imperialist control. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

HIST 4417 - Commodities and Globalization (3 Credits)

Trading raw material & processed goods internationally has greatly affected world cultures & geopolitics. Tracing commodity chains since 1500 for food, fuel, industrial material & products, & intellectual property, this course will conclude with the effects of current regulations, marketing & environmental concerns. Cross-listed with HIST 5417. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4418 - Trade and Premodern World History (3 Credits)

Explores the interconnections that shaped premodern world history, considering the ways that the production, exchange, and consumption of cloth were tied to specific forms of political power, social and religious organization, and long distance economic relationships. Cross-listed with HIST 5418. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4420 - Traditional China: China to 1600 (3 Credits)

A general introduction to the history of China from the advent of historic civilization to the point of the great encounter with the West. Cross-listed with HIST 5420. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4421 - Modern China (3 Credits)

Surveys Chinese history in the modern era. Includes examination of Western domination of China; revolution and internal fragmentation of China; Japanese attacks and World War II; and civil war and the communist revolution. Cross-listed with HIST 5421. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4422 - Living through Mao's China: Life, Material Culture, Movies, 1949-76 (3 Credits)

Introduces students to ordinary people's daily life in Mao's China (1949-1976) through an exploration of material culture, movies and scholarship. This course pays particular attention to the ways people's everyday living intertwined with politics. Cross-listed with HIST 5422. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4431 - Modern Japan (3 Credits)

Course of Japanese history since the Perry expedition. Covers Japanese Westernization and industrialization, the expansion of empire and defeat in World War II, the occupation, and the amazing technological and social transformation since the occupation years. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with HIST 5431. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4451 - Southern Africa (3 Credits)

An in-depth history of the clash of peoples and cultures in Africa south of the Zambezi River. African and Afrikaner political, economic and cultural development in a single land and the consequences of several competing nationalisms existing side by side are examined. Apartheid and African opposition to it are analyzed. Cross-listed with HIST 5451. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4455 - African Struggle for Independence (3 Credits)

An assessment of African leadership from the colonial era to the present. Cross-listed with HIST 5455. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4461 - The Modern Middle East (3 Credits)

Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with HIST 5461. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4462 - Islam in Modern History (3 Credits)

This course studies Islamic thought and practice over the last two centuries in terms of major historical processes that have operated at local, national, and global scales. Cross-listed with HIST 5462, RLST 4462, RLST 5462. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4471 - The Second World War (3 Credits)

The War in its totality: causes, military strategies (equal treatment to European and Pacific theaters), campaigns, impact of technology and weapons, political and social upheaval. Cross-listed with HIST 5471. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4472 - The 1950s: Korean War, the Cold War and Social Transformation (3 Credits)

A critical and methodical exploration of several of the social, cultural, and political events of the 1950s. Investigates the complex interaction between politics and culture during this decade, paying close attention to anti-Communist thought and the Korean War. Cross-listed with HIST 5472. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4475 - The Vietnam War (3 Credits)

Covers the conflict in Vietnam, with roots in the period prior to World War II. Main topics include the rise of nationalism in French Indochina, the war against the French, the Northern move to unify Vietnam, American intervention, and eventual victory of the Northern regime. Cross-listed with HIST 5475. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

HIST 4490 - Weapons of Mass Destruction (3 Credits)

Weapons of mass destruction have affected politics, health, and environments around the globe. This course will examine the development, use, and consequences of these modern technologies of war and terror. Cross-listed with HIST 5490. Term offered: summer, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Summer.

HIST 4491 - United States History, 1865-1919 (3 Credits)

Surveys the major intersections of politics, culture, and society in American history between 1865 and 1919. The course will be attentive to the diversity of American experiences and will explore domestic and international themes in United States history. Cross-listed with HIST 5491. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4492 - United States History, 1919-1945 (3 Credits)

Surveys the major intersections of politics, culture, and society in American history between 1919 and 1945. The course will be attentive to the diversity of American experiences and will explore both domestic and international themes in United States history. Cross-listed with HIST 5492. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4493 - United States History, 1945-1973 (3 Credits)

Surveys the major intersections of politics, culture, and society in American history between 1945 and 1973. The course will be attentive to the diversity of American experiences and will explore both domestic and international themes in United States history. Cross-listed with HIST 5493. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4494 - Red and Blue America: U.S. History, 1973-Present (3 Credits)

Surveys the major intersections of politics, culture, and society in American history since 1973. The course will be attentive to the diversity of American experiences and will explore both domestic and international themes in United States history. Cross-listed with HIST 5494. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

HIST 4503 - Topics in History of Science (3 Credits)

Themes vary from year to year. Possible topics: Darwinism, Nature of Memory, Time and Space, Origins. Cross-listed with HIST 5503. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4504 - Animals in U.S. History (3 Credits)

Human-animal relationships offer powerful and unexpected perspectives on the American past. An eclectic range of readings and viewings, written assignments and contemplative experiences will contextualize contemporary practices, beliefs, and ethics – vegetarianism, hunting, pet-keeping, and many others – in historical context. Cross-listed with HIST 5504. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4621 - Explorers and Exploration (3 Credits)

Examines the history of travel and exploration from the 13th century to the present. Readings draw primarily from first-person accounts to understand why people voyage, what they hope to discover, and what happens to them along the way. Cross-listed with HIST 5621. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4622 - Oceans In History (3 Credits)

Explores transoceanic exchanges, relations, and transformations in modern world history. Examines how historians analyze and conceptualize global interactions. Topics include voluntary and forced migrations, resistance and revolution, transoceanic economic relations, piracy, and environmental change. Cross-listed with HIST 5622. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4645 - Archival Management (3 Credits)

This course studies theory and principles pertaining to the management of current and non-current records, public and private archival materials, as well as the administration of archival manuscript depositories for housing records of historical value. Cross-listed with HIST 5645. Max hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4810 - Special Topics (1-3 Credits)

Cross-listed with HIST 5810. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

HIST 4839 - History Seminar (3 Credits)

Covers the use of documentary sources and historical criticism, with students utilizing these skills in a historical research paper. Note: Required for history majors. Preferably taken in the senior year. Prereq: HIST 3031 with a grade of C or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: HIST 3031 with a grade of C or higher

HIST 4840 - Independent Study: HIST (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

HIST 4849 - Independent Study History Honors Research Paper (3 Credits)

Students competing for history honors must take this course to prepare their honors paper. The course requires students to produce a finished research paper of professional quality under the direction of a history faculty member. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: Open to advanced history majors only. Max Hours: 3 Credits.

Grading Basis: Letter Grade

HIST 4850 - History in the Community: History Day Mentoring (1-3 Credits)

Directed by CU Denver History faculty, students participate in and judge National History Day in Colorado. They gain teaching experience mentoring students preparing social-studies and literacy-based projects. Their papers are based on scholarly readings and analyses of their experiences in middle and high schools. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: Permission of department chair. Term offered: spring. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

HIST 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

History, BA

Introduction

Please click here (p. 445) to see History department information.

The bachelor's degree in history provides students with a firm grounding for advanced studies in education, librarianship, law, business and public service, as well as graduate work in the humanities and social sciences

broadly. History is an all-inclusive discipline, making it an excellent choice for students with a wide variety of career goals.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This major can be complete on campus or with a combination of on-campus and online courses. Many core and upper-division courses are offered online.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 36 HIST credit hours.
2. Students must complete a minimum of 18 upper-division (3000-level and above) HIST credit hours, with a minimum of 15 credit hours at 4000-level or higher.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 HIST credit hours with CU Denver faculty.

Program Allowances or Restrictions

1. 15 of the 18 upper division level credit hours must be taken at the 4000 level, including HIST 4839 History Seminar.

Required Courses

Code	Title	Hours
<i>Take the following</i>		6
HIST 3031	Theory and Practice of History: An Introduction to the Major ¹	3
HIST 4839	History Seminar ¹	3

¹ Students must complete HIST 3031 Theory and Practice of History: An Introduction to the Major with a grade of C or better before enrolling in HIST 4839 History Seminar.

History, BA with Secondary Teaching Licensure Endorsement

Introduction

Please click [here](#) (p. 445) to see History department information.

The special responsibility of historical studies is to help individuals and communities understand the past. History courses integrate many branches of knowledge, cutting across the lines of the social sciences and the humanities, and even the natural sciences. Identifying forces of stability and processes of change, history students develop research, writing and analytical skills, which serve them well beyond their university years.

By comparing the human conditions over decades or centuries, history students identify fundamental social trends and analyze critical causal factors. The study of history builds confidence for making judgments in many fields of human endeavor and provides insight into current social, political, economic and cultural issues. History is an all-inclusive discipline, making it an excellent choice for students with a wide variety of career goals. The Department of History trains students to be critical thinkers, capable researchers, and careful writers.

The secondary licensure program is a partnership program between the College of Liberal Arts and Sciences (CLAS) and the School of Education & Human Development (SEHD). Secondary Education Licensure students choose a major within CLAS and complete all CORE, CLAS, major, and initial teacher education admission requirements before completing a final professional year of licensure coursework through the SEHD.

Program Delivery

- This major can be complete on campus or with a combination of on-campus and online courses. Many core and upper-division courses are offered online.

Declaring This Major

- Click [here](#) (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 36 HIST credit hours. Students must complete courses to prepare for the Social Studies Praxis exam and complete SEHD teacher licensure requirements.
- Students must complete a minimum of 18 upper-division (3000-level and above) HIST credit hours, with a minimum of 15 credit hours at 4000-level or higher..
- Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are

calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

- Students must complete a minimum of 18 HIST credit hours with CU Denver faculty.

Program Allowances, Restrictions and Recommendations

Students are responsible for meeting with the advisor in the SEHD to confirm teacher education and licensure requirements. In addition to completing all minimum program requirements above, SEHD secondary education students must complete the following minimum SEHD licensure (p. 712) requirements:

- Complete the Education Declaration form and all subsequent processes and requirements, including a background check, prior to April 1st (for students intending to complete their clinical field experience in fall) or November 1st (for students intending to complete their clinical field experience in spring). Students must meet with the SEHD advisor for detailed information.
- Student pursuing secondary education licensure must complete the following requirements to be admitted to the Professional (final) Year:
 - a minimum cumulative CU GPA of 3.0 or higher. Students with a lower GPA may be considered under certain conditions.
 - all CU Denver Core, CLAS, major, electives, and initial teacher education coursework requirements prior to the start of the Professional Year
 - the official application and interview process
 - Deadlines for Professional Year application are March 1st (for students intending to begin Professional Year in fall) or October 1st (for students intending to begin Professional Year in spring).
- Students must complete all initial teacher education and professional (final) year coursework with a minimum grade of B- or higher.
- Students must pass the appropriate Praxis exam before the start of the second semester of the Professional Year.

Required Courses

HIST 4645	Archival Management	3

¹ HIST 1361 U.S. History to 1876 and HIST 1362 U.S. History Since 1876 are required for the secondary social studies Praxis exam. Students will fulfill the CU Denver Core Humanities and one U.S. Distribution Course with one course and the CLAS Humanities and one HIST elective course with the other course.

Secondary Social Studies Courses

Code	Title	Hours

In order to prepare for the Social Studies Praxis exam, students should take all of the following courses:

These courses will also count toward History, CU Denver and CLAS graduation requirements, as identified.

Anthropology

Code	Title	Hours
ANTH 1303	Introduction to Biological Anthropology	4
ANTH 2102	Culture and the Human Experience	3

* ANTH 1303 Introduction to Biological Anthropology Will count as CU Denver Core Nat/Phys Science with lab. ANTH 2102 Culture and the Human Experience will count toward either CU Denver Behavioral Science or CLAS Behavioral Science.

Economics

Code	Title	Hours
ECON 2012	Principles of Economics: Macroeconomics	3

* Will count as CU Denver Core Social Sciences or CLAS Social Science.

Geography

Code	Title	Hours
GEOG 1102	World Regions Global Context	3
GEOG 1202	Introduction to Physical Geography	3

* GEOG 1202 Introduction to Physical Geography will count as CLAS Nat/Phys Science without lab and GEOG 1102 World Regions Global Context will count as CU Denver Core Social Science or CLAS Social Science.

History

Code	Title	Hours
HIST 1361	U.S. History to 1876	3
or HIST 1362	U.S. History Since 1876	
HIST 3345	Immigration and Ethnicity in American History	3
or HIST 3349	Social Movements in 20th Century America	

¹ HIST 1361 U.S. History to 1876 or HIST 1362 U.S. History Since 1876 will the CU Denver Core Humanities and one U.S. Distribution Course.

² HIST 3345 Immigration and Ethnicity in American History or HIST 3349 Social Movements in 20th Century America will fulfill CLAS Humanities and one U.S. Distribution Course.

Political Science

Code	Title	Hours
PSCI 1101	American Political System	3
PSCI 3022	Political Systems of the World	3
or PSCI 3042	Introduction to International Relations	

* PSCI 1101 American Political System is highly recommended and will count as a lower-division level elective credit, toward the overall 120 credit hours required to graduate.

PSCI 3022 Political Systems of the World or PSCI 3042 Introduction to International Relations will count as CU Denver Core International Perspectives.

Psychology

Code	Title	Hours
PSYC 1005	Introduction to Psychology II	3

* Will count toward either CU Denver Behavioral Science or CLAS Behavioral Science.

Sociology

Code	Title	Hours
SOCY 3020	Race and Ethnicity in the U.S.	3

* Will count as CU Denver Cultural Diversity.

SEHD Licensure Coursework Requirements

Students must complete SEHD licensure requirements located here (p. 712).

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/history/bachelor-arts-history/>).

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/clas/>).

History Minor

Introduction

Please click here (p. 445) to see History department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program and an online program. Students can complete the minor with all on-campus courses, all online courses, or a mix of on-campus and online courses.

Declaring This Minor

- To declare this minor, contact CLAS advising at CLAS_Advising@ucdenver.edu or visit the CLAS advising office in NC 1030. Students must be in a degree-seeking undergraduate program before they can declare this minor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 18 HIST credit hours.
- Students must complete a minimum of 9 upper-division (3000-level and above) HIST credit hours.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete a minimum of 12 HIST credit hours with CU Denver faculty.

Code	Title	Hours
Required Courses		
Select a minimum of three credit hours (one course) from each of the following areas:		9
United States (p. 464)		
Europe (p. 464)		

World (Africa, Asia, Latin America) (p. 465)

Electives

Select an additional 9 HIST elective credit hours ¹	9
Total Hours	18

¹ Any courses listed above may be used to fulfill the elective requirements once the area distributions have been met.

Immigration Studies Certificate Introduction

Please click [here](#) (p. 445) to see History department information.

Issues of immigration are at the center of modern policy and political debates and are thus a core concern for social scientists, policy makers, civic leaders, community organizations, and citizens. The objective of the History Department's Undergraduate Immigration Studies Certificate is to offer both traditional academic training through coursework and research and also practical experience working with immigrant and refugee communities through an internship. The Immigration Studies Certificate will ultimately prepare students to conduct immigration research, influence immigration public policy, and inform immigrant-related government decisions.

Upon successful completion of the certificate, students will:

- Understand the theoretical explanations for immigration flows, immigrant assimilation and exclusion, and ethnic formation
- Possess a fundamental understanding of the legal and political institutions responsible for immigration policy
- Be familiar with current trends in immigration studies thought, research, and activism
- Be able to apply the content and methodological skills to engage in original research projects involving immigration topics
- Be able to apply the theories and examples from coursework to conduct immigration-focused internships in the workforce

Program Delivery

- This is an on-campus program.

Declaring This Certificate

- **Eligibility:** While housed in the History Department, Immigration Studies is a multidisciplinary field that draws from Ethnic Studies, Anthropology, Political Science, Education, and Sociology. Thus, CU Denver undergraduate students in any discipline can enroll in the program.
- This certificate is open to all CU Denver Undergraduates. Students may apply for the Immigration Studies Certificate at any point in their studies and maintain a grade point average of at least 3.0 within the certificate courses. To apply, students should print and attach a completed Immigration Studies Certificate Application (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/history/immigration-studies-certificate/immigration_studies_certificate_application.docx) to an unofficial transcript. These documents should be submitted to the Immigration Studies Certificate Administrator, Dr. Peter A. Kopp (peter.kopp@ucdenver.edu (peter.kopp@ucdenver.edu ? subject=Immigration%20Studies%20Certificate)). Once the application is approved, students will be contacted about their acceptance into the program.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click [here](#) (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 12 credit hours from the approved courses.
2. Students must complete a minimum of 6 upper division (3000-level and above) credit hours from the approved courses.
3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all certificate credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. If departments offer additional courses that fit within the themes of the Immigration Studies Certificate, those courses can be counted for credit with the Immigration Certificate Administrator's approval
2. The certificate will be awarded when the student graduates with the bachelor's degree.

Required Courses

Code	Title	Hours
<i>Take both of the following required courses</i>		6
HIST 3345	Immigration and Ethnicity in American History ¹	3
HIST 3939	Internship ²	1-3

¹ Students must take HIST 3345 Immigration and Ethnicity in American History **prior** to enrolling in an internship.

² Students will work with the Immigration Studies Certificate Administrator and the Experiential Learning Center to secure an immigration- or refugee-related Internship.

Electives

Code	Title	Hours
<i>Take two related electives from the following</i>		6
ANTH 4300	Migrant Health	
ANTH 4350	Anthropology of Globalization	
EDFN 3000	Undocumented Mexican Immigration	
ETST 3108	Chicano/a and Latino/a History

Overview

The Humanities Minor is an interdisciplinary studies program. Students take courses in a range of disciplines with a variety of faculty.

Undergraduate Information

The Humanities Minor is a 15-credit hour undergraduate interdisciplinary minor available through CU-Denver's College of Liberal Arts and Sciences (CLAS). The study of Humanities offers students ideas and concepts for being ethical, creative citizens equipped with tools for critical thinking in a global, multinational world. Taking an interdisciplinary approach, the Humanities Minor cultivates humanistic concepts through historically grounded texts and traditions. It teaches critical engagement with society's most pressing issues by developing a human-oriented perspective in which creativity and critical, theoretical thinking frame ethical being in the world. Comprising Humanities-based coursework, students gain important foundations in personal and community values by pursuing a concentration in one of three interdisciplinary pathways:

Story-telling and Meaning: comprised of Humanities electives focused on how humans make ethical decisions and meaning in life through literature, philosophy, history, and religion.

Picturing Humanity: comprising Humanities courses emphasizing the aesthetic role of art, history, film, and visual studies in the constitution of diverse cultural and social perspectives.

Theorizing Humanity: comprised of coursework focusing on the public role of social theory, philosophy, ethnic studies, and social justice in the formation of culture and society

Student Learning Goals

A Humanities Minor offers valuable skills demanded by today's competitive global market. Students who study Humanities have strong writing and communication skills that make them successful in a wide range of careers, like teaching, non-profits leadership, advertising, law, and medicine. Humanities Minor pathways tailor coursework within humanistic traditions and ideas that offer meaningful exploration of issues in contemporary life and society. Students learn analytic thinking and reasoning demanded by careers, like law, technology, marketing, and politics. Humanities study provides knowledge that transcends the limitations of individual disciplinary majors and minors. Pathways within the interdisciplinary Humanities Minor offer students the opportunity to bring together content and themes from diverse, but related disciplines within the framework of humanistic inquiry and critical analysis.

Click here (p. 467) to learn about the requirements for the Humanities Minor.

Programs

- Humanities Minor (p. 467)

Humanities (HUMN)

HUMN 1012 - The Humanistic Tradition: Modes of Expression (3 Credits)

Familiarizes students with humanistic modes of expression through the study of history, literature, philosophy, music, and the visual and dramatic arts. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

HUMN 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

HUMN 4251 - Introduction to Legal Studies (3 Credits)

A survey of the United States legal system, including lawmaking powers, jurisdiction, court procedures, professional ethics and major principles of business law, contracts, estates and probate, family law, property and torts. Cross-listed with HUMN 5251/SSCI 4251/SSCI 5251. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

HUMN 4325 - First Amendment: Theory and Context (3 Credits)

First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Cross-listed with HUMN 5325, SSCI 4325, SSCI 5325, PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

HUMN 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

HUMN 4984 - Topics: Interdisciplinary Humanities (1-3 Credits)

Concerned with specialized aspects of the humanities from various theoretical and research perspectives. These courses are interdisciplinary and serve as a forum for discussion of individual projects and theses.

Term offered: fall, spring. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Humanities Minor Introduction

The Humanities Minor cultivates humanistic exploration through historically grounded texts and traditions. It teaches critical engagement with society's most pressing issues by developing a human-oriented perspective in which creativity and critical, theoretical thinking frame ethical being in the world.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the

College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours from approved coursework.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours from approved coursework.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 12 credit hours with CU Denver faculty, from approved courses.

Program Allowances and Restrictions

1. Coursework must be approved by a Humanities Minor advisor.
2. Of the four elective courses, at least one course must be taken at 3000-level and at least one must be at the 4000-level.
3. If a student wants to deviate from these lists, they must have advisor approval prior to completing the substitute coursework.

Required Course

Code	Title	Hours
<i>Take the following introductory course</i>		3
HUMN 1012	The Humanistic Tradition: Modes of Expression (Students may opt to complete or transfer in a comparable HUMN 1000- or 2000-level course with prior advisor approval.)	3

Electives

Code	Title	Hours
<i>Take four elective courses (12 credit hours) of coursework in Humanities disciplines and Humanities-related programs, in one of three available interdisciplinary pathways</i>		12

Individually Structured Major

Director: Associate Dean Marjorie Levine-Clark

Faculty advisor: Brandon Mills

Overview

The College of Liberal Arts and Sciences Interdisciplinary Studies Major (ISM) provides students with the opportunity to construct an individualized major that meets their unique needs and interests, and which results in a B.A.. This flexible program allows students to follow academic pursuits that transcend traditional department or college boundaries, combining coursework from two, three, or even more academic units to explore a particular theme. An ISM tends to be more focused than traditional majors and should not be considered a default major for students uncertain about their course of study.

Roles and Responsibilities

Student

- creates the ISM proposal and course contract (in collaboration with faculty advisors)
- meets regularly with ISM Primary Advisor to assess progress through ISM
- fulfills requirements of ISM course contract

Associate Dean for Planning, Initiatives, and Diversity

- approves student proposals for ISM
- signs off on ISM course contracts
- maintains records of ISM applications
- certifies graduation

Primary Faculty Advisor

- approves ISM course contract
- meets with ISM advisees to monitor progress
- oversees advisees' capstone projects

Other Faculty Advisors

- approve course contract
- help with capstone projects when needed

CLAS Academic Advisor

- reviews overall course contract
- approves exempt core area

Honors

Liberal arts students interested in graduating with Latin honors in the individually structured major program should meet with the assistant/associate dean in the CLAS Advising Office to verify they meet eligibility requirements and to modify the program plan for the honors project. Students who successfully complete the ISM honors program will have the appropriate Latin honor designation placed on the University of Colorado diploma and transcript.

To participate in the ISM honors program, CLAS students must meet each of the following eligibility requirements:

- have a declared ISM major with an approved ISM contract
- possess a minimum 3.2 cumulative University of Colorado GPA
- possess a minimum 3.5 GPA on all completed University of Colorado course work in the ISM contract

Eligible ISM students must complete an undergraduate research project and present the results to a faculty honors committee. The level of Latin honors awarded is determined by the faculty honors committee. ISM students are to complete 3 to 6 semester hours of undergraduate independent study over a period of two semesters in one of the disciplines that constitute the ISM contract. The faculty sponsor from the project discipline will serve as the honors committee chair. The independent study research project is to produce a thesis-quality report to be presented orally to a three-member interdisciplinary faculty honors committee representing the disciplines in the ISM contract. Upon completion of the research report and oral presentation to the honors committee, the level of Latin honors will be determined by the following criteria:

- cum laude-awarded upon completion of written report and oral presentation
- magna cum laude-awarded by honors committee based on successful written report and oral presentation
- summa cum laude-awarded by honors committee based on excellence in written report and oral presentation

Application for an ISM:

In order to declare an Interdisciplinary Studies Major, students are required to submit a program plan that includes a proposal and a course contract. Students should aim to complete a program plan before the end of the sophomore year. The proposal should be approved before students have taken one-third of the classes listed in their course contracts. Copies of your completed ISM proposal and course contract must be filed

with the Associate Dean for Planning, Initiatives, and Diversity and with your CLAS Academic Advisor.

- The ISM proposal must include:
 - A description of your chosen theme (see below for sample themes).
 - An explanation of why the theme requires coursework that integrates multiple disciplines. You can choose a theme within interdisciplinary frameworks already established in CLAS but which do not offer BA degrees. These frameworks include Chinese Studies, Health Humanities, Law Studies, Religious Studies, Social Justice, Sustainability, and Women's and Gender Studies. You are also encouraged to create your own frameworks.
 - An outline of specific learning objectives for the ISM (see below for sample learning objectives).
 - Approval from the Associate Dean for Planning, Initiatives and Diversity.
- Your ISM course contract must include:
 - A list of the courses in your chosen disciplines and the optional "grab bag" of courses that you intend to apply to your ISM, as well as potential alternate courses. You should work closely with the Associate Dean for Planning, Initiatives, and Diversity and faculty advisors in your chosen disciplines to create your course contract.
 - Signatures from your chosen Primary Faculty Advisor from one of your main disciplines and signatures from Faculty Advisors from your other main disciplines. You do not need a faculty advisor for grab bag courses.
 - Signature from your Academic Advisor.
 - Signature from the Associate Dean for Planning, Initiatives, and Diversity.

Programs

Individually Structured Major Options

- Integrated Health Sciences Option, BA - Individually Structured Major (p. 470)
- Integrated Studies, BA - Individually Structured Major (p. 473)
- Intercampus Interdisciplinary Option, BA - Individually Structured Major (p. 474)
- Interdisciplinary Studies, BA - Individually Structured Major (p. 476)

Individually Structured Major (ISMA)

ISMA 1500 - Introduction to Interdisciplinary Learning (3 Credits)
This course introduces the theories, methodologies, and practices of interdisciplinary studies through a specific theme that will focus on how to learn in an online environment and how interdisciplinary scholars combine the theories and methods of a variety of fields. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade

ISMA 2840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

ISMA 3000 - Special Topics (1-3 Credits)

Special classes for faculty-directed experiences examining issues and problems not generally covered in the curriculum. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ISMA 3100 - Learning Across Disciplines (3 Credits)

Examining a compelling issue, students will learn what kinds of questions require thinking beyond a single discipline, how interdisciplinary scholars combine a variety of fields, and how to approach the challenges of interdisciplinary writing. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

ISMA 3500 - Interdisciplinary Experiential Learning (3 Credits)

In this course, students will use the knowledge from their chosen clusters to bear on an experiential opportunity. Choosing an internship, community-based project, or job extension, students will collaborate with peers to design projects in this highly student-driven course. Prereq: ISMA 1500 with a C- or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMA 1500 with a C- or higher

ISMA 3840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

ISMA 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

ISMA 4500 - Interdisciplinary Learning Capstone (3 Credits)

This course brings together students who have been working on individualized majors to share a capstone experience. The goal is for students to integrate knowledge from their cluster and apply it to a project relevant to their field of interest. Prereq: ISMA 3500 with a C- or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMA 3500 with a C- or higher.

ISMA 4840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

ISMA 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

ISMA 4900 - Interdisciplinary Studies Capstone (3 Credits)

Students will be guided through the research process as they complete interdisciplinary capstone projects. They will receive feedback during each stage of the project's development and consultation from disciplinespecific faculty advisors. Prereq: ISMA 3100 with a C- or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMA 3100 with a C- or higher.

Integrated Health Sciences Option, BA - Individually Structured Major

Introduction

Please click [here](#) (p. 468) to see Individually Structured Major department information.

The College of Liberal Arts and Sciences (CLAS) Integrated Health Sciences option provides students with the opportunity to construct an individualized major that meets their unique needs, and which results in a B.A.

The **Integrated Health Studies Track** is designed for students who are interested in health from the perspective of the liberal arts and sciences and who seek interdisciplinary training focused around particular health topics. An interdisciplinary approach to health through the liberal arts and sciences seeks to create broadly-educated citizens who can apply critical thinking, information literacy, analysis, and independent problem solving to a wide variety of situations. Students can choose from a selection of health-focused minors and certificates that they combine with interdisciplinary clusters, which permits deeper understanding of a focused health topic. The track supports students seeking positions in

- Health education
- Health administration
- Community health
- Non-profit health organizations
- Environmental health
- Community organizing
- Social work
- Occupational health
- Health policy
- Gerontology

- And more

These degree requirements are subject to periodic revision by CLAS, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their CLAS Academic Advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

The ISM program plan must comply with the following policies:

1. Students must complete a minimum of 39 credit hours from the approved courses.
2. Students must complete a minimum of 9 upper-division (3000-level and above) credit hours in the approved cluster area and must complete all of the upper-division requirements for the minor or certificate they choose to pair with the cluster.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 credit hours with CU Denver faculty from the approved cluster area and must complete all of the residency requirements for the minor or certificate they choose to pair with the cluster.

Program Restrictions, Allowances and Recommendations

1. Students combine **one** of the identified CLAS minors or certificates with **one** of the topical clusters to make up their **major areas**. Students will earn the minor/ certificate they use to form a cluster for their major, as long as they have completed all of the requirements for that program.
2. Students can double-count a maximum of one course across their areas (in addition to an introductory course).
3. Students must take courses from at least **two** different disciplines in their topical cluster.
4. Students are required to take **two** courses as an introduction to their major. If an introductory course is also part of a student's topical

cluster, a student may count one introductory course as part of that area's credits.

5. **Note:** Some courses in each cluster require prerequisites that must be met making them a 21 credit cluster. Please see course descriptions.

Code	Title	Hours
Introductory Courses		
Select two of the following: ¹		6
COMM 2500	Introduction to Health Communication	
HEHM 3100	Introduction to Health Humanities	
PBHL 2001	Introduction to Public Health	
SOCY 3440	Medical Sociology	
CLAS Minor of Certificate		
Select and complete one CLAS minor or certificate:		15
Public Health Minor (p. 471)		
Health Humanities Minor (p. 471)		
Health Communication Certificate (p. 472)		
Sociology of Health and Medicine Certificate (p. 472)		
Topical Cluster		
Select and complete 15 hours, 9 upper division in at least one topical cluster:		15
Aging and End of Life Cluster (p. 472)		
Biology and Society Cluster (p. 472)		
Environmental Health Cluster (p. 472)		
Drugs and Addiction Cluster (p. 472)		
Family Health Issues Cluster (p. 472)		
Food and Nutrition Cluster (p. 473)		
Sexuality and Reproduction Cluster (p. 473)		
Capstone		
ISMA 4900	Interdisciplinary Studies Capstone ²	3
Total Hours		39

¹ If an introductory course is also part of a student's chosen area, a student may count one introductory course as part of that area's credits.

² Taken toward the end of your career (junior/senior year.)

Minors/Certificates

Public Health Minor (p. 441)

The undergraduate minor in Public Health is designed to provide students with a basic understanding of the social, cultural, and biological dimensions of health. The minor curriculum provides students with the intellectual and methodological tools needed to understand the joint bio-cultural determinants and contexts of health, health care and public health.

Health Humanities Minor (p. 444)

The Health Humanities minor critically analyzes historical and contemporary connections among health, medicine, and society. The minor deepens understandings of disease and wellness, pain and suffering, personhood, the nature of death and dying, embodied experience, and the limits of technological knowledge. Students explore the human dimensions of medical practice and how they interact with lived experience.

Health Communication Certificate (p. 355)

The Certificate in Health Communication seeks to impart the knowledge and skills necessary for creating, analyzing, and assessing health communications in a diverse and global world, where health occupies an increasingly prominent portion of our public life. This certificate provides students with a theoretically rich and practically relevant education in how health messages are generated, negotiated, and understood.

Sociology of Health and Medicine Certificate (p. 665)

The Sociology of Health and Medicine Certificate provides training in the core research methodologies and theories of medical sociology, examining individual experience, institutional structures, laws and policies that affect health, and broader systems of inequality that lead to unequal rates of illness and access to care.

Topical Clusters

Aging and End of Life Cluster

The Aging and End of Life Cluster is designed for students to learn about the range of human experiences with aging and dying, and to understand how the medical considerations of aging and the end of life intersect with social, ethical, policy, and religious questions.

Code	Title	Hours
ANTH 3666	Anthropology of Death	3
IWKS 4520	Design for Healthful Human Longevity	3
PHIL 3550	Philosophy of Death and Dying	3
PSYC 2205	Lifespan Developmental Psychology for Health Majors	3
PSYC 3822	Aging, Brain and Behavior	3
RLST 4460	Death and Concepts of Afterlife	3
SOCY 3570	Death & Dying: Social & Medical Perspectives	3
SOCY 4290	Aging, Society and Social Policy	3
SOCY 4650	Sociology of Adulthood and Aging	3

Biology and Society Cluster

This area examines the ways biology interacts with everyday life. Students will learn about the reciprocal relationships between biology and society, including themes of health and disease, the environment, evolution, ethics, and behavioral choices about health.

Code	Title	Hours
ANTH/PBHL 4060	Evolutionary Medicine	3
ANTH 4150	Human Biocultural Adaptability	3
ANTH 4600	Medical Anthropology	3
BIOL 3104	Behavioral Genetics	3
PHIL 4242	Bioethics	3
PSYC 2220	Biological Basis of Behavior	3
PSYC 3262	Health Psychology	3
PSYC 3263	Hormones and Behavior	3
PSYC 3724	Developmental Psychobiology	3
PSYC 3810	Neuropsychology	3
SOCY 4220	Population Change and Analysis	3

Note: If students choose multiple upper division PSYC courses, they will need to add the introductory prerequisites, for a total for 21 credits for the cluster.

Environmental Health Cluster

This area focuses on the relationships between people and their environments. Students will learn about how both natural and built environments impact human health and disease, and how ecological balances are important to maintaining human health.

Code	Title	Hours
ANTH 3250	Climate, Environment and Society	3
ANTH 3316	History of Human Environmental Impacts	3
ANTH 4150	Human Biocultural Adaptability	3
BIOL 3654	General Microbiology	5
BIOL 4053	Disease Ecology	3
BIOL 4154	Conservation Biology	3
BIOL 4415	Microbial Ecology	3
BIOL 4460	Environmental Toxicology	3
ENVS 1342	Environment, Society and Sustainability	3
ENVS 4720	Climate Change: Causes, Impacts and Solutions	3
GEOG 3401	Geography of Food and Agriculture	3
GEOG 3501	Geography of Health	3
GEOG 4020	Earth Environments and Human Impacts	3
GEOG 4350	Environment and Society in the American Past	3
GEOG 4710	Disasters, Climate Change, and Health	3
PBHL 3020	Introduction to Environmental Health	3

Note: If students choose multiple upper division BIOL courses, they will need to add the introductory prerequisites, for a total for 21 credits for the cluster.

Drugs and Addiction Cluster

This area considers the characteristics of addiction and how drugs work. Students will have the opportunity to study drugs and addiction from a variety of perspectives to better understand how individuals experience addiction and how society approaches policies and treatments regarding drugs and addiction.

Code	Title	Hours
ANTH 3045	Cannabis Culture	3
ANTH 3420	Anthropology and Politics of the Global Tobacco Epidemic	3
ANTH/PBHL 4090	Drug Syndemic	3
ECON 3400	Economics of Sex and Drugs	3
PSYC 3265	Drugs, Brain and Behavior	3
SOCY 3040	Drugs, Alcohol & Society	3

Family Health Issues Cluster

This area explores families as locations of health and well-being, on the one hand, and sources of health problems and crises, on the other. Students will learn about the relationships between family health and community health, as well as individual health and family health.

Code	Title	Hours
COMM 3275	Family Communication	3
PBHL 3051	Mental Illness and Society	3

PBHL 4110	Public Health Perspectives On Family Violence	3
PSYC 3405	Family Psychology	3
PSYC 3611	Psychology of Women	3
SOCY 3010	Sociology of Human Sexuality	3
SOCY 3700	Families and Society	3
SOCY 4270	Social Meanings of Reproduction	3
SOCY 4290	Aging, Society and Social Policy	3
SOCY 4640	Sociology of Childhood and Adolescence	3
SOCY 4650	Sociology of Adulthood and Aging	3
SOCY 4780	Violence in Relationships	3

Note: If students choose multiple PSYC courses, they will need to add the introductory prerequisites, for a total for 21 credits for the cluster.

Food and Nutrition Cluster

This area considers relationships between nutrition and overall health and well-being. Students will connect food to issues of sustainability and communication, understand obstacles to healthy eating, and learn about global issues of nutrition.

Code	Title	Hours
ANTH 3210	Urban Food Systems and Sustainability	3
ANTH 4040	Anthropology of Food and Nutrition	3
CHEM 2300	Nutritional Chemistry	3
COMM 4601	You Are What You Eat: Food as Communication	3
GEOG 3401	Geography of Food and Agriculture	3
GEOG 4460	Sustainable Urban Agriculture Field Study I	3
GEOG 4470	Sustainable Urban Agriculture Field Study II	3
EDFN 4000	Food Justice in City & Schools	3

Sexuality and Reproduction Cluster

This area examines sexuality and reproduction at both micro and macro levels, from the anatomy of the human body and the psychology of mind to the history of multiple societies and clusters. Students will learn how assumptions about gender and sex inform the science of sexuality and reproduction, and health impacts that derive from these relationships.

Code	Title	Hours
ANTH 4260	Human Reproductive Ecology	3
BIOL 3074	Human Reproductive Biology	3
HIST 4307	History of Sexuality	3
HIST 4345	Gender, Science, and Medicine: 1600 to the Present	3
PBHL 3010	Human Sexuality and Public Health	3
PBHL 3071	Global Topics In Sexual and Reproductive Health	3
PSYC 3235	Human Sexuality	3
SOCY 3010	Sociology of Human Sexuality	3
SOCY 3080	Sex and Gender	3
SOCY 4220	Population Change and Analysis	3
SOCY 4270	Social Meanings of Reproduction	3

Integrated Studies, BA - Individually Structured Major

Introduction

Please click here (p. 468) to see Individually Structured Major department information.

The College of Liberal Arts and Sciences (CLAS) Integrated Studies option provides students with the opportunity to construct an individualized major that meets their unique needs, and which results in a B.A.

This flexible program allows students to create a major by combining two course clusters

- One cluster must be based on a CLAS minor in the CU Denver catalog. The minor must be at least 15 credits, and students can add additional courses from the discipline (up to 21 credits total in one discipline) to form the cluster.
- The other cluster can also be based on a minor in the catalog (within CLAS or another school or college), or it can be constructed by the student from a group of courses from a variety of disciplines that form a coherent body of knowledge (an interdisciplinary cluster)
- Students must also complete an introduction to interdisciplinary studies course as well as an interdisciplinary capstone course and project that bring together the learning from their two clusters

These degree requirements are subject to periodic revision by CLAS, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their CLAS Academic Advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- Students are required to submit a program plan that includes a proposal and a course contract. Copies of completed Integrated Studies option proposals and course contracts must be filed with the Dean's Office and with the student's CLAS Academic Advisor.
- The Integrated Studies option proposal must include
 - Two chosen clusters (at least one of which must be based on a CLAS minor)
 - If one of the clusters is constructed, an explanation of how the courses fit together to form a coherent body of knowledge
 - Approval from an Associate Dean in CLAS
- The Integrated Studies option course contract must include
 - A list of the courses the student intends to take or has completed in the chosen clusters, as well as potential alternate courses. The student should work closely with their CLAS academic advisor to create the course contract
 - Signature from the student's CLAS Academic Advisor
 - Signature from the appropriate CLAS Associate Dean

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 36 credits from approved coursework.
2. Students must complete a minimum of 18 upper division (3000 level and above) credit hours with a minimum of 9 upper division level credit hours in each cluster.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. A minimum of 9 credits in each course cluster in addition to ISMA 3100 Learning Across Disciplines and ISMA 4900 Interdisciplinary Studies Capstone (24 credit hours) must be completed with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students will earn the minor(s) they use to form a cluster(s) for their major, as long as they have completed all of the requirements for that program.
2. A student must have already completed at least 60 credit hours to declare the Integrated Studies option.
3. At least half of all credits in the Integrated Studies option must be from CLAS departments.
4. Each course cluster in the major option must consist of at least 15 credit hours and one cluster must be based on a CLAS minor in the CU Denver catalog.
5. Students can apply credits they earned before declaring the Integrated Studies option to the major.
6. Once the Integrated Studies option course contract is filed, any changes to coursework must be approved by the student's CLAS Academic Advisor and resubmitted to the Associate Dean for approval.
7. Students may petition the Associate Dean to fulfill their introduction and capstone outside of ISMA 3100 Learning Across Disciplines and ISMA 4900 Interdisciplinary Studies Capstone.

Roles and Responsibilities

Student

- creates the Integrated Studies option initial proposal and course contract (in collaboration with their CLAS Academic Advisor)
- meets regularly with their CLAS Academic Advisor to assess progress through the major, CLAS graduation requirements and CU Denver graduation requirements
- fulfills requirements of the Integrated Studies course contract

CLAS Academic Advisor

- reviews Integrated Studies option proposal and overall course contract together with the student
- meets with Integrated Studies option advisees to monitor progress
- maintains records of Integrated Studies option proposals and contracts
- certifies graduation

Associate Dean

- approves student proposals and course clusters for Integrated Studies option majors
- signs off on Integrated Studies option course contracts
- may oversee advisee's capstone project
- may consult with student and other faculty on course clusters

Faculty Advisor

- may oversee advisees' capstone projects
- may consult with student and Associate Dean on course clusters

Integrated Studies Coursework Requirements

Code	Title	Hours
<i>Take the following</i>		
ISMA 3100	Learning Across Disciplines ¹	3
ISMA 4900	Interdisciplinary Studies Capstone ²	3
Complete a minimum of 30 credit hours from two course clusters ³		30
Total Hours		36

¹ Should be taken early in the academic career (i.e. sophomore year.)

² Should be taken toward then end of the academic career (i.e. senior year.)

³ Each cluster must consist of at least 15 credit hours, and one cluster must be based on a CLAS minor in the CU Denver catalog.

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/clas/>).

Intercampus Interdisciplinary Option, BA - Individually Structured Major

Introduction

Please click here (p. 468) to see Individually Structured Major department information.

The University of Colorado's Intercampus Interdisciplinary Studies Degree is a fully online degree designed to offer maximum flexibility for students whose interests and professional aspirations span many disciplines. While requiring a high level of self-direction on the part of students, this program also offers students active guidance by faculty and academic advisors. Key features of this program include:

- Students design majors around interdisciplinary topics of professional and personal interest

- Students, guided by advisors, take initiative in directing their own education not just through the choice of interdisciplinary topics but also through required experiential learning opportunities
- Students learn how to analyze and apply knowledge gained from multiple disciplines
- Students choose from among a large set of courses offered across the Boulder, Colorado Springs, and Denver campuses
- Degree focuses on fostering graduates who are able to write, problem solve, and communicate verbally
- Students have the option to complete the full degree in three years

ISO is a system initiative realized through campus cooperation. Faculty and administrative representatives from the three comprehensive campuses of the University of Colorado System (CU Denver, CU Boulder, and UCCS) have participated in constructing the major.

The central facets of the Option are:

- Collaborative Foundational Courses
 - Collaborative teams made up of faculty members from the three campuses have completed syllabi for three foundational courses and have begun the process of building these courses online through the Canvas Learning Management System (which the three comprehensive campuses have now adopted).
- Collaborative Course Clusters
 - Campus teams have vetted ten clusters across their campuses in discussions with faculty governance bodies, department chairs, and other groups to assure buy-in as well as to confirm that appropriate courses are included in the clusters.

These degree requirements are subject to periodic revision by CLAS, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their CLAS Academic Advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus, online or hybrid program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Requirements (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 39 credits from approved coursework.
2. Students must complete a minimum of 15 upper division (3000-level and higher) credit hours from approved coursework.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major

GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

4. Students must complete a minimum of 24 credit hours of approved coursework with CU Denver faculty.

Requirements

Code	Title	Hours
<i>Take the following</i>		
ISMA 1500	Introduction to Interdisciplinary Learning ¹	3
ISMA 3500	Interdisciplinary Experiential Learning	3
ISMA 4500	Interdisciplinary Learning Capstone ²	3
<i>Complete two course clusters of a minimum of 15 credit hours each.</i>		<i>30</i>
Total Hours		39

¹ Should be taken early in the academic career (i.e. freshman year.)

² Should be taken toward the end of the academic career (i.e. senior year.)

Approved Course Clusters

Clusters are interdisciplinary groups of courses selected from each campus to support a recognizable topic shared among the three campuses; they differ from traditional campus- and disciplinary-based minors and certificate programs. Team ISO has created 10 interdisciplinary clusters from which students will select two. Each cluster must contain a minimum of 15 credits from a common group of courses drawn from the three comprehensive campuses:

1. Cultural Diversity (<http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/individually-structured-major/intercampus-interdisciplinary-option-ba/CULTURAL+DIVERSITY.pdf>)
2. Research Methods & Data Analysis (<http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/individually-structured-major/intercampus-interdisciplinary-option-ba/RESEARCH+METHODS+AND+DATA+ANALYSIS.pdf>)

Interdisciplinary Studies, BA - Individually Structured Major

Introduction

Please click here (p. 468) to see Individually Structured Major department information.

The College of Liberal Arts and Sciences Interdisciplinary Studies Major (ISM) provides students with the opportunity to construct an individualized major that meets their unique needs and interests, and which results in a B.A. This flexible program allows students to follow academic pursuits that transcend traditional department or college boundaries, combining coursework from two, three, or even more academic units to explore a particular theme. An ISM tends to be more focused than traditional majors and should not be considered a default major for students uncertain about their course of study.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- In order to declare an Interdisciplinary Studies Major, students are required to submit a program plan that includes a proposal and a course contract. Students should aim to complete a program plan before the end of the sophomore year. The proposal should be approved before students have taken one-third of the classes listed in their course contracts. Copies of your completed ISM proposal and course contract must be filed with the Associate Dean for Diversity, Outreach and Initiatives and with your CLAS Academic Advisor.
- The ISM proposal must include

- A description of your chosen theme (see below for sample themes).
- An explanation of why the theme requires coursework that integrates multiple disciplines. You can choose a theme within interdisciplinary frameworks already established in CLAS but which do not offer BA degrees. These frameworks include Chinese Studies, Health Humanities, Law Studies, Religious Studies, Social Justice, Sustainability, and Women's and Gender Studies. You are also encouraged to create your own frameworks.
- An outline of specific learning objectives for the ISM (see below for sample learning objectives).
- Approval from the Associate Dean for Diversity, Outreach and Initiatives.
- Your ISM course contract must include
 - A list of the courses in your chosen disciplines and the optional "grab bag" of courses that you intend to apply to your ISM, as well as potential alternate courses. You should work closely with the Associate Dean for Diversity, Outreach and Initiatives and faculty advisors in your chosen disciplines to create your course contract.
 - Signatures from your chosen Primary Faculty Advisor from one of your main disciplines and signatures from Faculty Advisors from your other main disciplines. You do not need a faculty advisor for grab bag courses.
 - Signature from your Academic Advisor.
 - Signature from the Associate Dean for Diversity, Outreach and Initiatives.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Requirements (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

The ISM program plan requires course work over two or three disciplines. A discipline is defined as a single department or program such as biology, ethnic studies or math. The ISM program plan must comply with the following policies:

1. Students must complete a minimum of 42 credits from approved coursework.
2. Students must complete a minimum of 18 upper division (3000 level and above) credit hours with a minimum of 9 upper division level credit hours in Disciplines I and II.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. A minimum of 9 credits in Disciplines I and II, in addition to ISMA 3100 Learning Across Disciplines and ISMA 4900 Interdisciplinary Studies Capstone (24 credit hours) must be completed with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Once the ISM course contract is filed, any changes to coursework must be approved by the student's Primary Faculty Advisor and resubmitted to the Associate Dean for Diversity, Outreach and Initiatives and to the student's CLAS Academic Advisor.
2. A minimum of 30 credit hours must be completed in liberal arts and sciences course work.
3. A maximum of one discipline (15 credits) may be outside CLAS.
4. A third optional discipline may be a mixture of course work, excluding courses from the first and second disciplines.
5. An ISM title must be consistent with the academic theme and disciplines in the program plan.
6. Students may petition the Associate Dean for Diversity, Outreach and Initiatives to fulfill their introduction and capstone outside of ISMA 3100 Learning Across Disciplines and ISMA 4900 Interdisciplinary Studies Capstone.
7. The ISM proposal should be approved before students have taken one-third of the classes listed in their course contracts.

Roles and Responsibilities

Student

- creates the ISM proposal and course contract (in collaboration with faculty advisors)
- meets regularly with ISM Primary Advisor to assess progress through ISM
- fulfills requirements of ISM course contract

Associate Dean for Diversity, Outreach and Initiatives

- approves student proposals for ISM
- signs off on ISM course contracts
- maintains records of ISM applications
- certifies graduation

Primary Faculty Advisor

- approves ISM course contract
- meets with ISM advisees to monitor progress
- oversees advisees' capstone projects

Other Faculty Advisors

- approve course contract
- help with capstone projects when needed

CLAS Academic Advisor

- reviews overall course contract
- approves exempt core area

Coursework Requirements

Code	Title	Hours
<i>Take the following</i>		
ISMA 3100	Learning Across Disciplines ¹	3
ISMA 4900	Interdisciplinary Studies Capstone ²	3
Interdisciplinary Coursework		36-42

Complete a minimum of 15 credit hours in two disciplines.

Complete the remainder credit hours by contracting with additional disciplines or by creating a "grab bag": choosing courses from a variety of disciplines that suit the ISM plan.

Up to 15 credit hours for an ISM can come from outside of CLAS.

Total Hours	42-48

- ¹ Should be taken early in the academic career (i.e. sophomore year.)
- ² Should be taken toward the end of the academic career (i.e. senior year.)

Example Breakdowns

Sample breakdowns of what ISM coursework might look like:

Discipline I: 15 hours

Discipline II: 15 hours

Discipline III: 9 hours

Discipline IV: 9 hours

Total: 48 credit hours

Discipline I: 18 hours

Discipline II: 15 hours

"Grab Bag" from four disciplines: 12 hours

Total: 45 credit hours

Discipline I: 24 hours

Discipline II: 18 hours

Total: 42 credit hours

Example Themes

Examples of Interdisciplinary Studies Major themes could include:

1. Global Health
2. Victorian Studies
3. Gender and Media
4. Applied Sciences
5. Urban Studies
6. Consumers and Consumption
7. Disability Studies
8. Health and Sexuality
9. Human Rights
10. Human-centered design and innovation
11. Food Studies
12. Science, Technology, and Society
13. Latin American Studies

Example Course Contracts

An example course contract for Global Health could look like:

Discipline I: Anthropology

Code	Title	Hours
ANTH 1000	Anthropology: Past and Present	3
or ANTH 2102	Culture and the Human Experience	
ANTH 3210	Urban Food Systems and Sustainability	3
ANTH 4070	Culture of Development and Globalization	3
ANTH 4080	Global Health Practice	3
ANTH 4300	Migrant Health	3
Total Hours		15

Discipline II: Public Health

Code	Title	Hours
PBHL 2001	Introduction to Public Health	4
PBHL 3041	Health, Culture and Society	3
PBHL 3070	Perspectives in Global Health	3
PBHL 3071	Global Topics In Sexual and Reproductive Health	3
PBHL 4020	Global Health: Comparative Public Health Systems	3
Total Hours		16

Grab Bag

Code	Title	Hours
COMM 4500	Health Communication	3
ECON 4660	Health Economics.	3
ETST 3002	Ethnicity, Health and Social Justice	3
GEOG 3501	Geography of Health	3
SOCY 3440	Medical Sociology	3
Total Hours		15

Example of learning objectives

Global Health

1. Develop knowledge of current global health issues.
2. Identify the theories, methods, and analytical perspectives of anthropology and public health to understand global health systems.
3. Synthesize the theories, methods, and analytical perspectives of anthropology and public health, with input from other disciplines, to answer interdisciplinary questions.
4. Communicate ideas effectively in writing and through speaking.
5. Critically evaluate a variety of textual and statistical evidence.
6. Demonstrate ethical approaches to studying a variety of cultural perspectives.

Integrative Biology

Chair: John G. Swallow

Associate Chair: Amanda Charlesworth

Program Assistants: Barbara Schmidt, Barbara McClure

Administrative Assistant: Jacki Craig

Undergraduate BS Program Director: Kimberly F. Regier

Health Careers Advising: Charles A. Ferguson, Gene Brooks, Trishia Vasquez, Kenneth English

BA/BS-MD Program Coordinator: Kenneth English

Lab Coordinator: James Salmen, Munira Lantz, Sladjana Subotic, Enrique Karr

Office: Science, 2071

Telephone: 303-315-7600

Fax: 303-315-7601

Overview

Integrative Biology is the study of living organisms at different levels of organization, from molecular biology to biosphere ecology. Our undergraduate curriculum is designed to offer a firm foundation for understanding life processes, and a variety of biology electives to accommodate individual interests. Our courses prepare students to enter a wide variety of biological careers including health care, ecology, and bioengineering. Our graduates have the tools needed to think critically and to make informed decisions as citizens sharing the responsibility to take care of society and of Earth.

A single course may fulfill up to two requirements in the following areas: CU Denver Core Curriculum, CLAS Graduation requirements, a major program, a minor program, or a certificate program.

Departmental Honors

Departmental honors is only eligible for students who take classes for letter grades, with associated GPA values. Departmental honors is awarded to students based on their GPA in classes taken from Downtown Campus faculty. The following minimum GPA must be met both for all courses taken at CU Denver (overall GPA) and for biology courses alone (biology GPA) to receive the following honors levels: *cum laude*, 3.500; *magna cum laude*, 3.700; *summa cum laude*, 3.900.

Biology Research Scholars

The biology faculty encourages students to pursue research as part of their undergraduate education. Students who excel in both course work and research will be recognized as CU Denver Biology Research Scholars or Research Associates.

To qualify for the **Research Scholars Program**, you must:

- achieve a minimum grade point average of 3.500 in all courses taken from CU Denver faculty, as well as in all CU Denver biology courses
- participate in a research project, consisting of a minimum of six credit hours of independent study (BIOL 2840 Independent Study, BIOL 3840 Independent Study, or BIOL 4840 Independent Study), taken over at least two semesters
- write a scientific paper describing the research
- present an oral or poster presentation summarizing your research

To qualify for the **Research Associates Program**, you must:

- achieve a minimum grade point average of 2.500 in all courses taken from CU Denver faculty, as well as in all CU Denver biology courses
- participate in a research project, consisting of a minimum of three credit hours of independent study (BIOL 2840 Independent Study, BIOL 3840 Independent Study, BIOL 4840 Independent Study or BIOL 4880 Directed Research), taken over at least two semesters
- write a scientific paper describing the research or present an oral or poster presentation summarizing your research

Students who wish to become involved in research should contact Dr. Christopher Phiel no later than their junior year, and preferably sooner.

Graduate Information

Please go to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/integrative-biology/>) catalog to read about our graduate programs.

Programs

- Biology, BS (p. 486)
- Biology Minor (p. 489)
- Biotechnology Certificate (p. 490)
- Environmental Stewardship of Indigenous Lands Undergraduate Certificate (p. 491)

Faculty

Professors:

Michael J. Greene, PhD, Oregon State University
Roderick Nairn, PhD, University of London
Bradley J. Stith, PhD, Washington State University
John G. Swallow, PhD, University of Wisconsin Madison
Diana F. Tomback, PhD, University of California, Santa Barbara

Associate Professors:

Amanda Charlesworth, PhD, University College, London
Greg Cronin, PhD, University of North Carolina at Chapel Hill
Laurel Hartley, PhD, Colorado State University
Christopher J. Phiel, PhD, Thomas Jefferson University
Timberley M. Roane, PhD, University of Arizona
Alan Vajda, PhD, University of Colorado Boulder
Michael Wunder, PhD, Colorado State University

Assistant Professors:

Sara Branco, PhD, University of Chicago
Brian Buma, PhD, University of Colorado Boulder
Carlos Infante, PhD, Harvard University
Christopher S. Miller, PhD, University of California Los Angeles
Annika Mosier, PhD, Stanford University
Gregory Ragland, PhD, University of North Carolina Chapel Hill

Senior Instructors:

Hannah Anchordoquy, PhD, University of Colorado Boulder
Laurel Beck, PhD, Michigan State University
Gene Brooks, DDS, University of Missouri
Cheri A. Jones, PhD, University of Florida
David Knochel, PhD, University of Colorado Boulder
Lisa Johansen, PhD, University of Alabama
Molly Nepokroeff, PhD, University of Wisconsin Madison
Kimberly F. Regier, EdD, University of Colorado Denver

Clinical Assistant Professor:

Tod Duncan, PhD, University College London

Emeritus Faculty:

Gerald Audesirk, PhD, California Institute of Technology
Teresa E. Audesirk, PhD, University of Southern California
Leo P. Bruederle, PhD, Rutgers, the State University of New Jersey
Linda K. Dixon, PhD, University of Illinois
John H. Freed, PhD, Stanford University
Charles A. Ferguson, PhD, University of Colorado Boulder

Biology (BIOL)

BIOL 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

BIOL 1550 - Basic Biology: Ecology and the Diversity of Life (4 Credits)

Introduces the process of science, gene expression, biological diversity, evolution, and ecology. Highlights applications to contemporary issues.

Lecture and lab course. Note: For students who are not majoring in biology. Biology and health career majors should not take this course.

Students may not receive credit for this course if they have already received credit for BIOL 2051 and BIOL 2061. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab; Denver Core Requirement, Biol Phys Sci - Lec/Lab.

BIOL 1560 - Basic Biology: From Cells to Organisms (4 Credits)

Introduces the process of science, cell structure and function, survey of representative human and plant systems, and genetics. Highlights applications to contemporary issues. Lecture and lab course. Note: For students who are not majoring in biology. Biology and health career majors should not take this course. Students may not receive credit for this course if they have already received credit for BIOL 2051 and BIOL 2061. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec/Lab; GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab.

BIOL 2010 - Organisms to Ecosystems (Gen Bio) (3 Credits)

Introduces four major areas of study: (1) evolution,(2) animal structure and function, (3) plant structure and function and (4) ecology. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Biology majors and pre-health career students must also take the accompanying laboratory BIOL 2011. No co-credit with BIOL 2030(2097) or BIOL 2061. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab; Denver Core Requirement, Biol Phys Sci - Lec.

BIOL 2011 - Organisms to Ecosystems Lab (Gen Bio) (1 Credit)

Investigations, observations, and experiments in evolution, bioinformatics, ecology, and animal behavior, anatomy, and physiology; requires off-campus field work. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Students are strongly encouraged to take BIOL 2010 concurrently or before they take this course. No co-credit with BIOL 2031(2098) or BIOL 2081. Term offered: fall, spring, summer. Max hours: 1 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab; Denver Core Requirement, Biol Phys Sci - Lab.

BIOL 2020 - Molecules to Cells (Gen Bio) (3 Credits)

Introduces four major areas of study: (1) the chemistry of biological systems; (2) the structure and function of the cell; (3) cellular energy transformations (photosynthesis and respiration); and (4) genetics (mitosis, meiosis, patterns of inheritance, molecular genetics). Note: This class is intended for students planning to take upper division biology courses and for biology majors. Biology majors and pre-health career students must also take the accompanying laboratory BIOL 2021. Prereq: BIOL 2010 (2061) or BIOL 2030 (2097) with a C- or higher. No co-credit with BIOL 2040(2095) or BIOL 2051. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (2061) or BIOL 2030 (2097) with a C- or higher.

Additional Information: GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab; Denver Core Requirement, Biol Phys Sci - Lec.

BIOL 2021 - Molecules to Cells Lab (Gen Bio) (1 Credit)

Introduces the basic scientific approach through investigations, observations, and experiments in cell biology, basic biochemical techniques, genetics, molecular genetics and applications of biotechnology. Note: This class is intended for students planning to take upper division biology courses and for biology majors. Prereq: BIOL 2010 (2061) or BIOL 2030 (2097) with a C- or higher. No co-credit with BIOL 2041(2096) or BIOL 2071. Term offered: fall, spring, summer. Max hours: 1 Credit. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (2061) or BIOL 2030 (2097) with a C- or higher.

Additional Information: GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab; Denver Core Requirement, Biol Phys Sci - Lab.

BIOL 2030 - Honors Organisms to Ecosystems (Gen Bio) (3 Credits)

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. Introduces four major areas of study: evolution, animal structure/function, plant structure/function, and ecology. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences Instructor permission required. No co-credit with BIOL 2010(2061) or BIOL 2097. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences

Typically Offered: Spring.

BIOL 2031 - Honors Organisms to Ecosystems Lab (Gen Bio) (1 Credit)

Honors level course limited to students in the BA/BS/MD, Denver Bound and UHL programs. Advanced study of evolution, plant and animal anatomy, developmental biology and includes two off-campus ecology field trips. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences. No co-credit with BIOL 2011(2081) or BIOL 2098. Term offered: spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences

BIOL 2040 - Honors Molecules to Cells (Gen Bio) (3 Credits)

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. Four major topics covered: the chemistry of biological systems, the structure/function of the cell, cellular energy transformations and genetics. Prereq: BIOL 2010 (2061) or BIOL 2030 (2097) with a C- or higher. Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01). Instructor permission required. No co-credit with BIOL 2020(2051) or BIOL 2095. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: BIOL 2010 (2061) or BIOL 2030 (2097) with a grade of C- or higher Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01)

Typically Offered: Fall.

BIOL 2041 - Honors Molecules to Cells Lab (Gen Bio) (1 Credit)

Honors level course limited to students in the BA/BS/MD, Denver Bound and UNHL programs. Introduces the basic scientific approach and report preparation through exercises and experiments in cell biology, basic biomedical techniques, genetics, molecular genetics and applications of biotechnology. Instructor permission required. Prereq: BIOL 2011(2081) or BIOL 2031 (2098) with a grade of C- or higher. Restriction: restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01). No co-credit with BIOL 2021(2071) or BIOL 2096. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prerequisite: BIOL 2011 (2081) or BIOL 2031 (2098) with a grade of C- or higher Restriction: Restricted to Biology honors students within the College of Liberal Arts and Sciences(student group BH01)

BIOL 2840 - Independent Study (1-3 Credits)

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Note: registration by special processing form only. Prereq: Students must have completed one year of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have completed 15 hours of BIOL courses with a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: 15 hours of BIOL courses with a 2.75 GPA in BIOL courses

BIOL 3020 - Practical Laboratory Skills (1 Credit)

Designed for Students who are interested in working in a professional biology laboratory. Covers improvement of manual dexterity skills, understanding common laboratory apparatus and handling biological macromolecules and living cells. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031(or 2081), CHEM 2038(or 2088), CHEM 2061(or 2091) and 2068(or 2098) with a C- or higher. Max Hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031(or 2081), CHEM 2038(or 2088), CHEM 2061(or 2091) and 2068(or 2098) with a C- or higher.

BIOL 3074 - Human Reproductive Biology (3 Credits)

Comprehensive study of anatomy and physiology of human reproduction. Embryogenesis of male and female reproductive systems and detailed analysis of contraception, world population growth, population control and implications of population growth are also covered. Note: Students will not receive credit for this class if they have already received credit for BIOL 4074. Prereq: BIOL 3611 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 3104 - Behavioral Genetics (3 Credits)

Interdisciplinary course on relationships between behavior and heredity, with emphasis on human behavioral genetics. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Cross-listed with PSYC 3104. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3124 - Introduction to Molecular Biology (3 Credits)

Provides an understanding of the structure and function of genetic material, with respect to the regulation of gene expression and protein synthesis. Emphasizes eukaryotic systems and understanding the significance of contemporary laboratory-based research. Prereq: BIOL 3832 with a grade of C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3832 with a C- or higher

BIOL 3134 - Advanced Topics (1-8 Credits)

Periodic examination of current topics in the field of biology. (See Schedule Planner for current topics). Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9.

BIOL 3137 - Advanced Special Topics with Lab (1-15 Credits)

Periodic examination of current topics in the field of biology. (See Schedule Planner for current topics). Prereq: BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) and BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Max hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Prereq: BIOL 2010 (or 2061/2097/2030) and BIOL 2011 (or 2081/2098/2031) and BIOL 2020 (or 2051/2095/2040) and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3225 - Human Physiology (4 Credits)

The basic orientation of the course is toward understanding the functioning of the body as a set of homeostatic mechanisms. Particular emphasis is placed on membrane potentials, muscle, circulation, respiration, digestion, the kidney, the control of metabolism and acid-based balance. Note: This is a combined lecture and lab course. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031(or 2081), CHEM 2038(or 2088), CHEM 2061(or 2091) and 2068(or 2098) with a C- or higher. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031(or 2081), CHEM 2038(or 2088), CHEM 2061(or 2091) and 2068(or 2098) with a C- or higher.

BIOL 3244 - Human Anatomy (5 Credits)

This course introduces structural aspects of the human body from a systems-based approach, in both lecture and laboratory. The systems addressed include the integument, skeletal, muscular, nervous, digestive, respiratory, circulatory, immune, renal, reproductive and endocrine systems. Anatomical models, microscope slides and human cadavers are used in lab. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Term offered: fall, spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3330 - Plant Diversity (3 Credits)

Surveys all major plant groups using evolutionary and ecological principles to interpret patterns of diversity in form and function. Topics include reproduction and life cycles, adaptations and ecological interactions, paleobotany and biogeography, classification and taxonomy and evolution. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3411 - Principles of Ecology (3 Credits)

A lecture course that examines the interrelationships between organisms and their environments. Subject matter includes organism, population and ecosystem levels of study and application to current environmental issues. The emphasis is on the underlying principles of ecology that involve all types of organisms. Note: Satisfies core ecology requirement for biology major. May not be used as upper division biology elective. No co-credit with BIOL 3412. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3413 - Ecology Laboratory (2 Credits)

Provides hands-on experiences in ecology and appreciation for using research tools to study ecological systems. Students will learn a wide range of techniques and concepts related to population, community, ecosystem, urban, and physiological ecology. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, or be concurrently enrolled in BIOL 3411 in order to enroll in this course. Max hours: 2 Credits.

Grading Basis: Letter Grade

Prereq or Co-req: BIOL 3411 with a C- or higher

BIOL 3445 - Introduction to Evolution (3 Credits)

Introduction to the processes and patterns of evolution. Topics include: history of evolutionary thought, origin of life, evidence for evolution, phylogenetics, evolutionary genetics, natural selection and other evolutionary forces, speciation and biodiversity, evolution of sexual reproduction and social organization. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3521 - Vertebrate Biology (3 Credits)

The Subphylum Vertebrata consists of fish, amphibians, reptiles, birds and mammals—some of the most fascinating and most threatened species on earth. This course covers the evolution, taxonomy, anatomy, physiology, ecology and conservation of these organisms. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3525 - Parasitology (3 Credits)

This course is designed to provide a foundation in parasitology and to improve skills in scientific writing to students interested in biodiversity, veterinarian medicine, public health, & health care. Prokaryotes are addressed briefly; the focus of this course is the natural history of 'traditional' eukaryotic parasites. Topics include evolutionary associations of parasites with plants and animals (including humans), modes of transmission, and general life cycles. Subject matter includes basic anatomy, epidemiology, and physiology, with a brief introduction to immunology. Note: may be used as an upper-division biology elective. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3611 - General Cell Biology (3 Credits)

Covers the structure and function of the cell including bioenergetics, membranes, secretion, respiration and the cell cycle. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031 (or 2081), CHEM 2038 (or 2088), CHEM 2061 (or 2091) and 2068 (or 2098) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031 (or 2081), CHEM 2038 (or 2088), CHEM 2061 (or 2091) and 2068 (or 2098) with a C- or higher.

BIOL 3612 - Cell Biology Laboratory (3 Credits)

Laboratory course covering topics in cell and molecular biology, such as protein folding, membrane potential, organelle function, cell signaling and fertilization; as well as associated methods, including microscopy, cell culture and PCR. Basic skills are emphasized in recitation and laboratory. Prereq: General cell biology with a grade of "C-" or higher or permission of instructor. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 3621 - Introduction to Immunology (3 Credits)

Provides an introduction to the basic concepts of immunology, including development of the immune system, innate immunity, aspects of the adaptive immune system, and the role of the immune system in disease, as well as allergies and autoimmunity. Prereq: BIOL 3611 and 3832 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 and 3832 with a grade of C- or higher

BIOL 3640 - Mammalogy (4 Credits)

Lecture, laboratory, and required field trips. This course provides a general overview of the biology of mammals, including their diversity, distribution, economic importance, and other characteristics that make them of special interest to humans. Coverage will be worldwide, with special emphasis placed on the mammals of Colorado. Note: Students will not receive credit for this class if they have already received credit for BIOL 4640. Prereq: BIOL 3411 with a grade of C- or higher. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 3654 - General Microbiology (5 Credits)

Covers all aspects of the biology of microorganisms: their cellular structures and function, growth and metabolism, general and molecular genetics, diversity and interactions with other organisms and the environment (ecology). The objective is to provide students with a thorough introduction to microbiology including basic micro-biological laboratory techniques. Note: This is a combined lecture and lab course. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031 (or 2081), CHEM 2038 (or 2088), CHEM 2061 (or 2091) and 2068 (or 2098) with a C- or higher. Term offered: fall, spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) AND CHEM 2031 (or 2081), CHEM 2038 (or 2088), CHEM 2061 (or 2091) and 2068 (or 2098) with a C- or higher.

BIOL 3674 - Endocrinology (3 Credits)

This systematic survey of the endocrine system looks at the cellular basis and biochemical characteristics of individual endocrine tissues. Their function in the regulation of other endocrinological, physiological, and behavioral events is analyzed. The course emphasizes the human system and complements studies in physiology, behavior and neurobiology. Prereq: BIOL 3611 with a grade of C- or higher. Students will not earn credit for this course if they have already earned credit for BIOL 4674. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 3763 - Biostatistics (4 Credits)

Introduces statistical thinking in biology. Emphasizes data exploration and probability-based inference methods including estimation, testing, and confronting models with data. Concepts and examples for general and applied biology, including ecology and the health sciences. Includes exposure to statistical software. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) and MATH 1110, or MATH 1120, or 1130, or 1401, or 2411, or 2421 or 2830 with a C- or higher. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) and MATH 1110, or MATH 1120, or 1130, or 1401, or 2411, or 2421 or 2830 with a C- or higher.

BIOL 3804 - Developmental Biology (3 Credits)

Covers gamete development, fertilization, and embryo development including establishing body axes, tissue differentiation and organ formation. Note: Students will not earn credit for BIOL 3804 if they have earned credit for BIOL 4054 and will not earn credit for BIOL 4054 if they have earned credit for BIOL 3804. Prereq: General cell biology with a grade of "C-" or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 3832 - General Genetics (3 Credits)

Introduces molecular, classical, developmental and population genetics. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3840 - Independent Study (1-3 Credits)

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Prereq: Students must have completed one year of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 3939 - Internship (1-3 Credits)

Approved internships will provide opportunities to apply classroom knowledge in a professional environment and expand the student's knowledge of biology. Associated coursework includes scientific reading/writing and presentation(s). Prereq: BIOL 2051 or 2095 and BIOL 2061 or 2097 with a C or higher AND have junior level standing with a 2.75 GPA. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: BIOL 2051 or 2095 and BIOL 2061 or 2097 with a C or higher AND have junior level standing with a 2.75 GPA.

BIOL 4024 - Introduction to Biotechnology (3 Credits)

Introduces aspects of biotechnology within a historical context, including medical, forensic, agricultural and microbial biotechnology. Addresses principles behind state-of-the-field techniques in recombinant DNA technology, bioinformatics, proteomics and genomics. Biotechnology regulations and ethics will also be discussed. Prereq: BIOL 3832 with a C- or higher. Cross-listed with BIOL 5024. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3832 with a C- or higher

BIOL 4050 - Advanced Biology Topics (1-8 Credits)

Examines current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Cross-listed with BIOL 5050. Repeatable. Max Hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 4052 - Advanced Ecology (3 Credits)

This combination seminar and lecture course focuses on state-of-field knowledge, current theories and recent models in selected areas of ecology, such as theoretical ecology, evolutionary ecology, population biology and ecosystems ecology. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5052. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4053 - Disease Ecology (3 Credits)

The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of disease. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5053. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4055 - Virology (3 Credits)

This is an upper level undergraduate/graduate class providing an in-depth study of the history of virology, different types of viruses, viral disease, research to combat viral infections, and different uses of viruses in biotechnology. Note: Students will not earn credit for this course if they have already earned credit for BIOL 4051 or BIOL 5051. Prereq: BIOL 3611 with a grade of C- or higher. Cross-listed with BIOL 5055. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 4064 - Cell Biology of Disease (3 Credits)

Builds on the foundations laid in the prerequisite courses. How alterations in membrane transport, autophagy, mitochondria, lysosomes, cilia, unfolded protein response and autophagy lead to major human diseases. A major emphasis is the control and integration of cellular activities. Prereq: General cell biology with a C- or higher. One semester of Biochemistry is strongly recommended for optimal student success. Cross listed with BIOL 5064. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 4125 - Molecular Biology Laboratory (3 Credits)

Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Prereq: BIOL 3124 with a C- or higher or Coreq: BIOL 3124. Cross-listed with BIOL 5125. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3124 with a C- or higher or Coreq: BIOL 3124

BIOL 4126 - Molecular Genetics (3 Credits)

Examines molecular techniques and their application to experimental genetics, specifically organization and mapping of genomes, application and model systems in defining hereditary components of disease, and mechanisms of identifying mutations and their implications for disease. Also addresses application of recombinant DNA technology. Prereq: Completion of Introduction to Molecular Biology with a C- or higher is required in order for students to enroll in this course. Cross-listed with BIOL 5126. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3124 with a C- or higher

BIOL 4128 - Topics in Molecular Biology (3 Credits)

Literature-based course examining the regulation of gene expression in eukaryotic systems, as well as contemporary recombinant DNA technology and applications of molecular cloning techniques. Prereq: BIOL 3124 with a C- or higher; biochemistry strongly recommended. Cross-listed with BIOL 5128. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3124 with a C- or higher

BIOL 4134 - Human Genetics (3 Credits)

Advanced survey of the current status of the field. Emphasis on understanding, diagnosis and treatment of genetic disease and on the impact of molecular biology on human genetics. Prereq: General genetics with a grade of "C-" or higher. Cross-listed with 5134. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3832 with a grade of C- or higher

BIOL 4144 - Medical Microbiology (3 Credits)

Provides an understanding of the relationship between pathogenic organisms and their host. Emphasis is placed on the area of medical bacteriology, with attention given to mechanisms of pathogenesis, genetics of disease, serology and treatment. Prereq: general microbiology with a grade of "C-" or higher. Cross-listed with BIOL 5144. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3654 with a grade of C- or higher

BIOL 4154 - Conservation Biology (3 Credits)

Basic concepts and theories in ecology, population biology and genetics as they apply to issues relating to the preservation of biodiversity, such as the genetics of small populations, captive propagation, restoration ecology and the design of nature reserves. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5154. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4165 - Neurobiology (3 Credits)

Overview of neuroscience, covering the cellular basis of neuronal activity, muscle, sensory structures and the structure and function of the human brain. Prereq: BIOL 3611 and PSYC 2220 with a C- or higher OR BIOL 3225 with a C- or higher. Cross-listed with BIOL 5165. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 and PSYC 2220 with a C- or higher OR BIOL 3225 with a C- or higher.

BIOL 4225 - Genomics and Bioinformatics (3 Credits)

Explores how genome-wide data are collected and analyzed. Example applications include human disease, microbial evolution, ecological genomics, and parasite drug resistance. Students implement projects based on real DNA sequencing data. Prereq: BIOL 3832 with a C- or higher. Cross-listed with BIOL 5225. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: BIOL 3832 with a C- or higher.

BIOL 4250 - Mechanisms of Animal Behavior (3 Credits)

The proximate and ultimate mechanisms of animal behavior are analyzed using comparative animal examples from the scientific literature. Proximate mechanisms include genetic and physiological processes. Ultimate mechanisms include the role of natural and sexual selection in the evolution of behavior. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher. Genetics and human physiology are recommended. Cross-listed with BIOL 5250. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 4335 - Plant Science (4 Credits)

Lecture, lab and field trips. An in-depth study of flowering plants, including embryology, structure, function, reproduction, ecology and evolution of the group. Emphasis is placed upon morphology and anatomy at all stages of plant development. Prereq: One year of General Cell Biology (BIOL 3611) with a grade of "C-" or higher. Cross-listed with BIOL 5335. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 4345 - Flora of Colorado (4 Credits)

Lecture, lab and field trips. Introduces the vascular plant flora of Colorado, including ferns, gymnosperms and flowering plants. Emphasis on field identification of species representing a range of natural communities from grassland to alpine tundra, as well as non-natives. Field and herbarium techniques covered. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5345. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4415 - Microbial Ecology (3 Credits)

An in-depth study of ecology as it relates to microorganisms; abiotic and biotic interactions within microbial populations in macro- and microhabitats; and the role of microorganisms in maintaining steady state conditions in natural ecosystems. Emphasis is placed on how the ecology of microorganisms affects the human condition. Prereq: General microbiology with a grade of "C-" or higher. Cross-listed with BIOL 5415. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3654 with a grade of C- or higher

BIOL 4425 - Biogeography (3 Credits)

An in-depth study of biological populations through analysis of geographic distribution patterns in space and time. Emphasis on how biogeography informs studies of evolution and ecology and on applied studies in conservation, sustainability, epidemiology, and disease dynamics. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5425. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4430 - Introduction to Spatial Ecology (3 Credits)

Focuses on patterns of life and ecological interactions in space. Emphasis on drivers of patterns, practical application of spatial ecology software, programming, and introductory spatial statistics on the quantification of patterns. Main topics: Scale and scaling, pattern development, detecting and characterizing patterns, temporal dynamics, and implications of spatial structure to conservation biology, resilience, and ecosystem functioning. Cross-listed with BIOL 5430. Prereq: BIOL 3411 with C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3411 with C- or higher.

BIOL 4460 - Environmental Toxicology (3 Credits)

Text and literature-based course provides students with background knowledge concerning environmental toxins, the nature and extent of environmental contamination, and toxicant effects on individual organisms and populations. Prereq: BIOL 3611 with a grade of C- or higher. Cross-listed with BIOL 5460. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 4464 - Exercise Physiology (3 Credits)

This course addresses the dynamic physiological changes associated with exercise. Where human physiology addresses physiological processes at rest, this course explores how the cardiovascular, respiratory, nervous and endocrine systems support increased energy transfer as skeletal muscle becomes more active. Prereq: Human Physiology (BIOL 3225 or equivalent) with a grade of C- or higher. Cross-listed with BIOL 5464. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3225 with a grade of C- or higher

BIOL 4475 - Mechanisms of Human Pathology (3 Credits)

Studies physiological, cellular and biochemical processes in human diseases. Mechanisms of inflammatory diseases, infectious diseases, neoplastic diseases, and others will be examined. Prereq: BIOL 3225 or BIOL 3244 with a grade of C- or higher. Cross-listed with BIOL 5475. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: BIOL 3225 or BIOL 3244 with a C- or higher

BIOL 4494 - Population and Evolutionary Genetics (3 Credits)

Introduces the genetic processes underlying evolutionary change in microbial, plant and animal populations. Topics include: sources of variation, Hardy-Weinberg equilibrium, population genetic structure, natural selection and other evolutionary forces, quantitative genetics and molecular phylogenetics. Emphasis on experimental data. Prereq: Completion of General Genetics and Introduction to Evolution with a C- or higher is required in order for students to enroll in this course. Cross-listed with BIOL 5494. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3832 and BIOL 3445 with a C- or higher

BIOL 4550 - Cell Signaling (3 Credits)

Lecture by faculty and student presentations cover mechanism of hormones and regulation of various cellular processes through second messenger systems. Prereq: General cell biology with a grade of "C-" or higher; one semester of biochemistry recommended. Cross-listed with BIOL 5550. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 with a C- or higher

BIOL 4622 - Topics in Immunology (3 Credits)

An in-depth study of immunological concepts. Topics will vary from semester to semester and may range from specifics of immune cell responses to tolerance and autoimmunity. Delivery will include lecture, student presentations, and discussion. Prereq: BIOL 3621 with a C- or higher. Cross-listed with BIOL 5622. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3621 with a C- or higher

BIOL 4634 - Biology of Cancer (3 Credits)

Cancer is the second leading cause of death in the United States. This course offers an overview of recent research into the causes, treatments and possible prevention of cancer. Includes a detailed look at the mechanisms of action of various oncogenes. Prereq: BIOL 3611 and BIOL 3832 with a C- or higher. Cross-listed with BIOL 5634. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3611 and BIOL 3832 with a C- or higher.

BIOL 4644 - Advanced Human Anatomy Laboratory (2 Credits)

Advanced laboratory course in human anatomy. In-depth look at the structural aspects of the human body, emphasizing function. Models, microscope slides, and visual media will supplement cadaver-based dissections. Prereq: One year of general biology and human anatomy with a grade of "C-" (2.0) or higher. Cross-listed with BIOL 5644. Term offered: fall, spring. Max hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3244 with a C- or higher.

BIOL 4815 - Structural Biology of Neurodegenerative Diseases (3 Credits)

Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331. Cross-listed with CHEM 4815, CHEM 5815, and BIOL 5815. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331

BIOL 4825 - Biochemistry of Metabolic Disease (3 Credits)

Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331. Cross-listed with CHEM 4825, CHEM 5825, and BIOL 5825. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331

BIOL 4835 - Biochemistry of Gene Regulation and Cancer (3 Credits)

Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331. Cross-listed with CHEM 4835, CHEM 5835, and BIOL 5835. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: 1) BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), and 2) CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Coreq: PHYS 2020 or PHYS 2331

BIOL 4840 - Independent Study (1-6 Credits)

Student will contribute to ongoing faculty or graduate student's lab or field-based investigation that makes an original intellectual or creative contribution to the discipline. Associated coursework includes scientific reading/writing/presentation(s). Note: Registration by special processing form only. Prereq: Students must have completed one year of general biology with a grade of "C-" or higher and must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041) with a C- or higher.

BIOL 4880 - Directed Research (1-6 Credits)

A student designed lab or field-based investigation that involves data collection, and that makes an original intellectual or creative contribution to the discipline. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

BIOL 4910 - Field Studies (3 Credits)

Field studies of individuals, populations and communities comprising a specified ecosystem. Emphasis on field identification of vascular plants and vertebrate animals. Topics include the physical environment, biotic and abiotic interactions, life history, ecological adaptations and biogeography. Note: Lectures and a week-long field trip. Prereq: Students must have completed BIOL 3411 (Principles of Ecology) with a C- or higher, in order to enroll in this course. Cross-listed with BIOL 5910.

Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: BIOL 3411 with C- or higher.

BIOL 4974 - Advanced Evolution (3 Credits)

A capstone course that draws upon concepts from all fields of biology. Topics include the fossil record, mass extinctions, the historical development of the modern synthesis, principles and mechanisms of evolution, current viewpoints and controversies. Prereq: BIOL 3445 and 3832 with a C- or higher. Cross-listed with BIOL 5974. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOL 3445 and 3832 with a grade of C- or higher

BIOL 4990 - Undergraduate Research Seminar (1 Credit)

Introduces research in the biological sciences. Students read current scientific literature, attend related seminars and participate in discussions. This course offers students a chance to interact with visiting scientists, who will present state-of-the-field biological research in a seminar setting. Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), and BIOL 2021 (or 2071/2096/2041), BIOL 3411, BIOL 3445, BIOL 3611 and BIOL 3832 with a C- or higher. Restriction: Restricted to Senior standing or higher with an overall GPA of 3.0 or higher. Cross-listed with BIOL 6655. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: BIOL 2010 (or 2061/2097/2030), BIOL 2011 (or 2081/2098/2031), BIOL 2020 (or 2051/2095/2040), BIOL 2021 (or 2071/2096/2041), BIOL 3411, 3445, 3611 and BIOL 3832 with a C- or higher. Restriction: Senior standing or higher with GPA of 3.0 or higher.

Biology, BS

Introduction

Please click here (p. 478) to see Integrative Biology department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges

students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 63 credit hours, including a minimum of 36 BIOL credit hours and 27 credit hours in ancillary coursework.
2. Students must complete a minimum of 18 upper division (3000- level and above) BIOL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 upper division (3000-level and above) BIOL credit hours with CU Denver faculty and at least 3 credits must be at 4000-level.

Program Restrictions, Allowances and Recommendations

1. All upper division biology courses applied to the undergraduate biology major must be completed within 10 years of graduation.
2. Biology majors are advised to complete either ENGL 3154 Technical Writing or ENGL 4175 Writing in the Sciences to fulfill the CLAS Communicative Skills requirement.
3. Undergraduate students may count up to 6 credit hours of independent study or internship (any combination of BIOL 3840 Independent Study, BIOL 3939 Internship, BIOL 4840 Independent Study, BIOL 4880 Directed Research) toward the upper-division Biology electives requirement in the major.

Required Courses

Code	Title	Hours
Complete the following		20
BIOL 2010 or BIOL 2030	Organisms to Ecosystems (Gen Bio) Honors Organisms to Ecosystems (Gen Bio)	3
BIOL 2011 or BIOL 2031	Organisms to Ecosystems Lab (Gen Bio) Honors Organisms to Ecosystems Lab (Gen Bio)	1
BIOL 2020 or BIOL 2040	Molecules to Cells (Gen Bio) Honors Molecules to Cells (Gen Bio)	3

BIOL 2021 or BIOL 2041	Molecules to Cells Lab (Gen Bio) Honors Molecules to Cells Lab (Gen Bio)	1
BIOL 3411	Principles of Ecology	3
BIOL 3445	Introduction to Evolution	3
BIOL 3611	General Cell Biology	3
BIOL 3832	General Genetics	3

Upper Division Biology Electives

Upper Division-Level Biology Lab

Code	Title	Hours
<i>Complete at least one upper division level (3000 or higher) Biology lab course from the list below.</i>		2
BIOL 3137	Advanced Special Topics with Lab	2
BIOL 3225	Human Physiology	4
BIOL 3244	Human Anatomy	5
BIOL 3413	Ecology Laboratory	2
BIOL 3612	Cell Biology Laboratory	3
BIOL 3640	Mammalogy	4
BIOL 3654	General Microbiology	5
BIOL 4125	Molecular Biology Laboratory	3
BIOL 4335	Plant Science	4
BIOL 4345	Flora of Colorado	4
BIOL 4644	Advanced Human Anatomy Laboratory	2
BIOL 4910	Field Studies	3

4000-Level Biology Elective

Code	Title	Hours
<i>Take at least one 3 credit hour 4000 level biology lecture course from CU Denver Biology faculty.</i>		3
BIOL 4024	Introduction to Biotechnology	3
BIOL 4050	Advanced Biology Topics	3
BIOL 4052	Advanced Ecology	3
BIOL 4053	Disease Ecology	3
BIOL 4055	Virology	3
BIOL 4064	Cell Biology of Disease	3
BIOL 4126	Molecular Genetics	3
BIOL 4128	Topics in Molecular Biology	3
BIOL 4134	Human Genetics	3
BIOL 4144	Medical Microbiology	3
BIOL 4154	Conservation Biology	3
BIOL 4165	Neurobiology	3
BIOL 4225	Genomics and Bioinformatics	3
BIOL 4250	Mechanisms of Animal Behavior	3
BIOL 4335	Plant Science	4
BIOL 4345	Flora of Colorado	4
BIOL 4415	Microbial Ecology	3
BIOL 4425	Biogeography	3
BIOL 4430	Introduction to Spatial Ecology	3
BIOL 4460	Environmental Toxicology	3
BIOL 4464	Exercise Physiology	3
BIOL 4475	Mechanisms of Human Pathology	3
BIOL 4494	Population and Evolutionary Genetics	3

BIOL 4550	Cell Signaling	3
BIOL 4622	Topics in Immunology	3
BIOL 4634	Biology of Cancer	3
BIOL 4815	Structural Biology of Neurodegenerative Diseases	3
BIOL 4825	Biochemistry of Metabolic Disease	3
BIOL 4835	Biochemistry of Gene Regulation and Cancer	3
BIOL 4974	Advanced Evolution	3

Upper Division Level Biology Electives

Code Title Hours
Choose upper division level (3000 or higher) biology electives, not already taken above. Take at least 11 additional credits or enough credits to reach the minimum required total of 36 BIOL credits.

BIOL 3020	Practical Laboratory Skills	1
BIOL 3074	Human Reproductive Biology	3
BIOL 3104	Behavioral Genetics	3
BIOL 3124	Introduction to Molecular Biology	3
BIOL 3134	Advanced Topics	1-8
BIOL 3137	Advanced Special Topics with Lab	1-15
BIOL 3225	Human Physiology	4
BIOL 3244	Human Anatomy	5
BIOL 3330	Plant Diversity	3
BIOL 3413	Ecology Laboratory	2
BIOL 3521	Vertebrate Biology	3
BIOL 3525	Parasitology	3
BIOL 3612	Cell Biology Laboratory	3
BIOL 3621	Introduction to Immunology	3
BIOL 3640	Mammalogy	4
BIOL 3654	General Microbiology	5
BIOL 3674	Endocrinology	3
BIOL 3763	Biostatistics	4
BIOL 3804	Developmental Biology	3
BIOL 3840	Independent Study	1-3
BIOL 3939	Internship	1-3
BIOL 4024	Introduction to Biotechnology	3
BIOL 4050	Advanced Biology Topics	1-8
BIOL 4052	Advanced Ecology	3
BIOL 4053	Disease Ecology	3
BIOL 4055	Virology	3
BIOL 4064	Cell Biology of Disease	3
BIOL 4125	Molecular Biology Laboratory	3
BIOL 4126	Molecular Genetics	3
BIOL 4128	Topics in Molecular Biology	3
BIOL 4134	Human Genetics	3
BIOL 4144	Medical Microbiology	3
BIOL 4154	Conservation Biology	3
BIOL 4165	Neurobiology	3
BIOL 4225	Genomics and Bioinformatics	3
BIOL 4250	Mechanisms of Animal Behavior	3
BIOL 4335	Plant Science	4
BIOL 4345	Flora of Colorado	4
BIOL 4415	Microbial Ecology	3
BIOL 4425	Biogeography	3

BIOL 4430	Introduction to Spatial Ecology	3
BIOL 4460	Environmental Toxicology	3
BIOL 4464	Exercise Physiology	3
BIOL 4475	Mechanisms of Human Pathology	3
BIOL 4494	Population and Evolutionary Genetics	3
BIOL 4550	Cell Signaling	3
BIOL 4622	Topics in Immunology	3
BIOL 4634	Biology of Cancer	3
BIOL 4644	Advanced Human Anatomy Laboratory	2
BIOL 4815	Structural Biology of Neurodegenerative Diseases	3
BIOL 4825	Biochemistry of Metabolic Disease	3
BIOL 4835	Biochemistry of Gene Regulation and Cancer	3
BIOL 4840	Independent Study	1-6
BIOL 4880	Directed Research	1-6
BIOL 4910	Field Studies	3
BIOL 4974	Advanced Evolution	3
CHEM 3810	Biochemistry	4
CHEM 4820	General Biochemistry II	3

Ancillary Coursework

Code Title Hours

Take all of the following Ancillary Core courses:

Chemistry

Code	Title	Hours
<i>Take all of the following</i>		13
CHEM 2031	General Chemistry I	3
or CHEM 2081	Honors General Chemistry I	
CHEM 2038	General Chemistry Laboratory I	1
or CHEM 2088	Honors General Chemistry I Laboratory	
CHEM 2061	General Chemistry II	3
or CHEM 2091	Honors General Chemistry II Lecture	
CHEM 2068	General Chemistry Laboratory II	2
or CHEM 2098	Honors General Chemistry II Laboratory	
CHEM 3411	Organic Chemistry I	4

Physics

Code	Title	Hours
<i>Take the following courses ¹</i>		10
PHYS 2010	College Physics I	4
or PHYS 2311	General Physics I: Calculus-Based	
PHYS 2321	Intro Experimental Phys Lab I	1
PHYS 2020	College Physics II	4
or PHYS 2331	General Physics II: Calculus-Based	
PHYS 2341	Intro Experimental Phys Lab II	1

- ¹ PHYS 2321 Intro Experimental Phys Lab I and PHYS 2341 Intro Experimental Phys Lab II are specifically designed for students in non-Physics majors and can be paired with either PHYS 2010 College Physics I and PHYS 2020 College Physics II or PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based lectures. Students pursuing a second major in Physics should complete PHYS 2311 General Physics I: Calculus-Based and PHYS 2331 General Physics II: Calculus-Based and PHYS 2351 Applied Physics Lab I and PHYS 2361 Applied Physics Lab II.

Math

Code	Title	Hours
<i>Take one of the following Ancillary Math options</i>		

Code	Title	Hours
Option I		

Complete the following

MATH 1401	Calculus I	4

Code	Title	Hours
Option II: Take one from list A and one from list B		

A) Complete one of the following lower division level General Education Math courses

MATH 1070	College Algebra for Business	3
MATH 1080	Calculus for Social Sciences and Business	3
MATH 1108 & MATH 1109	Stretch College Algebra-Part 1 and Stretch College Algebra-Part 2	6
MATH 1110	College Algebra	4
MATH 1120	College Trigonometry	3
MATH 1130	Precalculus Mathematics	4

B) Complete one of the following upper division statistics courses

BIOL 3763	Biostatistics	4
MATH 4830	Applied Statistics	3

Biology Minor

Introduction

Please click here (p. 478) to see Integrative Biology department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your CLAS advisor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 27 credit hours, including a minimum of 18 BIOL credit hours and 9 credit hours in ancillary coursework.
2. Students must complete a minimum of 9 upper-division (3000-level and above) BIOL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 upper division level BIOL credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. All upper-division biology courses applied to the undergraduate biology major must be completed within 10 years of graduation.

Required courses

Code	Title	Hours
<i>Take all of the following</i>		8
BIOL 2010 or BIOL 2030	Organisms to Ecosystems (Gen Bio) Honors Organisms to Ecosystems (Gen Bio)	3
BIOL 2011 or BIOL 2031	Organisms to Ecosystems Lab (Gen Bio) Honors Organisms to Ecosystems Lab (Gen Bio)	1
BIOL 2020 or BIOL 2040	Molecules to Cells (Gen Bio) Honors Molecules to Cells (Gen Bio)	3
BIOL 2021 or BIOL 2041	Molecules to Cells Lab (Gen Bio) Honors Molecules to Cells Lab (Gen Bio)	1
Code	Title	Hours
<i>Take two of the following</i>		6
BIOL 3411	Principles of Ecology	3
BIOL 3445	Introduction to Evolution	3
BIOL 3611	General Cell Biology	3
BIOL 3832	General Genetics	3

Upper Division Biology Electives

Code	Title	Hours
<i>Take at least two upper division level Biology courses (3000 or higher), including at least one of the following labs¹</i>		4
BIOL 3137	Advanced Special Topics with Lab	1-15
BIOL 3225	Human Physiology	4
BIOL 3244	Human Anatomy	5
BIOL 3413	Ecology Laboratory	2
BIOL 3612	Cell Biology Laboratory	3
BIOL 3640	Mammalogy	4
BIOL 3654	General Microbiology	5
BIOL 4125	Molecular Biology Laboratory	3
BIOL 4335	Plant Science	4
BIOL 4345	Flora of Colorado	4
BIOL 4644	Advanced Human Anatomy Laboratory	2
BIOL 4910	Field Studies	3

¹ BIOL 3020 Practical Laboratory Skills will not satisfy this requirement.

Biotechnology Certificate

Introduction

Please click here (p. 478) to see Integrative Biology department information.

Biotechnology is a rapidly growing field in Colorado and nationally that encompasses many disciplines. Agriculture, biofuels, biomedical biotechnology, pharmaceuticals, microbiology, and medical device development are all well-represented areas of biotechnology in Colorado. The Department of Integrative Biology offers a Certificate program in Biotechnology that allows students to acquire foundational knowledge and specialized skills relevant to these research areas. The certificate is designed to provide a strong background in biochemistry and molecular biology, with an emphasis on applied training via lab work and research experiences. Upon completion of the requirements, students obtain

recognition in the form of a Certificate and official designation on their transcript.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Certificate

Students may earn the certificate while working on their Bachelors Degree# or, the courses may be taken through non#degree admission. All admissions questions should be directed to the Registrar's office. All questions regarding tuition and fees should be directed to the Bursar's office.

Students interested in completing the Biotechnology certificate should contact the Department of Integrative Biology. (https://clas.ucdenver.edu/integrative-biology/academics/certificates/#biotechnology_certificate-93) A certificate will be issued and noted on your transcript upon proof of satisfactory completion of the course work. You must contact the Biotechnology Certificate faculty advisor no later than the start of the semester of graduation in order for the certificate recognition to appear on your transcripts.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 17 credits from approved courses.
2. Students must complete a minimum of 17 upper division (3000-level and above) credit hours from approved courses.
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All courses used to satisfy the requirements for the Certificate must be completed at CU Denver.

Program Restrictions, Allowances and Recommendations

1. Individual courses used to earn the Biotechnology Certificate carry prerequisites that must be met before enrolling.
2. All courses used to satisfy the requirements for the Certificate must be completed within a five-year period.
3. You must contact the Biotechnology Certificate faculty advisor (Dr. Chris Miller) no later than the start of the semester of graduation in order for the certificate recognition to appear on your transcripts.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		<i>15-16</i>
BIOL 3124	Introduction to Molecular Biology	3
BIOL 4024	Introduction to Biotechnology	3
BIOL 4125	Molecular Biology Laboratory	3
BIOL 3939	Internship	3
or BIOL 4880	Directed Research	
CHEM 3810	Biochemistry	3-4
or CHEM 4820	General Biochemistry II	

Elective Courses

Code	Title	Hours
<i>Take one elective from among those listed below, or a course pre-approved by the Biotechnology Certificate faculty advisor</i>		<i>2-4</i>
BIOL 3612	Cell Biology Laboratory	3
BIOL 3763	Biostatistics	4
BIOL 4055	Virology	3
BIOL 4064	Cell Biology of Disease	3
BIOL 4134	Human Genetics	3
BIOL 4144	Medical Microbiology	3
BIOL 4225	Genomics and Bioinformatics	3
BIOL 4622	Topics in Immunology	3
BIOL 4634	Biology of Cancer	3
CHEM 3111	Analytical Chemistry	3
CHEM 4121	Instrumental Analysis	3
CHEM 4828	Biochemistry Lab	2
CHEM 4835	Biochemistry of Gene Regulation and Cancer	3

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/integrative-biology/academics/certificates/#biotechnology_certificate-93).

Environmental Stewardship of Indigenous Lands Undergraduate Certificate

Introduction

The Environmental Stewardship of Indigenous Lands (ESIL) certificate is an exciting educational opportunity at the University of Colorado Denver (CU Denver), where Indigenous comprises the terms Native American, American Indian, Alaskan Native, and Hawaiian Native. The ESIL certificate provides a unique training opportunity for students to combine a passion for protecting natural resources with a desire to communicate across diverse cultures and schools of thought. This unique program provides training, internships, and job placement for students interested in environmental issues involving tribal and non-tribal entities.

The certificate is available to current CU Denver undergraduate students, post-baccalaureate students, and transfer students. While the certificate is open to students from all educational backgrounds, ESIL targets students majoring in science, technology, engineering, and mathematics (STEM).

Additionally, the ESIL certificate incorporates professional training through extracurricular activities and internships. The extracurricular activities provide students with culturally-relevant exposure to topics such as tribal independence, environmental law, transcultural competency, and traditional ecological knowledge (TEK). Both the STEM curriculum and culturally-relevant knowledge are applied during internships in which students practice facilitation as tribal liaisons with partner organizations including Indigenous tribes and government agencies (State and Federal).

These degree requirements are subject to periodic revision by the ESIL certificate advisors. Exceptions and substitutions for individual cases will be made by ESIL advisors only. Students in the ESIL program are required to meet with their assigned advisor before the start of each semester to confirm best plans of study.

The ESIL program is offered at the undergraduate level.

ESIL Academic Advisors

- Dr. David Mays (David.Mays@ucdenver.edu) in the Department of Civil Engineering
- Dr. Rafael Moreno-Sanchez (Rafael.Moreno@ucdenver.edu) in the Department of Geography and Environmental Sciences
- Dr. Timberley Roane (Timberley.Roane@ucdenver.edu) in the Department of Integrative Biology

Program Delivery

This is an on-campus program, with an off-campus internship requirement.

Declaring This Certificate

Admission Requirements:

Students must officially declare their interest in enrolling in the ESIL certificate program following the link at <https://clas.ucdenver.edu/esil/>.

Upon enrollment in the ESIL certificate program, students participate in the ESIL program activities, complete at least one ESIL internship, and take the ESIL coursework. In addition to the certificate requirements, students are also required to complete any STEM courses identified by the ESIL program director.

Eligibility:

Students in any discipline are eligible for admission in the certificate. Students from a non-STEM background may have to complete STEM coursework to meet the STEM expectations of the certificate.

General Requirements

Students must satisfy all requirements as outlined below.

- Click here (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 12 credit hours of approved courses.
2. Students must complete a minimum of six upper division level (3000-level and above) credits from approved courses.
3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective

courses are calculated in the certificate GPA. Students cannot complete certificate course requirements as pass/fail.

- Students must complete a minimum of 12 credit hours of approved course with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

- It is expected that students have a STEM background for completion of the certificate. For most STEM students, the STEM degree serves as the background needed. For non-STEM students, additional certificate related STEM coursework may be required. For the certificate recognition to appear on the student's transcript, students must meet all curricular and co-curricular requirements and meet with an ESIL advisor no later than the start of the semester of graduation.
- Students must be enrolled in one course per year to maintain active status in the certificate program.
- Participation is required in ESIL workshops and seminars.
- ESIL internships are designed to expose students to the professional practice of facilitation and offer important connections and networking opportunities directly with agencies who hire tribal liaisons. Assignment and completion of the internship must be pre-approved by an ESIL advisor. The ESIL certificate requires a written report and presentation to demonstrate proficiency for each internship. The ESIL certificate requires at least one internship through the ESIL program. All students must work with their ESIL advisor for the placement in the required ESIL internship. Some majors may allow students to earn and apply internship credit toward their degree.
- The ESIL certificate requires the courses listed below. Each course applied to the ESIL certificate may carry prerequisites that must be met prior to course enrollment.

Required courses

Code	Title	Hours
<i>Take one of the following</i>		3
BIOL 3763	Biostatistics	4
CVEN 3611	Engineering Statistics	3
CVEN 5381	Introduction to Geographic Information Systems	3
GEOG 4770	Applied Statistics for the Natural Sciences	3
GEOG 4080	Introduction to GIS	3
MATH 2830	Introductory Statistics	3
MATH 4830	Applied Statistics	3

Internship

Code	Title	Hours
<i>All students must complete an ESIL approved internship or equivalent coursework.</i>		3
BIOL 3939	Internship ¹	3
GEOG 3939	Internship ¹	3

- ¹ Students must work in advance with their ESIL advisor to have their internship or other coursework approved.

Electives

Code	Title	Hours
<i>Take two of the following:</i>		6
COMM 3271	Communication and Diversity ²	
ETST 3036	American Indian Cultural Images ²	
ETST 3110	Indigenous Studies	
MGMT 4100	Leveraging Diversity and Inclusion in Business ²	
PSCI 3214	Federal Law and American Indians	
PSCI 4144	Indigenous Political Systems	
PSCI 4146	Indigenous Politics	

- ² These courses fulfill the core curriculum requirement for cultural diversity.

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/esil/learning-outcomes/>).

Interdisciplinary Programs

Overview

Interdisciplinary programs encourage students to synthesize the theories, methods and analytical perspectives of diverse disciplines to bring new ways of understanding to particular themes or problems. Interdisciplinary studies foster research and teaching collaboration among faculty and students, who cross traditional academic specialties. Interdisciplinary programs also place a high value on reaching beyond the university into our local, national and global communities, providing students with real-world experiences through internships and experiential learning.

The college also has several established interdisciplinary programs leading to full undergraduate degrees, minors, certificates and graduate degrees. A brief description of each program follows, with a link to its respective program section.

Graduate Information

Please go to the **Graduate** catalog to read about our graduate programs

Undergraduate Information

- Health is one of the fastest growing industries in the US and the Bureau of Labor Statistics has projected increasing demand and labor shortages for at least the next ten years. The CU Denver **Post-Baccalaureate Allied and Professional Health Sciences Certificate** was developed as an opportunity for the many students who already have a bachelor's degree and want to shift their career into this large and fast growing industry to improve employment opportunities and potential earnings.
- The increasing prominence of China in world affairs has made knowledge of Chinese language and cultures an asset in numerous fields. The innovative Minor in Chinese Studies (p. 573) offers a specialized study of China through coursework in the related disciplines of language, anthropology, history, geography, literature and political science.
- The Civics, Public Policy and Equity (p. 681) is designed to help students from any disciplinary major develop competencies and skills regarding United States civics from diverse perspectives. The certificate provides students with many course options to complete introductory and advanced coursework tailored to their

individual interests. This certificate promotes civic engagement and participation in the political process.

- From social media and mobile phones to the algorithms in self-driving cars, digital and information technologies are everywhere. The Digital Studies Certificate (p. 682) provides students with the opportunity to investigate the relationships between new communication technologies and society and to develop skills creating digital media messages and products.
- The **K-12 Teacher Licensure Programs**, in collaboration with the School of Education & Human Development, enable students to add educational training to their liberal arts and sciences discipline studies.
- The Minor in Environmental Sciences (p. 424) allows students to choose courses from the social sciences, physical sciences, engineering, humanities and statistics to create a unique program of study.
- The Ethnic Studies BA (p. 398) and the Minor in Ethnic Studies (p. 399) provide students the opportunity, through academic investigation, to develop a greater understanding of the cultural pluralism of the present day United States and to acquire skills needed in professional and social service fields.
- The Individually Structured Major (ISMA) (p. 468) gives students an opportunity to construct a major that meet their unique needs and interests. Students pursue studies that combine coursework from two, three, or even more academic units to explore a particular theme. The ISM challenges students to ask questions that require thinking beyond a single discipline.
- In a world where global commerce and politics have emerged as driving forces, the International Studies Major (p. 495) provides students with innovative perspectives on changes that affect all of us. INTS is designed to provide students a thorough education in international issues while preparing them for global careers. The major offers students the opportunity to develop a deeper understanding of complex international issues and the forces that are shaping our world.
- The Minor in Health Humanities (p. 444) explores the ethical, cultural, social and political contexts of health and medicine, providing an excellent addition to science-based curricula serving as a stand-alone program that addresses many current issues of interest to the humanities and social sciences.
- The Humanities Minor (p. 467) cultivates humanistic exploration through historically grounded texts and traditions. It teaches critical engagement with society's most pressing issues by developing a human-oriented perspective in which creativity and critical, theoretical thinking frame ethical being in the world.
- The **Minor in Law Studies** is intended to help students become intelligent and critical scholars of legal and political discourse. While the minor may be useful for students contemplating law school, it is also intended to appeal to a wider group of students interested in issues relating to law and society and careers in public policy related fields.
- The Professional Skills Certificate (p. 684) certificate is designed for undergraduate students seeking to acquire and enhance diverse workplace skills that are highly valued by today's employers. Students will learn to communicate effectively, write persuasively, and develop proficiency in digital and media literacy or data literacy.
- The **Public Health Majors** enable students to get either a BA or BS degree in public health, depending on their focus. They may choose from over 100 electives in 14 academic departments, in addition to specific public health core courses.

- Religion involves the worldview of a culture, its social norms, ethics, and politics. In the private realm, religious experiences are among the most profound an individual can have. The **Minor in Religious Studies** fosters a nuanced understanding of religion, and cultivates critical skills evaluating religious phenomena.
- The **Minor in Social Justice** encourages students to recognize how democracy, education, consumerism, media, race, class and gender intersect. The minor fosters the many ways that our students are already engaged as citizens, the desirable possibilities that remain unrealized and their power to effect that actualization.
- Holistic approaches to sustainability practices in our daily living require a workforce that understands the various perspectives that address a broad optimistic framework. Students who complete the **Minor in Sustainability** will demonstrate a command of the language, structure and skills of multiple, relevant disciplines, and will be better prepared to take leadership in this complex, challenging field.
- The **Minor in Women's and Gender Studies** focuses students' attention on the centrality of gender and sexuality to understanding our past and present worlds. Students and faculty probe assumptions about men and women, and question structures of inequality as they play out in local and global contexts.

Interdisciplinary Programs (IDST)

IDST 4000 - Special Topics (1-3 Credits)

Cross-listed with IDST 5000. Note: May be taken more than once for credit when topics vary. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

IDST 4010 - Foundations of STEM Communication (3 Credits)

This course will provide students with an introduction to STEM communication and offer opportunities for developing STEM content for a variety of audiences across multiple formats. These formats span written, oral, digital, and social media communication. Through classroom exercises and assignments, students will understand the role of communication in shaping perceptions, knowledge, decisions and ultimately realities vis-a-vis STEM. They will also learn to provide critical analysis of popular mainstream STEM communication and be able to identify basic expectations and constraints of STEM communication across audience and context. The class will explore approaches to communicating concepts in STEM disciplines to a variety of audiences through practice. Ultimately, the students will develop the skills and resources necessary to enable effective communication of complex STEM ideas to a wide range of audiences. Note: Students may not earn credit if they have already received credit for IDST topics courses with a similar title. Suggested background: Students are recommended to have completed at least one undergraduate sequence in a STEM discipline before enrolling in this course. Cross-listed with IDST 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

International Studies

Overview

In a world where the forces of politics, commerce, culture, and technology are multifaceted and interconnected, the International Studies (INTS) major provides students with a much-needed global perspective. INTS is an interdisciplinary liberal arts degree that prepares students for international careers and graduate study. The INTS major offers students a deep understanding of complex international issues and the underlying drivers that are shaping our world. Employers seek the qualities of

INTS graduates: historical knowledge, research ability, cross-cultural competence, teamwork and leadership experience, and the ability to analyze, model, and solve real-world problems. According to the National Association of Colleges and Employers (NACE), International Studies graduates earn higher starting salaries than any other social science major, except Economics. The INTS major provides students with the methodological tools necessary to analyze various regions of the world and global issues from different academic disciplines. Students take courses from departments including Anthropology, Business, Communication, Economics, Geography, History, Modern Languages, Political Science, and Religious Studies, among others. This combination of coursework, flexibility, and customization provides INTS majors a distinctive and valuable degree for today's world.

Undergraduate Information

Click here (p. 495) for information about the requirements for the Major in International Studies.

Click here (p. 505) for information about the requirements for the Minor in International Studies.

Joint BA/MA Programs

Highly-motivated students with strong GPAs in the INTS major may qualify for admission to a MA program, with the BA in International Studies and MA in either Humanities or Social Science. This condensed graduate degree program allows students to double-count 5 graduate-level courses toward the BA and MA simultaneously and to complete the MA degree with only one extra year of coursework. Interested students should contact advisors in both the INTS program and Masters in Humanities or Masters in Social Sciences program to learn more about specific course plans and requirements.

Click here (p. 504) for information about the requirements for the 4+1 BA in International Studies to MH or MSS.

Click here (p. 503) for information about the requirements for the 4+1 BA in International Studies to PSCI MA.

Programs

- International Studies, BA (p. 495)
- International Studies, 4 + 1 BA/ Political Science, MA (p. 503)
- International Studies, 4 + 1 BA/ Humanities, MH or Social Sciences, MSS (p. 504)
- International Studies Minor (p. 505)

E-mail: Alison.Shah@ucdenver.edu

The international studies program is an interdisciplinary major with faculty drawn from several independent academic departments.

International Studies (INTS)

INTS 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

INTS 2020 - Foundations of International Studies (3 Credits)

Through a combination of lecture, discussion, and hands-on learning activities, students will develop skills and abilities necessary for academic and professional success in the international studies arena, especially critical thinking, connection building, conceptual understanding, and cultural awareness. The course is structured in three phases: (1) core interdisciplinary concepts; (2) regional foci; and (3) global issues. Note: Please add course note: Students may not receive credit for INTS 2020, if they have already received credit for INTS 2000.

Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

INTS 3939 - Internship (1-6 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

INTS 4152 - Religion & Communication (3 Credits)

This course focuses on the relational/coconstitutive dynamics between religion, culture, and communication and how that shapes the world in which people live; how the legacy of political religious conflict, in conjunction with international culture wars, instigate socio-cultural conflict and change; and how an in-depth study of the dynamics of religion, culture, and communication can improve intergroup/intercultural/international relations or even negotiation/conflict resolution processes. Students will develop capacity to critically analyze the socio-cultural and political implication of religious ideology (radical and moderate), ways in which these ideologies are performed and communicated, and their (students') agency/ability to contribute to intercultural/international understanding, conflict resolution, civic engagement, and/or social justice efforts. In addition, upon completion, students should be prepared to engage in complex conversations about the idea of religion, its role and relevance in human lives, and recognize several commonalities and differences between their (students') and non-Western/other societies' worldviews, cultures, and communicative dynamics. We will engage these topics through multiple and diverse readings, examples from television, film, and social media, reflexive writing assignments, research and analytical activities, critical discussions, and experiential learning activities. Cross-listed with COMM 4152, RLST 4152, COMM 5152, INTS 5152, and RLST 5152. Max hours: 3 Credits.

Grading Basis: Letter Grade

INTS 4611 - Rhetoric of Global Food Policy (3 Credits)

This course examines stakeholder relations, agendas, and debates about global food policy using rhetorical concepts and analysis. Topics include the framing of debates about agriculture, hunger and obesity, the greening of food governance, sustainable food systems, and more. This course fulfills the communication department's pathway course requirement. Cross-listed with COMM 4611. Prereq: Junior standing or higher. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

INTS 4700 - Special Topics (3 Credits)

Note: May be taken more than once for credit when topics vary. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

INTS 4840 - Independent Study (1-3 Credits)

Directed study based on a specific subfield of international studies.

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

INTS 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

INTS 4990 - International Studies Capstone (3 Credits)

A capstone course for students in the International Studies major, the class is designed to facilitate independent student research in the field of international studies and assist students in developing advanced writing and communication skills. Prereq: Students in the course must be declared international studies majors in their final year of coursework (senior status is recommended preparation). Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to International Studies Majors only

INTS 4995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with INTS 5995. Term offered: summer. Repeatable. Max hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

International Studies, BA

Introduction

Please click here (p. 493) to see International Studies department information.

In a world where the forces of politics, commerce, culture, and technology are multifaceted and interconnected, the International Studies major provides students with a much needed global perspective. International Studies is an interdisciplinary liberal arts degree that prepares students for international careers and graduate study. The International Studies major offers students a deep understanding of complex international issues and the underlying drivers that are shaping our world. Employers seek the qualities of International Studies graduates: historical knowledge, research ability, cross-cultural competence, teamwork and leadership experience, and the ability to analyze, model, and solve real-world problems. The INTS major provides students with the methodological tools necessary to analyze various regions of the world and global issues from different academic disciplines. Students can take courses from departments including Anthropology, Business, Communication, Economics, Ethnic Studies, Geography, History, Modern Languages, Political Science, and Religious Studies, among others. This combination of coursework, flexibility, and customization provides International Studies majors a distinctive and valuable degree for today's world.

Degree requirements are subject to periodic revision by the academic program, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

International Studies students are expected to develop both a regional zone of expertise and thematic specialization. Students should choose courses from the introductory, zone, and theme lists that contribute to developing both a broad and deep understanding of international issues.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 48 credit hours from the approved courses.
2. Students must complete a minimum of 24 upper-division (3000-level and above) credit hours in the major from the approved courses.

- Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
- Students must complete a minimum of 24 credit hours with CU Denver faculty from the approved courses.

Program Restrictions, Allowances and Recommendations

- No more than 56 credits accepted toward graduation.
- Program Honors = 3.5 GPA within the major.
- Students may use up to 6 internship credits toward international studies graduation requirements.
- Students may use up to 6 credits of independent study toward international studies graduation requirements.
- Up to two 2000 level or above language courses may be counted toward a Zone or Focus Theme.
- Students are strongly encouraged to reach proficiency in a second language, beyond the CLAS foreign language proficiency requirement. Students may take proficiency tests in languages to document existing language skills. Non-native English speakers may use English for their language proficiency.
- Students are strongly encouraged to complete a High Impact Practice course, INTS 3939 Internship, INTS 4840 Independent Study, INTS 4880 Directed Research or any travel study or study abroad experience, which may be counted toward a Zone or Focus Theme.
- Students majoring in International Studies may choose MATH 1010 Mathematics for the Liberal Arts to complete their general education math requirement. Students in Focus Themes with a heavier Economics component (such as Global Development, Global Environmental Studies, and International Political Economy) should consider MATH 2830 Introductory Statistics. Please meet with the major advisor to discuss your interests.

Required Introductory Courses

Code	Title	Hours
<i>Take all of the following</i>		<i>15</i>
ANTH 2102	Culture and the Human Experience	3
or COMM 4720	Dynamics of Global Communication	
ECON 2012	Principles of Economics: Macroeconomics	3
INTS 2020	Foundations of International Studies	3
HIST 4032	Globalization in World History Since 1945	3
PSCI 3022	Political Systems of the World	3
or PSCI 3042	Introduction to International Relations	

Electives

Code	Title	Hours
<i>Take 30 credits drawn from one Zone of Expertise and one Focus Theme, according to the categories below. A minimum of 24 credits must be at the 3000 or 4000 level. Students must take courses in at least two different disciplines within both their Zone of Expertise and Focus Theme.</i>		
Students may take any two courses from Modern Languages at 2000 level or above.		

At least 12 credits from one Zone of Expertise. (p. 496) ¹

At least 12 credits from one Focus Theme. (p. 499) ¹

Total Hours	30

¹ Various Global Education/Study Abroad courses may not appear on the lists below. Please consult with an International Studies advisor for current offerings.

Zones of Expertise

Complete at least four courses from one Zone of Expertise, in at least two different disciplines:

Africa (Sub-Saharan)

Code	Title	Hours
ETST 4730	Peoples and Cultures of Sub-Saharan Africa	3
FREN 3200	The Francophone World in the Post-Colonial Era	3
HIST 3451	Introduction to African History	3
HIST 3500	African History in Novels and Films	3
HIST 4055	The Atlantic Slave Trade: Africa, Caribbean and U.S.	3
HIST 4451	Southern Africa	3
HIST 4455	African Struggle for Independence	3
INTS 3939	Internship	1-6

International Studies, 4 + 1 BA/ Political Science, MA

Introduction

The 4+1 accelerated Master's program in Political Science is an expedited program of study that allows students to complete a Bachelor's degree in International Studies and a Master's degree in Political Science in as few as 5 years. Students will follow the undergraduate curriculum for International Studies and work closely with their faculty advisor to begin taking Political Science graduate level coursework as they complete their undergraduate degree. They will complete no more than 15 credits as an undergraduate that will apply to both their undergraduate and graduate degrees. Students may officially declare their intent to complete this program in either their junior or senior year, and may apply to the graduate program during their senior year. Application requirements may differ from the traditional 2-year MA, which is why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements.

Please click here (p. 493) to see International Studies department information.

Please click here (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/political-science/>) to see Political Science department information.

Program Delivery

- This is an on-campus program.

Declaring this Program

Click here (p. 63) to go to information about declaring a major.

The INTS 4+1 BA/MA program is open to any INTS major who has reached junior-level status (completed 60-credit hours of coursework) with a GPA greater than 3.0. Students eligible to declare the INTS BA/MA degree program must be active CU Denver students who have competed at least one semester in residence at CU Denver, including at least two CU Denver PSCI courses.

In order to declare the INTS 4+1 BA/MA program prior to completion of the BA degree, interested students should consult with both the INTS undergraduate and PSCI graduate advisors. Students must complete a 4+1 BA/MA degree intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary. Completed 4+1 degree declaration forms are submitted to CLAS Advising for processing.

All students who have declared the 4+1 degree program option as undergraduates must submit a formal application through the CU Denver Graduate School's online application system during their final semester

of undergraduate coursework. The department's preferred application deadlines are April 1 (summer term), May 1 (fall term), and November 1 (spring term).

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students will follow the undergraduate curriculum for International Studies (p. 495) and work closely with their faculty advisor to begin taking Political Science graduate level coursework as they complete their undergraduate degree.
2. A minimum of 48 undergraduate credit hours in the International Studies program and 33 graduate credits hours in Political Science must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
3. Up to 15 graduate level credit hours in Political Science may be taken by International Studies undergraduates accepted to the 4+1 program, and these credits will count both towards completion of the International Studies undergraduate degree, and the graduate degree in political science, if the student is later accepted into the graduate program. No more than 15 credit hours may "double-count" for the M.A.. Elective courses must be in accordance with Graduate School Policies (<http://catalog.ucdenver.edu/cu-denver/graduate/graduate-school-policies-procedures/>), therefore, meeting with an advisor regularly is recommended.
4. Students must complete a minimum of 24 upper-division (3000-level and above) credit hours and all graduate level credits with CU Denver faculty.
5. Students should officially declare their intent to complete this program by their junior year and apply to the graduate program during the semester they intend to graduate with their BA.
6. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5.
7. Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements.
8. All graded attempts in required and elective courses are calculated in the major GPA. No course taken as pass/fail may be counted.
9. To secure admission to the Political Science graduate program, submit formal graduate application during the senior year.
10. Application requirements may differ from the traditional 2-year MA, which is why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements for Political Science (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/political-science/political-science-ma/>).

International Studies, 4 + 1 BA/ Humanities, MH or Social Sciences, MSS

Introduction

The International Studies BA/MHMSS (Master of Humanities/Master of Social Science Program) in the College of Liberal Arts and Sciences provides an expedited interdisciplinary program of study that allows participating students to complete an interdisciplinary Bachelor degree in International Studies and an interdisciplinary Master degree in Humanities or Social Science through the MHMSS program in five years. INTS students interested in participating apply for either the MH or MSS degree no earlier than their first semester of junior-year standing as an undergraduate. Students may further choose to concentrate in one of the MH or MSS tracks. (For track information, see descriptions of the MH and MSS degree programs in the graduate catalog.) Upon acceptance, students take a maximum of 15 credit hours of graduate-level courses beginning the second semester of their junior year (or its equivalent) and through the whole of their senior year. Because these classes "double count," they fulfill requirements for both the BA major and the Master degree in Humanities or Social Science. Students then continue graduate studies exclusively in the chosen degree plan, either MH or MSS, to complete their master degree by the end of their fifth year in CLAS at CU Denver.

Please click here (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/humanities/>) to see more information about the Humanities department.

Please click here (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/social-science/>) to see more information about the Social Science department.

Please click here (p. 493) to see International Studies department information.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)

- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Admissions Requirements and Process

- Interested students should contact their INTS advisor and the MH or MSS advisor as early as possible to ensure proper planning for the five year degree.
- Student and faculty will work together to submit an intent to complete the program form to CLAS Advising.
- To qualify, students must have a 3.0 or higher GPA in CLAS. All courses taken at the 4000- and 5000-level must be completed with at least a B or higher.
- To secure admission to the Master's in Humanities or Master's in Social Science graduate program, students must apply to the graduate program during the semester in which they will successfully complete their degree, and should have most of their general education and major requirements completed by this time.
- Application requirements may differ from the traditional 2 year MH/MSS, which is why students need to work closely with faculty advisors and the Humanities or Social Sciences graduate program directors for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements for Humanities (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/humanities/humanities-mh/>) or Social Sciences (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/social-science/social-science-mss/>).

Program Requirements

1. Students in the 5-year INTS BA/MHMSS Program must satisfy all existing requirements for both an undergraduate degree in CLAS with a major in International Studies (p. 495) and a Master of Humanities (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/humanities/humanities-mh/>) or Social Science (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/social-science/social-science-mss/>) degree. These requirements can be fulfilled through multiple possible paths through the department's curriculum.
2. A minimum of 48 undergraduate credit hours in the International Studies program and 36 graduate credits hours in Humanities or Social Sciences must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
3. Up to 15 graduate level credit hours in Humanities or Social Sciences coursework may be taken by International Studies undergraduates accepted to the 4+1 program, and these credits will count both towards completion of the International Studies undergraduate degree, and the graduate degree, if the student is later accepted into the graduate program. No more than 15 credit hours may "double-count" for the MH/ MSS. Elective courses must be in accordance with Graduate School Policies, therefore, meeting with an advisor regularly is recommended.
4. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major

GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

- Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements.
- Students must complete a minimum of 24 upper-division (3000-level and above) credit hours and all graduate level credits with CU Denver faculty.

Program Options

BA/MHMSS students may choose to do a general MH or MSS degree or select a track concentration within the degree plan, including Social Justice, Philosophy and Theory, Visual Studies, Women's and Gender Studies, Ethnic Studies, International Studies, Community Health, and Society and Environment.

To learn more about the Student Learning Outcomes for this program, please visit our website. (<https://clas.ucdenver.edu/international-studies-learning-outcomes/>)

International Studies Minor Introduction

Please click here (p. 493) to see International Studies department information.

As the globe becomes increasingly connected, students gravitate towards classes that provide the interdisciplinary skills and international awareness required for success in the 21st century. The International Studies minor at CU Denver offers students a unique opportunity to create an individually tailored and relevant minor based upon a spectrum of Liberal Arts classes.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus and online program, available to students at the Denver campus and International College of Beijing.

Declaring This Minor

- Denver students: please see your CLAS advisor
- ICB students: please see the International Studies advisor
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 18 credit hours from the approved courses.
- Students must complete a minimum of 15 upper-division (3000-level and above) credit hours in the minor from the approved courses.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.5. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete a minimum of 9 credit hours with CU Denver faculty from the approved courses.

Program Restrictions, Allowances and Recommendations

- Students cannot take more than two upper-division courses from the same department for the minor, including the introductory course.
- The maximum amount of credit hours a student could receive through independent study courses is 6.
- Students may be able to complete all 18 credits via online courses.
- Additional courses may be considered by individual request. Please contact Alison.Shah@ucdenver.edu

Code	Title	Hours
Take one introductory course		3
INTS 2020	Foundations of International Studies ¹	
PSCI 3022	Political Systems of the World	
PSCI 3042	Introduction to International Relations	
HIST 4032	Globalization in World History Since 1945	
Take any five upper division elective courses (3000-4000 level), with an international focus, from the approved course lists. ²		15
<i>Courses on international and global topics may come from Anthropology, Communication, Economics, Ethnic Studies, Geography, History, Political Science, or other departments. Pre-approved courses have been clustered by theme, to guide student selection.</i>		
Total Hours		18

¹ Students who do not select INTS 2020 Foundations of International Studies for their introductory course are permitted to take that course to fulfill one of the five upper-division courses slots.

² Students are encouraged to select a 3000- or 4000-level seminar in a discipline other than their major to ensure that high level work in another field is being performed.

Law Studies

Coordinator: Omar Swartz (MHMS), JD, Duke University; PhD, Purdue University

Telephone: 303-315-3567

E-mail: Omar.Swartz@ucdenver.edu

Overview

The law studies minor at CU Denver is an interdisciplinary course of studies intended to help students become intelligent and critical scholars of legal and political discourse. While the minor may be useful for students contemplating law school, it is also intended to appeal to a wider group interested in issues relating to law and society and careers in public policy-related fields. The minor is designed to achieve the following three interrelated goals:

- to introduce students to the major areas of law that affect life in the United States and important legal issues that influence current events;
- to enable students to become familiar and fluent with a legal vocabulary and legal reasoning; and
- to better prepare students with the analytical and conceptual tools to be critical citizens in our constitutional democracy.

In addition to these goals, students who complete the minor with the intention of attending law school may find themselves more prepared than they otherwise would be for the often mystifying and rigorous first year of law school. To help these students, the program contains an advising component which assists students who are contemplating law school to provide them with a realistic appraisal of law school and of the legal profession. The counselors will aid students with the law school application process.

[Click here \(p. 519\)](#) for more information about the Minor in Law Studies.

Programs

- Law Studies Minor (p. 519)

Political Science (PSCI)

PSCI 1001 - Introduction to Political Science: The Quest for Freedom and Justice (3 Credits)

Introduces the study of politics, its human importance, and its relationship to social institutions. Analysis of the relationship between individual political behavior and characteristics of the political system. Development of key concepts such as power, legitimacy, authority, political socialization, and revolution. Note: Required of all PSCI majors. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS1
Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS1, Soc Behav Sci:Econ or Pol.

PSCI 1101 - American Political System (3 Credits)

General introduction to the American political system with emphasis upon citizen involvement, the relationships among the various levels and branches of government, formal and informal institutions, processes, and behavior. Note: Required of all PSCI majors. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS1
Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS1, Soc Behav Sci:Econ or Pol.

PSCI 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

PSCI 2001 - Topics in Political Science (1-3 Credits)

Covers different areas of politics. Note: May be taken more than once for credit when topics vary. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PSCI 2006 - Global Political Issues (3 Credits)

Studies global political issues, exploring the broad forces at play in the world: international economics, national interests, military power, nationalism, ethnicity, the environment and human rights. Discussion of world events and underlying global issues, incorporating analytical tools used by political scientists. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2011 - Logic of Political Inquiry (3 Credits)

This course builds critical thinking techniques, logical habits of mind, and research skills necessary for political study. Includes argumentation basics, logical fallacies, evaluating evidence, understanding statistics, effective writing, and internet research. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2365 - Politics of Climate Change (3 Credits)

This course shows how Political Science addresses today's most severe threat to our planet. It analyzes how societies try to mitigate and adapt to climate change at various governance levels. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2410 - Political Science through Science Fiction (3 Credits)

Explore political science concepts by analyzing works of science fiction. Course examines utopian and dystopian communities, imagined futures, and political theorizing in both classic and unusual works of fiction. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2840 - Independent Study (1-3 Credits)

An opportunity for lower division students who demonstrate academic potential to pursue the study of some subject of interest in greater detail, with supervision from a faculty member in the department. Subjects chosen and arrangements for assignments to be made between student and faculty. Prereq: One semester of course work at Downtown Denver Campus. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 3000 - Topics: Conference Participation (1 Credit)

Max hours: 1 Credit.

Grading Basis: Letter Grade

PSCI 3002 - Topics in Political Science (1-3 Credits)

Covers different areas of politics. Note: May be taken more than once for credit when topics vary. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PSCI 3011 - Research Methods (3 Credits)

Design of political/social research, both qualitative and quantitative. Applications of statistical techniques and procedures to social and political phenomena. Use of computer and the Internet. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3022 - Political Systems of the World (3 Credits)

The class focuses on the analyses of various political systems around the world. Students will look at democracies and dictatorships, industrialized countries and developing countries. Though a structured comparison, students will assess and test key theories in Political Science. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PSCI 3034 - Race, Gender, Law and Public Policy (3 Credits)

Historical overview of race and gender relations in the U.S. and an examination of the treatment of issues of race and gender in the judicial system and public policy. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PSCI 3035 - Political Movements: Race and Gender (3 Credits)

Examines the emergence, growth, and decline of social movements for race and gender equality. Discussion of political issues of race and gender in the 1990s. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PSCI 3042 - Introduction to International Relations (3 Credits)

Basic background and theories of international relations with focus on the interaction between nation states, international organizations, regimes and transnational movements. Themes examined include foreign policy conduct, international security and political economy, human rights and environmental management. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PSCI 3050 - Islamophobia (3 Credits)

Islamophobia depicts Islam and its followers as threats to civilization, human rights and progress. Course examines historical and current Islamophobia, including impacts on international relations and on domestic politics. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3064 - Power and Empowerment in the United States (3 Credits)

Introduces U.S. political economy. Analysis of the political and economic forces and structures that shape the opportunities available to the American people. Among topics included are reciprocal impacts of government and business, the federal budget, taxation, lobbying and special interests, community organizing, and elections. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3214 - Federal Law and American Indians (3 Credits)

Examines the legal and political history of the U.S. in relation to American Indian Nations. Focuses on specific laws and Supreme Court cases in federal Indian law, with analysis of U.S. policy. There will be some comparison with Indian policies of other countries. Cross-listed with ETST 3216. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3347 - Film and Politics (3 Credits)

Presents historical and contemporary films to introduce students to critical evaluation of film as a political medium. Whether designed as propaganda or entertainment, films shape and reflect critical issues in our political and social culture. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3840 - Independent Study: PSCI (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PSCI 3914 - The Urban Citizen (3 Credits)

Course emphasis is community, the individual, and the good life.

Experiential learning and classroom discussions about capacities of urban citizens. Focus is on social, political, and economic resources that individuals command, issues of equality and inequality, and possibilities of constructive change. Prereq: A willingness to spend a semester working and studying together as a team in both the classroom and the community. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3939 - Internship (1-9 Credits)

Designed experiences involving application of political concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

PSCI 4002 - Topics in Political Science (3 Credits)

Specialized areas of politics. Note: May be taken more than once for credit when topics vary. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PSCI 4009 - Politics of the Budgetary Process (3 Credits)

Develops each student's understanding of budgeting and financial management in the public and nonprofit sectors. An overview of public sector and nonprofit fiscal management is provided, along with thorough exploration of the political influences that affect financial decision-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4011 - GIS in Political Science (3 Credits)

Computer lab course developing methodological skills in Geographic Information Systems (GIS) in political contexts. Geospatial computerized mapping skills are important in political fields such as urban planning, electoral analysis, environmental justice, demographics, public health, and criminal justice. Designed for beginners. Cross-listed with PSCI 5011. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4014 - Media and Politics (3 Credits)

Explores the impact of the news media on the American political system, including public policy and citizen participation, and addresses trends in news coverage and media ownership, and their impact on public opinion. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4024 - State Politics: Focus Colorado (3 Credits)

Examination of American state politics, with an emphasis on Colorado. Course examines the special role of state governments in the American federal system. Focus on dominant current issues facing Colorado state government. Term offered: fall, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4025 - Local Governance and Globalization (3 Credits)

Introduces international political economy, consequences of globalization for localities, interplay between wealth and power among nations, multinational corporations, NGOs and the UN, and impact of their actions on local governments. Topics include development, aid, trade, outsourcing, eco-sustainability and global equity. Cross-listed with PSCI 5025. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4034 - Political Parties and Pressure Groups (3 Credits)

Democrats, Republicans, third parties, and pressure groups in the United States. Analysis of pressure politics and political behavior. Impact of parties and pressure groups on the public good. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4044 - The Presidency (3 Credits)

An overview of the historical, constitutional, and functional aspects of the presidency. Focuses on the powers and vulnerabilities of the presidency and on the style and politics of the current president. Cross-listed with PSCI 5044. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4057 - Religion and Politics (3 Credits)

Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state;" (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Cross-listed with PSCI 5057 and RLST 4500, 5500. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4074 - Urban Politics (3 Credits)

The crisis and the promise of U.S. cities. Nature and roots of critical urban problems. Citizen involvement in urban decision making. Government as problem and as solution. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4075 - Gentrification and Social Equity (3 Credits)

Study causes and consequences of urban gentrification, and explore strategies of grassroots resistance and social equity solutions that are being mobilized to challenge the forces of gentrification. Contrast common celebrations of the waves of capital reinvestment that are fueling urban revitalization with the frequent claim of many low-income neighborhoods: "Gentrification is Class War!" Cross-listed with PSCI 5075. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4084 - Local Government and Administration (3 Credits)

Policy and administrative challenges faced by local government in the 21st century. Emphasis on cities under federalism, alternative forms of city governance, and new challenges from increasingly diverse constituents. Issues of poverty, public safety, health, transportation, environment, corruption, and accountability. Cross-listed with PSCI 5084. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4085 - Comparative Governance: Environment and Society (3 Credits)

Focuses on how public & private actors at various levels of governance address pressing social & environmental issues such as aging societies, drug abuse, air pollution & global warming. Students will learn to analyze the dynamics of conflict & cooperation, using main concepts and theories of governance literature. Cross-list PSCI 5085. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4094 - Seminar: American Politics (3 Credits)

Foundations of U.S. politics and contemporary political issues. Federal/state/community relations. Relationship among the three branches of the Federal government. Colorado controversies arising under the U.S. Constitution. Cross-listed with PSCI 5014. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4105 - Comparative Politics: Europe (3 Credits)

An intensive and comparative analysis of the political systems and processes of Europe. Emphasis on political culture and economy; executive-legislative relationships; electoral systems; political parties and interest groups; political conflict and citizen participation; and the impact of social changes on political institutions. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5105. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4115 - Third World Politics (3 Credits)

Examines the factors challenging political stability in low income nations and the prospects for democracy and economic development. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4124 - Denver Politics (3 Credits)

Surveys Denver's dominant political and economic forces and community agendas that compete with the downtown growth machine. Examines urban renewal strategies, gentrification and grass-roots resistance, and the role of officials in shaping Denver's distribution of wealth and life-opportunities. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4126 - Introduction to International Political Economy (3 Credits)

A short introduction to international economy, including classic readings of international political economy (such as Smith, Ricardo, Marx, Lenin), and more recent work on globalization, applying related theories to the current world economy. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

PSCI 4144 - Indigenous Political Systems (3 Credits)

Surveys political theory and practice in indigenous societies in the Americas. Examines the impact of indigenous political thought on Euro-American politics, especially the U.S. Constitution, and explores the contemporary impact of indigenous people on current politics. Cross-listed with ETST 4144. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4146 - Indigenous Politics (3 Credits)

Surveys the status of the world's native peoples and nations, and the role of law and politics in the future of indigenous peoples in the global arena. Examines questions of human rights, economic development, and international law and politics. Cross-listed with PSCI 5145 and ETST 4146. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4150 - Gender Politics in the Middle East: Beyond Orientalism & Islamism (3 Credits)

This course is about Middle Eastern women's subjectivity and various forms of agency. It explores the nexus of domestic, regional and international forces that shapes the lives of Middle Eastern women, in particular in the Algerian, Egyptian, Iranian, Israeli and Palestinian contexts. Far from being silent observers of the contests among these forces, as is often assumed, Middle Eastern women have been active actors in the public arena since the 19th century colonial encounter and the importation of the modern state to the region using an array of means to make their voices heard. They were often more militant than those of their countrymen. The course is divided into two parts. The first part provides an overview of the theoretical notions discussed such as Orientalism, agency, colonialism and post-colonialism. Related to this theoretical section is a historical overview that is necessary to the understanding of the contemporary conditions of Middle Eastern women and the continuities and changes between past and present. The second part covers pressing topics in the lives of Middle Eastern women in the post-independence era such as the rise of Political Islam, the global trend of democratization, war and occupation. The emphasis in this section is on women as active participants in the debates surrounding these issues, rather than as objects of them. The readings assigned include both texts written by scholars from the region and by others from without. They provide analyses of the contexts within which Middle Eastern women's struggles take place. In addition, students will be exposed to materials produced by Middle Eastern women activists that express their own opinions and views in order to avoid misrepresentation and to reflect the diversity among them. Cross-listed with WGST 4150. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4155 - Political Systems of the Middle East and North Africa (3 Credits)

Comparative analysis of political processes in the Middle East and North Africa. Islamic political theory and its contemporary manifestations. The role of nationalism and the quest for modernity in the political development of this region. Parties and programmed modernization in transitional politics. Violent and nonviolent change. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4156 - The Arab-Israeli Peace Process (3 Credits)

Critical analysis of Arab and Israeli perspectives on the on-going peace negotiations in the Middle East. Historical background and religious-cultural aspects of current problems. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with ETST 4156. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4165 - Islamic Politics and Culture (3 Credits)

Comprehensive, in-depth study of Islam and Muslims. Islam is viewed as a "way of life" with social, economic, psychological, spiritual, and political implications. Among topics to be examined are: women in Islam, Jihad, fundamentalism, Islamic movements, Islam and the West. Cross-listed with RLST 3100. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4176 - Gandhi's Legacy: Non-Violent Resistance Today (3 Credits)

This course assesses the legacy of Gandhi's nonviolent struggle against systemic oppression. We examine Gandhi's ideas and practices, consider Western images of political violence, and then focus on questions and possible answers raised by empirical studies. Cross-listed with PSCI 5176. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4185 - Corruption in the U.S. and Abroad (3 Credits)

Explores the causes and consequences of administrative and political corruption in developed and developing countries, and evaluates various anti-corruption strategies. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4186 - East Asia in World Affairs (3 Credits)

Political and economic systems and foreign policies of East Asian powers, such as China, Japan, Taiwan, South Korea and Hong Kong; interactions of these powers and their collective economic and political roles in world affairs; major theoretical approaches to the study of East Asian powers. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

PSCI 4195 - Political Systems of Sub-Saharan Africa (3 Credits)

Analysis of major types of political systems in sub-Saharan Africa and intensive case studies of selected countries exemplifying each type. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4206 - Social Movements, Democracy and Global Politics (3 Credits)

Examines global social movements as new political actors within world politics; how theoretical perspectives in international relations and democracy address these actors; and the forms of interaction among these actors, states, and global governance institutions. Cross-listed with PSCI 5206. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4207 - Theories of Social and Political Change (3 Credits)

Investigation of social and political power with respect to possibilities of change. Location of present barriers to change within ongoing histories of marginalization, exclusion, and violence. Critical examination of political inclusion and recognition. Imaginations and pursuits of just, equitable, and/or Utopian worlds. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4215 - Women's Rights, Human Rights: Global Perspectives (3 Credits)

Explores the global feminist movement's campaign to "engender" human rights. Examination of women's human-rights issues and the critique of this campaign as representing cultural imperialism. Note: this course assumes that students have completed at least two political science courses. Cross-listed with WGST 4215. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4216 - International Politics: Human Rights (3 Credits)

The system of nation states, concepts of national interest, goals of foreign policies, conduct of diplomacy, and the bearing of these elements on the problem of human rights. Presentation and evaluation of the solutions that have been offered for the securing of justice and the maintenance of peace. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4224 - Dictatorships in 21st Century (3 Credits)

Analyzes and classifies political systems of non-democratic regimes. Reviews earlier and contemporary theories that explain the origins, survival and death of authoritarian regimes. Discusses the impact of dictatorial rule on domestic developments as well as on international relations. Cross-listed with PSCI 5224. PSCI 3022 recommended for student success. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4225 - Democracy and Democratization (3 Credits)

Examines the conditions under which countries turn from authoritarianism towards democracy and become stable democratic regimes. Also examines the impact of foreign and international factors on new democracies. Cross-listed with PSCI 5225. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSCI 4226 - The United Nations in World Affairs (3 Credits)

Current operation and future potential of the United Nations as a complex actor in world affairs, both expressing conflicting interests of its participants and promoting universal goals, including world peace, human rights, and environmental protection. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4235 - Politics and Markets in Latin America (3 Credits)

Explores political economic development in Latin America within the context of the world system. Includes the study of colonization, land tenure, foreign investment, authoritarianism, militarism, social and revolutionary movements, human rights and democratization. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PSCI 4236 - American Foreign Policy (3 Credits)

Examines the postwar events, controversies, and most recent challenges in U.S. foreign policy. Analyses of the major sources of U.S. foreign policy, such as ideology, national interests, and national power. Attention to the pattern and process of foreign policy-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

PSCI 4237 - American National Security (3 Credits)

Examines American national security, utilizing an interdisciplinary analysis of its domestic historical development and its function in the current global context. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4240 - International Security (3 Credits)

Examines old and emerging "threats" to national security, and policy responses, from theoretical, historical and geographical perspectives. Explores challenges of ethnic conflict, weapons of mass destruction, environmental and economic security. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4245 - Populist Movements around the World (3 Credits)

Political populism is on the rise in virtually every part of the world. Populist leaders, parties and movements exert direct influence when they are in power. However, they also create pressure on centrist leaders and parties and influence politics indirectly. This course explores the phenomenon of political populism around the world. We begin by defining populism and investigate cases of populist movements in the United States, Europe, the Middle East, Latin America and Asia. After that, we will engage the literature devoted to explaining the phenomenon. The course concludes with a discussion of the effects of populism and the dangers that some forms of it pose to democracy. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4248 - Gender, Globalization and Development (3 Credits)

Analyzes the effects of globalization on the gendered processes of international development and strategies to empower women to achieve gender justice across race, class and national divisions. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5245 and WGST 4248/5248. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4265 - Social Justice And Globalization (3 Credits)

Examines issues of justice and ethical responsibility in a globalizing world. Do moral obligations of individuals and institutions end at national borders or do they encompass all human beings and extend to the environment and to future generations? Cross-listed with PSCI 5265. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4266 - International Law (3 Credits)

Investigates the body of law that regulates relations between nations and provides a framework for solving common problems and disputes between nations. Note: this course is intended for political science majors. Cross-listed with PSCI 5266. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4274 - Conflict Resolution and Public Consent Building (3 Credits)

Alternative strategies for resolving or mediating conflicts facing public or nonprofit organizations and for building public consent, with emphasis on personal, interpersonal, organizational, interest-group, cross-cultural, and roots of conflict and bases for consent. Cross-listed with PSCI 5274. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4276 - Conflicts and Rights in International Law (3 Credits)

Explores contending interpretations and practices in international law regarding issues such as the legitimacy of humanitarian intervention, efficacy of truth commissions, tensions between truth and justice in cases of genocide and war crimes, and legal changes needed to devise viable rules. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5276. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4280 - The Politics of War Law (3 Credits)

Examines international laws governing armed conflict, including human rights law. Investigates the reasons for instances of compliance and violation within this international legal regime regulating war and conflict. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4286 - International Relations: War or Peace? (3 Credits)

Presents alternative theoretical frameworks for the explanation of war and peace. Investigations of the efficacy of international law, just-war norms and the UN in preventing or containing conflict. Cross-listed with PSCI 5286. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4326 - Advanced International Political Economy: Globalization (3 Credits)

Engages the current debate about globalization. Conceptualizes globalization and evaluates the pros and cons of global trade and finance for developed and developing countries. Develops a model for a sustainable and just global economy. Prereq: PSCI 4126. Cross-listed with PSCI 5326. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: PSCI 4126

PSCI 4330 - U.S. Health Policy (3 Credits)

The role of public health policy as legislated at the federal and state levels. Individual health policy (e.g. social security and managed care) and public health policy (e.g. mandatory immunizations, HIV testing, air and water quality). Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4354 - Environmental Politics (3 Credits)

Political, legal, and economic forces in environmental law and policy. Special emphasis on air and water pollution and on threats to public and agricultural land. Environmental groups and their opponents. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4365 - Global Ecological Crises (3 Credits)

Overview of global ecological problems such as climate change, transboundary pollutions, and loss of bio-diversity in an attempt to understand the political, economic, and cultural forces behind these problems and the status of legal and policy initiatives to address them. Cross-listed with PSCI 5365. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4407 - Early Political Thought (3 Credits)

Main currents of political thought in their historical setting from Plato to Machiavelli, with a critical evaluation of those elements of continuing worth. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4414 - Non-Profits and Social Change (3 Credits)

Explores role of non-profits in catalyzing social change. What are obstacles and opportunities to leveraging social change through nonprofits? What factors shape non-profits to be either transformational or systemstabilizing forces? Cross-listed with PSCI 5514. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4417 - Modern Political Thought (3 Credits)

Theories of modernity and its lasting social and political consequences. Topics may include liberalism and neoliberalism, capitalism and Marxism, humanism and posthumanism, racial slavery, colonialism, and ecology. PSCI 4407 is not a prerequisite for PSCI 4417. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4427 - Law, Politics and Justice (3 Credits)

Analysis of the relationship of politics, law, and justice, particularly the degree to which moral norms and political concerns should and do influence legal standards and their perceived legitimacy. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4437 - Coercion and the State (3 Credits)

An analysis of: (1) the historical emergence of the modern state; (2) the theoretical justifications for the concentration of political power and the activist state; (3) the internationalization of the European state system; and (4) anarchist and Fourth World challenges. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4444 - Contemporary Culture and Politics in America (3 Credits)

Intellectual and experiential investigation of the interplay of culture and politics in American society, as manifested in literature, social and political philosophy, psychological writings and trends, radical movements, popular culture, and daily behavior. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4446 - Advanced Indigenous Peoples' Politics (3 Credits)

Builds upon the theoretical and applied foundations of PSCI 4146. Intensive study of international legal and political developments are examined, particularly in the United Nations and the Organization of American States systems. Prereq: PSCI 4144 or PSCI 4146. Cross-listed with PSCI 5446. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: PSCI 4144 or PSCI 4146

PSCI 4457 - American Political Thought (3 Credits)

Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Cross-listed with PSCI 5457, ETST 4457, and ETST 5457. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4477 - Constitutional Law I (3 Credits)

Nature and scope of the following American constitutional principles as developed by the U.S. Supreme Court: federalism, jurisdiction of the federal courts, separation of powers, the taxing power, and the commerce power. Case method. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4487 - Constitutional Law II (3 Credits)

Continuation of PSCI 4477, with emphasis on the war powers of the president, citizenship, the Bill of Rights, and the Civil War amendments. (Case method.) Note: PSCI 4477 is not a prerequisite for PSCI 4487. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4494 - Judicial Politics (3 Credits)

Examines principal actors in the legal system: police, lawyers, judges, citizens. About half of this course is devoted to the study of judicial behavior, especially at the Supreme Court level. Political and personal influences on judicial behavior. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4505 - Political System of Russia and Its Neighbors (3 Credits)

The class focuses on the political values, institutions and actors of Russia and its neighboring countries, covering the political developments since the late 20th century. The relations between Russia, the European Union and the United States are also analyzed. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4535 - Labor and Working Class Politics (3 Credits)

Explores the status of the labor movement both in the U.S. and internationally, as well as the political, philosophical, and social implications of socioeconomic class status and identity. Cross-listed with PSCI 5535. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4545 - Immigration Politics (3 Credits)

Introduces students to central theories of migration and a survey of immigration law and policy in the 20th century. Highlights experiences of Mexican and Latin American immigrants and related topics, including: U.S.-Mexican foreign relations, bilingual education, undocumented immigration and globalization. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5545. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 4550 - The Irish Diaspora (3 Credits)

While the population of Ireland today is roughly five million, there are an estimated 80 million people worldwide and nearly 50 million people in North America who claim some Irish identity. This course will explore this massive, nearly 5 century old, diaspora, beginning with the Plantations of Ulster and subsequent Ulster Scots emigration to North America, through the Great Hunger of the 19th century and massive exodus to the United States, Canada, Australia, and beyond. The course focus heavily on Irish immigrant communities in early Colorado, specifically Leadville, examining the history of our own community as a window into the larger political, social, and economic structures that drove such a migration. The course will conclude with an examination of the N. Ireland Peace Process, Good Friday Agreement, and BREXIT, inquiring about the role that Ireland and the Irish Diaspora plays today in global politics. Note: Students in this course will travel to parts of Colorado that once had significant Irish immigrant communities, places such as Leadville, Cripple Creek/Victor, Nevadaville, and various Catholic parishes and cemeteries in Denver. Students will also be expected to perform primary source research on Irish communities in early Colorado. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4554 - Chicano and Latino Politics (3 Credits)

Analysis of the social, cultural, and economic factors that affect political behavior of Latinos. Special attention is paid to the Mexican American cultural heritage and to relations between Mexican Americans and Anglo Americans. Cross-listed with ETST 4558. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4555 - International Women's Resistance (3 Credits)

Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5555, ETST 4555 and WGST 4555/5555. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4564 - Gender and Politics (3 Credits)

Inter-sectional examination of the personal and political life of gender. Exploration of constructions, performances, and creative reconfiguration of gender through a variety of texts, genres, and media. Cross-listed with WGST 4564. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4605 - Politics and Governments of South Asia (3 Credits)

Studies the political systems of Bangladesh, India, Pakistan, Sri Lanka and Nepal. The impact of British rule on the development of political institutions on the subcontinent as well as problems of political development at all levels. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4615 - Politics and Government of China (3 Credits)

Political and governmental changes within China, from the 19th century to the present. Primary emphasis on contemporary political systems and sociopolitical problems. China's struggle for independence and economic development. The Chinese revolutions, Maoist communism, and the post-Maoist period. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4645 - Comparative Political Leadership (3 Credits)

Comparative study of historical, socio-cultural, and psychological bases of political leadership. Leadership types in peasant societies, empires, and revolutionary movements. Dilemmas of democratic versus authoritarian leadership in modernizing and industrial states. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4726 - Seminar on U.S. and China Relations (3 Credits)

Detailed examination of historical context and current issues in U.S./China relations. Emphasis on modern period, with particular attention to changing relations in context of rising power of China. Cross-listed with PSCI 5726. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4736 - The Middle East in World Affairs (3 Credits)

Evolution and revolution in the Middle East. The character of nationalism in the area. Analysis of inter-regional and international problems affecting the Middle East, with special emphasis on current Arab-Israeli relations. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4757 - Legal Reasoning and Writing (3 Credits)

Introduces the fundamentals of legal reasoning and legal argumentation through intensive class discussion, formal debate and writing. Attention is given to the relationship between case and statutory law and their application in trial and appeals courts in the United States. Note: this course assumes that students have completed ENGL 1020, 2030, and any 3000-level English/writing course, or COMM 3120. Cross-listed with PSCI 5747, COMM 4750, 5750. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4807 - Political Violence (3 Credits)

Investigates different types of political violence including genocide, ethnic and religious conflict, revolution, terrorism, war, state repression and others. Introduces theories of individual, collective and institutional violence, applies them to a range of case studies and explores possible solutions. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4808 - Strategies of Peacebuilding (3 Credits)

The course investigates the theories and strategies of peacebuilding in societies that have endured intrastate conflict and/or massive human rights violations and asks whether peace and justice and democracy can or should work together and how forgiveness and reconciliation might develop. Cross-listed with PSCI 5808. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4827 - Women and the Law (3 Credits)

Examines the role of the courts in the development of public policy toward women; how the legal system affects the economic power, family roles, safety and political participation of women. Cross-listed with ETST 4827 and WGST 4827. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4837 - Contemporary Issues in Civil Liberties (3 Credits)

Conflicting rights of individuals and groups in several areas of civil liberties, including religious groups, free speech, sexual freedom, racial quotas, and anti-governmental actions and publications. This course includes case law, readings, guest speakers and case discussions. Cross-listed with PSCI 5837. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4840 - Independent Study: PSCI (1-3 Credits)

An opportunity for advanced students with good scholastic records, and with appropriate courses completed, to pursue independently the study of some subject of special interest to them. Subjects chosen and arrangements made to suit the needs of each student. Note: Primarily for seniors. Prereq: 15 semester hours in political science and permission of instructor. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

PSCI 4878 - War, Film, and International Law (3 Credits)

This course examines interactions of culture, politics, and law by chronologically investigating 20th-century war movies and the ways experiences and norms have shaped and been shaped by cinematic representations. Cross-listed with PSCI 5878. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

PSCI 4914 - Community Organizing and Community Development (3 Credits)

The theory and practice of community organizing strategies and community development innovations. How can social activists build power at the grassroots to build equitable, sustainable, and healthy communities? Cross-listed with PSCI 5914. Note: Students will not receive credit for this course if they have already earned credit for PSCI 3075. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4934 - CU at the Capitol (3 Credits)

Examines current year legislative session of Colorado General Assembly. Study of various elected leaders; Colorado party system; Governor-Assembly relations; citizen and lobbyist influence; corruption and virtue in politics; current affairs. Each student will be placed in a state government internship. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4944 - CU in the City (3 Credits)

Investigation of community development strategies through seminar discussions, urban walking tours, and student field placement with a local community based organization, non-profit, or public office engaged in community development work. Cross-listed with PSCI 5944. Recommended Preparation: PSCI 3075 Community Organizing and Development. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4960 - Capstone in Political Science (3 Credits)

Course facilitates independent student research in Political Science and assists students in developing advanced writing and communication skills. Students will design, execute and present advanced research project. Restriction: Students must have completed 27 credits hours in Political Science (PSCI) with a C- or higher in order to register. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Students must have completed 27 credits hours in Political Science (PSCI) with a C- or higher in order to register.

PSCI 4995 - Global Study Topics (1-3 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with PSCI 5995. Term offered: summer. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Social Sciences (SSCI)

SSCI 3939 - Internship (1-12 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

Typically Offered: Fall, Spring, Summer.

SSCI 4025 - Legal Advocacy/Engagement (3 Credits)

This course is an introduction to litigation practice skills in the context of cutting-edge litigation to create social change. Students will participate in mock litigation activities including conducting legal research, writing briefs, deposing witnesses, and making oral argument. The course will assist students in understanding basic legal advocacy while exploring the ways in which the legal system facilitates or stymies social change. The class is designed to be highly interactive, with a strong emphasis on learning-by-doing and collaborative problem-solving. It is intended for students with a strong interest in attending law school who are committed to preparing themselves for that experience by working with material that maybe initially unfamiliar or daunting. If students undertake that challenge, they can expect to leave the class better prepared for law school and knowledgeable about how law is used to achieve social change. Note: Law Studies students should take this course as one of the last courses for the minor. Max hours: 3 Credits.

Grading Basis: Letter Grade

SSCI 4050 - Special Topics in Law Studies (3-6 Credits)

These topics courses are concerned with specialized aspects of the study of law within the social sciences from various theoretical and research perspectives. These courses are interdisciplinary and serve as a forum for discussion specific to students interested in law studies. Term offered: fall, spring. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

SSCI 4060 - Topics in Law Studies: Constitutional Thought (3-6 Credits)

These topics courses are concerned with specialized aspects of the study of constitutional thought as related to law studies. These courses are interdisciplinary and serve as a forum for discussion specific to students interested in law studies. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

SSCI 4070 - Topics in Law Studies: Social Context of Law (3-6 Credits)
These topics courses are concerned with specialized aspects of the study of the social context of law. These courses are interdisciplinary and serve as a forum for discussion specific to students interested in law studies. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

SSCI 4251 - Introduction to Legal Studies (3 Credits)
A survey of the United States legal system, including lawmaking powers, jurisdiction, court procedures, professional ethics and major principles of business law, contracts, estates and probate, family law, property and torts. Cross-listed with HUMN 4251/HUMN 5251/SSCI 5251. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 4325 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Cross-listed with HUMN 4325, HUMN 5325, SSCI 5325, PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 4840 - Independent Study (1-3 Credits)
Directed study based on a specific subfield of social sciences. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

SSCI 4880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

Law Studies Minor

Introduction

Please click here (p. 510) to see Law Studies department information.

The Minor in Law Studies at the University of Colorado Denver (CU Denver) is an interdisciplinary course of studies intended to help students become intelligent and critical scholars of legal and political discourse. While the minor may be useful for students contemplating law school, it is also intended to appeal to a wider group of students interested in issues relating to law and society and careers in public policy related fields. The minor is designed to achieve the following three interrelated goals.

First, to introduce students the major areas of law that affect life in the United States and important legal issues that influence current

events. **Second**, to enable students to become familiar and fluent with a legal vocabulary and legal reasoning. **Third**, to better prepare students with the analytical and conceptual tools to be critical citizens in our constitutional democracy. In addition to these goals, students who complete the minor and who intend to attend law school may find themselves more prepared than they otherwise would be for the often mystifying and rigorous first year of law school. To help these students, the program contains a strong advising component which assists students who are contemplating law school to provide them with a realistic appraisal of law school and of the legal profession. The counselors will aid students with the law school application process.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- To apply for this minor, students must complete and submit a major/minor change declaration form to the CLAS Advising Office in North Classroom, 1030.
- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 18 credit hours from the approved courses.
2. Students must complete a minimum of 18 upper-division (3000-level and above) credit hours in the minor from the approved courses.
3. Students must earn a minimum grade of C (2.0) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 3.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 credit hours with CU Denver faculty from the approved courses.

Program Restrictions, Allowances and Recommendations

1. All courses must be taken in residence at CU Denver from CU Denver faculty. No transfer courses apply.
2. Courses taken for the minor cannot serve to fulfill requirements of the university general education or the CLAS undergraduate core graduation requirements. Courses taken for a student's major cannot be used to fulfill any requirements for the minor unless prior permission is granted by the minor coordinator.

3. Every course used to complete minor requirements must be upper-division (3000-level and above).

Foundations

Code	Title	Hours
<i>Take the following:</i> *		6
HUMN 4251	Introduction to Legal Studies	3
SSCI 4025	Legal Advocacy/Engagement	3

* No substitutions allowed for Foundations courses.

Constitutional Thought

Code	Title	Hours
<i>Take two of the following:</i> *		6
PSCI 4477	Constitutional Law I	3
PSCI 4487	Constitutional Law II	3
SSCI 4060	Topics in Law Studies: Constitutional Thought	3-6
SSCI 4325	First Amendment: Theory and Context	3

* No substitutions allowed for Constitutional Thought courses.

Social Context of law

Code	Title	Hours
<i>Take two of the following:</i>		6
COMM 3231	Famous U.S. Trials	3
CRJU 4430	Law and Society	3
HIST 4308	Crime, Policing, and Justice in American History	3
PHIL 4260	Philosophy of Law	3
PSCI 4827	Women and the Law	3
PSYC 3505	Psychology and the Law	3
SOCY 4700	Sociology of Law	3
SSCI 4070	Topics in Law Studies: Social Context of Law	3-6

Mathematical and Statistical Sciences

Chair: Julien Langou

Associate Chair: Stephen Hartke

Program Assistant II: Maria Rase

Administrative Assistant III: Kylie Parish

IT Senior Professional: Joseph Malingowski

Office: Student Commons Building, 4th Floor

Telephone: 303-315-1700 (department)

Fax: 303-315-1704

Department Email: MathStaff@ucdenver.edu

Overview

The Department of Mathematical and Statistical Sciences at the University of Colorado Denver offers degrees and certificates at the undergraduate and graduate levels in mathematics, applied mathematics, data science, and statistics through coursework, research and industrial collaboration. Traditional courses such as calculus, linear algebra,

probability, statistics and discrete mathematics are offered regularly by the department. In addition, contemporary subjects such as high-performance computing; numerical analysis, optimization, statistical methods, and operations research are also well represented by course offerings and faculty interests. In all of its activities, the department embodies the outlook that mathematics, statistics, computing and data science are powerful tool that can be used to solve problems of immediate and practical importance.

Apart from the specialized mathematical and statistical skills acquired through course work, the degrees and certificates also provide general skills that are valued by many employers. These skills include problem solving, critical thinking, analysis, facility with data, the ability to process quantitative information, and perhaps most important of all, the ability to learn new skills and concepts quickly.

Center for Computational & Mathematical Biology

Director: Weldon Lodwick

Telephone: 303-315-1733

The Center for Computational Biology (CCMB) is a multidisciplinary center focused on computational and mathematical biology research and education.

Center for Computational Mathematics

Director: Jan Mandel

Telephone: 303-315-1703

Website: <http://ccm.ucdenver.edu/>

The Center for Computational Mathematics is composed of faculty members who have an interest in computational mathematics, the study of solving mathematical problems with computers. The center resides in the Department of Mathematical and Statistical Sciences and includes faculty members from various other departments. The primary goal of the center is to foster research in computational mathematics and to maintain a strong educational program at all levels. It has extensive ties with industry along the Front Range and with government laboratories throughout the nation. It offers students an excellent opportunity to receive training and experience in this exciting new field. The center operates several supercomputing clusters.

Math Clinic

Website: <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/math-clinic> (<https://clas.ucdenver.edu/mathematical-and-statistical-sciences/math-clinic/>)

Each semester, the mathematical and statistical sciences department conducts math clinics that are open to both undergraduate and graduate students. Each clinic is sponsored by a business, government agency or research organization. The clinic sponsor provides a specific project on which students work with the supervision of a faculty member and a sponsor representative. Every clinic results in a final report to the sponsor and provides participating students with an opportunity to apply mathematics to relevant problems. Recent math clinic sponsors include Raytheon, Lockheed Martin, Xenometrix, Budget Truck Rental and United Launch Alliance.

Statistical Consulting Service

The Department of Mathematical and Statistical Sciences regularly offers a graduate course in statistical consulting in which students work on problems provided by researchers and clients at CU Denver and

in the Denver metropolitan area. Potential clients should contact the department at 303-315-1700.

Undergraduate Information

Co-Directors: Diana White and Adam Spiegler

Telephone: 303-315-1720

The Department of Mathematical and Statistical Sciences offers a BS program that provides broad training in mathematics with the option of specializing in one of four areas of special emphasis, or simply satisfying the requirements without specifying an area. The four areas of emphasis are: applied mathematics, probability and statistics, data science, and economics.

To determine which math course a student should take first, see the Department of Mathematical and Statistical Sciences webpage (www.math.ucdenver.edu (<http://www.math.ucdenver.edu>)).

Students with potential transfer credit that was not automatically accepted upon admission should contact the Department of Mathematical and Statistical Sciences (MathStaff@ucdenver.edu or 303-315-1700).

Students must declare a major in the CLAS Advising Office. Once a major is declared, students should contact the Department of Mathematical and Statistical Sciences to meet with a math advisor, and continue to do so at least once per semester. All mathematics majors should visit the CLAS Advising Office to have graduation requirements checked at a minimum the semester prior to graduation.

Please click here (<https://clas.ucdenver.edu/mathematical-and-statistical-sciences/undergraduate-programs/>) to learn more about the MATH programs on their website.

Graduation With Honors

The mathematical and statistical sciences department recognizes students who complete the undergraduate program with distinction.

To be eligible for graduation with honors at the *cum laude* level a student must graduate with an overall GPA of 3.2 or better for the last 60 credit hours taken at University of Colorado Denver and either:

- Option 1: Have a GPA of 3.7 or better in upper-division math courses taken at CU Denver, **or**
- Option 2: Have a GPA of 3.5 or better in upper-division math courses taken at CU Denver and must complete an honors project.

To be eligible for graduation with honors at the *magna cum laude* level a student must graduate with an overall GPA of 3.2 or better for the last 60 credit hours taken at University of Colorado Denver and either:

- Option 1: Have a GPA of 3.85 or better in upper-division math courses taken at CU Denver, **or**
- Option 2: Have a GPA of 3.7 or better in upper-division math courses taken at CU Denver and must complete an honors project.

To be eligible for graduation with honors at the *summa cum laude* level a student must graduate with an overall GPA of 3.2 or better for the last 60 credit hours taken at University of Colorado Denver and satisfy **all** of the following:

- Have a GPA of 3.7 or better in upper-division math courses taken at CU Denver and must complete an honors project.

- When a recommendation for Honors at the Summa Cum Laude is brought to Department as a motion, a vote will be taken and such a motion must be passed by a two-thirds majority of those voting at the meeting.
- Considerations such as overall quality of the candidate's honors project, outreach, community, other extra-curricular activities relating to mathematics.

Undergraduate Applied Statistics Certificate

Director: Joshua French

Email: Joshua.French@ucdenver.edu

Telephone: 303-315-1709

There is a growing need for qualified statistical analysts of the ever-increasing amounts of data collected in business, industry, and government. The certificate in applied statistics program is designed to give students a strong background in statistical methodology and data analysis in preparation for opportunities in the workforce or for graduate studies. The Department of Mathematical and Statistical Sciences offers certificates in applied statistics at both the undergraduate and graduate levels.

Click here (p. 540) to learn about the Undergraduate Applied Statistics Certificate.

Undergraduate Certificate in Data Science Essentials

Director: Adam Spiegler

Email: math.advising@ucdenver.edu

Data scientists will have essential competencies in several areas related to analysis of data. In particular, a data scientist should: have strong programming ability in a language popular in data science (e.g., Python, R, Julia); be able to extract, manipulate, and visualize data; have an understanding of probability and statistics in order to quantify uncertainty; be able to build complex models for finding patterns and explaining data. This certificate should provide students with essential skills for introductory data science.

Click here (p. 541) to learn about the Undergraduate Certificate in Data Science Essentials

Graduate Information

Faculty

Professors:

Stephen Hartke, PhD, Rutgers University
Michael S. Jacobson, PhD, Emory University
Julien Langou, PhD, INSA, Toulouse, France
Weldon A. Lodwick, PhD, Oregon State University
Jan Mandel, PhD (equivalent), Charles University, Czechoslovakia
Florian Pfender, PhD, Emory University
Stephanie A. Santorico, PhD, North Carolina State University

Associate Professors:

Stephen Billups, PhD, University of Wisconsin-Madison
Steffen Borgwardt, PhD, Technische Universität München
Troy Butler, PhD, Colorado State University
Joshua French, PhD, Colorado State University
Audrey Hendricks, PhD, Boston University
Burton Simon, PhD, University of Michigan, Ann Arbor
Diana White, PhD, University of Nebraska

Assistant Professors:

Erin Austin, PhD, University of Minnesota
Yaning Liu, PhD, Florida State University
Emily Speakman, PhD, University of Michigan

Associate Professors, Clinical Teaching Track:

RaKissa Manzanarez, PhD, University of Northern Colorado
Adam Spiegler, PhD, University of Arizona

Senior Instructors:

Michael Kawai, MS, University of Colorado Denver
Gary Olson, MS, University of Colorado Denver
Robert Rostermundt, PhD, University of Colorado Denver

Instructors:

Joe Billello, MS, Long Island University
Daniel Klie, MS, University of Colorado Denver
Lance Lana, MS, University of Colorado Denver
Dmitriy Ostrovskiy, PhD, State University of New York at Stony Brook
Pamela Whitten, MA, University of Colorado Boulder

International College of Beijing Faculty:

Ba Nguyen, PhD, Wayne State University
Joseph Quarcio, PhD, University of South Florida

Research Faculty:

Aime Fournier, PhD, Yale University

Emeritus Faculty:

William Briggs, PhD, Harvard University
William E. Cherowitzo, PhD, Columbia University
Kathryn L. Fraughnaugh, PhD, University of Houston
J. Richard Lundgren, PhD, Ohio State University
Andrew Knyazev, PhD, Russian Academy of Sciences
Stanley E. Payne, PhD, Florida State University

Mathematics Courses

MATH 1010 - Mathematics for the Liberal Arts (3 Credits)

Designed to give liberal arts students the skills required to understand and interpret quantitative information that they encounter in the news and in their studies, and to make quantitatively-based decisions in their lives. Topics include a survey of logic and analysis of arguments, identifying fallacies in reasoning, working with numbers and units, linear and exponential relations and essentials of probability and statistics. The emphasis is on applications with case studies in economics, finance, environmental sciences, health, music and science. Note: This course assumes that students have knowledge equivalent to three years of high school mathematics (two years of algebra). Requisite: In order to promote student success, any student who has an ACT MATH score less than 19 (or equivalently an SAT MATH score less than 520) AND a H.S. GPA of less than 3.25 will be required to enroll in the one credit hour co-requisite workshop MATH 1011. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1
 Grading Basis: Letter Grade

In order to promote student success, any student who has an ACT MATH score less than 19 (or equivalently an SAT MATH score less than 520) AND a H.S. GPA of less than 3.25 will be required to enroll in the one credit hour co-requisite workshop MATH 1011.

Additional Information: Denver Core Requirement, Mathematics; GT courses GT Pathways, GT-MA1, Mathematics.

MATH 1011 - Math for Liberal Arts Workshop (1 Credit)

Prepares students for college-level mathematics. Students receive one-on-one and small-group instruction on mathematics topics related to college level mathematics success. Coreq: MATH 1010. Term offered: fall, spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Coreq: MATH 1010

MATH 1060 - Finite Mathematics (3 Credits)

This course is designed to introduce students to mathematics topics commonly encountered by business students. This course meets the universities CORE mathematics requirement. The topics include linear equations and inequalities, linear, quadratic, exponential and logarithmic functions, simple, compound and continuous interest, future and present value annuities, amortization, systems of equations, linear programming, logic, sets and probability. Graphing technology is used extensively and business applications are emphasized throughout. Terms offered: Fall and Spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Mathematics.

MATH 1070 - College Algebra for Business (3 Credits)

Covers the same mathematical topics as College Algebra, MATH 1110, but with business applications. Note: Graphics calculator required. Note: Students may not receive credit for this course if they have already received credit for MATH 1110 or MATH 1130. Note: 24 on ACT-Math, 560 on SAT-Math or above average performance in intermediate algebra, algebraic literacy or integrated math are strongly recommended as preparation for this course. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics.

MATH 1080 - Calculus for Social Sciences and Business (3 Credits)

A one-semester course in single-variable calculus. Topics include limits, derivatives, differentiation rules, integration and integration rules.

Emphasis is on applications to business and social sciences. Note: No knowledge of trigonometry is required. Those planning to take more than one semester of calculus should take MATH 1401 instead of MATH 1080. MATH 1070 or MATH 1110 with a C- or higher is required for students to register for this course. No co-credit with MATH 1401. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 1070 or MATH 1110 with a C- or higher

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 1108 - Stretch College Algebra-Part 1 (3 Credits)

This course is the first half of a two-semester sequence (consisting of MATH 1108 followed by MATH 1109). The two-semester course sequence is equivalent to MATH 1110 (College Algebra). The topics in algebra are designed for students who intend to take the calculus sequence. An in-depth study of functions, linear and quadratic equations, circles, inequalities, domain & range, piecewise and transformation of functions, mathematical modeling and select other topics are explored. Desmos graphing technology is used extensively and students will review algebraic skills such as factoring and completing the square, graphing techniques and function properties where needed. Applications are emphasized. Note: No co-credit with MATH 1070, MATH 1110 or MATH 1130. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 1109 - Stretch College Algebra-Part 2 (3 Credits)

This course is the second half of a two-semester sequence (consisting of MATH 1108 followed by MATH 1109). The two semester course sequence is equivalent to MATH 1110 (College Algebra). The topics in algebra are designed for students who intend to take the calculus sequence. Data scatter plots and curve fitting, solving equations, polynomial functions, rational functions, exponential and logarithmic functions and selected other topics are explored. Desmos graphing technology is used extensively and students enrolled in MATH 1109 will review algebraic skills such as solving linear and quadratic equations, factoring and completing the square, graphing techniques and function properties where needed. Applications are emphasized. Note: No co-credit with MATH 1070, MATH 1110 or MATH 1130. Prerequisite: MATH 1108 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Pre: MATH 1108 with C- or higher.

Additional Information: Denver Core Requirement, Mathematics.

MATH 1110 - College Algebra (4 Credits)

Topics in algebra designed for students who intend to take the calculus sequence. Functions, domains, ranges, graphs, data scatter plots and curve fitting, solving equations and systems of equations, polynomial, rational, exponential and logarithmic functions and other topics.

Applications are emphasized. Note: Students may not receive credit for this course if they have already received credit for MATH 1070 or MATH 1130. Prereq: MATH 1109 or MATH 1070 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA10 or MA30 or MA01 Student Group OR ALEKS PPL score 46-100. If you have any questions or concerns about this requisite, please notify MATH.Placement@ucdenver.edu. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

MATH 1109 or MATH 1070 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA10 or MA30 or MA01 Student Group OR ALEKS PPL score 46-100.

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: Fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

MATH 1120 - College Trigonometry (3 Credits)

Topics in trigonometry, analytic geometry, and elementary functions designed for students who intend to take the calculus sequence. Angles and trigonometry functions of acute angles, analytic trigonometry, fundamental trigonometric functions and identities including hyperbolic trigonometry, parametric equations, and polar coordinate system. Graphic calculators and/or computer algebra systems are used extensively. Applications are emphasized. Prereq: MATH 1109 or MATH 1070 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100. If you have any questions or concerns about this requisite, please notify MATH.Placement@ucdenver.edu. Students with a grade of B- or better in MATH 1110 or MATH 1070 pass the course at a much higher rate. No co-credit with MATH 1130. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

MATH 1109 or MATH 1070 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100.

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 1130 - Precalculus Mathematics (4 Credits)

Condensed treatment of the topics in MATH 1110 and 1120. Prereq: : MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100. If you have any questions or concerns about this requisite, please notify MATH.Placement@ucdenver.edu. No co-credit with MATH 1070, 1110 or 1120. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

MATH 1120 or MATH 1130 or MATH 1401 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100.

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 1376 - Programming for Data Science (3 Credits)

The course introduces scientific computing using Python. Topics will include programming skills such as assignment, control statements, loops, and functions. Applications will focus on mathematical and data science topics. Prereq: MATH 1109 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 or MATH 2830 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 1109 or MATH 1110 or MATH 1120 or MATH 1130 or MATH 1401 or MATH 2830 with a C- or higher OR entry into the MA30 or MA01 Student Group OR ALEKS PPL score 61-100.

MATH 1401 - Calculus I (4 Credits)

First course of a three-semester sequence (MATH 1401, 2411, 2421) in calculus. Topics covered include limits, derivatives, applications of derivatives, and the definite integral. Note: No co-credit with MATH 1080. Prereq: MATH 1109 or MATH 1070 or MATH 1110 with a C- or higher and MATH 1120 with a C- or higher or MATH 1130 with a C- or higher or MATH 1401 with a C- or higher OR entry into the MA01 Student Group OR ALEKS PPL score 76-100. If you have any questions or concerns about this requisite, please notify MATH.Placement@ucdenver.edu. Max Hours: 4 Credits.

Grading Basis: Letter Grade

MATH 1109 or MATH 1070 or MATH 1110 with a C- or higher and MATH 1120 with a C- or higher or MATH 1130 with a C- or higher or MATH 1401 with a C- or higher OR entry into the MA01 Student Group OR ALEKS PPL score 76-100.

Additional Information: Denver Core Requirement, Mathematics; GT courses GT Pathways, GT-MA1, Mathematics.

MATH 1840 - Independent Study. (1-3 Credits)

Repeatable. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

MATH 2411 - Calculus II (4 Credits)

The second of a three-semester sequence (MATH 1401, 2411, 2421) in calculus. Topics covered include exponential, logarithmic, and trigonometric functions, techniques of integration, indeterminate forms, improper integrals and infinite series. Prereq: C- or better in MATH 1401. Note: Students with a grade of B- or better in MATH 1401 pass this course at a much higher rate. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

Prereq: C- or better in MATH 1401

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 2421 - Calculus III (4 Credits)

The third of a three-semester sequence in Calculus (MATH 1401, 2411 and 2421). Topics include vectors, vector-valued functions, partial differentiation, differentiation, multiple integration, and vector calculus. Prereq: C- or better in MATH 2411. Note: Students with a grade of B- or better in MATH 2411 pass this course at a much higher rate. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1

Grading Basis: Letter Grade

Prereq: C- or better in MATH 2411

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 2810 - Topics (1-3 Credits)

Topics in mathematics with various subtitles reflecting course content.

Prereq: permission of instructor. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

MATH 2830 - Introductory Statistics (3 Credits)

Basic statistical concepts, summarizing data, probability concepts, distributions, confidence intervals, hypothesis testing. Note: This course assumes that students have knowledge equivalent to three years of high school mathematics (two years of algebra), intermediate algebra, or Algebraic Literacy at a Colorado Community College at the start of class. Students who have a grade of B- or better in one of these courses pass at a much higher rate. Term offered: fall, spring, summer. Requisite: In order to promote student success, any student who has an ACT MATH score less than 19 (or equivalently an SAT MATH score less than 520) AND a H.S. GPA of less than 3.25 will be required to enroll in the one credit hour co-requisite workshop MATH 2831. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-MA1.

Grading Basis: Letter Grade

In order to promote student success, any student who has an ACT MATH score less than 19 (or equivalently an SAT MATH score less than 520) AND a H.S. GPA of less than 3.25 will be required to enroll in the one credit hour co-requisite workshop MATH 2831.

Additional Information: GT courses GT Pathways, GT-MA1, Mathematics; Denver Core Requirement, Mathematics.

MATH 2831 - Introductory Statistics Workshop (1 Credit)

Prepares students for college-level mathematics. Students receive one-on-one and small-group instruction on mathematics topics related to college level mathematics success. Co-req: MATH 2830. Term offered: fall, spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Co-requisite: MATH 2830

MATH 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

MATH 3000 - Introduction to Abstract Mathematics (3 Credits)

Students learn to prove and critique proofs of theorems by studying elementary topics in abstract mathematics, including logic, sets, functions, equivalence relations and elementary combinatorics. Coreq: MATH 2421 or MATH 3191. Note: This course assumes that students have taken MATH 2411 or equivalent. Students who have a grade of B- or better in MATH 2411 pass at a much higher rate. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Coreq: MATH 2421 or MATH 3191

MATH 3041 - Fundamental Mathematics: Algebra, Probability and Data Analysis (3 Credits)

This course is particularly pertinent to prospective elementary teachers, involving algebra, probability and data analysis from a modern approach. Its primary emphasis is asking and answering questions intelligently about our world through the use of algebra, probability, and data analysis. Explorations focus on representing, analyzing, generalizing, formalizing, and communicating patterns and the chances of future events. Mathematics content will be presented in a problem solving and exploratory context, using appropriate instructional tools. This course will not satisfy the requirements for a major in Mathematics. Prereq: MTED 3040 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MTED 3040 with a C- or higher.

Additional Information: Denver Core Requirement, Mathematics.

MATH 3191 - Applied Linear Algebra (3 Credits)

Topics include systems of equations, Gaussian elimination with partial pivoting, LU-decomposition of matrices, matrix algebra, determinants, vector spaces, linear transformations, eigen values and applications.

Note: No co-credit with MATH 3195. Prereq: C- or better in MATH 2411.

Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: C- or better in MATH 2411

MATH 3195 - Linear Algebra and Differential Equations (4 Credits)

Presents the essential ideas and methods of linear algebra and differential equations, emphasizing the connections between and the applications of both subjects. The course is designed for students in the sciences and engineering. Note: No co-credit with MATH 3200 and MATH 3191. Prerequisite: MATH 2411 with a C- or higher. Term offered: fall, spring, summer. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: C- or better in MATH 2411

MATH 3200 - Elementary Differential Equations (3 Credits)

First and second order differential equations, Laplace transforms, systems of equations, with an emphasis on modeling and applications. Note: No co-credit with MATH 3195. Prerequisite: MATH 2411 with a C- or higher, Co-requisite MATH 3191. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: MATH 2411 with a C- or higher, Co-requisite MATH 3191.

MATH 3210 - Higher Geometry I (3 Credits)

Studies the foundations of modern geometry by examining axiomatic systems for various geometries, with an emphasis on non-Euclidean hyperbolic geometry. Prereq: C- or better in MATH 3000. Cross-listed with MCKE 5210. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: C- or better in MATH 3000

MATH 3301 - Introduction to Optimization (3 Credits)

Introduces a mathematical approach for decision-making in practice based on optimization. Students will learn to model, analyze and solve a variety of problems from deterministic operations using both continuous and discrete mathematical programming algorithms and software. Note: this course assumes that students have taken MATH 3191 or MATH 3195 or equivalent. Students who have received a grade of B- or better in MATH 3191 or 3195 pass this course at a much higher rate. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 3302 - Simulation in Operations Research (3 Credits)

Elementary stochastic processes and standard nondeterministic operations research models solved by simulation: Markov chains, Poisson process, Monte Carlo and discrete-event simulation, queuing theory, and inventory models. Note: This course assumes that students have programming experience (e.g. MATLAB), and have taken MATH 3191 and MATH 3800 or 4810 or equivalent. Students who have a grade of B- or better in MATH 3191 and MATH 3800 or 4810 pass this course at a much higher rate. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 3376 - Data Wrangling & Visualization (3 Credits)

The course provides an introduction to obtaining, restructuring, and visualizing complex data sets. Students will learn to manipulate many data types, store data in a variety of structures, and construct static and dynamic plots in a variety of contexts. Students earning a B- or better in Math 1376 or 4387 are more likely to be successful in this course than students earning lower grades. Prereq: MATH 1376 or MATH 4387 with a C- or higher and MATH 2830 or MATH 3382 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: MATH 1376 or MATH 4387 with a C- or higher and MATH 2830 or MATH 3382 with a C- or higher

MATH 3382 - Statistical Theory (3 Credits)

Probability, random variables, properties of distributions, bootstrap methods, maximum likelihood and method of moments estimation, properties of estimators, classical methods for confidence intervals and hypothesis testing. Prereq: MATH 2421 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 2421 with a C- or higher.

MATH 3440 - Introduction to Symbolic Logic (3 Credits)

Covers truth functional and quantificational logic through polyadic first order predicate calculus and theory of identity. Attention is given to such problems in metatheory as proofs of the completeness and consistency of systems of logic. Cross-listed with PHIL 3440. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

MATH 3511 - Mathematics of Chemistry (4 Credits)

Multivariate functions, probability and statistics for chemistry, matrices and vectors, mathematics of reaction kinetics and symmetry point groups. Course covers mathematics needed for CHEM 4511 and 4521. Can also be an elective for the mathematics minor. Prereq: MATH 2411, CHEM 2031 or CHEM 2081, CHEM 2061 or CHEM 2091. Term offered: fall. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: MATH 2411, CHEM 2031 or CHEM 2081, CHEM 2061 or CHEM 2091

Typically Offered: Fall.

MATH 3800 - Probability and Statistics for Engineers (3 Credits)

Basic probability theory, discrete and continuous random variables, point and interval estimation, test of hypotheses, and simple linear regression.

Note: no co-credit with MATH 4810. Note: This course assumes that students have taken MATH 2411 and have either previously taken MATH 2421 or are taking MATH 2421 the same semester as MATH 3800. Students who have a grade of B- or better in MATH 2411 pass this course at a much higher rate. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

MATH 4010 - History of Mathematics (3 Credits)

A history of the development of mathematical techniques and ideas from early civilization to the present, including the inter-relationships of mathematics and sciences. Prereq: MATH 2411 with a C- or higher. Coreq: MATH 3000 or 3191. Cross-listed with MATH 5010. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 2411 with a C- or higher Coreq: MATH 3000 or 3191

Typically Offered: Spring.

MATH 4015 - Capstone Course for Secondary Teachers (3 Credits)

High school mathematics from an advanced perspective: analyses of alternative definitions, extensions and generalizations of familiar theorems; discussions of historical contexts in which concepts arose; applications of mathematics. Note: For undergraduate majors, this course only counts toward the mathematics education option. Note: this course assumes that students have taken MATH 3210, 4310 and 3140 or equivalent. Cross-listed with MATH 5015. Max Hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4027 - Topics in Mathematics (3 Credits)

Special topics in mathematics will be covered; consult 'Schedule Planner' for current topics and prerequisites. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

MATH 4110 - Theory of Numbers (3 Credits)

Every other year. Topics include divisibility, prime numbers, congruencies, number theoretic functions, quadratic reciprocity, and special diophantine equations, with applications in engineering. Prereq: Grade of C- or better in MATH 3000. Note: Students who have a grade of B- or better in MATH 3000 pass this course at a much higher rate. Cross-listed with MATH 5110. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Grade of C- or better in MATH 3000

MATH 4140 - Introduction to Modern Algebra (3 Credits)

Studies the fundamental algebraic structures used in modern mathematics. Topics include groups, rings, fields and polynomials. Note: This course assumes that students have taken MATH 3000 or equivalent and either MATH 3191 or MATH 3195. Students who have a grade of B- or better in these courses pass at a much higher rate. Cross-listed with MCKE 5140. Prereq: MATH 3000 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 3000 with a C- or higher.

MATH 4310 - Introduction to Real Analysis I (3 Credits)

Calculus of one variable, the real number system, continuity, differentiation, integration theory, sequence and series. Prereq: Prereq: Grade of C- or better in MATH 2421 and 3000. Note: Students who have a grade of B- or better in MATH 2421 and 3000 pass this course at a much higher rate. Cross-listed with MCKE 5310. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Grade of C- (1.7) or better in MATH 2421 and 3000

Typically Offered: Fall.

MATH 4320 - Introduction to Real Analysis II (3 Credits)

Convergence, uniform convergence; Taylor's theorem; calculus of several variables including continuity, differentiation and integration; Picard's theorem in ordinary differential equations and Fourier series. Prereq: MATH 4310 with a C- or higher. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 4310 with a C- or higher.

Typically Offered: Spring.

MATH 4337 - Intro to Statistical and Machine Learning (3 Credits)

This is an applied, hands-on course in statistical and machine learning. This course will introduce students to the general framework, best practices, model training, and assessment for machine learning methods from the viewpoint of statistics. Both supervised and unsupervised methods are covered including penalized regression, knearest neighbors, clustering, and neural networks. Additional machine learning topics such as random forests and support vector machines are included as time permits. Ultimately, students will learn how and why to use a particular method, how to validate and explain the results, and apply the methods to real data. Note: It is recommended that students are comfortable learning a statistical computing language such as R or Python as these will be taught alongside the course material. Students with minimal programming experience should expect to spend more time learning the programming language throughout the course. Prereq: MATH 4387 or MATH 5387 or MATH 4830 or MATH 5830 or BIOL 3763 with a C- or higher. Students who have completed a different statistics course that contains regression and computing may seek instructor permission to enroll. Cross-listed with MATH 5337. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 4387 or MATH 5387 or MATH 4830 or MATH 5830 or BIOL 3763 with a C- or higher.

MATH 4387 - Applied Regression Analysis (3 Credits)

Topics include simple and multiple linear regression, model diagnostics and remediation, and model selection. Emphasis is on practical aspects and applications of linear models to the analysis of data in business, engineering and behavioral, biological and physical sciences. Prereq: Grade of C- (1.7) or better in MATH 3191 and in MATH 3800 or 4820 or 3382. Note: Students who have a grade of B- or better in MATH 3191, an A in MATH 3800 or a B- or better in MATH 4820 pass this course at a much higher rate. Cross-listed with MATH 5387. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Grade of C- (1.7) or better in MATH 3191 and in MATH 3800 or 4820 or 3382

Typically Offered: Fall.

MATH 4388 - Machine Learning Methods (3 Credits)

Regression, neural networks, clustering, support vector machines, random forests, and other prediction/classification techniques will be used to solve supervised and unsupervised learning problems. This course will connect each topic with the underlying mathematical foundation such as optimization methods and statistical inference. A key focus is deriving the methods and their properties to guide proper application. Students will learn how to apply methods using standard libraries from Python, R, or Matlab. Prereq: MATH 1376 or MATH 3250 and MATH 3382 or MATH 3800 and MATH 3191 or MATH 3195, all with a C- or higher. Cross-listed with MATH 5388. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 1376 or MATH 3250 and MATH 3382 or MATH 3800 and MATH 3191 or MATH 3195, all with a C- or higher.

MATH 4390 - Game Theory (3 Credits)

Zero-sum and non-zero-sum games; Nash equilibrium and the principle of indifference; Shapley value and other concepts of fair division; Evolutionary game theory, ESS, and evolutionary population dynamics. Applications in economics, business, and biology. Note: This course assumes that students have programming experience (e.g. MATLAB), and have taken MATH 2421, 3191 and 3200 or MATH 3195, MATH 3800 or 4810, or equivalent. Students who have a grade of B- or better in these courses pass this course at a much higher rate. Cross-listed with MATH 5390. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring, Summer.

MATH 4394 - Experimental Designs (3 Credits)

Designs covered will include: completely randomized, complete block, split plot, incomplete block, factorial and fractional factorial designs. Additionally, power and study design for non-experimental studies will be covered. Prereq: Grade of C- or better in MATH 4387 or 5387. Cross-listed with MATH 5394. Term offered: spring of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Grade of C- or better in MATH 4387 or 5387

MATH 4408 - Applied Graph Theory (3 Credits)

Introduces discrete structures and applications of graph theory to computer science, engineering, operations research, social science, and biology. Topics include connectivity, coloring, trees, Euler and Hamiltonian paths and circuits, matching and covering problems, shortest route and network flows. Prereq: MATH 2511 or CSCI 2511 or MATH 3000 with a C- or higher. Note: This course assumes that students have taken MATH/CSCI 2511 or MATH 3000. Students who have a grade of B- or better in MATH/CSCI 2511 or MATH 3000 pass this course at a much higher rate. Cross-listed with CSCI 4408 and MCKE 5408. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 2511 or CSCI 2511 or MATH 3000 with a C- or higher.

Typically Offered: Spring.

MATH 4409 - Applied Combinatorics (3 Credits)

Every other year. Major emphasis is on applied combinatorics and combinatorial algorithms, with applications in computer science and operations. Topics include general counting methods, generating functions, recurrence relations, inclusion-exclusion, and block designs. Prereq: MATH 3000 with a C- or higher. Note: This course assumes that students have taken MATH 3000. Students who have a grade of B- or better in MATH 3000 pass this course at a much higher rate. Cross-listed with MCKE 5409. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: MATH 3000 with a C- or higher.

Typically Offered: Fall.

MATH 4450 - Complex Variables (3 Credits)

Infrequent. Topics include complex algebra, Cauchy-Riemann equations, Laurent expansions, theory of residues, complex integration, and introduction to conformal mapping. Note: This course assumes that students have taken MATH 2421 and MATH 3000. Students who have a grade of B- or better in MATH 2421 and MATH 3000 pass this course at a much higher rate. Term offered: spring of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4650 - Numerical Analysis I (3 Credits)

Methods and analysis of techniques used to resolve continuous mathematical problems on the computer. Solution of linear and nonlinear equations, interpolation and integration. Prereq: MATH 3191 or MATH 3195 with a C- or higher. Cross-listed with CSCI 4650, 5660, and MATH 5660. Term offered: fall, spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 3191 or MATH 3195 with a C- or higher.

MATH 4660 - Numerical Analysis II (3 Credits)

Numerical differentiation and integration, numerical solution of ordinary differential equations, and numerical solutions of partial differential equations as time allows. Prereq: MATH 3191 or MATH 3195 with a C- or higher and MATH 3200 with a C- or higher. Cross-listed with MATH 5661, CSCI 4660 and 5661. Term offered: spring of odd years. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: MATH 3191 or MATH 3195 with a C- or higher and MATH 3200 with a C- or higher.

Typically Offered: Spring.

MATH 4733 - Partial Differential Equations (3 Credits)

Infrequent. Initial/Boundary value problems for first-order, wave, heat and Laplace Equations; maximum principles; Fourier Series and applications.

Note: This course assumes that students have taken MATH 2421 and MATH 3200, and either have taken MATH 3000 or have experience with partial differential equations in engineering or physics. Students who have a grade of B- or better in MATH 2421 and MATH 3200 pass this course at a much higher rate. Cross-listed with MATH 5733. Term offered: spring of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4779 - Math Clinic (3 Credits)

The clinic is intended to illustrate the applicability and utility of mathematical concepts. Research problems investigated originate from a variety of sources—industry, government agencies, educational institutions, or nonprofit organizations. Prereq: consult Schedule Planner or instructor. Cross-listed with MATH 5779. Term offered: fall, spring.

Repeatable. Max Hours: 99 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 99.

MATH 4791 - Continuous Modeling (3 Credits)

Every other year. Surveys mathematical problems that arise in natural sciences and engineering. Topics may include population models, epidemic models, mechanics, heat transfer and diffusion, tomography, pharmaco-kinetics, traffic flow, fractal models, wave phenomena, and natural resource management. Most models discussed are based on differential and integral equations. Emphasis is formulation and validation of models as well as methods of solution. Note: This course assumes that students have taken MATH 3191 and MATH 3200. Students who have a grade of B- or better in MATH 3191 and MATH 3200 pass this course at a much higher rate. Cross-listed with MATH 5791.

Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4792 - Probabilistic Modeling (3 Credits)

Every other year. Markov chains; Poisson processes, continuous time Markov chains, elementary topics in queuing theory, and some mathematical aspects of Monte Carlo simulation, including random variate generation, variance reduction, and output analysis. Note: This course assumes that students have taken MATH 4810 or 5310 and have some programming experience. Students who have a grade of B- or better in MATH 4810 or 5310 pass this course at a much higher rate. Cross-listed with MATH 5792. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4793 - Discrete Math Modeling (3 Credits)

Every other year. Focuses on the use of graph theory and combinatorics to solve problems in a wide variety of disciplines. Applications are selected from computer science, communication networks, economics, operations research, and the social, biological and environmental sciences. Note: This course assumes that students have taken MATH 3191 and MATH 4408. Students who have a grade of B- or better in MATH 3191 and MATH 4408 pass this course at a much higher rate. Cross-listed with MATH 5793. Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4794 - Optimization Modeling (3 Credits)

Every other year. Principles of model formulation and analysis are developed by presenting a wide variety of applications, both for natural phenomena and social systems. Examples of optimization models to represent natural phenomena include principles of least time and energy. Examples in social systems include resource allocation, environmental control and land management. Specific applications vary, but are chosen to cover a wide scope that considers dichotomies, such as discrete vs. continuous, static vs. dynamic, and deterministic vs. stochastic.

Some computer modeling language (like GAMS) is taught. Note: This course assumes that students have taken MATH 2421 and MATH 3191. Students who have a grade of B- or better in MATH 2421 and MATH 3191 pass this course at a much higher rate. Cross-listed with MATH 5794.

Max hours: 3 Credits.

Grading Basis: Letter Grade

MATH 4810 - Introduction to Probability (3 Credits)

The course covers axioms of probability, combinatorial probability, conditional probability, random variables (discrete, continuous, and multivariate), expected value (mean, moments, variance, covariance, etc.), limit theorems (laws of large numbers, Central Limit Theorem). Note: No co-credit with MATH 3800. Coreq: MATH 2421. Term offered: fall, spring.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Coreq: MATH 2421.

MATH 4820 - Introduction to Mathematical Statistics (3 Credits)

Sampling distributions, maximum likelihood and method of moments estimation, properties of estimators, classical methods for confidence intervals and hypothesis testing, simple linear regression. Prereq: Grade of C- or better in MATH 3800 or MATH 4810 (preferred). Note: Students who have a grade of A in MATH 3800 or a B- or better in MATH 4810 pass this course at a much higher rate. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Grade of C- or better in MATH 3800 or MATH 4810

Typically Offered: Spring.

MATH 4830 - Applied Statistics (3 Credits)

Review of estimation, confidence intervals and hypothesis testing; Anova; categorical data analysis; non-parametric tests; linear and logistic regression. No co-credit with MATH 4387 or 5387 and doesn't count for Math degrees. Cross-listed with MATH 5830. Prereq: MATH 2830 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 2830 with a C- or higher.

Typically Offered: Spring.

MATH 4840 - Independent Study (1-3 Credits)

Variable credit depending on the student's needs. Offered for the advanced student who desires to pursue a specific topic in considerable depth. Note: Supervision by a full-time faculty member is necessary, and the dean's office must concur. Students may register for this course more than once with departmental approval. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

MATH 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Mathematics, BS

Introduction

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 45 credit hours, including a minimum of 42 MATH credit hours.
2. Students must complete at least 30 upper-division (3000-level and above) credit hours in the major.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.25. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 upper-division level MATH credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must complete at least 15 of their upper-division level MATH credits with CU Denver faculty.
2. Students may not use any of the following MATH courses to count toward major requirements:

- MATH 3195 Linear Algebra and Differential Equations
- MATH 3511 Mathematics of Chemistry
- MATH 3800 Probability and Statistics for Engineers
- MATH 4830 Applied Statistics

Programming Requirements

Code	Title	Hours
<i>Take one of the following programming requirements:</i>		3-4
MATH 1376	Programming for Data Science	3
Or		
CSCI 1410 & CSCI 1411	Fundamentals of Computing and Fundamentals of Computing Laboratory	4

Mathematics Courses

Code	Title	Hours
<i>Take all of the following Mathematics courses:</i>		27
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4
MATH 2421	Calculus III	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3191	Applied Linear Algebra	3
MATH 3382	Statistical Theory	3
MATH 4310	Introduction to Real Analysis I	3
MATH 4779	Math Clinic	3

Electives

Code	Title	Hours
<i>Take five approved MATH electives (at least 15 semester hours) above the 3000 level, excluding 3195, 3511, 3800, and 4830.</i>		15
MATH 3200	Elementary Differential Equations	3
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 3376	Data Wrangling & Visualization	3
MATH 3440	Introduction to Symbolic Logic	3
MATH 4010	History of Mathematics	3
MATH 4027	Topics in Mathematics	3
MATH 4110	Theory of Numbers	3
MATH 4140	Introduction to Modern Algebra	3
MATH 4310	Introduction to Real Analysis I	3
MATH 4320	Introduction to Real Analysis II	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4387	Applied Regression Analysis	3
MATH 4388	Machine Learning Methods	3
MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4409	Applied Combinatorics	3
MATH 4450	Complex Variables	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3

MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3

Mathematics - Applied Option, BS

Introduction

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 54 credit hours, including a minimum of 42 MATH credit hours and a minimum of 9 credit hours in ancillary coursework.
2. Students must complete at least 30 upper-division (3000-level and above) credit hours in the major.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.25. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 upper-division level MATH credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must complete at least 15 of their upper-division level MATH credits with CU Denver faculty.
2. Students may not use any of the following MATH courses to count toward major requirements:
 - MATH 3195 Linear Algebra and Differential Equations
 - MATH 3511 Mathematics of Chemistry
 - MATH 3800 Probability and Statistics for Engineers
 - MATH 4830 Applied Statistics

Programming Courses

Code	Title	Hours
Take one of the following programming options:		3-4
MATH 1376	Programming for Data Science	3
Or		
CSCI 1410 & CSCI 1411	Fundamentals of Computing and Fundamentals of Computing Laboratory	4

Mathematics Courses

Code	Title	Hours
Take all of the following Mathematics courses:		36
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4
MATH 2421	Calculus III	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3191	Applied Linear Algebra	3
MATH 3200	Elementary Differential Equations	3
MATH 3382	Statistical Theory	3
MATH 4310	Introduction to Real Analysis I	3
MATH 4650	Numerical Analysis I	3
MATH 4733	Partial Differential Equations	3
MATH 4779	Math Clinic	3

Electives

Code	Title	Hours
Take two approved MATH electives (at least six semester hours) above the 3000 level, excluding 3195, 3511, 3800, and 4830.		6
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 3376	Data Wrangling & Visualization	3
MATH 3440	Introduction to Symbolic Logic	3
MATH 4010	History of Mathematics	3
MATH 4027	Topics in Mathematics	3
MATH 4110	Theory of Numbers	3
MATH 4140	Introduction to Modern Algebra	3
MATH 4310	Introduction to Real Analysis I	3
MATH 4320	Introduction to Real Analysis II	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4387	Applied Regression Analysis	3
MATH 4388	Machine Learning Methods	3

MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4409	Applied Combinatorics	3
MATH 4450	Complex Variables	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3
MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3

Additional Courses

Code	Title	Hours
<i>Take three additional courses (typically 9 credits), countable towards a major in one of the following subjects, at any level:</i>		9

Business

- Accounting - BS in Business Administration with Specialization in Information Systems (p. 138)
- Accounting, BS in Business Administration (p. 139)
- Entrepreneurship, BS in Business Administration (p. 140)
- Finance, BS in Business Administration (p. 140)
- Financial Management with Specialization in Information Systems, BS in Business Administration (p. 141)
- Financial Management, BS in Business Administration (p. 141)
- Human Resources Management, BS in Business Administration (p. 142)
- Information Systems, BS in Business Administration (p. 142)
- International Business, BS in Business Administration (p. 144)
- Management with Specialization in Information Systems, BS in Business Administration (p. 144)
- Management, BS in Business Administration (p. 145)
- Marketing with Specialization in Information Systems, BS in Business Administration (p. 145)
- Marketing, BS in Business Administration (p. 146)
- Risk Management and Insurance, BS in Business Administration (p. 147)
- Sports Business, BS in Business Administration (p. 148)

Biology

- Biology, BS (p. 486)

Chemistry

- Chemistry, BS (p. 337)

Computer Science

- Computer Science, BA (p. 269)
- Computer Science, BS (p. 271)

Economics

- Economics, BA (p. 366)

Geography and Environmental Science

- Geography - Environment, Society and Sustainability Option, BA (p. 419)
- Geography - Environmental Science Option, BA (p. 421)
- Geography - Urban Studies and Planning, BA (p. 423)

Health and Behavioral Science

- Public Health, BA (p. 436)
- Public Health, BS (p. 437)

Physics

- Physics - Pure and Applied Physics Option, BS (p. 597)

Sociology

- Sociology - Gender and Society Concentration, BA (p. 658)
- Sociology, BA (p. 657)

Other areas allowable on a case-by-case basis.

Mathematics, 5 Year BS/ Applied Mathematics, MS

Introduction

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

This is a unique program where a student can obtain both a BS in Mathematics and MS in Applied Mathematics in five years through a specialized course sequence. The program requires 12 fewer credits than if both degrees were earned separately.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

This is an on-campus program.

Declaring This Major

Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements for Mathematics BS

While students are completing a BS degree in Mathematics, (p. 529) they may also complete some of the requirements for an MS degree in Applied Mathematics (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/mathematical-statistical-sciences/applied-mathematics-ms/>) by participating in the BS/MS program using the following guidelines:

1. The student must apply and be accepted for participation in the BS/MS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary.
2. Students should declare their intent to complete this program in their junior or senior year to the Director of the Program in Applied Mathematics after completing MATH 1401 Calculus I, MATH 2411 Calculus

II, MATH 2421 Calculus III, MATH 3000 Introduction to Abstract Mathematics, MATH 3191 Applied Linear Algebra, MATH 4310 Introduction to Real Analysis I. A 3.0 grade point average (GPA) is required over all mathematics courses.

3. Students must complete a total of 45 credit hours, including a minimum of 42 MATH credit hours.
4. Students must complete at least 30 upper-division (3000-level and above) credit hours in the major.
5. Students must earn a minimum grade of C- (1.7) in all undergraduate courses taken at CU Denver and must achieve a minimum cumulative undergraduate GPA of 2.25. Students must earn a minimum grade of B- (2.7) in all graduate courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0, for all courses that will apply to the MS. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
6. Students must complete a minimum of 15 upper-division level MATH credit hours and all graduate level credit hours with CU Denver faculty.
7. Up to 12 semester hours of graduate-level course work may be taken as an undergraduate and applied toward the MS degree.
8. Students will be advised to take MATH 4320 Introduction to Real Analysis II as an elective for the B.S.
9. In the semester in which the student intends to complete their BS, students must apply for admission into MS degree in Applied Mathematics (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/mathematical-statistical-sciences/applied-mathematics-ms/>). Students must complete either the requirements for the M.S. degree without concentration area or specific coursework requirements in one of the following areas: Applied Probability, Applied Statistics, Discrete Mathematics, Mathematics of Engineering and Science, Numerical Analysis, or Operations Research.
10. The following MATH courses will **not** count toward a graduate degree: MCKE 5000 Algebraic Patterns and Functions I-MCKE 5009 Math Modeling—Using and Applying Math, MATH 5010 History of Mathematics, MATH 5012 An Advanced Perspective on Number and Operation-MATH 5015 Capstone Course for Secondary Teachers, MATH 5017 Topics in Mathematics for Teachers, MATH 5198 Mathematics for Bioscientists, and MATH 5830 Applied Statistics.

Mathematics, BS Course Requirements

Programming Requirements

Code	Title	Hours
<i>Take one of the following programming requirements:</i>		3-4
CSCI 1410 & CSCI 1411	Fundamentals of Computing and Fundamentals of Computing Laboratory	4
Or		
MATH 1376	Programming for Data Science	3

Mathematics Courses

Code	Title	Hours
<i>Take all of the following Mathematics courses:</i>		24
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4

MATH 2421	Calculus III	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3191	Applied Linear Algebra	3
MATH 3382	Statistical Theory	3
MATH 4310	Introduction to Real Analysis I	3

Electives

Code	Title	Hours
<i>Take two approved MATH electives (at least six semester hours) above the 3000 level, excluding 3195, 3511, 3800, 3999, and 4830.</i>		6
MATH 3200	Elementary Differential Equations	3
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 3376	Data Wrangling & Visualization	3
MATH 3440	Introduction to Symbolic Logic	3
MATH 4010	History of Mathematics	3
MATH 4027	Topics in Mathematics	3
MATH 4110	Theory of Numbers	3
MATH 4140	Introduction to Modern Algebra	3
MATH 4320	Introduction to Real Analysis II	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4387	Applied Regression Analysis	3
MATH 4388	Machine Learning Methods	3
MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4409	Applied Combinatorics	3
MATH 4450	Complex Variables	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4733	Partial Differential Equations	3
MATH 4779	Math Clinic	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3
MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3

MATH numbered 5000 or above

Note that these courses taken during the undergraduate career with be used for the B.S. and apply to the 30 hours of course work and satisfy the core requirement for the Applied Mathematics.

Code	Title	Hours
<i>Take the following:</i>		12
MATH 5779	Math Clinic	3
or MATH 6330	Workshop in Statistical Consulting	
<i>Take nine semester hours of MATH numbered 5000 or above from the list below.</i>		
MATH 5070	Applied Analysis	3
or MATH 6131	Real Analysis	
MATH 5135	Functions of a Complex Variable	3
MATH 5310	Probability	3

MATH 5320	Statistical Inference	3
MATH 5387	Applied Regression Analysis	3
MATH 5390	Game Theory	3
MATH 5394	Experimental Designs	3
MATH 5490	Network Flows	3
MATH 5593	Linear Programming	3
MATH 5660	Numerical Analysis I	3
MATH 5661	Numerical Analysis II	3
MATH 5733	Partial Differential Equations	3
MATH 5792	Probabilistic Modeling	3
MATH 5793	Discrete Math Modeling	3
MATH 5794	Optimization Modeling	3
MATH 6023	Topics in Discrete Math	3
MATH 6101	Uncertainty Quantification	3
MATH 6131	Real Analysis	3
MATH 6360	Exploratory Data Analysis	3
MATH 6376	Statistical Computing	3
MATH 6380	Stochastic Processes	3
MATH 6384	Spatial Data Analysis	3
MATH 6388	Statistical and Machine Learning	3
MATH 6395	Multivariate Methods	3
MATH 6398	Calculus of Variations and Optimal Control	3
MATH 6404	Applied Graph Theory	3
MATH 6595	Nonlinear Programming	3
MATH 6653	Introduction to Finite Element Methods	3
MATH 6735	Continuum Mechanics	3
MATH 6960	Research Methods in Mathematics and Statistics	3

Introduction

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

This is a unique program where a student can obtain both a BS in Mathematics and MS in Statistics in five years through a specialized course sequence. The program requires 12 fewer credits than if both degrees were earned separately.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements for Mathematics BS

While students are completing a BS degree in Mathematics (p. 529), they may also complete some of the requirements for an MS degree in Statistics (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/mathematical-statistical-sciences/statistics-ms/#degreerequirementstext>) by participating in the BS/MS program using the following guidelines:

1. The student must apply and be accepted for participation in the BS/MS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary.
2. Students should declare their intent to complete this program in their junior or senior year to the Director of the Program in Applied Mathematics after completing MATH 1401 Calculus I, MATH 2411 Calculus II, MATH 2421 Calculus III, MATH 3000 Introduction to Abstract Mathematics, MATH 3191 Applied Linear Algebra, MATH 4310 Introduction to Real Analysis I. A 3.0 grade point average (GPA) is required over all mathematics courses.
3. Students must complete a total of 45 credit hours, including a minimum of 42 MATH credit hours.
4. Students must complete at least 30 upper-division (3000-level and above) credit hours in the major.
5. Students must earn a minimum grade of C- (1.7) in all undergraduate courses taken at CU Denver and must achieve a minimum cumulative undergraduate GPA of 2.25. Students must earn a minimum grade of B- (2.7) in all graduate courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0, for all courses that will apply to the MS. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
6. Students must complete a minimum of 15 upper-division level MATH credit hours and all graduate level credit hours with CU Denver faculty.
7. Up to 12 semester hours of graduate-level course work may be taken as an undergraduate and applied toward the MS degree in Statistics (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/mathematical-statistical-sciences/statistics-ms/#degreerequirementstext>).

departments/college-liberal-arts-sciences/mathematical-statistical-sciences/statistics-ms/#degreerequirementstext).

8. In the semester in which the student intends to complete their BS, students must apply for admission into MS degree in Statistics (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/mathematical-statistical-sciences/statistics-ms/#degreerequirementstext>).

Mathematics, BS Course Requirements Programming Courses

Code	Title	Hours
<i>Take one of the following programming requirements:</i>		3-4
CSCI 1410 & CSCI 1411	Fundamentals of Computing and Fundamentals of Computing Laboratory	4
Or		
MATH 1376	Programming for Data Science	3

Mathematics Courses

Code	Title	Hours
<i>Take all of the following Mathematics courses:</i>		24
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4
MATH 2421	Calculus III	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3191	Applied Linear Algebra	3
MATH 3382	Statistical Theory	3
MATH 4310	Introduction to Real Analysis I	3

Electives

Code	Title	Hours
<i>Take two approved MATH electives (at least six semester hours) above the 3000 level, excluding 3195, 3511, 3800, 3999, and 4830.</i>		6
MATH 3200	Elementary Differential Equations	3
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 3376	Data Wrangling & Visualization	3
MATH 3440	Introduction to Symbolic Logic	3
MATH 4010	History of Mathematics	3
MATH 4027	Topics in Mathematics	3
MATH 4110	Theory of Numbers	3
MATH 4140	Introduction to Modern Algebra	3
MATH 4320	Introduction to Real Analysis II	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4387	Applied Regression Analysis	3
MATH 4388	Machine Learning Methods	3
MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4409	Applied Combinatorics	3
MATH 4450	Complex Variables	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4733	Partial Differential Equations	3

MATH 4779	Math Clinic	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3
MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3

MATH numbered 5000 or above

Note that these courses taken during the undergraduate career with be used for the B.S. and apply to the 30 hours of course work and satisfy the core requirement for the MS in Statistics.

Code	Title	Hours
<i>Take the following</i>		12
MATH 5310	Probability	3
MATH 5320	Statistical Inference	3
MATH 5387	Applied Regression Analysis	3
MATH 6330	Workshop in Statistical Consulting	3

Data Sciences Minor

Introduction

Please click here (p. 520) to see Mathematical and Statistical department information.

The demand for employees trained in data science has grown considerably in recent years. This minor will serve students by offering them specific training in data science.

Data science training should include components related to statistics, computing, and preferably, a specific field of application (e.g., business, biology, health, etc.). The minor is flexible in that it allows a student to get core training in data science programming and statistics, while allowing students to develop additional data science-related skills from other disciplines, or to focus on specific skills within data science.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your CLAS advisor.
- Click here (p. 63) to go to information about declaring a major/minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 18 credit hours, including a minimum of 12 MATH credit hours.
2. Students must complete a minimum of 9 upper division (3000-level and above) MATH credit hours. Most upper-division courses have lower-division pre-requisites.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 6 upper-division level MATH credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Be aware of no co-credit policies. Here is a non-exclusive list of our most common no co-credit policies: no co-credit between:
 - MATH 3800 Probability and Statistics for Engineers and MATH 4810 Introduction to Probability,
 - MATH 3195 Linear Algebra and Differential Equations and MATH 3200 Elementary Differential Equations,
 - MATH 3191 Applied Linear Algebra and MATH 3195 Linear Algebra and Differential Equations,
 - MATH 4387 Applied Regression Analysis and MATH 4830 Applied Statistics.

Required Courses

Code	Title	Hours
<i>Take the following</i>		12
MATH 1376	Programming for Data Science	3
or ISMG 4400	Programming Fundamentals with Python	
MATH 2830	Introductory Statistics (or equivalent coursework with Undergraduate Committee approval)	3
or MATH 3382	Statistical Theory	
or MATH 3800	Probability and Statistics for Engineers	
MATH 3376	Data Wrangling & Visualization	3
MATH 4830	Applied Statistics	3
or MATH 4387	Applied Regression Analysis	

Elective Courses

Code	Title	Hours
<i>Take two courses from the following list of approved courses:</i>		6
CSCI 3287	Database System Concepts	3
CSCI 3963	Network Structures	3
CSCI 4455	Data Mining	3
CSCI 4580	Data Science	3
CSCI 4788	Bioinformatics	3
CSCI 4930	Machine Learning	3
CSCI 4931	Deep Learning	3
CSCI 4951	Big Data Systems	3
ECON 4030	Data Analysis with SAS	3
ECON 4811	Introduction to Econometrics	3
GEOG 4070	Remote Sensing II: Advanced Remote Sensing	3
GEOG 4080	Introduction to GIS	3
GEOG 4081	Cartography and Computer Mapping	3
GEOG 4085	GIS Applications for the Urban Environment	3
GEOG 4090	Environmental Modeling with Geographic Information Systems	3
GEOG 4091	Open Source Software for Geospatial Applications	3
GEOG 4092	GIS Programming and Automation	3
GEOG 4095	Deploying GIS Functionality on the Web	3
GEOG 4235	GIS Applications in the Health Sciences	3
ISMG 3000	Technology In Business	3
ISMG 3500	Enterprise Data and Content Management	3
MATH 3191	Applied Linear Algebra	3
MATH 3195	Linear Algebra and Differential Equations	4
MATH 3200	Elementary Differential Equations	3
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4388	Machine Learning Methods	3
MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4733	Partial Differential Equations	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3
MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3
MATH 6330	Workshop in Statistical Consulting	3

Applied Statistics Undergraduate Certificate

Introduction

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

There is a growing need for qualified statistical analysts of the ever-increasing amounts of data collected in business, industry, and government. The Certificate in Applied Statistics program is designed to give students a strong background in statistical methodology and data analysis in preparation for opportunities in the workforce or for graduate studies.

Students will gain competence in such topics as descriptive statistics, estimation, confidence intervals, probability and inferential techniques, simple and multiple regression, analysis of variance, and more advanced topics. Students can focus on a particular application area such as economics, psychology, sociology, geology or environmental science through the choice of an elective course and the data analysis project.

Programs are offered at the undergraduate and graduate level.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

This is an on-campus program.

Declaring This Certificate

- Admission requirements: Completion of calculus 1, 2 and 3 as well as linear algebra, each at a B- or above. Students enrolled in the certificate program will be expected to utilize concepts from calculus and linear algebra without the use of technology, e.g., evaluation of limits, derivatives and integrals.
- The certificate can be declared by contacting the Director of Statistical Programs.

Coordinator: Joshua French Ph.D.

Telephone: 303-315-1709

E-mail: Joshua.French@ucdenver.edu

Web site: <https://clas.ucdenver.edu/mathematical-and-statistical-sciences/undergraduate-certificate-applied-statistics> (<https://>

clas.ucdenver.edu/mathematical-and-statistical-sciences/undergraduate-certificate-applied-statistics/

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies.

Certificate Requirements

1. Students must complete a minimum of 13 credits hours.
2. All credits for the certificate must be taken at the upper division level (3000-level and above).
3. Students must earn a minimum grade of B-(2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Since a certificate is a University of Colorado Denver certification of a student's specialized knowledge in an advanced subject area, all courses in the certificate program are expected to be taken in residency at the University of Colorado Denver.

Program Restrictions, Allowances and Recommendations

1. Students must be enrolled in one course per year to maintain their status in the certificate program.
2. Certificates must be completed within 3 years from matriculation.

Required Courses

Code	Title	Hours
<i>Take the following</i>		9
Fundamental course in probability		
MATH 4810	Introduction to Probability (recommended)	3
	or MATH 3800 Probability and Statistics for Engineers	
Fundamental course in mathematical statistics		
MATH 3382	Statistical Theory	3
Advanced applications course		
MATH 4387	Applied Regression Analysis	3

Electives

Code	Title	Hours
<i>Take one of the following</i>		3
Any statistics course in the Department of Mathematical and Statistical Sciences at the 4000 level or higher ¹		
ECON 4030	Data Analysis with SAS	3
ECON 4150	Economic Forecasting	3
ECON 4811	Introduction to Econometrics	3
GEOG 4770	Applied Statistics for the Natural Sciences	3

¹ (must be pre-approved by the Certificate Coordinator). MATH 4830 Applied Statistics cannot apply toward the certificate.

Data Analysis Project

Code	Title	Hours
<i>Take the following</i>		1
MATH 4840	Independent Study	1

An independent data analysis project is required with a report and presentation to demonstrate proficiency with data analysis techniques and a statistical computing software package. Enroll for one hour of MATH 4840, Independent Study, or in an equivalent course pre-approved by the Certificate Coordinator.

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/mathematical-and-statistical-sciences/undergraduate-certificate-applied-statistics/>).

Data Science Undergraduate Certificate

Please click here (p. 520) to see Mathematical and Statistical Sciences department information.

Introduction

Data scientists will have essential competencies in several areas related to analysis of data. In particular, a data scientist should: have strong programming ability in a language popular in data science (e.g., Python, R, Julia); be able to extract, manipulate, and visualize data; have an understanding of probability and statistics in order to quantify uncertainty; be able to build complex models for finding patterns and explaining data. This certificate should provide students with essential skills for introductory data science.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

This is an on-campus program.

Declaring This Certificate

See the program advisor for an application form.

Coordinator: Adam Spiegler Ph.D.

Telephone: 303-315-1700

E-mail: math.advising@ucdenver.edu

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 12 credit hours from approved courses.

- Students must complete a minimum of 6 upper division (3000-level and above) credit hours.
- Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.25. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
- Students must complete a minimum of 9 upper division level credit hours with CU Denver faculty.

Required Courses

Code	Title	Hours
<i>In order to ensure adequate programming skills for data science, students take one of the following courses that develops strong programming skills in a programming language popular in data science (e.g., Python, R, Julia).</i>		3

MATH 1376	Programming for Data Science	3
MATH 4650	Numerical Analysis I	3
ISMG 4400	Programming Fundamentals with Python	3

Code	Title	Hours
<i>In order to ensure that students can accurately quantify the likelihood of various outcomes and quantify uncertainty related to estimation and prediction, students take one of the following courses that covers basic probability and statistics.</i>		3

MATH 2830	Introductory Statistics (or equivalent coursework with Undergraduate Committee approval)	3
MATH 3382	Statistical Theory	3
MATH 3800	Probability and Statistics for Engineers	3

Code	Title	Hours
<i>In order to ensure that students are able to comfortably work with and visualize data, students take the following course, developing skills related to obtaining, manipulating, and visualizing data.</i>		3
MATH 3376	Data Wrangling & Visualization	3

Code	Title	Hours
<i>In order to ensure that students are able to build reasonably complex models for explaining or identifying patterns in data, students take one of the following courses that largely focuses on describing the behavior of data (whether synthetic or observed) via tools like simulation, direct model building, association, or a complementary approach.</i>		3
MATH 3301	Introduction to Optimization	3
MATH 4387	Applied Regression Analysis	3
MATH 4830	Applied Statistics	3

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/mathematical-and-statistical-sciences/undergraduate-certificate-data-science-essentials/>).

Modern Languages

Chair: Devin Jenkins

Program Assistant: Niki Mott

Office: Plaza Building, Room 118

Mailing Address:

Campus Box 178

P.O. Box 173364

Denver, CO 80217-3364

Telephone: 303-315-7234

Fax: 303-315-7233

Overview

General Information

The Department of Modern Languages includes Arabic, Chinese, French, German, Latin and Spanish. Majors are available in French and Spanish, and minors are available in Chinese, French, Linguistics and Spanish. Certification is available in Spanish for International Business. Students must declare a major prior to their final semester of coursework. The department recommends that majors and minors include some study abroad while they are fulfilling their degree requirements at CU Denver. Please see a departmental advisor about study abroad opportunities. Credit earned abroad will normally count toward satisfaction of the major and minor requirements at CU Denver, but to assure full transfer of credit, students must see an advisor in the department before enrolling in programs abroad. Courses taken abroad and designated as upper division in Chinese, French, German or Spanish are subject to study abroad and transfer credit policies.

Departmental Honors

Students who meet certain criteria and have been invited by the faculty of the appropriate language are encouraged to participate in the Department of Modern Languages honors program. Successful completion of this program by students majoring in French or Spanish leads to graduation with the distinction of *cum laude*, *magna cum laude* or *summa cum laude*. See French and Spanish sections for details.

Relevance to Other Programs

In addition to fulfilling major and minor requirements, courses in the Department of Modern Languages prepare students in the language, literature and civilization of the countries and peoples they are studying. Certain courses may apply to the fulfillment of core curriculum requirements in the College of Liberal Arts and Sciences.

Foreign Language Requirement

All students with majors in the College of Liberal Arts and Sciences must demonstrate proficiency in a foreign language at the second semester level. This is accomplished through course work, by examination or by completion of second-year high school credit. Students must receive a grade of C- (1.7) or higher in the final semester of the second-year course in high school or the second-semester college-level course in order to fulfill the foreign language requirement. The prerequisite for the second-semester college course is a grade of C- (1.7) or better in the first-semester course. There is no pass/fail option for any course taken for the foreign language requirement.

Students may show their level of proficiency by taking the placement/proficiency exam. The languages tested are French, German and Spanish. For other languages, consult the CLAS Advising Office. For information on the placement/proficiency exam, check the Modern Languages website or call the Department of Modern Languages, 303-315-7234. The number of times a student may take the exam is limited to once per semester.

For information on fulfilling part of the foreign language requirement through study abroad, see the Study Abroad section of the catalog or call 303-315-2232, or consult a Modern Languages advisor.

Department of Modern Languages Policy on Student Placement in Lower-Division Courses

A student may not enroll in a lower-division (1000/2000) language course that is below his/her level of language proficiency. Students wishing to enroll in a lower-division language course that does not directly follow their last completed course in the regular sequence must consult with an appropriate faculty member of the Department of Modern Languages prior to enrollment. Students who have achieved some proficiency in a foreign language through other means than academic courses must also consult with an appropriate faculty member of the Department of Modern Languages prior to enrollment. Call 303-315-7234 for further information.

Departmental Advising

Upon declaring a major or minor in modern languages, each student will be assigned to a faculty advisor with whom the student should consult at least once per semester thereafter. It is especially important that modern language majors have their transcripts reviewed by a departmental advisor before enrolling in their final 30 semester hours at CU Denver. Failure to do so may result in delay of graduation. Students presenting four years of high school foreign language (Level IV) for admission must see a departmental advisor before enrolling in courses for the major or minor. Students with CLEP credits or advanced placement credits from high school should see a departmental advisor about course equivalencies.

Before enrolling in their final semester, seniors demonstrate advanced oral and written proficiency in the language that they are studying through an oral proficiency interview and a written outcomes assessment exam. Students must see a departmental advisor to schedule proficiency tests in their language.

Residency Requirement

A minimum of 18 semester hours of course work leading to a major in French or Spanish must be taken from modern languages faculty at CU Denver. For a minor in Chinese, French, Linguistics or Spanish, 9 semester hours must be taken from modern languages faculty at CU Denver. Courses taken at other institutions while a student is enrolled at CU Denver may be applied to the major or minor only with departmental approval before enrollment in those courses.

Undergraduate Information

Arabic

The Department of Modern Languages offers first- and second-year Arabic courses.

Chinese

- French Minor (p. 574)
- Linguistics Minor (p. 575)
- Spanish Minor (p. 576)
- Spanish for International Business Certificate (p. 577)

Arabic Faculty

Instructor:

Soubeka Bahri, Ph.D, City University of New York

Chinese Faculty

Assistant Professor and advisor:

I-hao Victor Woo, PhD, Boston University

Lecturer:

Jing Li, BA, Nankai University

French Faculty

Associate Professor, Clinical Track:

Linda Alcott, PhD, University of Colorado

Senior Instructor and advisor:

Lori Willard, PhD, University of Colorado

Instructor:

Jocelyne Hunsinger, BA, University of Ottawa (Ontario, Canada)

German Faculty

Lecturer:

Maggie Rosenau, PhD, University of Colorado

Latin Faculty

Lecturers:

Mary De Forest, PhD, University of Colorado

Alan Sumler, PhD, City University of New York

Linguistics Faculty

ASSOCIATE PROFESSOR:

Devin Jenkins, PhD, University of New Mexico

ASSISTANT PROFESSORS:

Alyssa Martoccio, PhD, University of Illinois

I-hao Victor Woo, PhD, Boston University

ASSISTANT PROFESSOR-CLINICAL TRACK:

Gabriela de Robles, PhD, Georgetown University

INSTRUCTOR and advisor:

Soubeika Bahri, Ph.D, City University of New York

Spanish Faculty

PROFESSOR:

Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

Associate Professors:

Michael Abeyta, PhD, University of California-Davis

María Luisa Fernández Martínez, PhD, University of California, Irvine

Devin Jenkins, PhD, University of New Mexico

Assistant Professor:

Alyssa Martoccio, PhD, University of Illinois

ASSISTANT PROFESSOR-Clinical track:

Gabriela de Robles, PhD, Georgetown University

Instructors:

Ileana Gross, MA, University of Georgia

Amanda Ritchie, MA, University of Akron

Undergraduate Spanish Advisors (by student's last name)

A-F:

PROFESSOR:

Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

G-O:

ASSISTANT PROFESSOR:

Alyssa Martoccio, PhD, University of Illinois

P-Z:

ASSOCIATE PROFESSOR:

María Luisa Fernández Martínez, PhD, University of California, Irvine

Graduate Advisor:

ASSOCIATE PROFESSOR:

Michael Abeyta, PhD, University of California-Davis

Study Abroad Advisor:

ASSOCIATE PROFESSOR:

Devin Jenkins, PhD, University of New Mexico

Internship Director:

PROFESSOR:

Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

Emeritus Faculty:

ASSOCIATE PROFESSORS:

Kathleen Bollard

Diane Dansereau

INSTRUCTORS:

Tim Phillips

Ted Wendelin

Arabic (ARAB)

ARAB 1000 - Introduction to Cultures of the Arabic-Speaking World (3 Credits)

Introduces students to the Arabicspeaking cultures of North Africa, some Asian countries, and the Gulf States, with a focus on politics, culture, economics, literature and the arts. Taught in English. Term offered: spring, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities.

Typically Offered: Fall, Spring.

ARAB 1010 - Beginning Arabic I (5 Credits)

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Term offered: spring, fall. Max Hours: 5 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

ARAB 1020 - Beginning Arabic II (5 Credits)

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Note: This course assumes that students have passed ARAB 1010 or equivalent, or have taken one year of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

ARAB 2110 - Intermediate Arabic I (3 Credits)

Third-semester course in Modern Standard Arabic (MSA) designed for students who have had two semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 1020 or equivalent, or have taken two years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARAB 2120 - Intermediate Arabic II (3 Credits)

Fourth-semester course in Modern Standard Arabic (MSA) designed for students who have had three semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 2110 or equivalent, or have taken three years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

ARAB 2840 - Independent Study (1-3 Credits)

Independent study for students wishing to pursue nonoffered studies in Arabic language and culture. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ARAB 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

Chinese (CHIN)

CHIN 1000 - China and the Chinese (3 Credits)

A multidisciplinary introduction to Chinese society both past and present. Prehistory, birth of imperial China, literature, philosophy, religion, nationalism, revolution, modernization, contemporary life, social structure, gender, food, family life, population policy, ethnicity, popular culture, economics and politics. Note: This course is taught in English. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH4.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH4, Arts Hum: Foreign Languages.

CHIN 1010 - Beginning Chinese I (5 Credits)

A basic introduction to Chinese language and culture. Students study pronunciation, vocabulary, grammar and simple writing techniques. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. No previous study of Chinese is required. Term offered: fall. Max hours: 5 Credits.

Grading Basis: Letter Grade

CHIN 1020 - Beginning Chinese II (5 Credits)

(Continuation of CHIN 1010.) Further practice of pronunciation, study of vocabulary, grammar, and simple writing techniques. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 1010 or equivalent, or have taken one year of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

CHIN 1071 - Mandarin Chinese for the Professions (3 Credits)

Provides students with language skills and cultural knowledge in the context of conducting business with Chinese. Students develop elementary language skills for communication, cultural awareness and business etiquette via structured thematic units with business scenarios and simulations. Note: Chinese 1071 cannot be taken to fulfill language requirements; nor can it be used to substitute for Chinese 1010. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

CHIN 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Freshman level students

CHIN 2110 - Second Year Chinese I (3 Credits)

Continuing development of listening, speaking, reading, and writing skills in practical Chinese, with grammar review and introduction of the Chinese dictionary. In addition to contemporary Chinese, there is some emphasis on Chinese classical materials, such as proverbs. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 1020 or equivalent, or have taken two years of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

CHIN 2120 - Second Year Chinese II (3 Credits)

(Continuation of CHIN 2110.) Satisfies the fourth semester language requirement at most graduate schools. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed CHIN 2110 or equivalent, or have taken three years of high school Chinese, or possess equivalent proficiency. A grade of C- or higher in CHIN 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

CHIN 2840 - Independent Study (1-3 Credits)

Term offered: fall, spring. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CHIN 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Sophomore standing. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

CHIN 2970 - Contemporary Chinese Cinema (3 Credits)

Introduces students to Chinese cinema, one of the most powerful and often controversial modes of representing society, culture, history and politics in China. Note: Taught in English. All films have English subtitles. No previous study of Chinese language or culture is required. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

CHIN 3010 - Advanced Intermediate Chinese (3 Credits)

This course capitalizes on students' already acquired knowledge to further develop language skills in Mandarin Chinese. Students learn to make a transition from reading pedagogically prepared materials to more authentic ones. Note: this course assumes that students have passed CHIN 2120 or equivalent, or possess equivalent proficiency. A grade of C- or higher in CHIN 2120 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

CHIN 3130 - Special Topics in Chinese (3 Credits)

Varying topics in Chinese language, literature and culture appropriate to the 3000 level, not otherwise covered by regular courses. Note: This course assumes that students have passed CHIN 2120 or equivalent, or possess equivalent language proficiency. Note: May be taken more than once, provided that the topic is different each time. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Typically Offered: Fall, Spring.

CHIN 3200 - Contemporary Chinese Society and Culture (3 Credits)

Provides students with an overview of the systems in modern China (such as educational, political and economical), its family and interpersonal constructs and the elements of modern China found in popular cultures. It also exposes students to rudimentary and practical use of the Chinese language. Note: This course is taught in English. Max hours: 3 Credits.

Grading Basis: Letter Grade

CHIN 3300 - Special Topics on Chinese Film (3 Credits)

Studies the cultural, social and historical conditions that have shaped Chinese cinema. May focus on one Chinese speaking country or more than one (including but not limited to China, Taiwan and Hong Kong). May focus on a particular period (pre-Cultural revolution, for example) or a particular theme (urban cinema or martial arts films, for example). Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

CHIN 3840 - Independent Study: CHIN (1-3 Credits)

Term offered: fall, spring. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

CHIN 3939 - Internship - CHIN (1-3 Credits)

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

CHIN 3995 - Global Study Topics (3 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Summer.

CHIN 4690 - Methods of Teaching Modern Languages (3 Credits)

Studies the methods and practices of teaching modern languages. Note: requirement for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 5690. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

CHIN 4691 - Methods of Teaching Modern Languages II (3 Credits)

A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 5691. Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690

Typically Offered: Spring.

CHIN 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

French (FREN)

FREN 1000 - Introduction to Cultures of the French-Speaking World (3 Credits)

Introduces students to the many cultures of the French-speaking world. Taught in English for accessibility to students from different colleges at the University. The countries studied are: France, its overseas departments (Guadeloupe and Martinique) and territories (Tahiti); Quebec; Senegal; and other African countries. Term offered: fall, spring. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH4.

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-AH4, Arts Hum: Foreign Languages; Denver Core Requirement, Humanities.

FREN 1001 - French Language I (4 Credits)

Introductory course in French language skills, in which basic grammatical structures are introduced, together with elementary vocabulary and cultural items that allow the student to carry on simple conversations in French. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. No previous study of French is required. No co-credit with FREN 1010. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

FREN 1002 - French Language II (4 Credits)

Second semester of elementary French language skills continuation of French Language I (FREN 1001). More complex grammatical structures are introduced together with appropriate vocabulary and cultural and literary readings that allow students to carry on more complex conversations. Note: This course assumes that students have passed FREN 1001 or 1010 or equivalent, or have taken one year of high school French, or possess equivalent proficiency. A grade of C- or higher in the previous French course is recommended for success in this course. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. This course is not intended for native speakers. No co-credit with FREN 1020. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

FREN 1010 - Beginning French I (5 Credits)

Basic grammatical and syntactic structures are introduced, together with an elementary vocabulary and cultural items that allow the student to carry on simple conversations in French. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. No previous study of French is required. Max hours: 5 Credits.

Grading Basis: Letter Grade

FREN 1020 - Beginning French II (5 Credits)

(Continuation of FREN 1010.) More complex grammatical structures are introduced, and literary and cultural readings are added. Elementary vocabulary and cultural awareness are expanded to enable the student to carry on more complicated conversations. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed FREN 1001 or 1010 or equivalent, or have taken one year of high school French, or possess equivalent proficiency. A grade of C- or higher in the previous French course is recommended for success in this course. This course is not intended for native speakers. Max hours: 5 Credits.

Grading Basis: Letter Grade

FREN 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

FREN 2003 - French Language III (3 Credits)

Third semester of French language skills- continuation of French Language II (FREN 1002). Further introduction to beginning & intermediate level grammatical structures with appropriate vocabulary and cultural & literary readings that allow students to understand oral & written French and to speak & write in French in everyday situations. Note: This course assumes that students have passed FREN 1002 or 1020 or equivalent, or have taken two years of high school French, or possess equivalent proficiency. A grade of C- or higher in the previous French course is recommended for success in this course. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. This course is not intended for native speakers. No co-credit with FREN 2110. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities.

FREN 2004 - French Language 4: Introduction to Advanced Studies (3 Credits)

This course is designed to review and further develop French language skills, to continue the study of Francophone cultures and to prepare students for advanced-level French studies. Note: This course assumes that students have passed FREN 2003 or 2110 or equivalent, or have taken three years of high school French, or possess equivalent proficiency. A grade of C or higher in the previous French course is recommended for success in this course. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. This course is not intended for native speakers. No co-credit with FREN 2020. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities.

FREN 2110 - Intermediate French I: Grammar Review, Reading and Composition (3 Credits)

Designed to further develop all the language skills, with particular emphasis on reading and writing, and to further continue students' introduction to French culture. Students review grammar and vocabulary, read and discuss *Le Petit Prince*, and express their reactions to the text both orally and in writing. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed FREN 1002 or 1020 or equivalent, or have taken two years of high school French, or possess equivalent proficiency. A grade of C- or higher in the previous French course is recommended for success in this course. This course is not intended for native speakers. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 3010 - French Phonetics and Pronunciation (3 Credits)

Helps students acquire speech habits through knowledge of phonetics. Topics include the function of the speech organs, accurate production and recognition of sound, and the use of phonetic symbols. Note: Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: spring term of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

FREN 3020 - Conversation through Film (3 Credits)

Conversation course focusing on the exploration of the diversity of French and Francophone cultures through film. Oral practice methodologies will include small group discussions, short oral presentations and debates. Note: Students with native or near-native-level proficiency will not be allowed to take FREN 3020. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: spring term of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

FREN 3050 - Advanced Grammar and Composition (3 Credits)

Rigorous review of grammar (including past and future tenses, conditional mood and nominal phrase), along with development of writing skills through analysis and discussion of selections from French writers. Through questions and written exercises, students familiarize themselves with vocabulary, spelling, syntax and grammar. Note: May be taken before or after FREN 3060. Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: fall term of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

FREN 3060 - Advanced French Language Skills (3 Credits)

Rigorous review of grammar (including subjunctive, interrogative, verbal phrase and passive voice), along with development of writing skills through analysis and discussion of selections from French writers. Through questions and written exercises, students familiarize themselves with vocabulary, spelling, and grammar. Note: May be taken before or after FREN 3050. Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: fall term of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 3112 - Survey of French Literature I (3 Credits)

Introduces survey of the major literary trends and prominent writers of French literature from 842 A.D. to the end of the 18th century. Note: May be taken before or after FREN 3122. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: fall term of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 3120 - French Cultural Identities: Myths and Realities (3 Credits)

The self-assured demeanor of the average French man or woman both attracts and confounds. In fact, a French person's behavior – or that of the French government – can seem impossible to decode if not understood within an authentically French context. This course examines that context and explores how the French view everyday life. Includes analysis of classic French films. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 3122 - Survey of French Literature II (3 Credits)

Introduces survey of the major literary trends (romanticism, realism and existentialism) and writers of the 19th and 20th centuries. Students become acquainted with prominent writers of the period such as Beauvoir, Chateaubriand, Hugo, Balzac, Flaubert, Proust, Camus and Sartre. Note: May be taken before or after FREN 3112. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: spring term of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

FREN 3130 - Current Topics of the French-Speaking World (3 Credits)

Combines discussion and writing on political, economic, and social conditions in contemporary France and the Francophone world. Articles from current French newspapers, news magazines, television broadcasts, and the World Wide Web are analyzed for a better understanding of modern French culture. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: fall term of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

FREN 3140 - Contemporary Francophone Cultures (3 Credits)

Through the reading of short stories and cultural texts, engages students in the exploration of cultures of the Francophone world. Addresses political, economic and geographic status of each region as well as societal identity, immigration, the individual and cultural identity. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Term offered: spring term of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

FREN 3200 - The Francophone World in the Post-Colonial Era (3 Credits)

Focuses on the many Francophone regions of the world, including (but not limited to) France, North and West Africa, Southeast Asia, and the Caribbean, and surveys a wide span of subject matter as it pertains to the post-colonial situations in these regions. Taught in English. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Prereq: Sophomore standing or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

Additional Information: Denver Core Requirement, International Perspectives.

FREN 3840 - Independent Study: FREN (1-3 Credits)

Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

FREN 3939 - Internship (1-3 Credits)

Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

FREN 3970 - Special Topics (3 Credits)

Varying topics in French and Francophone language, literature and culture appropriate to the 3000 level, not otherwise covered by regular courses. Note: This course assumes that students have passed FREN 2004 or 2120 or equivalent, or have taken four years of high school French, or possess equivalent proficiency. Note: May be taken more than once, provided that the topic is different each time. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

FREN 3995 - Global Study Topics (3-6 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Typically Offered: Summer.

FREN 4010 - Advanced Composition: Stylistics (3 Credits)

Focuses on improvement of writing skills and development of the student's ability to compose logically and convincingly. The writing styles to be studied include: narration, description, portrait, persuasive essay and report. Note: This course assumes that students have passed FREN 3050 or 3060 or an equivalent course, plus one other 3000 level course in French. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4050 - Advanced French for Business (3 Credits)

Concentrates on the technical language necessary to meet the economic and commercial needs of the modern world. Prepares students for the practical certificate of business and economic French of the Paris Chamber of Commerce. Note: Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course assumes that students have passed FREN 3050 or 3060 or an equivalent course, plus one other 3000 level course in French. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4082 - Introduction to Translation (3 Credits)

Introduces the methodology and practice of written translation from English to French/French to English. Students will learn techniques on how to avoid word by word translation, faulty sentence structure and anglicisms by focusing on grammar, syntax and vocabulary. Note: Students must demonstrate third-year competence and advanced writing skills in English. Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Note: This course assumes that students have passed FREN 3050 or 3060 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 5082. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4200 - French Civilization Through the Nineteenth Century (3 Credits)

Development of French culture and civilization from a historical perspective, beginning with the origins of France and continuing through the 19th century. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Note: May be taken before or after FREN 4210. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed two 3000 level courses in French. Term offered: spring term of even years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

FREN 4210 - French Civilization - Twentieth and Twenty-First Centuries (3 Credits)

(Continuation of FREN 4200) The development of French culture and civilization in a historical perspective from the beginning of the 20th century to the present. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Note: May be taken before or after FREN 4200. Note: This course assumes that students have passed two 3000 level courses in French. Term offered: fall term of odd years. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

FREN 4310 - Seventeenth Century Literature (3 Credits)

An in-depth study of the century considered to be the pinnacle of French theatre. Includes plays by Racine, Moliere and Corneille, as well as poetry by Lafontaine and Boileau. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4360 - Eighteenth Century Novel, Theater and Poetry (3 Credits)

Studies several novels and plays characteristic of the 18th century as well as some of the more famous poems. Includes Diderot, Rousseau, Voltaire, Marivaux and Laclos. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4430 - Nineteenth Century French Novel (3 Credits)

Development of the French novel during the 19th century. Includes such writers as Stendhal, Hugo, Balzac, George Sand, Flaubert, Maupassant and Zola. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 5430. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

FREN 4480 - Twentieth Century French Novel (3 Credits)

Represents novels of the 20th century, a period of great innovation in the French novel. Authors generally treated are Camus, Giono, Ernaux and Duras. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 5480. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

FREN 4490 - Twentieth Century French Theater (3 Credits)

Surveys the major movements in French literature of the 20th century as represented in the theater arts. Such authors as Jarry, Artaud, Apollinaire, Giraudoux, Sartre, and Beckett are discussed. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4510 - French Women Writers (3 Credits)

Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 5510 and WGST 4511/5511. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

FREN 4520 - Voices of Haiti and the Caribbean (3 Credits)

This course explores the literary production of contemporary Haitian and Caribbean writers within varied cultural and gender contexts. It focuses on historical, societal and post-quake issues confronting both men and women writers of the French Caribbean. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 5520. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

FREN 4600 - History of the French Language (3 Credits)

Studies phonological, morphological, and syntactic changes in the language of Gaul from Latin to modern French. Note: This course assumes that students have passed FREN 3010 and FREN 3050 or 3060 or equivalent courses. Cross-listed with FREN 5600. Max hours: 3 Credits.

Grading Basis: Letter Grade

FREN 4690 - Methods of Teaching Modern Languages (3 Credits)

Studies the methods and practices of teaching modern languages. Note: requirement for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

FREN 4691 - Methods of Teaching Modern Languages II (3 Credits)

A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690

Typically Offered: Spring.

FREN 4840 - Independent Study: FREN (1-3 Credits)

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

FREN 4841 - Independent Study: FREN (1-3 Credits)

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

FREN 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

FREN 4970 - Special Topics (3 Credits)

Varying topics in French and Francophone language, literature and culture appropriate to the 4000 level, not otherwise covered by regular courses. Note: This course assumes that students have passed two 3000 level courses in French. Note: May be taken more than once, provided that the topic is different each time. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

FREN 4995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Typically Offered: Summer.

German (GRMN)

GRMN 1000 - Germany and the Germans (3 Credits)

Introduces the ways in which the various aspects of German culture help define German life and national identity. By examining art, music and media, primarily of the 20th century, students explore what it means to be German. Note: Taught in English. Term offered: spring, fall. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH4.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH4, Arts Hum: Foreign Languages.

Typically Offered: Fall, Spring.

GRMN 1010 - Beginning German I (5 Credits)

Introduces basic grammar, sentence structure and speech patterns. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course.

Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Term offered: fall. Max hours: 5 Credits.

Grading Basis: Letter Grade

GRMN 1020 - Beginning German II (5 Credits)

(Continuation of GRMN 1010.) Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed GRMN 1010 or equivalent, or have taken one year of high school German, or possess equivalent proficiency. A grade of C- or higher in GRMN 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

GRMN 3200 - Current German Society and Culture (3 Credits)

Provides students with a detailed overview of the systems in modern, united Germany such as social, educational, and political. Examines how Germany sees itself as a vital member of the EU. Exposes students to rudimentary use of the German language. Prereq: Sophomore standing. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

Additional Information: Denver Core Requirement, International Perspectives.

Typically Offered: Fall, Spring.

GRMN 3995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: spring, summer, fall. Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Typically Offered: Fall, Spring, Summer.

GRMN 4690 - Methods of Teaching Modern Languages (3 Credits)

Studies the methods and practices of teaching modern languages. Note: requirement for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

GRMN 4691 - Methods of Teaching Modern Languages II (3 Credits)

A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690

Typically Offered: Spring.

Greek (GREK)

GREK 1010 - Greek I: Biblical (5 Credits)

Intended for students of languages, religious studies, and philosophy. Introduces the forms and syntax of Greek so that in the 13th week students will be able to read about 85% of the New Testament in the original language. Cross-listed with RLST 1010. Max hours: 5 Credits. Grading Basis: Letter Grade

GREK 1020 - Greek II: Biblical (5 Credits)

A continuation of 1st-semester Biblical and Classical Greek. Covers the remaining forms and syntax of the textbook, with an emphasis on sight-reading passages from the New Testament. At the end of the course we will read, translate and study short fragments and lines written by some Pre-Socratic philosophers such as Thales, Anaxagoras, Anaximander, Heraclitus, and Parmenides. Prereq: GREK 1010. Max hours: 5 Credits. Grading Basis: Letter Grade

GREK 2110 - Greek III: Classical (3 Credits)

Introduction to classical Greek, followed by reading of Plato's "Apology" with selections from "Pre-Socratic philosophers" (e.g. Xenophanes of Colophon, Zeno of Elea, Pythagoras) and Aristotle. Prereq: GREK 1020. Max hours: 3 Credits. Grading Basis: Letter Grade

GREK 2840 - Independent Study - GREK (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Max hours: 3 Credits. Grading Basis: Letter Grade

GREK 4840 - Independent Study - GREK (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

GREK 5840 - Independent Study - GREK (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

Latin (LATN)

LATN 1010 - Elementary Latin I (5 Credits)

Introduces grammar, syntax, and vocabulary of Classical Latin, with an emphasis on preparing students to read Latin while improving English grammar and vocabulary skills. Two semesters of Latin may be used to fulfill the CLAS language competency requirement. Term offered: fall. Max hours: 5 Credits. Grading Basis: Letter Grade

LATN 1020 - Beginning Latin II (5 Credits)

Completes the presentation of basic Latin grammar, syntax and vocabulary. Introduces students to Latin literature through readings in select authors adapted to meet the needs of beginning students. Note: This course assumes that students have passed LATN 1010 or equivalent, or have taken one year of high school Latin, or possess equivalent proficiency. A grade of C- or higher in LATN 1010 is recommended for success in this course. Term offered: spring. Max hours: 5 Credits. Grading Basis: Letter Grade

LATN 1050 - Vocabulary for Professionals (3 Credits)

Studies English words derived from Latin and Greek by analyzing their component parts (prefixes, stems, and suffixes). Cross-listed with ENGL 1050. Term offered: spring, fall. Max hours: 3 Credits. Grading Basis: Letter Grade Typically Offered: Fall, Spring.

LATN 2010 - Intermediate Latin I (3 Credits)

Introduces advanced Latin grammar, vocabulary, syntax, and stylistics of Latin prose via readings in Caesar, Cicero and Livy. Includes review of basic Latin grammar, plus introduction to Latin prose composition and Latin rhetoric. Emphasis on historical, cultural, social context of authors and works. Note: This course assumes that students have passed LATN 1020 or equivalent, or have taken two years of high school Latin, or possess equivalent proficiency. A grade of C- or higher in LATN 1020 is recommended for success in this course. Term offered: spring, fall. Max hours: 3 Credits. Grading Basis: Letter Grade Typically Offered: Fall, Spring.

LATN 2020 - Intermediate Latin II (3 Credits)

(Continuation of LATN 2010.) Completes the presentation of advanced Latin grammar, vocabulary, syntax, and stylistics of Latin prose. Continues the study of Latin prose composition and Latin rhetoric with emphasis on historical, cultural, and social context of authors and works. Note: This course assumes that students have passed LATN 2010 or equivalent, or have taken three years of high school Latin, or possess equivalent proficiency. A grade of C- or higher in LATN 2010 is recommended for success in this course. Term offered: spring, fall. Max hours: 3 Credits. Grading Basis: Letter Grade Typically Offered: Fall, Spring.

LATN 2840 - Independent Study (1-3 Credits)

Repeatable. Max Hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

LATN 3000 - Medical Terminology (3 Credits)

The course enables students to understand medical terms by learning the Greek and Latin word elements that form these terms. Term offered: summer. Max hours: 3 Credits. Grading Basis: Letter Grade

LATN 3840 - Independent Study (1-3 Credits)

Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

LATN 4840 - Independent Study (1-3 Credits)

Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

Linguistics (LING)

LING 2000 - Foundations of Linguistics (3 Credits)

Provides students with the foundations of the scientific study of language. Examines core areas within theoretical linguistics, sociolinguistics, historical linguistics, language acquisition, and writing systems, using a variety of languages. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Behavioral Sciences.

Typically Offered: Fall, Spring.

LING 3100 - Language in Society (3 Credits)

Introduces students to language use in the context of American society. Examines the interaction between language and age, gender, race, ethnicity, education, income, social class, language attitudes, policy and politics. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

Typically Offered: Fall, Spring.

Spanish (SPAN)

SPAN 1000 - Introduction to Cultures of the Spanish Speaking World (3 Credits)

Introduces students to the Spanish-speaking cultures of Spain, Latin America, and the United States through a historical overview and a focus on contemporary politics and culture. Note: Taught in English. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH4

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-AH4, Arts Hum:

Foreign Languages; Denver Core Requirement, Humanities.

Typically Offered: Fall, Spring, Summer.

SPAN 1010 - Beginning Spanish I (5 Credits)

Introduces basic Spanish pronunciation and grammar, useful vocabulary and idioms. Readings and class discussions relating to the Hispanic world. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Term offered: fall, spring, summer. Max hours: 5 Credits.

Grading Basis: Letter Grade

Additional Information: Lower Division; Credit.

SPAN 1011 - Intensive Spanish (5 Credits)

SPAN 1011/1021 combines both semesters of the first year, and meets the needs of highly motivated students of the language and culture.

Note: Students who have studied Spanish previously should not enroll in SPAN 1011/1021 without first consulting a department advisor. Cross-listed with SPAN 1021. Max hours: 5 Credits.

Grading Basis: Letter Grade

Typically Offered: Summer.

SPAN 1020 - Beginning Spanish II (5 Credits)

(Continuation of SPAN 1010.) Further development of listening, speaking, reading and writing skills. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed SPAN 1010 or equivalent, or have taken one year of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall, spring, summer. Max hours: 5 Credits.

Grading Basis: Letter Grade

SPAN 1021 - Intensive Spanish (5 Credits)

SPAN 1011/1021 combines both semesters of the first year, and meets the needs of highly motivated students of the language and culture.

Note: Students who have studied Spanish previously should not enroll in SPAN 1011/1021 without first consulting a department advisor. Cross-listed with SPAN 1011. Max hours: 5 Credits.

Grading Basis: Letter Grade

Typically Offered: Summer.

SPAN 1070 - Spanish Medical Conversation for Beginners (3 Credits)

SPAN 1070 is a beginner's Spanish class designed to help a variety of medical personnel and students, who don't have a previous knowledge of the Spanish language, to improve their communication with their Spanish speaking patients or clients. It involves learning and practicing basic and essential conversation such as greetings, asking information during medical visits or emergency care, giving recommendations, speaking about medical records and other health related issues. The class requires weekly practice of fundamental medical interviews in Spanish, while improving general fluency and cultural competence

Grading Basis: Letter Grade

SPAN 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

Typically Offered: Fall.

SPAN 1995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education.

Repeatable. Max hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

SPAN 2110 - Second Year Spanish I (3 Credits)

Continues the development of skills acquired in 1010 and 1020. Readings deal with Hispanic culture and current topics from Spain and Latin America. Development of informal oral and written expression. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed SPAN 1020 or equivalent, or have taken two years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 2120 - Second Year Spanish II (3 Credits)

Continues the development of skills acquired in SPAN 1010, 1020 and 2110, together with a review of grammar. Readings deal with Hispanic culture and literature. Development of informal oral and written expression. SPAN 2120 satisfies the fourth-semester language requirement at most graduate schools. Note: Students may not enroll in any lower division (1000/2000) language skills course in which their level of proficiency exceeds that of the course. Students placing into a course through any means other than following the regular sequence must consult with an appropriate faculty member of the Dept. of Modern Languages prior to enrollment. Note: This course assumes that students have passed SPAN 2110 or equivalent, or have taken three years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

SPAN 2130 - Current Topics in the Spanish-Speaking World (3 Credits)

A fourth-semester course (parallel to 2120) designed for students majoring or minoring in international affairs, but open to anyone wishing to continue the study of Spanish beyond 2110. Along with development of language skills and grammar review, class work involves contemporary topics in cultural, political, economic and social affairs. Note: This course assumes that students have passed SPAN 2110 or equivalent, or have taken three years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 2110 is recommended for success in this course. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Sophomore standing. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SPAN 2995 - Global Study Topics (1-15 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Typically Offered: Summer.

SPAN 3010 - Spanish Composition I (3 Credits)

Expansion and reinforcement of oral and written skills in Spanish at an advanced level, in a broad cultural context. Oral activities are individual and in groups. Topics are introduced through oral activities, and are then used for written assignments. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed SPAN 2120 or 2130 or equivalent, or have taken four years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 2120 or 2130 is recommended for success in this course. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 3020 - Spanish Composition II (3 Credits)

(Continuation of SPAN 3010.) Development of oral and written skills in Spanish in preparation for taking other advanced courses. Topics of increasing complexity are selected from current publications in Spanish. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Note: This course assumes that students have passed SPAN 2120 or equivalent, or have taken four years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 2120 is recommended for success in this course. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 3025 - Writing for Latinos (3 Credits)

Writing class for students who grew up speaking Spanish, especially those who grew up in the United States. Focuses on different types of formal writing, spelling, difficult grammar points and writing as a process. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

SPAN 3026 - Writing for Latinos II (3 Credits)

This course is a continuation of SPAN 3025 (Writing for Latinos) designed for heritage speakers of Spanish, that is, for students who grew up in the United States and have learned Spanish at home. The goal for this course is to continue the development of the student's bilingual range to achieve communicative, linguistic and sociolinguistic competence in speaking, listening, reading and writing Spanish. Special emphasis will be given to grammar, appropriate vocabulary for formal registers, and academic writing of increased complexity. Students' work involves reading, composing, writing and proof reading different type of essays on topics related to students' cultural background, the Spanish speaking world, and Spanish for academic purposes. A multi-faceted approach to the language will help the student continue to gain a solid grasp of the Spanish language and all of its varieties and awareness of the diversity of the Hispanic communities both here in the US as well as in the Spanish speaking world. Recommended preparation: Completion of SPAN 2120 with a C or higher or consultation with an advisor in the CU Denver Department of Modern Languages or the instructor of record, for placement. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 3030 - Spanish Oral Proficiency (3 Credits)

This course is designed to help students acquire an "Intermediate High" level of proficiency in speaking and understanding spoken Spanish.

Content-based instruction in small groups. Note: This course assumes that students have passed SPAN 2120 or equivalent, or have taken four years of high school Spanish, or possess equivalent proficiency. This course is not intended for heritage Spanish speakers. A grade of C- or higher in SPAN 2120 is recommended for success in this course. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to SPAN-BA or SPAN-MIN students within the College of Liberal Arts and Sciences

SPAN 3050 - Advanced Spanish Grammar (3 Credits)

A close study of the structure of the language and practice in its written use. Note: Recommended for those intending to teach Spanish at the secondary level. Note: This course assumes that students have passed SPAN 2120 or equivalent, or have taken four years of high school Spanish, or possess equivalent proficiency. A grade of C- or higher in SPAN 2120 is recommended for success in this course. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPAN 3060 - Hispanic Phonetics: Theory and Practice (3 Credits)

Explores the phonetics of spoken Spanish throughout the world.

Theoretical content: classification of all Spanish sounds and how they are affected and change according to their phonetic environment and region. Grading Basis: Letter Grade

Prereq or Coreq: SPAN 3101

Typically Offered: Fall, Spring.

SPAN 4590 - Ibero-American Thought (3 Credits)

The course examines philosophical works by essayists, literary critics, and cultural thinkers from Spanish-American countries and the Iberian Peninsula. Besides reading philosophical works in their original form, students will read scholarly commentaries to deepen their understanding of those works. Prereq or Coreq: SPAN 3101. Cross-listed with SPAN 5590. Term offered: spring, fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or Coreq: SPAN 3101

Typically Offered: Fall, Spring.

SPAN 4599 - Special Topics: Latin American Literature (3 Credits)

Varying topics in Latin American literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq or Coreq: SPAN 3101. Term offered: spring, fall. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq or Coreq: SPAN 3101

Typically Offered: Fall, Spring.

SPAN 4600 - Seminar in Spanish Creative Writing: Poetry and Short Fiction (3 Credits)

A capstone writing course. Semester writing project will be collected poems and short stories. Prereq: junior standing or higher. Cross-listed with SPAN 5600. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SPAN 4690 - Methods of Teaching Modern Languages (3 Credits)

Studies the methods and practices of teaching modern languages. Note: requirement for language majors in the teacher certification program, School of Education, CU Denver. Note: This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

SPAN 4691 - Methods of Teaching Modern Languages II (3 Credits)

A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MLNG 4690 or SPAN 4690 or FREN 4690 or GRMN 4690 or CHIN 4690

Typically Offered: Spring.

SPAN 4840 - Independent Study: SPAN (1-3 Credits)

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

SPAN 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

SPAN 4970 - Special Topics in Literature (3 Credits)

Varying topics in Hispanic literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq or Coreq: SPAN 3101. Cross-listed with SPAN 5970. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq or Coreq: SPAN 3101

Typically Offered: Fall, Spring.

French, BA

Introduction

Please click [here](#) (p. 542) to see Modern Languages department information.

Students wishing to improve their linguistic skills as well as their knowledge of Francophone literature and culture may choose this major.

The French program offers courses in advanced language, linguistics, literature, civilization, culture and business, all taught exclusively in French. A minor is also offered. All French majors are strongly encouraged to participate in a study abroad program. Please see your

French department advisor for information about opportunities to include study abroad as part of your major.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- To be admitted to major status in French, students must have an overall GPA of C+ (2.3).
- Students presenting four years of high school French (Level IV) for admission to CU Denver must see a French advisor before enrolling in courses for the major.
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 30 FREN credit hours.
2. Students must complete a minimum of 30 upper division (3000-level or above) FREN credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative GPA of 2.5 for all courses applied to major requirements. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 FREN credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. French majors are advised to take MATH 1010 Mathematics for the Liberal Arts or MATH 2830 Introductory Statistics for their CU Denver Core Curriculum Mathematics requirement.

2. All courses counting toward the French major must be taught in French.
3. FREN 3200 The Francophone World in the Post-Colonial Era does not count toward the major.
4. Courses taken at other institutions while a student is enrolled at CU Denver may be applied to the major only with departmental approval before enrollment in those courses.
5. Students with advanced placement credits from high school must see a French advisor about course equivalencies.
6. Upon declaring a major in French, each student will be assigned to a faculty advisor with whom the student should consult at least once per semester thereafter. It is especially important that students have their transcripts reviewed by their advisor before enrolling in their final 30 credit hours at CU Denver. Failure to do so may result in delay of graduation.
7. During their final semester in the language, French major students participate in an oral proficiency interview and take a written outcomes assessment exam to measure their level of proficiency and mastery of key concepts.
8. Students must take at least one literature elective course and at least one culture or civilization elective course.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		12
FREN 3010	French Phonetics and Pronunciation	
FREN 3020	Conversation through Film	
FREN 3050	Advanced Grammar and Composition	
FREN 3060	Advanced French Language Skills	

Electives

Code	Title	Hours

Spanish, 4 + 1 BA/ MA

Introduction

Please click here (p. 542) to see Modern Languages department information.

The combined BA/MA (4+1) program in Spanish provides a coherent cumulative educational experience that prepares students for either immediate entry into a Master's level career or continued study in a PhD program. The BA/MA application process is competitive, as the program is designed for highly qualified students who have the scholarly and linguistic competencies necessary for an expedited program.

Students study the language, linguistics, literature, culture and civilization of Spain, Spanish America and the Spanish-speaking areas of the United States in their undergraduate coursework. Students choose from two options for completion of their Master's degree: either they complete their coursework and take a comprehensive written and oral exam in their last semester, or they complete a six credit thesis under the direction of Spanish faculty. The program offers a comparatively high degree of flexibility for students to focus their studies in one or more of the following fields of Hispanic studies: Spanish linguistics, methods of teaching Spanish as a foreign language, Spanish and Spanish American literature and cultural studies, including film.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- Students should officially declare their intent to complete this program in their junior year and apply to the graduate program during their senior year. Applicants should have completed all CLAS and Core requirements by the end of their 3rd year.

- Student must demonstrate promise or ability to pursue advanced study and research, as shown by previous scholastic records.
- Demonstrate Spanish oral and written proficiency at the Advanced level, as defined by the American Council on the Teaching of Foreign Languages.
- If a native speaker must be proficient with the English language and able to speak, read and write at a graduate school level.
- To be admitted to the combined BA/MA in Spanish program, students must earn an overall GPA of B (3.0) or higher in their undergraduate coursework, but also an average GPA of B+ (3.5) or higher in their upper-division Spanish coursework (3000-4000 level). For any graduate course to be counted toward the master's degree, the student must earn a minimum grade of B- (2.7). All graduate coursework must be completed with an overall grade point average of B (3.0) or higher. Students cannot complete major, graduate, or ancillary course requirements as pass/fail.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements Graduation Requirements (p. 292)
- Click here (p. 93) for information about Academic Policies

Admissions Requirements and Process

- Interested students should contact their SPAN undergraduate and graduate advisors as early as possible to ensure proper planning for the five year degree.
- Student and faculty will work together to submit an intent to complete the program form to CLAS Advising.
- To qualify, students must have a 3.0 or higher GPA in CLAS. All courses taken at the 4000- and 5000-level must be completed with at least a B or higher.
- Students may apply to the graduate program during the semester in which they will successfully complete their degree, and should have most of their general education and major requirements completed by this time.

Program Requirements

1. Students must complete a minimum of 33 SPAN credit hours.
2. Students must complete a minimum of 30 upper division (3000-level and above) SPAN credit hours, with at least 12 SPAN credit hours at the 4000 level and 9 credits of 5000-level Spanish elective courses.
3. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. Students must earn a minimum grade of B- (2.7) in all graduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

4. Students must complete a minimum of 18 SPAN undergraduate level credit hours with CU Denver faculty. All graduate level credit hours must be completed with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must satisfy all existing requirements for both an undergraduate degree in CLAS with a Spanish Language, Literature and Culture major (p. 565) and a Master of Arts in Spanish (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/modern-languages/spanish-ma/>) degree. These requirements can be fulfilled through multiple possible paths through the department's curriculum.
2. A maximum of 12 graduate credit hours may be used to fulfill both the undergraduate and graduate degree requirements.

Spanish Language, Literature and Culture, BA

Introduction

Please click here (p. 542) to see Modern Languages department information.

The Spanish program studies the language, linguistics, literature, culture and civilization of Spain, Spanish America and the Spanish-speaking areas of the United States.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- To be admitted to major status in Spanish, students must have an overall GPA of C+ (2.3).

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- [Click here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 36 credit hours with a minimum of 30 SPAN credit hours.
2. Students must complete a minimum of 36 upper division (3000-level and above) credit hours with at least 12 SPAN credit hours at the 4000 level or higher.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 SPAN credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Spanish majors are advised to take MATH 1010 Mathematics for the Liberal Arts or MATH 2830 Introductory Statistics for their CU Denver Core Curriculum Mathematics requirement.
2. Courses taken at other institutions while a student is enrolled at CU Denver may be applied to the major only with departmental approval before enrollment in those courses.
3. Before enrolling in their final semester in the language, Spanish majors must be evaluated by the faculty in oral and written skills. Students must see their Spanish advisor for specific information.
4. Up to 6 credit hours of the 36 upper division level credit hours may be taken in related fields.

Spanish Language, Literature and Culture BA with Secondary Teaching Licensure Endorsement

Introduction

Please click here (p. 542) to see Modern Languages department information.

This course of study is for undergraduate students who are seeking their license to teach Spanish Foreign Language in middle and high school. The program is a joint effort between the College of Liberal Arts and Sciences and the School of Education & Human Development. Students earn a Bachelor of Arts degree through the College of Liberal Arts and Sciences in Spanish Language, Literature and Culture and a teaching license through the School of Education & Human Development.

- Student pursuing this path must major in the Spanish Language, Literature and Culture option (p. 564) and complete the teaching licensure pathway for World Languages. (p. 712)

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- To be admitted to major status in Spanish, students must have an overall GPA of C+ (2.3).
- Students planning to pursue this path must consult with an advisor as soon as possible.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- School of Education Secondary Teacher Education Licensure Program Requirements (p. 712)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 36 credit hours with a minimum of 30 SPAN credit hours.
2. Students must complete a minimum of 36 upper division (3000-level and above) credit hours with at least 12 SPAN credit hours at the 4000-level or higher.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 SPAN credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Majors are advised to take MATH 1010 Mathematics for the Liberal Arts or MATH 2830 Introductory Statistics for their CU Denver Core Curriculum Mathematics requirement.
2. Courses taken at other institutions while a student is enrolled at CU Denver may be applied to the major only with departmental approval before enrollment in those courses.
3. Before enrolling in their final semester in the language, Spanish majors must be evaluated by the faculty in oral and written skills. Students must see their Spanish advisor for specific information.
4. Up to 6 credit hours of the 36 upper division level credit hours may be taken in related fields.
5. **Students are responsible for meeting with the advisor in the SEHD to confirm teacher education and licensure requirements.** In addition to completing all minimum program requirements above,

SEHD secondary education students must complete the following minimum SEHD licensure (p. 712) requirements:

- a. Complete the Education Declaration form and all subsequent processes and requirements, including a background check, prior to April 1st (for students intending to complete their clinical field experience in fall) or November 1st (for students intending to complete their clinical field experience in spring). Students must meet with the SEHD advisor for detailed information.
- b. Student pursuing secondary education licensure must complete the following requirements to be admitted to the Professional (final) Year:
 - i. a minimum cumulative CU GPA of 3.0 or higher. Students with a lower GPA may be considered under certain conditions.
 - ii. all CU Denver Core, CLAS, major, electives, and initial teacher education coursework requirements prior to the start of the Professional Year
 - iii. the official application and interview process
 - iv. Deadlines for Professional Year application are March 1st (for students intending to begin Professional Year in fall) or October 1st (for students intending to begin Professional Year in spring).
- c. Students must complete all initial teacher education and professional (final) year coursework with a minimum grade of B- or higher.
- d. Students must pass the appropriate Praxis exam before the start of the second semester of the Professional Year.

¹ The School of Education may develop undergraduate level cross-lists for CLDE 5030 and CLDE 5820.

Students can take CLDE 4020, CLDE 5030 and SPAN/MLNG 4690 and apply them toward the Spanish elective requirements and the Secondary Teaching Licensure requirements. Double counting these three courses can save time and money as students complete the program.

Teaching Licensure Requirements

Students must complete the Secondary Education Licensure Requirements established by the School of Education and Human Development. (p. 712)

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/modLang/spanish-program/spanish-major-language-literature-and-culture-track/>).

Spanish, International Language and Culture for the Professions Option, BA

Introduction

Please click here (p. 542) to see Modern Languages department information.

This option in the Spanish major offers career possibilities, both in government and private industry, at home and abroad. Languages are useful in business, industry, commerce, civil service, law, library science, media, science, economics, health and social sciences. Students who follow this course of study could also qualify as teachers of general business subjects in bilingual as well as traditional school systems. (However, students who wish to be certified to teach Spanish in the public schools should consult the department for information concerning the undergraduate language licensure program.)

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.
- International Spanish for the Professions is a controlled-enrollment major that takes two years to complete. Interested students should contact the Spanish advisor in the Department of Modern Languages

to declare the major. This should be done as early as possible in the student's academic career, but not later than the second semester of the sophomore year.

- To be admitted to major status in Spanish, students must have an overall GPA of C+ (2.3).
- Prerequisites: *(These courses do not count toward the major total of 45 semester hours)*

Code	Title	Hours
ECON 2012	Principles of Economics: Macroeconomics	3
ECON 2022	Principles of Economics: Microeconomics	3
MATH 1070	College Algebra for Business	3
	or MATH 1110 College Algebra	
SPAN 2110	Second Year Spanish I	3
	or SPAN 2120 Second Year Spanish II	

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 45 credit hours, including a minimum of 30 SPAN credit hours and 15 credit hours in ancillary coursework.
2. Students must complete a minimum of 30 upper division (3000-level and above) credit hours and minimum of 6 SPAN credit hours at the 4000 level or higher, in the major.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 SPAN credit hours with CU Denver faculty.

Program Allowances and Restrictions

1. Spanish majors are advised to take MATH 1010 Mathematics for the Liberal Arts or MATH 2830 Introductory Statistics for their CU Denver Core Curriculum Mathematics requirement.
2. Courses taken at other institutions while a student is enrolled at CU Denver may be applied to the major only with departmental approval before enrollment in those courses.

- Before enrolling in their final semester in the language, Spanish majors must be evaluated by the faculty in oral and written skills. Students must see their Spanish advisor for specific information.
- Students must complete least 6 SPAN credit hours at the 4000 level.
- Students must complete a minimum of 30 credit hours in courses taught in Spanish.

Chinese Studies Minor

Introduction

Please click here (p. 542) to see Modern Languages department information.

The Minor Program in Chinese Studies is an interdisciplinary program offering a specialized study of China through coursework in the related disciplines of language, anthropology, history, geography, philosophy, and political science. China's economic and political presence is increasingly prominent in the United States. CU Denver is uniquely positioned to make use of its location as the cultural, economic and political center of the Rocky Mountain region and of its diverse, well-trained and highly qualified faculty to offer a course of interdisciplinary studies related to China. Students may choose to focus either on General Chinese Studies or *Chinese Language and Culture*. On the one hand, *General Chinese Studies* encourages an interdisciplinary approach of accepting courses from various departments that focus on history, political science, art, philosophy, and more from China, Taiwan, Hong Kong, and Singapore. On the other hand, *Chinese Language and Culture* further develops students' linguistic competence and cultural awareness. The minor program offers a wide variety and levels of Mandarin Chinese language and culture courses that not only improve students' communication skills but also give a deeper look into different aspects of Chinese culture.

The program in Chinese studies offers a host of study abroad opportunities throughout the academic year and every summer. CU Denver has on-going programs at the China Agricultural University in Beijing, and programs in Taipei, as well as an association with Yunnan University in Kunming. Study abroad programs of five weeks to one year in length may be arranged, and program faculty can help students enroll in intensive Chinese language programs in Taiwan or on the mainland. Students pursuing the minor in Chinese language and area studies are encouraged to complete the program with a period of residence and study in China.

Program Director: Dr. I-hao Victor Woo

Advisor: Dr. I-hao Victor Woo

Email: i-hao.woo@ucdenver.edu

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make

exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours from the approved courses.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours in the minor, chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty chosen from the approved courses below.

Program Restrictions, Allowances and Recommendations

1. Courses taken at other institutions may be applied to the minor but only with approval of a Chinese faculty advisor in the Department of Modern Languages.

Required Courses

Code	Title	Hours
<i>Take the following</i>		6
CHIN 1000	China and the Chinese	3
or CHIN 1071	Mandarin Chinese for the Professions	
CHIN 2110	Second Year Chinese I	3

Additional Courses

Code	Title	Hours
<i>Take 9 credits ¹</i>		9
ANTH 4995	Global Study Topics (must be China-related)	3-9
ANTH 4000	Special Topics in Anthropology	3
CHIN 2120	Second Year Chinese II	3

French Minor

Introduction

Please click here (p. 542) to see Modern Languages department information.

The French program offers courses in advanced language, linguistics, literature, civilization, culture and business, all taught exclusively in French. Students benefit from a state-of-the-art language lab with Internet access and multimedia software programs, as well as technologically "smart" classrooms.

French minors are strongly encouraged to participate in one of UC Denver's Study Abroad Programs. Please see a faculty member in French for information about opportunities to include study abroad as part of your minor.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged

necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.
- Students may declare a minor in the CLAS advising office, and should see the French advisor to discuss course selections.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 FREN credit hours.
2. Students must complete a minimum of 15 upper-division (3000-level and above) FREN credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative GPA of 2.0. Students cannot complete minor requirements as pass/fail.
4. Students must complete a minimum of 9 FREN credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. The minor in French must include at least one language skills class, chosen from the classes listed below.
2. FREN 3200 The Francophone World in the Post-Colonial Era is taught in English, and does not count toward the minor.
3. All upper-division level (3000-level and above) courses must be taught in French.

Required Courses

Code	Title	Hours
<i>Take at least one of the following</i>		3
FREN 3010	French Phonetics and Pronunciation	
FREN 3020	Conversation through Film	
FREN 3050	Advanced Grammar and Composition	
FREN 3060	Advanced French Language Skills	

Electives

Code	Title	Hours
<i>Take four additional upper-division (3000-level or higher) FREN elective courses.</i>		12

All courses must be taught in French.

FREN 3010	French Phonetics and Pronunciation	3
FREN 3020	Conversation through Film	3
FREN 3050	Advanced Grammar and Composition	3
FREN 3060	Advanced French Language Skills	3
FREN 3112	Survey of French Literature I	3
FREN 3120	French Cultural Identities: Myths and Realities	3
FREN 3122	Survey of French Literature II	3
FREN 3130	Current Topics of the French-Speaking World (must be taught in French)	3
FREN 3140	Contemporary Francophone Cultures	3
FREN 3970	Special Topics (must be taught in French)	3

Linguistics Minor

Introduction

Please click here (p. 542) to see information about the Department of Modern Languages.

The minor in Linguistics is an interdisciplinary program awarded through the Department of Modern Languages. The minor is designed to guide students through an exact and structured discipline that examines various aspects of the nature of human language. A Linguistics minor may be of particular interest to students majoring in a Foreign Language, as well as majors in fields such as Anthropology, English, Communication, Education, Philosophy, and Sociology. The Linguistics minor is open to all undergraduate students at CU Denver.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on campus program.

Declaring This Minor

- Please see your advisor. To be admitted to minor status in Linguistics, students must have an overall GPA of C+ (2.3)
- Click here (p. 63) to go to information about declaring a major.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours from approved courses.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours in the minor, chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.5. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty chosen from the approved courses below.

Program Restrictions, Allowances and Recommendations

1. Upon declaring a minor in Linguistics, each student will be assigned to a faculty advisor with whom the student should consult at least once per semester thereafter. It is especially important that students have their transcripts reviewed by their advisor before enrolling in their final 30 credit hours at CU Denver. Failure to do so may result in delay of graduation.
2. Courses taken at other institutions may be applied to the minor, but only with approval of a Linguistics faculty advisor in the Department of Modern Languages.

Required Courses

Code	Title	Hours
<i>Take the following courses</i>		6
LING 2000	Foundations of Linguistics	3
LING 3100	Language in Society	3

Elective Courses

Code	Title	Hours
<i>Take nine credit hours from the following elective courses:</i>		9
ANTH 3121	Language, Culture, and Communication	3
CHIN 3130	Special Topics in Chinese	3
CLDE 1000	Language, Identity, & Power: International Perspectives	3

CLDE 4800	Language Development and Acquisition	1-5
CLDE 4830	Instructional Delivery Methods for Second Language Learners	1
CLDE 5030	Language Development of Multilingual Learners: Advanced	3

Spanish Minor

Introduction

Please click here (p. 542) to see information about the Department of Modern Languages.

Getting a minor can help build your skills in your field of study when correctly applied to a complementing major.

A minor can also be beneficial when you know what type of career you want to get into after graduation. In many cases what you major in does not necessarily reflect what kind of career you will go into. But if you see yourself leaning toward a certain career, you can pair this somewhat unrelated major to a minor that correlates between the two.

Minor in a language can be a great way to help you stand out from your competition in the job market.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a major/minor.
- Please see your faculty advisor to develop a plan of study.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 SPAN credit hours.
2. Students must complete a minimum of 15 upper-division (3000-level and above) SPAN credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 SPAN credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students may count up to 3 credit hours of Independent Study or Internship courses toward the minor.
2. Students must declare this minor prior to their final semester of coursework.
3. All course work must be taught in Spanish.

Required Courses

Code	Title	Hours
<i>Take at least one of the following</i>		3

Spanish for International Business Certificate

Introduction

Please click here (p. 542) to see Modern Languages department information.

The Department of Modern Languages offers an undergraduate Certificate in Spanish for International Business for students seeking an academic credential showing that they are prepared to meet the challenges of doing business in the Spanish-speaking world.

This certificate is available to all students across the University, as well as non-degree-seeking business professionals seeking to increase their skill set and value in the international market.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with the Chemistry advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Certificate

- You must complete the Application for the Certificate (https://clas.ucdenver.edu/modLang/sites/default/files/attached-files/application_for_certificate_in_spanish_int_business3.pdf) (**available on the Department webpage**). This requires an unofficial transcript from CU Denver showing that you are a current undergraduate student, or a copy of former transcripts indicating an undergraduate degree has been previously granted. This must be completed **prior** to completing the coursework (and applying for graduation, if you are a degree-seeking student) for the certificate.
- To begin coursework, non-degree-seeking students will need to apply to the University as a non-degree seeking student. Once accepted, you will be able to enroll in all of the appropriate classes. The following is a link to that information: <https://www.ucdenver.edu/admissions/non-degree-admissions> (<https://www.ucdenver.edu/admissions/non-degree-admissions/>).

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 12 SPAN credit hours.
2. Students must complete all 12 SPAN credit hours at the upper division level (3000-level and above).
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All 12 SPAN credits for the certificate must be earned at the University of Colorado Denver.

Program Restrictions, Allowances and Recommendations

1. SPAN 2120 Second Year Spanish II (or equivalent proficiency) is a pre-requisite for all SPAN courses numbered 3XXX.

Required Courses

Code	Title	Hours
<i>Take the following courses:</i>		6
SPAN 3700	Spanish for International Business I	
SPAN 3710	Spanish for International Business II	

Elective Courses

Code	Title	Hours
<i>Take two of the following courses ¹</i>		6
SPAN 2130	Current Topics in the Spanish-Speaking World (topic must be applicable to Spanish for International Business)	3
SPAN 3213	Contemporary Latin American Culture and Institutions	3
SPAN 3223	Contemporary Spanish Culture and Institutions	3
SPAN 3225	Special Topics In Hispanic Culture (topic must be applicable to Spanish for International Business)	3
SPAN 3782	Introduction to Translation I	3
SPAN 3792	Introduction to Translation II	3

¹ SPAN 2130 Current Topics in the Spanish-Speaking World or SPAN 3225 Special Topics In Hispanic Culture) can be applied to the certificate with advisor approval.

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/modLang/programs/certificate-spanish-international-business/>).

Philosophy

Chair: Sarah K. Tyson

Program Assistant: John Brogan

Office: Plaza Building, M108

Telephone: 303-315-7223

The philosophy program offers a rigorous liberal arts education. It trains students to speak and write carefully, think and reason critically, and to seek out creative connections between ideas of all kinds. Philosophy is an excellent undergraduate preparation for almost any professional field. Philosophical inquiries can cover a wide range of subject matters including ethics and politics, art and literature, history and religion, technology and the sciences. The benefits of a philosophy degree last a lifetime, setting students on a path toward self-development, intellectual sophistication, and the enrichment that comes from living a more a reflective life.

Undergraduate Information

Click here (p. 584) to learn about the requirements for the Major in Philosophy.

Click here (p. 588) to learn about the requirements for the Minor in Philosophy.

Click here (p. 587) to learn about the requirements for the Minor in Ethics.

Click here (p. 590) to learn about the requirements for the Minor in Philosophy of Science.

Click here (p. 587) to learn about the requirements for the 4+1 BA to MA program

Honors Program

Requirements for honors are the following:

1. Course Performance
 - a. *Cum laude*, 3.4 GPA within the major, 3.3 overall GPA
 - b. *Magna cum laude*, 3.6 GPA within the major, 3.5 overall GPA
 - c. *Summa cum laude*, 3.8 GPA within the major, 3.7 overall GPA
2. Thesis

Majors desiring to graduate with honors in philosophy must enroll in PHIL 4950 Honors Thesis for a minimum of 3 hours and a maximum of 6 hours (note that these hours are in addition to the 36 hours required for the philosophy major) and complete research that culminates in a thesis and oral examination. Majors must work with two faculty members during the project. Written proposals must be submitted and approved by the faculty committee prior to the beginning of the project. If the completed thesis and oral exam are deemed worthy of honors, the student will be awarded the honors consistent with his or her GPA. However, to receive highest honors (*summa cum laude*), the faculty committee must designate the performance for both the written thesis and the oral defense as worthy of graduation with highest honors. If the faculty committee makes no such designation, students will graduate *magna cum laude*.

Graduate Information

Please click here (p. 587) for more information about the 4+1 Philosophy to Master of Humanities well as the graduate in program philosophy through the CU Denver Masters of Humanities Program's Philosophy and Theory Track. (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/humanities/humanities-mh/#degreerequirementstext>)

Programs Offered

- Philosophy, BA (p. 584)
- Philosophy, 4 + 1 BA/ Humanities, MH (p. 587)
- Ethics Minor (p. 587)
- Philosophy Minor (p. 588)
- Philosophy of Science Minor (p. 590)

Faculty

Professors:

David L. Hildebrand, PhD, University of Texas, Austin
Robert Metcalf, PhD, Pennsylvania State University
Candice Shelby, PhD, Rice University
Mark Tanzer, PhD, Stony Brook University

Associate Professors:

Sarah Tyson, PhD, Vanderbilt University
Gabriel Zamosc-Regueros, PhD, University of Michigan

Assistant Professors:

Boram Jeong, PhD, Duquesne University

Clinical Teaching Track:

Jeffery Golub, PhD, The New School for Social Research

Senior Instructors:

Brian Lisle, PhD, Loyola University of Chicago
Daryl Mehring, PhD, University of Colorado
Samuel F. Walker, PhD, University of Colorado

Philosophy (PHIL)

PHIL 1012 - Introduction to Philosophy: Relationship of the Individual to the World (3 Credits)

Introductory course in philosophy that focuses on some of the central questions of philosophy, including theories of reality and the nature of knowledge and its limits. The knowledge of these areas is essential to the student for informed participation in the resolution of contemporary problems in today's society. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH3

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH3, Arts Hum: Ways of Thinking.

PHIL 1020 - Introduction to Ethical Reasoning (3 Credits)

Studies ethical problems and forms of ethical reasoning within the larger context of social and political philosophy. Specific ethical problems may be addressed, such as poverty, famine, abortion, punishment, animal rights, and environmental sustainability. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH3

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH3, Arts Hum: Ways of Thinking.

PHIL 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: Fall.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

PHIL 1700 - Philosophy and the Arts (3 Credits)

Considers philosophical questions involved in the analysis and assessment of artistic expressions and of the objects with which the arts, including the literary arts, are concerned. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 2441 - Logic, Language and Scientific Reasoning (3 Credits)

Intro course in argumentation, critical thinking and scientific reasoning. Covers rules of logical inference, informal fallacies, problem solving, and probabilistic reasoning. Enhances analytical and critical thinking skills tested on LSAT and MCAT, central to advancement in sciences, and broadly desired by employers. Max Hours: 3 Credits. Term offered: spring, summer, fall. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH3.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH3, Arts Hum: Ways of Thinking.

PHIL 2510 - Philosophy of Nature (3 Credits)

Critical comparison of different views of nature presupposed in science, art, religion, and environmental policy. Concepts of "natural" are examined in relation to such issues as animal rights, wilderness preservation, synthetic landscape, technology, pollution, and population control. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PHIL 3002 - Ancient Greek Philosophy (3 Credits)

History of ancient Greek thought, including traditional myth, pre-Socratic fragments, Plato's dialogues, and Aristotle's systematic philosophy. Cross-listed with PHIL 5002. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3010 - Medieval Philosophy (3 Credits)

History of philosophy from Augustine through Scotus and Ockham, the 5th through the 14th centuries. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3022 - Modern Philosophy (3 Credits)

History of philosophy from Descartes through Kant. Cross-listed with PHIL 5022. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3030 - Philosophies of the Good Life & Happiness (3 Credits)

Examines concepts and theories of happiness and their application in everyday living as discussed by major philosophers since antiquity (e.g., Aristotle, Kant, Nietzsche). Also considers critiques of Happiness (e.g., Freud, Schopenhauer). Recommended preparation: PHIL 1012 or PHIL 1020. Term offered: summer. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3032 - Twentieth Century Analytic Philosophy (3 Credits)

Surveys representative philosophers, methods, and problems in the 20th century analytic tradition. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3150 - History of Ethics (3 Credits)

Surveys the ethical thought of major figures in the history of philosophy, beginning with Plato and ending with the 19th century. Examples: Aristotle, Hume, Kant and Mill. (Class readings of primary philosophical texts.) Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3200 - Social and Political Philosophy (3 Credits)

Examines basic issues in social and political philosophy, including justice, freedom, individuality, power and community. Cross-listed with PHIL 5200. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3250 - Business Ethics (3 Credits)

Surveys some of the major moral problems which arise in business, such as the nature and scope of the moral responsibilities of corporations, affirmative action, and truth in advertising. Begins with a study of moral reasoning, ethical theory, and the challenges of applying ethical theory. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3280 - War and Morality (3 Credits)

Attempts to identify and analyze some of the major moral issues of war. When is a war just, when is it not? What are morally acceptable rules of engagement? What, if anything, justifies violating them? How does one evaluate terrorism and war against terrorism? What are moral alternatives to the violence of war? Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3300 - Special Topics in Philosophy (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHIL 3340 - Investigating Nature: Introduction to the Philosophy of Science (3 Credits)

This course is designed to introduce students to the Philosophy of Science. (No background in philosophy is required.) Philosophy of Science is concerned with how best to use observation and experiment to learn about the world, whether we are investigating fundamental physical structures, the complex operations of biological organisms, or the social dynamics of human groups. Drawing on both historical and contemporary works, we will seek to understand, among other topics, what makes scientific inquiry distinct from other forms of human learning, what accounts for the credibility and objectivity of scientific claims, the influence of psycho-social biases on observation and theory formation, as well as whether accepting a scientific theory, explanation or hypothesis means that we think it is true. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3350 - Metaphysics (3 Credits)

Studies major theories of reality, including topics such as the nature of substance, space and time, and universals and particulars. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3360 - Epistemology (3 Credits)

Study of major theories of knowledge, including such problems as perception and the distinction between belief and knowledge. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3410 - Asian Philosophies and Religions (3 Credits)

We in the Western world encounter a vastly different world, a radically different "universe of meaning," when we examine the traditions of the East. Even what we tacitly assume to be "real" is claimed by the Hindus and Buddhists of India to be a grand illusion. The world of China is, again, very different from India. An examination of Tibetan and Japanese religious forms will conclude our study of Asian thought. Cross-listed with RLST 3410. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PHIL 3430 - Environmental Ethics (3 Credits)

While human industry/technology creates enormous material prosperity, it can result in devastating environmental damage. This course analyzes the moral values, consequences and duties implied in relationships between human beings, animals and ecological systems, while seeking out new and ethical approaches. Cross-listed with PHIL 5430, HUMN 5430 and SSCI 5430. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3440 - Introduction to Symbolic Logic (3 Credits)

Covers truth functional and quantificational logic through polyadic first order predicate calculus and theory of identity. Attention is given to such problems in metatheory as proofs of the completeness and consistency of systems of logic. Prereq: A passing grade in PHIL 2441 or MATH 3000 or permission from the instructor is required in order for students to enroll in this course. Cross-listed with MATH 3440. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHIL 2441 or MATH 3000

PHIL 3441 - Philosophical Reasoning Skills (3 Credits)

This course provides Philosophy majors and other philosophically interested students with the skills and tools necessary for effectively navigating philosophical discussions. In this course we will cover issues such as validity and soundness, as well as several systems useful for demonstrating validity. The course will in addition address important issues in the philosophy of language, including the very important question of definitions, as well as the use of thought experiments and avoidance of informal fallacies. Finally, since philosophical reasoning increasingly involves knowledge of the methods of scientific reasoning, those skills will also be included in the course. Cross-listed with PHIL 5441. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Spring.

PHIL 3500 - Ideology and Culture: Racism and Sexism (3 Credits)

Surveys the nature and role of racism and sexism. Topics may include ideology theory, naturalism, the equal protection clause, recent scientific discussion, sociolegal history, and social constructionism. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PHIL 3550 - Philosophy of Death and Dying (3 Credits)

Historical overview of the metaphysical question of whether there is life after bodily death, beginning with classical arguments through the current debate over such phenomena as near death experiences and deathbed visions. Also focuses on ethical controversies such as suicide, euthanasia, and capital punishment, and the efficacy of philosophical consolations for grief. Strongly Recommended: Three hours of philosophy; preferably PHIL 1012 but if the student does not have coursework, consulting with the instructor prior to registration is strongly recommended. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3656 - Contemporary Religious Ethics: Jewish and Christian Traditions (3 Credits)

Historical and thematic introduction to ethics in Judaism, Roman Catholicism and Protestantism. A study of selected ethical issues: bio-medical, social justice, sexuality, economic justice, business and personal ethics. Strongly Recommended: English Composition, Intro to Philosophy, World Religions, World History or junior status. If the student does not have coursework or standing, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

PHIL 3760 - Kant (3 Credits)

A close study of Immanuel Kant's revolutionary thought, focusing on Kant's ontology, epistemology, and ethical theory, as they are articulated in his Critique of Pure Reason and Critique of Practical Reason. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5830. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHIL 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

PHIL 3981 - Chinese Philosophy and Culture (3 Credits)

China is a fascinating world with its own characteristic orientation to philosophical questions. Chinese thinkers produced the "Flowering of a Hundred Schools of Thought" in the Axial Age, the same period of time in which philosophy was coming to birth in ancient Greece. Covers some of the Chinese schools, including Confucianism, Taoism, Mohism, Legalism, Chinese "logic," and the later schools of schools of Neo-Confucianism, Neo-Taoism and Chinese Buddhism. Cross-listed with RLST 3660. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 3995 - Global Study Topics (1-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Department consent required. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PHIL 4000 - 19th and 20th Century Continental Philosophy (3 Credits)

A seminar on key problems and thinkers in the nineteenth & twentieth century continental philosophical traditions and their contemporary significance. Cross-listed with PHIL 5000, HUMN 5000 and SSCI 5000. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4040 - Skepticism (3 Credits)

Considers various forms of skepticism in the history of philosophy, as well as the ways that philosophers have responded to skepticism, especially in theories of belief. Note: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5040. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4101 - Pragmatism: Classical American Philosophy (3 Credits)

The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped to shape pragmatism, and the contemporary relevance of this tradition. Figures who may be included are: Emerson, Pierce, Royce, James, Dewey, Mead and Rorty. Prereq: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5101, HUMN 5101, SSCI 5101. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4150 - Twentieth Century Ethics (3 Credits)

Surveys representative philosophers, methods, and/or problems in 20th century ethics. Prereq: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4200 - Philosophical Problems and Contemporary Culture (3 Credits)

Issues and controversies in contemporary culture, their relation to modern theories of society, and their manifestations in the arts, science and technology, education, religion and ethics. Prereq: PHIL 3002 or 3022, and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have coursework, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4220 - Aesthetics and the Philosophy of Art (3 Credits)

Introduction to major theories of aesthetics and contemporary discussions of problems in aesthetics and the philosophy of art, including topics such as: the nature of art, interpretation and evaluation in art. Cross-listed with PHIL 5220 and HUMN 5220. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4230 - Postmodernism (3 Credits)

Traces the history of a set of ideas collectively known as postmodern. Disrupting traditional frameworks of knowledge, these concepts have had an enormous impact on the social sciences, the humanities, and the arts. Course readings expose students to the cross-disciplinary impact of postmodernism on theory, content, and method. Prereq: Upper division standing, PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4242 - Bioethics (3 Credits)

Examines some of the major moral issues confronting the nation's health care system. The class will search for solutions to such problems as financing health care for those unable to do so on their own, determining the extent of a patient's right to both refuse and demand certain types of medical treatment, and allocating scarce medical resources such as lifesaving vital organs. The springboard for examining these issues will be the doctor or patient relationship framed by the moral principles of respect for persons and beneficence. Prereq: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5242, SSCI 5242, HUMN 5242. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4260 - Philosophy of Law (3 Credits)

Surveys theoretical positions on the nature of law, with particular emphasis on American law. Prereq: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5260. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4270 - Philosophy of History (3 Credits)

Examines critical and speculative theories of history, including the problems of methodology, explanation, values, and the relationship between history and social philosophy. Prereq: PHIL 3002 or 3022 and a minimum grade of C in each previous philosophy course are strongly recommended, but if the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4300 - Philosophy of Mind (3 Credits)

Consideration of the problems in the philosophy of mind, such as the mind-body problem, the problem of our knowledge of other minds, the compatibility of free will and determinism, and discussion of such concepts as action, intention, motive, desire, enjoyment, memory, imagination, dreaming and self-knowledge. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5300. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4308 - Contemporary Feminist Thought (3 Credits)

This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Cross-listed with ENGL 4308, ENGL 5308, PHIL 5308, WGST 4308, WGST 5308. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4350 - Philosophy of Science (3 Credits)

This course examines some of the central philosophical questions concerning the nature of scientific investigation, such as the logical relation of evidence to hypothesis, the objective adjudication of competing hypotheses, the logical function of modeling in empirical inquiry, the criterion for a classificatory system to underwrite induction and explanation, the explanatory relationships between the differing sciences, as well as the theoretical and pragmatic function of scientific law and its relationship to explanation. Cross-listed with PHIL 5350. Term offered: spring. Max Hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4360 - American Legal Process (3 Credits)

Introduces students to basic issues in American jurisprudence as well as to the elements and dynamics of the modern American legal system. Cross-listed with PHIL 5360. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4450 - Punishment and Social Justice (3 Credits)

We will use the critical tools of philosophy to think about how contemporary practices of punishment are justified, how they shape the world we live in and what alternative normative frameworks might be. Cross-listed with PHIL 5450. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4460 - Theories of Human Nature (3 Credits)

Consideration of such problems as the changeability and definability of human nature, and the possibility of a science of human nature. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4470 - Concepts of the Soul (3 Credits)

Asks the questions: What is the nature of the human being? What makes us "human?" Do humans have a "soul?" What is its nature? Is it different from the "spirit?" What is its ultimate fate? Examines the various theories put forward by philosophers of both Eastern and Western traditions. Cross-listed with PHIL 5470 and RLST 4440, 5440. Max hours: 3 Credits. Grading Basis: Letter Grade

PHIL 4480 - Perspectives on Good and Evil (3 Credits)

Examines "problem of evil" as formulated in the philosophical tradition. Presents classical formulation of the problem, traditional solutions & classical critiques of each answer. Considers perspectives of various religious orientations, which deal differently with the question of suffering. Cross-listed with PHIL 5480, RLST 4480/5480. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4500 - Feminist Philosophy (3 Credits)

Seminar on key debates & figures in historical & contemporary feminist philosophy. Topics may include: rights, embodiment, gender, sexuality, race, reason, & violence. Figures may include: Wollstonecraft, Stanton, Beauvoir, Judith Butler, and bell hooks. Cross-listed with PHIL 5500, WGST 4500 & 5500.

Grading Basis: Letter Grade

PHIL 4600 - Philosophy of Religion (3 Credits)

Nature of religion and methods of studying it. Cross-listed with HUMN 5600, PHIL 5600, RLST 4060, 5060, and SSCI 5600. Term offered: summer. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4700 - Seminar in a Major Philosopher (3 Credits)

The major philosophical texts of one philosopher is studied in this course. Philosophers to be studied are major figures in the history of philosophy such as Plato, Aristotle, Kant and Hume. Note: May be taken for credit more than once. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Repeatable. Max hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

PHIL 4720 - Eastern Religious Thought (3 Credits)

Parallels the course in Western religious thought. The great religious traditions of the East, including Hinduism, Buddhism, Confucianism, and Taoism, are examined as they are presented in the writings of key philosophical representatives of each tradition. Cross-listed with RLST 4080. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4730 - Philosophy and Literature (3 Credits)

Considers the philosophical dimensions of literature. Strongly Recommended: PHIL 3002 or 3022, and a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5730, ENGL 4735 and 5735. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4735 - Rationalism (3 Credits)

Addresses the fundamental questions of truth and reality through natural reason. Topics vary and may include metaphysics and the rise of modern science; women and the enlightenment; historical problems and linguistic analysis. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5735. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4740 - Empiricism (3 Credits)

Considers the nature and importance of experience. Focuses on British Empiricism, but additional themes which vary may include: American pragmatism, logical positivism, scientific empiricism, phenomenology of experience. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5740. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4750 - Introduction to Phenomenology (3 Credits)

Examines the contribution of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology, through a study of such philosophers as Husserl, Heidegger, Sartre and Merleau-Ponty. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5750. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4755 - Philosophical Psychology (3 Credits)

Explores debates about psyche and body, mind and world, self and others, and consciousness and nature. Examines the philosophical questions related to those debates that arise within theories of perception, affect and cognition offered by influential psychological models. Cross-listed with HUMN 5750, SSCI 5750 and PHIL 5755. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4770 - Hegel (3 Credits)

A systematic study of the thought of G.W.F. Hegel through his most important and influential works: The Phenomenology of Spirit; The Encyclopedia of Philosophical Sciences; The Science of Logic; Lectures on the Philosophy of History; and his lectures on the history of philosophy, art and religion. Focus of the course varies. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5770. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4780 - Heidegger (3 Credits)

Studies the thought of Martin Heidegger, one of the most important philosophers of the 20th century. Includes texts from both Heidegger's early and later periods, and focuses on his analyses of human subjectivity and being. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5780. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4790 - Nietzsche (3 Credits)

A close study of Nietzsche's philosophical writings, with attention to his significance for philosophy in the 20th century and beyond. Cross-listed with PHIL 5790. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4795 - Marx and Marxism (3 Credits)

A close study of the most influential works of Karl Marx and subsequent theorists who provide either an influential interpretation of the works of Marx or contribute to an innovative application or elaboration of the basic tenets of Marxism. Cross-listed with PHIL 5795. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4800 - Plato (3 Credits)

A careful study of Plato's writings, emphasizing the dialogue form, and discussion of Plato's significance for the history of ethics, political theory, psychology, metaphysics and epistemology. Strongly Recommended:

PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5800. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4810 - Aristotle (3 Credits)

Examines Aristotle's systematic philosophy and discusses its contributions to logic, epistemology, physics, psychology, metaphysics, ethics and political theory. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5810. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4812 - Special Topics in Philosophy (3 Credits)

Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Repeatable. Max hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

PHIL 4820 - Hume (3 Credits)

Considers the work of eighteenth century philosopher David Hume.

Emphasis on unity of Hume's thought. Strongly Recommended:

PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5820. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4833 - Existentialism (3 Credits)

Examines one of the most influential movements in recent European thought, beginning with existentialism's 19th century roots, and continuing on to the existentialist philosophers of the 20th century.

Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger, Sartre and de Beauvoir. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course.

If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Cross-listed with PHIL 5833, HUMN 5833 and SSCI 5833. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4840 - Independent Study: PHIL (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PHIL 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHIL 4900 - John Dewey (3 Credits)

John Dewey was one of the most important of the American philosophers and public intellectuals of the twentieth century. Topics may include Dewey's philosophical naturalism, pragmatist epistemology, process metaphysics and philosophies of experience, aesthetics, religion, technology and democracy. Cross-listed with PHIL 5900. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4920 - Philosophy of Media and Technology (3 Credits)

A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Cross-listed with PHIL 5920, HUMN 5920, SSCI 5920. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4933 - Philosophy of Eros (3 Credits)

What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato's dialogues-such as Lysis, Symposium and Republic-and then by reading texts from Sigmund Freud, Michael Foucault and others. Cross-listed with PHIL 5933, WGST 4933/5933, SSCI 5933 and HUMN 5933. Max hours: 3 Credits.

Grading Basis: Letter Grade

PHIL 4950 - Honors Thesis (3-6 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Additional Information: Report as Full Time.

PHIL 4980 - Special Topics in Philosophy (1-3 Credits)

Repeatable. Max Hours: 15 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 15.

Philosophy, BA

Introduction

Please click [here](#) (p. 578) to see Philosophy department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Degree Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 36 PHIL credit hours.
2. Students must complete a minimum of 27 upper-division (3000-level and above) PHIL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 PHIL credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Courses taken at other institutions must either be transferred as direct equivalent to a CU Denver course or be approved by an advisor in the Philosophy Department for application towards the major.
2. For those students who major in philosophy and minor in ethics, philosophy or philosophy of science, up to two courses can satisfy the requirements for both.
3. For those students who qualify for and fulfill the requirements of graduation with Honors, a total of at least 39 hours is required.
4. Courses not specifically listed here but offered by the University may count toward the degree upon the approval of the Department Undergraduate Advisor.

Required Courses

Code	Title	Hours
<i>Take all of the following</i>		9
PHIL 3002	Ancient Greek Philosophy	3
PHIL 3022	Modern Philosophy	3
PHIL 3760	Kant	3

Logic and Reasoning

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 2441	Logic, Language and Scientific Reasoning	3
PHIL 3440	Introduction to Symbolic Logic	3
PHIL 3441	Philosophical Reasoning Skills	3

Social/Political Philosophy

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 3200	Social and Political Philosophy	3
PHIL 3280	War and Morality	3
PHIL 3500	Ideology and Culture: Racism and Sexism	3
PHIL 4500	Feminist Philosophy	3
PHIL 4450	Punishment and Social Justice	3

Ethics

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 3150	History of Ethics	3
PHIL 3250	Business Ethics	3
PHIL 3280	War and Morality	3
PHIL 3500	Ideology and Culture: Racism and Sexism	3
PHIL 3430	Environmental Ethics	3
PHIL 3550	Philosophy of Death and Dying	3
PHIL 4242	Bioethics	3
PHIL 4260	Philosophy of Law	3
PHIL 4500	Feminist Philosophy	3

Continental Philosophy

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 4500	Feminist Philosophy	3
PHIL 4780	Heidegger	3
PHIL 4790	Nietzsche	3
PHIL 4833	Existentialism	3

American or Analytic Philosophy

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 3032	Twentieth Century Analytic Philosophy	3
PHIL 4101	Pragmatism: Classical American Philosophy	3
PHIL 4300	Philosophy of Mind	3

PHIL 4350	Philosophy of Science	3
PHIL 4900	John Dewey	3

History of Philosophy

Code	Title	Hours
<i>Take one of the following</i>		3
PHIL 3010	Medieval Philosophy	3
PHIL 3022	Modern Philosophy	3
PHIL 3030	Philosophies of the Good Life & Happiness	3
PHIL 3032	Twentieth Century Analytic Philosophy	3
PHIL 4000	19th and 20th Century Continental Philosophy	3
PHIL 4040	Skepticism	3
PHIL 4101	Pragmatism: Classical American Philosophy	3
PHIL 4150	Twentieth Century Ethics	3
PHIL 4220	Aesthetics and the Philosophy of Art	3
PHIL 4230	Postmodernism	3
PHIL 4735	Rationalism	3
PHIL 4740	Empiricism	3
PHIL 4770	Hegel	3
PHIL 4780	Heidegger	3
PHIL 4790	Nietzsche	3
PHIL 4795	Marx and Marxism	3
PHIL 4800	Plato	3
PHIL 4810	Aristotle	3
PHIL 4820	Hume	3
PHIL 4833	Existentialism	3
PHIL 4900	John Dewey	3
PHIL 4920	Philosophy of Media and Technology	3

Philosophy Electives

Code	Title	Hours
<i>Take nine additional Philosophy elective credits, with at least three being at the upper division (3000 or above).</i>		9
PHIL 1012	Introduction to Philosophy: Relationship of the Individual to the World	3
PHIL 1020	Introduction to Ethical Reasoning	3
PHIL 1700	Philosophy and the Arts	3
PHIL 2441	Logic, Language and Scientific Reasoning	3
PHIL 2510	Philosophy of Nature	3
PHIL 3010	Medieval Philosophy	3
PHIL 3030	Philosophies of the Good Life & Happiness	3
PHIL 3032	Twentieth Century Analytic Philosophy	3
PHIL 3150	History of Ethics	3
PHIL 3200	Social and Political Philosophy	3
PHIL 3250	Business Ethics	3
PHIL 3280	War and Morality	3
PHIL 3300	Special Topics in Philosophy	1-3
PHIL 3340	Investigating Nature: Introduction to the Philosophy of Science	3
PHIL 3350	Metaphysics	3
PHIL 3360	Epistemology	3
PHIL 3410	Asian Philosophies and Religions	3

PHIL 3430	Environmental Ethics	3
PHIL 3440	Introduction to Symbolic Logic	3
PHIL 3441	Philosophical Reasoning Skills	3
PHIL 3500	Ideology and Culture: Racism and Sexism	3
PHIL 3550	Philosophy of Death and Dying	3
PHIL 3656	Contemporary Religious Ethics: Jewish and Christian Traditions	3
PHIL 3840	Independent Study	1-3
PHIL 3939	Internship	1-3
PHIL 3981	Chinese Philosophy and Culture	3
PHIL 3995	Global Study Topics	1-9
PHIL 4000	19th and 20th Century Continental Philosophy	3
PHIL 4040	Skepticism	3
PHIL 4101	Pragmatism: Classical American Philosophy	3
PHIL 4150	Twentieth Century Ethics	3
PHIL 4200	Philosophical Problems and Contemporary Culture	3
PHIL 4220	Aesthetics and the Philosophy of Art	3
PHIL 4230	Postmodernism	3
PHIL 4242	Bioethics	3
PHIL 4260	Philosophy of Law	3
PHIL 4270	Philosophy of History	3
PHIL 4300	Philosophy of Mind	3
PHIL 4308	Contemporary Feminist Thought	3
PHIL 4350	Philosophy of Science	3
PHIL 4360	American Legal Process	3
PHIL 4450	Punishment and Social Justice	3
PHIL 4460	Theories of Human Nature	3
PHIL 4470	Concepts of the Soul	3
PHIL 4480	Perspectives on Good and Evil	3
PHIL 4500	Feminist Philosophy	3
PHIL 4600	Philosophy of Religion	3
PHIL 4720	Eastern Religious Thought	3
PHIL 4730	Philosophy and Literature	3
PHIL 4735	Rationalism	3
PHIL 4740	Empiricism	3
PHIL 4750	Introduction to Phenomenology	3
PHIL 4755	Philosophical Psychology	3
PHIL 4770	Hegel	3
PHIL 4780	Heidegger	3
PHIL 4790	Nietzsche	3
PHIL 4795	Marx and Marxism	3
PHIL 4800	Plato	3
PHIL 4810	Aristotle	3
PHIL 4812	Special Topics in Philosophy	3
PHIL 4820	Hume	3
PHIL 4833	Existentialism	3
PHIL 4840	Independent Study: PHIL	1-3
PHIL 4880	Directed Research	1-6
PHIL 4900	John Dewey	3
PHIL 4920	Philosophy of Media and Technology	3
PHIL 4933	Philosophy of Eros	3

PHIL 4950	Honors Thesis	3-6
PHIL 4980	Special Topics in Philosophy	1-3

Philosophy, 4 + 1 BA/ Humanities, MH

Introduction

Please click here (p. 578) to see Philosophy department information.

The 4+1 accelerated Master's program in Philosophy is an expedited program of study that allows students to complete a Bachelor's degree in Philosophy and a Master's degree in Humanities in as few as 5 years.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

While students are completing a BA degree in Philosophy, they may also complete some of the requirements for an Master's in Humanities program by participating in the BA/ MH program using the following guidelines:

1. The student must apply and be accepted for participation in the program prior to completion of the BA degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary.

2. Students will follow the undergraduate curriculum for the Philosophy BA (p. 584) and work closely with their faculty advisor to begin taking Philosophy graduate level coursework as they complete their undergraduate degree.
3. Students must complete a minimum of 36 PHIL credit hours applied to the BA.
4. Students must complete a minimum of 27 upper-division (3000-level and above) PHIL credit hours and no more than 15 graduate (5000-level and above) credit hours.
5. Students must earn a minimum grade of C- (1.7) C-(1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail. Courses completed with grades below the letter grade of B- (GPA 2.7) may not be applied toward fulfillment of the requirements for any graduate degree within the Graduate School.
6. Students must complete a minimum of 18 undergraduate PHIL credit hours with CU Denver faculty and all graduate level coursework with CU Denver faculty.
7. Students may complete a maximum of 15 credits as an undergraduate that will apply to both their undergraduate and graduate degrees. These courses must be 4000 or 5000 level and should be selected in consultation with undergraduate and graduate advisors.
8. Students should officially declare their intent to complete this program by their junior year and apply to the graduate program during the semester in which they intend to complete their BA.
9. Application requirements may differ from the traditional 2 year MH, which is why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements.

To learn more about the undergraduate Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/philosophy/programs/bachelor-arts-major-philosophy/>).

To learn more about the graduate Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/mhmss/mhmss-degree-information/>).

Ethics Minor

Introduction

Please click here (p. 578) to see Philosophy department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Degree Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 PHIL credit hours.
2. Students must complete a minimum of 6 upper-division (3000-level and above) PHIL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 PHIL credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. For those students who major in philosophy, up to two courses can satisfy the requirements for both programs.
2. Religious Studies courses cannot be used to fulfill the requirements for the minor.
3. Courses taken at other institutions must either be transferred as direct equivalent to a CU Denver course or be approved by an advisor in the Philosophy Department for application towards the minor.
4. Courses not specifically listed here but offered by the Department may count toward the degree upon the approval of the Department Undergraduate Advisor.

Required Course

Philosophy of Science Minor

Introduction

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.
- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Degree Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 PHIL credit hours.
2. Students must complete a minimum of 9 upper-division (3000-level and above) PHIL credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 PHIL credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. For those students who major in philosophy, up to two courses can satisfy the requirements for both programs.
2. Religious Studies courses cannot be used to fulfill the requirements for the minor.
3. For a particular PHIL 4812 Special Topics in Philosophy/PHIL 4980 Special Topics in Philosophy course to serve as an elective, the

course material must be relevant to the minor and advisor approval to use the course as an elective is required.

4. It is possible to use PHIL courses not listed below to fulfill elective requirements but requires advisor approval.
5. Courses taken at other institutions must either be transferred as direct equivalent to a CU Denver course or be approved by an advisor in the Philosophy Department for application towards the minor.
6. Courses not specifically listed here but offered by the Department may count toward the degree upon the approval of the Department Undergraduate Advisor.

Required Courses

Code	Title	Hours
<i>Take the following</i>		9
PHIL 2441	Logic, Language and Scientific Reasoning	3
PHIL 3340	Investigating Nature: Introduction to the Philosophy of Science	3
PHIL 4350	Philosophy of Science	3

Electives

Code	Title	Hours
<i>Take six credit hours of the following:</i>		6
PHIL 3032	Twentieth Century Analytic Philosophy	3
PHIL 3350	Metaphysics	3
PHIL 3360	Epistemology	3
PHIL 3430	Environmental Ethics	3
PHIL 3440	Introduction to Symbolic Logic	3

Physics

Chair: Michael "Bodhi" Rogers
Email: physics.chair@ucdenver.edu
Program Assistant: Dawn Arge
Office: North Classroom, 3123
Telephone: 303-315-7390
Fax: 303-315-7366

Undergraduate Information

Physics, as the most fundamental of the sciences, is the foundation upon which many other disciplines are built. Therefore, other programs often require knowledge of the fundamentals of physics, and a physics degree is an outstanding platform for employment and advanced study in many technical disciplines. The department offers both a course of study fulfilling the bachelor of science degree and a wide range of service courses for students majoring in disciplines other than physics. Students

intending to major in physics should have a high school background that includes trigonometry, advanced algebra, chemistry and physics, as well as a good preparation in the arts and humanities. Students have an option during their freshman year to overcome any deficiencies in these areas.

The Department of Physics offers a track in Pure and Applied Physics which is intended for students preparing for graduate school, teaching careers, or careers in industry or government labs. Students preparing for employment in an interdisciplinary area (such as environmental, geophysical or energy study) can choose to add an appropriate minor or arrange a specific major program on an individual basis.

Students majoring in other disciplines have the option of choosing a minor in physics, in astrophysics, or in biophysics.

To enhance the employment and postgraduate study options of physics majors, the department is committed to providing students with opportunities for experimental, computational and theoretical research. On-campus opportunities are available through the faculty research programs. Questions regarding physics courses or the physics curriculum should be directed to a departmental advisor. Appointments should be made through the physics office.

Departmental Honors

Qualified students are encouraged to participate in the physics honors program. For these students, a senior thesis is required. This work will be conducted under the supervision of a faculty advisor. The topic and scope of this work will be chosen by the student in consultation with the thesis advisor. The student has the option of registering for up to 3 semester hours of independent study for the thesis project; regardless of registered semester hours, the student should commit the effort equivalent to a 3-semester-hour laboratory course toward completion of the thesis. The levels of passing scores are satisfactory, meritorious, and excellent.

Within this framework, three levels of honors are awarded by CU Denver in conjunction with the physics major:

1. *Cum laude*: The student must have a cumulative GPA of 3.25 both in physics and overall at CU Denver. The student's senior thesis and presentation must be judged to be meritorious by the committee.
2. *Magna cum laude*: The student must have a cumulative GPA of 3.50 both in physics and overall at CU Denver. The student's senior thesis and presentation must be judged to be meritorious by the committee.
3. *Summa cum laude*: The student must have a cumulative GPA of 3.75 both in physics and overall at CU Denver. The student's senior thesis and presentation must be judged to be excellent by the committee.

Programs Offered

- Physics - Pure and Applied Physics Option, BS (p. 597)
- Astrophysics Minor (p. 599)
- Biophysics Minor (p. 600)
- Physics Minor (p. 601)

Faculty

Professors:

Martin E. Huber, PhD, Stanford University

Michael "Bodhi" Rogers, PhD, RPA, Oregon State University

Alberto C. Sadun, PhD, Massachusetts Institute of Technology

Associate Professor:

Randall P. Tagg, PhD, Massachusetts Institute of Technology

Assistant Professors:

Amy L. Roberts, PhD, University of Notre Dame

Anthony N. Villano, PhD, Rensselaer Polytechnic Institute

Clinical Professor:

Masoud Asadi-Zeydabadi, PhD, University of Colorado Boulder

Research Professor:

Glen S. Mattioli, PhD, Northwestern University

Research Associate Professor:

Michael J. Friedel, PhD, University of Minnesota

Senior Instructors:

John Carlson, PhD, University of Michigan, Ann Arbor

Ramesh Dhungana, PhD, University of North Dakota, Grand Forks

Senior Professional Research Assistants:

Bruce Hines, MS, University of Colorado Denver

Emeritus Professors:

Martin M. Maltempo, PhD, Columbia University

Clyde S. Zaidins, PhD, California Institute of Technology

Physics (PHYS)

PHYS 1052 - General Astronomy I (4 Credits)

The history of astronomy is studied from early civilizations to the present. The basic motions of the earth, moon, sun, and planets are discussed both qualitatively and quantitatively, using elementary principles of physics. Properties of our solar system are discussed in detail, including results from unmanned space probes. Note: An additional 30 hours of laboratory work (at times to be arranged), plus appropriate report preparation time, are required to complete laboratory component of the course. Note: High school algebra or equivalent are strongly recommended preparation for this course. Term offered: spring, fall. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1
Grading Basis: Letter Grade
Additional Information: Denver Core Requirement, Biol Phys Sci - Lec/Lab; GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab.
Typically Offered: Fall, Spring.

PHYS 1100 - Foundations of Physics (4 Credits)

One-semester non-lab survey course especially designed for non-science majors. Acquaints students with some of the major principles and methods of physics. Includes applications of physics to everyday life and some discussion of the historical development of physics. Note: this course assumes that students have a good working knowledge of elementary algebra. Term offered: spring, summer, fall. Max Hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab; Denver Core Requirement, Biol Phys Sci - No Lab.

Typically Offered: Fall, Spring, Summer.

PHYS 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Offered irregularly.

Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

PHYS 1300 - Contemporary Topics in Physics. (2 Credits)

Covers various current topics in physics at a qualitative level. Designed primarily for students intending to major in physics, engineering, and chemistry. Max hours: 2 Credits.

Grading Basis: Letter Grade

PHYS 1450 - Professional Development I (1 Credit)

Introduction to the physics program for all beginning physics majors or those considering the major. Discussions about career opportunities, the various physics undergraduate and graduate degree paths, research being conducted within the physics department, and strategies for being a successful and engaged physics major. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Typically Offered: Fall.

PHYS 1840 - Independent Study: PHYS (1-3 Credits)

Students must check with a faculty member before taking this course. Repeatable. Term offered: spring, summer, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Typically Offered: Fall, Spring, Summer.

PHYS 2010 - College Physics I (4 Credits)

This is an algebra based physics course covering mechanics, heat and sound. Note: College algebra and trigonometry are strongly recommended preparation for optimal student success. Term offered: spring, summer, fall. Max Hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec; GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab.

Typically Offered: Fall, Spring, Summer.

PHYS 2020 - College Physics II (4 Credits)

This is an algebra based physics course covering electricity, magnetism, light and modern physics. Prerequisite: PHYS 2010 or PHYS 2311 with a C- or higher. Term offered: spring, summer, fall. Max Hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2.

Grading Basis: Letter Grade

Prerequisite: PHYS 2010 or PHYS 2311 with a C- or higher.

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec; GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab.

Typically Offered: Fall, Spring, Summer.

PHYS 2311 - General Physics I: Calculus-Based (4 Credits)

This is a calculus based physics course covering vector displacement, uniform and accelerated motion, force, momentum, energy, rotating systems, oscillations, and an introduction to thermodynamics. Emphasis is on basic principles. Prerequisite: MATH 1401 with a C- or higher. Term offered: spring, summer, fall. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prerequisite: MATH 1401 with a C- or higher.

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec.

Typically Offered: Fall, Spring, Summer.

PHYS 2321 - Intro Experimental Phys Lab I (1 Credit)

This introductory experimental physics laboratory introduces students to the methods of science through a series of experiments and exercises focused on how objects move. Students working in teams use mathematical and computational approaches to acquire data, examine data, and make conclusions about how well these data support hypotheses and models. Students will use different types of scientific communication, including graphs and other forms of data visualization and cogent written and oral evaluation of experimental findings. Term offered: spring, summer, fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

Typically Offered: Fall, Spring, Summer.

PHYS 2331 - General Physics II: Calculus-Based (4 Credits)

This is a calculus based physics course covering electrostatics, magnetic fields, electromagnetic waves (including light), and optics. Prerequisite: PHYS 2311 and MATH 2411 with a C- or higher. Term offered: spring, summer, fall. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prerequisite: PHYS 2311 and MATH 2411 with a C- or higher.

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec.

Typically Offered: Fall, Spring, Summer.

PHYS 2341 - Intro Experimental Phys Lab II (1 Credit)

This introductory experimental physics laboratory introduces students to the methods of science through a series of experiments and exercises focused on electricity and magnetism. Students working in teams use mathematical and computational approaches to acquire data, examine data, and make conclusions about how well these data support hypotheses and models. Students will use different types of scientific communication, including graphs and other forms of data visualization and cogent written and oral evaluation of experimental findings. Prereq: PHYS 2321 or PHYS 2030 with a C- or higher. Term offered: spring, summer, fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 2321 or PHYS 2030 with a C- or higher.

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

Typically Offered: Fall, Spring, Summer.

PHYS 2351 - Applied Physics Lab I (1 Credit)

Introduces physics majors to several ways that fundamental concepts in mechanics intersect with useful technologies, resulting in documented technical competencies useful in research and industry. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

Typically Offered: Fall, Spring.

PHYS 2361 - Applied Physics Lab II (1 Credit)

Introduces physics majors to several ways that fundamental concepts in electrodynamics and optics intersect with useful technologies, resulting in documented technical competencies useful in research and industry.

Prereq: PHYS 2351 with a C- or higher. Term offered: spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 2351 with a C- or higher.

Additional Information: Denver Core Requirement, Biol Phys Sci - Lab.

Typically Offered: Spring.

PHYS 2711 - Vibrations and Waves (3 Credits)

Introduces vibrations and waves associated with physical phenomena.

Analytic and numerical methods in physical contexts. Topics include harmonic oscillators, resonance, coupled oscillators, nonlinear oscillators, waves in elastic media, sound waves, pulses and dispersion.

Prerequisite: PHYS 2331 and MATH 2411 with a C- or higher. Term offered: typically offered spring only. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: PHYS 2331 and MATH 2411 with a C- or higher.

Typically Offered: Spring.

PHYS 2811 - Modern Physics I (4 Credits)

Presents a study of the events and discoveries that occurred during the latter part of the 19th and the first part of the 20th centuries which led to the discovery of quantum mechanics; namely, special relativity, particle nature of radiation, wave properties of particles, models of the atom, and the introduction of quantum mechanics. Prereq: PHYS 2331 and MATH 2411 with a C- or higher. Term offered: typically offered in spring only. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prerequisite: PHYS 2331 and MATH 2411 with a C- or higher.

Typically Offered: Spring.

PHYS 2840 - Independent Study: PHYS (1-3 Credits)

Students must check with a faculty member before taking this course.

Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Typically Offered: Fall, Spring, Summer.

PHYS 2880 - Directed Research (1-3 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PHYS 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: 15 hours of 2.75 GPA. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PHYS 3050 - General Astronomy II (3 Credits)

Evolution of our sun and other stars is studied, as well as the methods used to gain the information. Discussion includes objects such as

neutron stars, novae and supernovae, and black holes. Large-scale structures, including clusters and galaxies, are studied. Prereq:

PHYS 1052 or PHYS 2010 or PHYS 2311. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 1052 or PHYS 2010 or PHYS 2311

Typically Offered: Fall.

PHYS 3070 - Physical Cosmology (3 Credits)

Designed for science and engineering maj, stud. in quantitative fields/ w req math skills interested in physical universe. Covers large-scale structure of universe & its evolution from birth well into future. Gravitational concepts, neutron stars, black holes, big bang univ, cosmological tests, dark matter & energy. Problem solving emphasized.

Prereq: PHYS 1052 or PHYS 2010 or PHYS 2311 or permission. Note: This course assumes that students have completed PHYS 2010 or PHYS 2311 prior to taking this course. Note: Routine knowledge of algebra, geometry and trigonometry is assumed. Knowledge of trig and calculus also useful.

Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 1052 or PHYS 2010 or PHYS 2311

Typically Offered: Spring.

PHYS 3082 - Energy and the Environment (3 Credits)

For students of various backgrounds who wish to increase their understanding of the environmental and technical issues of supplying the energy demands of our society. Alternative energy sources and conservation are explored as solutions to promote sustainable society. Note: One college-level science course and MATH 1110 or equivalent are strongly recommended as preparation for optimal student success.

Cross-listed with ENVS 3082. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

PHYS 3120 - Methods of Mathematical Physics (3 Credits)

Typically covers calculus of variations, special functions, partial differential equations, integral transforms, linear vector spaces, and tensor analysis. Pre: MATH 2421 and either MATH 3195 or MATH 3191 and MATH 3200 with a C- or higher. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Pre: MATH 2421 and either MATH 3195 or MATH 3191 and MATH 3200 with a C- or higher.

Typically Offered: Fall.

PHYS 3151 - Biophysics Outlook I (1 Credit)

Designed as a companion to General Biology I (but can take stand-alone), this course explores how biophysics concepts and experimental methods add to the knowledge of life's processes at the molecular and cellular level. Note: PHYS 2010 and 2020 strongly recommended for optimal student success. Term offered: fall. Max Hours: 1 Credit.

Grading Basis: Letter Grade

Typically Offered: Fall.

PHYS 3161 - Biophysics Outlook II (1 Credit)

Designed as a companion to General Biology I (but can take stand-alone), this course explores how biophysics concepts and experimental methods contribute to the understanding of the structure and function of plants, animals & ecological systems. Note: PHYS 2010 and PHYS 2020 strongly recommended for optimal student success. Term offered: spring. Max Hours: 1 Credit.

Grading Basis: Letter Grade

Typically Offered: Spring.

PHYS 3211 - Analytical Mechanics (4 Credits)

Topics include the Lagrange and Hamiltonian formulations, the two-body problem, rigid body motion, and small oscillations. Pre-req: PHYS 2711, MATH 2421 and either MATH 3195 or MATH 3191 and MATH 3200 with a C- or higher. Co-req PHYS 3120. Term offered: fall. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Pre-req: PHYS 2711, MATH 2421 and either MATH 3195 or MATH 3191 and MATH 3200 with a C- or higher. Co-req PHYS 3120.

Typically Offered: Fall.

PHYS 3251 - Biophysics of the Body (4 Credits)

Fundamental ideas of anatomy, physiology, and biomechanics from the viewpoint of physics. Biological topics covered include: skeletal systems, muscular systems, circulatory systems, and human motion. Analytical mechanics topics include: Newtonian mechanics, harmonic motion, energy conservation, and introductory fluid dynamics. Prereq: PHYS 2711, 3161, MATH 2421 and 3195 or equivalent or permission of instructor.

Term offered: infrequent. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2711, 3161, MATH 2421 and 3195

PHYS 3252 - Biophysics of the Body NM (4 Credits)

Fundamental ideas of anatomy, physiology, and biomechanics from the viewpoint of physics. Biological topics covered include: skeletal systems, muscular systems, circulatory systems, and human motion. Analytical mechanics topics include: newtonian mechanics, harmonic motion, energy conservation, and introductory fluid dynamics. Prereq: PHYS 2010 and PHYS 2020. Term offered: infrequently. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2010 and PHYS 2020

PHYS 3411 - Thermal Physics (3 Credits)

Covers the basic concepts of the three related disciplines of thermodynamics, statistical mechanics, and kinetic theory. Prereq: PHYS 2331, PHYS 2811 and MATH 2421 with a C- or higher; Prereq or Coreq: MATH 3195 or MATH 3191 and MATH 3200 with a C- or higher if completed prior to PHYS 3411. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Prereq: PHYS 2331, 2811 and MATH 2421 with a C- or higher; Pre or Coreq: MATH 3195 or (MATH 3191 and MATH 3200) with a C- or higher. Typically Offered: Spring.

PHYS 3450 - Professional Development II (1 Credit)

Continuation of professional preparation for careers and graduate school. Students will conduct career-related research and engage in classroom discussions. Students will also examine their resume and transcript to create individualize action plans to bridge the gap between their current skills and those desired by employers and graduate schools. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Typically Offered: Fall.

PHYS 3451 - Biophysics of the Cell (4 Credits)

Fundamentals of cellular biology from the viewpoint of physics. Biological topics covered include: the central dogma of molecular biology, cellular signaling, genetic regulation, molecular crowding, and ion channels. Statistical and thermal physics topics include: statistics, probability, thermodynamics, heat, and entropy. Prereq: PHYS 2811, 3151 and MATH 2421 or permission of instructor. Coreq: MATH 3195. Term offered: on demand. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2811, 3151 and MATH 2421 Coreq: MATH 3195

PHYS 3452 - Biophysics of the Cell NM (4 Credits)

Fundamentals of cellular biology from the viewpoint of physics. Biological topics covered include: the central dogma of molecular biology, cellular signaling, genetic regulation, molecular crowding, and ion channels. Statistical and thermal physics topics include: statistics, probability, thermodynamics, heat, and entropy. Prereq: PHYS 2020, 2040 and 3151 or permission of instructor. Term offered: infrequent. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2020, 2040 and 3151

PHYS 3620 - Sound and Music (3 Credits)

Considers the basic nature of sound waves, the ear and hearing, and musical instruments. Although this course is mainly descriptive, some high school algebra will be used. Term offered: typically offered fall only. Max hours: 3 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall.

PHYS 3711 - Junior Laboratory I (2 Credits)

Advanced laboratory in classical and modern physics. Prereq: PHYS 2811 with a C- or higher. Term offered: fall. Max Hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2811 with a C- or higher.

Typically Offered: Fall.

PHYS 3721 - Junior Laboratory II (2 Credits)

Advanced laboratory in classical and modern physics. Prereq: PHYS 2811 with a C- or higher. Term offered: typically offered spring. Max hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2811 with a C- or higher.

Typically Offered: Spring.

PHYS 3750 - Capstone Project Proposal (1 Credit)

Provides opportunity for physics majors to prepare a written proposal in preparation for senior thesis research or a senior project. Emphasis placed on describing the problem, methodology, equipment, and data analysis needed to successfully complete the research or project. Completed proposals are submitted to each student's potential research or project advisor for review and approval. Pre-req: PHYS 2711 or PHYS 2811 with a grade of C- or better. Term offered: spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 2711 or PHYS 2811 with a grade of C- or better.

Typically Offered: Spring.

PHYS 3811 - Quantum Mechanics (4 Credits)

A course in which both wave and matrix mechanics are developed and applied to selected problems in atomic physics. Prereq: PHYS 2811 and 3211 with a C- or higher. Term offered: spring. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2811 and 3211 with a C- or higher.

Typically Offered: Spring.

PHYS 3840 - Independent Study: PHYS (1-3 Credits)

Note: Students must check with a faculty member before taking this course. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHYS 3880 - Directed Research (1-3 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PHYS 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher and at least a 2.75 cumulative GPA. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

PHYS 4251 - Physical Fluid Dynamics (3 Credits)

Fundamental concepts and methods in fluid dynamics are developed through basic laws, the Navier-Stokes equation, viscous fluid flow, dimensional analysis, vorticity, boundary layers, linear stability and turbulent flow. Cross-listed with PHYS 5251. Prereq: Restricted to students who have completed PHYS 2311, PHYS 2331 and PHYS 3120 with a C- or higher or with instructor permission. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restricted to students who have completed PHYS 2311, PHYS 2331 and PHYS 3120 with a C- or higher or with instructor permission.

PHYS 4331 - Principles of Electricity and Magnetism (4 Credits)

Elements of mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, polarized media, direct and alternating current theory, and introduction to electromagnetic fields and waves.

Prereq: PHYS 2331 and 3120 with a C- or higher. Term offered: fall. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2331 and 3120 with a C- or higher.

Typically Offered: Fall.

PHYS 4351 - Bioelectromagnetism (4 Credits)

The fundamental theory of electric and magnetic fields is developed and applied to problems of biology and medicine. Examples in medical diagnostics and treatment are built upon rigorous application of Maxwell's equations and constitutive models of electromagnetic properties of biomaterials. Prereq: PHYS 2331 and 3120 or permission of instructor. Cross-listed with PHYS 5351. Term offered: spring infrequently. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2331 and 3120

Typically Offered: Spring.

PHYS 4352 - Bioelectromagnetism NM (4 Credits)

This course is the non-majors' companion to PHYS 4351/5351 (taught simultaneously) using modeling approaches accessible to the general science student. Prereq: PHYS 2010, 2020 and MATH 1401 or permission of instructor. Cross-listed with PHYS 5352. Term offered: spring. Max Hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2010, 2020 and MATH 1401

Typically Offered: Spring.

PHYS 4400 - Scientific Instrumentation (3 Credits)

Conceptual and practical knowledge needed to design scientific instruments, develop technical products, and use special laboratory procedures to research. Topics include materials, mechanisms, electronics, and optics. Note: Two semesters of 2000-level introductory physics strongly recommended for optimal student success. Cross-listed with PHYS 5400. Repeatable. Term offered: infrequent. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHYS 4401 - Special Topics (1-3 Credits)

Repeatable. Infrequently Offered. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PHYS 4440 - Electricity and Magnetism II (3 Credits)

This course is a continuation of material presented in Electricity and Magnetism (PHYS 4331) and concentrates on electromagnetic radiation. Topics include the propagation of electromagnetic waves, interference and refraction, wave guides, the emission of electromagnetic radiation from antennas, and electromagnetic fields due to accelerating point charges. An introduction to relativistic electromagnetism is also included. Infrequently Offered. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 4331 with a C- or higher.

PHYS 4450 - Professional Development III (1 Credit)

Continuation of professional preparation for careers and graduate school. This seminar provides opportunities for students to reflect upon connections between the physics major, the core curriculum, and other learning experiences while a student. Students will develop a written reflection on their undergraduate experiences. Students will also learn how to locate and apply to open job positions and graduate school programs. Prereq: PHYS 3450 with a C- or higher. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 3450 with a C- or higher.

Typically Offered: Fall.

PHYS 4510 - Optics (3 Credits)

Presents a contemporary treatment of selected topics in optics, such as matrix methods in geometrical optics, the Fourier analysis approach to physical optics, and interaction of light with matter. Prereq: PHYS 2331, 2811 and 3120 with a C- or higher. Infrequently Offered. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2331, 2811 and 3120 with a C- or higher.

Typically Offered: Spring.

PHYS 4550 - Astrophysics (3 Credits)

Covers stellar astrophysics, solar physics, star formations, stellar evolution, processes in the interstellar medium, galactic dynamics and evolution, formation of galaxies and cosmology. Note: MATH 3195; PHYS 2821 and 3050 are strongly recommended preparation for optimal student success. Infrequently Offered. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHYS 4611 - Computational Physics (3 Credits)

Designed to provide an understanding of the role of the computer in modern theoretical physics by studying the simulation of physical phenomena in various fields of physics. Prerequisite: PHYS 3120. Note: Students will not earn credit for PHYS 4611, if they have already earned credit for PHYS 4610. Infrequently Offered. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: PHYS 3120

PHYS 4620 - Computational Physics II (2 Credits)

Assigns the student to an individual, advanced-level project modeling a physical phenomenon on the computer. Prereq: PHYS 4610 with a C- or higher. Infrequently Offered. Max hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 4611 with a C- or higher.

PHYS 4650 - Solid State Physics (3 Credits)

Covers the basic thermal and electrical properties of solids which are explained in terms of the Brillouin zone structures of phonons and electrons. Prereq: PHYS 3411 and PHYS 3811 with a C- or higher. Infrequently Offered. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 3411 and PHYS 3811 with a C- or higher.

PHYS 4711 - Senior Laboratory I (2 Credits)

Individual project laboratory with emphasis on modern methods of physical experimentation. Prereq: PHYS 3721 with a C- or higher. Term offered: spring, fall. Max Hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 3721 with a C- or higher.

Typically Offered: Fall, Spring.

PHYS 4721 - Senior Laboratory II (2 Credits)

Individual project laboratory with emphasis on modern methods of physical experimentation. Prereq: PHYS 4711 with a C- or higher. Term offered: spring, fall. Max Hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 4711 with a C- or higher.

Typically Offered: Fall, Spring.

PHYS 4750 - Senior Physics Thesis I (1 Credit)

Capstone experience in which seniors prepare, summarize, present their own research in physics in a formal written thesis. Emphasis on development of the first draft of the senior thesis. Prereq: PHYS 3750 with a C- or higher. Coreq: PHYS 4880. Term offered: fall. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 3750 with a C- or higher. Coreq: PHYS 4880.

Typically Offered: Fall.

PHYS 4751 - Senior Physics Thesis II (1 Credit)

Capstone experience in which seniors prepare, summarize, and present their own physics research in a formal written thesis. Completion of final print copy of the senior thesis and presentation of thesis research are required. Knowledge of physics content will also be tested via a comprehensive exam. Prereq: PHYS 4750 with a C- or higher. Coreq: PHYS 4880. Term offered: spring. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 4750 with a C- or higher. Coreq: PHYS 4880.

Typically Offered: Spring.

PHYS 4810 - Atomic and Molecular Structure (3 Credits)

A course in which quantum mechanical methods are applied to problems in atomic and molecular physics, such as the one-electron atom, atomic and molecular spectra, and particle scattering. Prereq: PHYS 3811 with a C- or higher. Infrequently Offered. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 3811 with a C- or higher.

PHYS 4820 - Subatomic Physics (3 Credits)

Introductory treatment of the various concepts and models used to describe nuclear and high energy particle phenomena. Prereq: PHYS 2811 with a C- or higher. Infrequently Offered. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PHYS 2811 with a C- or higher.

Typically Offered: Spring.

PHYS 4840 - Independent Study: PHYS (1-3 Credits)

Note: Students must check with a faculty member before taking this course. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Typically Offered: Fall, Spring, Summer.

PHYS 4850 - Physics for Design and Innovation I (3 Credits)

A service-learning project using fundamental physical principles to design a prototype scientific instrument, technical device, or technical process for a real-world client. Includes instruction on project management, intellectual property, and market analysis. Cross-listed with PHYS 5850. Repeatable. Term offered: infrequent. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PHYS 4852 - Physics for Design and Innovation II (3 Credits)

A capstone project using fundamental physical principles to prototype a scientific instrument, technical device or technical process. The focus is on the student's own product idea. Includes online guided readings on the wider context of product development. Students should consult with instructor on necessary physics and mathematics preparation for the project. Prereq: PHYS 4850 with a grade of C- or higher. Cross-listed with PHYS 5852. Repeatable. Term offered: infrequent. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: PHYS 4850 with a C- or higher.

PHYS 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Term offered: spring, summer, fall. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Typically Offered: Fall, Spring, Summer.

PHYS 4920 - Advanced Undergraduate Seminar (1 Credit)

Studies a focused topic such as: size and age of the universe, critical phenomena, non-linear optics, energy, fiber-optic communications, among others. Students research these topics and give a seminar outlining their findings. Prereq: PHYS 2811 with a C- or higher. Infrequently Offered. Max hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: PHYS 2811 with a C- or higher.

PHYS 4921 - Senior Seminar (1 Credit)

Grading Basis: Letter Grade

PHYS 4939 - Internship (1-3 Credits)

Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Typically Offered: Fall, Spring, Summer.

PHYS 4950 - General Relativity (3 Credits)

This course will introduce classical general relativity, a generalized theory of gravity that reduces to Newtonian gravity is the weak gravity limit.

This course covers the basic principles of Einstein's general theory of relativity, differential geometry, experimental tests of general relativity, black holes, and cosmology. Since this course will emphasize both analytic calculation and physical understanding of classical gravity and is a 3 credit hour senior-level physics course, it can be very challenging, especially if taken with other physics courses. A good rule of thumb for a college course of this type is to expect to spend a minimum of 2 to 4 times the amount of time outside of class as you do in class. For this course, that means a minimum of 6 to 12 hours per week outside of class. Term offered: infrequent. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PHYS 4980 - Advanced Physics Topics (1-3 Credits)

Covers a particular topic, as announced in the 'Schedule Planner.' Note:

May be taken more than once for credit in different topics. Prereq:

PHYS 2811 with a C- or higher. Repeatable. Term offered: spring, fall. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: PHYS 2811 with a C- or higher.

Typically Offered: Fall, Spring.

Physics - Pure and Applied Physics Option, BS

Introduction

Please click [here](#) (p. 590) to see Physics department information.

The department of Physics at the University of Colorado Denver enriches understanding of how the world works by incorporating physics in every aspect of life. Good intuition about how things work has been, since the time of Galileo, a hallmark of physicists.

CU Denver's faculty is committed to providing substantive applied research experiences for our undergraduate students by incorporating aspects of every day life into their classrooms and research. A major in physics is one of the few academic degree programs that prepares its students for an amazing array of careers including computer analyst, engineer, technical writer, industrial marketer, doctor, and lawyer.

Our faculty is committed to provide students with opportunities for laboratory experience in a research environment. Students work elbow-to-elbow with their professor mentors on such projects as:

- Applying chaos and complex systems theory to problems ranging from the onset of turbulence in fluid flows to the erratic motions of loads hanging from cranes aboard ships at sea
- Study of quasar jets and other associated dynamical properties, supernovae and nucleosynthesis
- Superconducting Quantum Interference Devices (SQUIDS) specifically the fabrication of microelectronic SQUIDS
- Applying non-linear dynamics and stochastic modeling to biological systems to understand how variations in genotype can lead to unique behavior
- Developing detection techniques in the search for the Dark Matter component of our Universe
- Applying physics to archaeology and historic preservation
- Developing ways to help students learn physics better

Those students intending to major in physics should have a high school background that includes trigonometry, advanced algebra, chemistry and physics, as well as a good preparation in the arts and humanities. Students have an option during their freshman year to overcome some deficiencies in these areas. Students preparing for employment in an interdisciplinary area (such as environmental, geophysical or energy study) can choose to add an appropriate minor or arrange a specific major program on an individual basis. Students interested in teaching physics in high school are encouraged to consider the CLAS educational studies minor in addition to their physics major.

Students are strongly encouraged to consult with the Physics advisor, meet physics faculty engaged in Pure & Applied Physics research, attend departmental seminars, and explore ways that Physics relates to research undertaken by faculty in other disciplines.

For more information, contact:

Michael "Bodhi" Rogers (Physics advisor)

Email: physics.chair@ucdenver.edu

Office: North Classroom 3123B

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click [here](#) (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- [Click here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 63 credits, including a minimum of 47 PHYS credit hours and 16 credit hours in ancillary coursework.
2. Students must complete a minimum of 16 PHYS upper-division (3000-level and above) credit hours in the major.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 12 PHYS credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must declare their intention to major in Physics by the time they have completed 60 semester hours
2. The introductory labs, PHYS 2351 Applied Physics Lab I and PHYS 2361 Applied Physics Lab II, are required for all physics majors. If the department is unable to offer one or both of these labs then PHYS 2321 Intro Experimental Phys Lab I may be substituted for PHYS 2351 Applied Physics Lab I and PHYS 2341 Intro Experimental Phys Lab II may be substituted for PHYS 2361 Applied Physics Lab II, upon prior advisor approval.
3. Students earning a Physics major cannot earn a Physics minor. A senior thesis is required for all students wishing to graduate with departmental honors. For all other students, the faculty encourages a senior thesis or project.

Required Courses

Code	Title	Hours
Take all of the following required courses:		26
PHYS 2311	General Physics I: Calculus-Based	4
PHYS 2351	Applied Physics Lab I	1
PHYS 2331	General Physics II: Calculus-Based	4
PHYS 2361	Applied Physics Lab II	1
PHYS 2711	Vibrations and Waves	3
PHYS 2811	Modern Physics I	4
PHYS 3120	Methods of Mathematical Physics	3
PHYS 3711	Junior Laboratory I	2

Pure and Applied Physics Courses

Code	Title	Hours
Take all of the following Pure and Applied Physics courses:		15
PHYS 3211	Analytical Mechanics	4
PHYS 3411	Thermal Physics	3
PHYS 3721	Junior Laboratory II	2
PHYS 3811	Quantum Mechanics	4
PHYS 4331	Principles of Electricity and Magnetism	4
PHYS 4711	Senior Laboratory I	2

Electives

Code	Title	Hours
Take six 3000-level or above PHYS credit hours, including up to 3 semester hours of directed research or independent study.		6
PHYS 3050	General Astronomy II	3
PHYS 3070	Physical Cosmology	3
PHYS 3082	Energy and the Environment	3
PHYS 3151	Biophysics Outlook I	1
PHYS 3161	Biophysics Outlook II	1
PHYS 3251	Biophysics of the Body	4
PHYS 3252	Biophysics of the Body NM	4
PHYS 3451	Biophysics of the Cell	4
PHYS 3452	Biophysics of the Cell NM	4
PHYS 3620	Sound and Music	3
PHYS 3840	Independent Study: PHYS	1-3
PHYS 3880	Directed Research	1-3
PHYS 3939	Internship	1-3
PHYS 4251	Physical Fluid Dynamics	3
PHYS 4351	Bioelectromagnetism	4
PHYS 4352	Bioelectromagnetism NM	4
PHYS 4400	Scientific Instrumentation	3
PHYS 4401	Special Topics	1-3
PHYS 4440	Electricity and Magnetism II	3
PHYS 4510	Optics	3
PHYS 4550	Astrophysics	3
PHYS 4611	Computational Physics	3
PHYS 4620	Computational Physics II	2
PHYS 4650	Solid State Physics	3
PHYS 4721	Senior Laboratory II	2
PHYS 4810	Atomic and Molecular Structure	3
PHYS 4820	Subatomic Physics	3
PHYS 4840	Independent Study: PHYS	1-3
PHYS 4880	Directed Research	1-6
PHYS 4920	Advanced Undergraduate Seminar	1
PHYS 4939	Internship	1-3
PHYS 4950	General Relativity	3
PHYS 4980	Advanced Physics Topics	1-3

Ancillary Courses

Code	Title	Hours
Take all of the following ancillary courses:		16-18
MATH 1401	Calculus I	4

MATH 2411	Calculus II	4
MATH 2421	Calculus III	4
MATH 3191 & MATH 3200	Applied Linear Algebra and Elementary Differential Equations	4-6
or MATH 3195 Linear Algebra and Differential Equations

Astrophysics Minor

Introduction

Please click here (p. 590) to see Physics department information.

Astrophysics is an important and well-represented subdiscipline of physics. It includes the study of the solar system, galactic and extragalactic astrophysics, as well as cosmology. A minor in this field combines a theoretical approach with observational analysis. There is also the opportunity to do research in this field.

The physics department offers minors in physics, biophysics, and astrophysics. However, it is not possible to receive a minor in more than one of these fields. Also, physics majors may elect to receive the astrophysics or biophysics minor from the department, but not the physics minor.

Students are strongly encouraged to consult with the astrophysics advisor, meet physics faculty engaged in Astrophysics research, attend departmental astrophysics-related seminars, and explore ways that astrophysics relates to research undertaken by faculty in other disciplines.

For more information, contact:

Alberto Sadun (Astrophysics Minor Advisor)
Email: alberto.sadun@ucdenver.edu
Office: North Classroom 3809

Michael "Bodhi" Rogers (Physics advisor)
Email: physics.chair@ucdenver.edu
Office: North Classroom 3123B

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 16 PHYS credit hours.
- Students must complete a minimum of 6 upper-division (3000-level and above) PHYS credit hours.
- Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
- Students must complete a minimum of 9 PHYS credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

- Requirements for the minor in astrophysics may be used to fulfill the requirements of the major in physics.
- A student majoring in physics who wants to minor in astrophysics cannot use the 3000-level and above courses applied to the Astrophysics minor for their Physics Major requirements.

Introductory Physics Lecture/Lab Courses

Code	Title	Hours
<i>Take the following courses</i>		<i>10</i>
PHYS 2010	College Physics I	4
or PHYS 2311	General Physics I: Calculus-Based	
PHYS 2321	Intro Experimental Phys Lab I	1
or PHYS 2351	Applied Physics Lab I	
PHYS 2020	College Physics II	4
or PHYS 2331	General Physics II: Calculus-Based	
PHYS 2341	Intro Experimental Phys Lab II	1
or PHYS 2361	Applied Physics Lab II	

Upper Division Astrophysics Electives

Code	Title	Hours
<i>Take a minimum of two of the following:</i> ¹		<i>6</i>
PHYS 3050	General Astronomy II	
PHYS 3070	Physical Cosmology	
PHYS 3082	Energy and the Environment	
PHYS 3411	Thermal Physics

Biophysics Minor

Introduction

Please click here (p. 590) to see Physics department information.

The minor in biophysics enables students with primary interests in biology, chemistry, health sciences, mathematics, anthropology, psychology, or other disciplines to explore the deep connections between fundamental physical processes and the functions and development of life. Using mathematical and computational models as well as precise experimental measurements and advanced instrumentation, biophysics explores living processes within a framework that builds upon fundamental physics concepts of mechanics, electrodynamics, statistical physics, and quantum physics. Students taking a minor in biophysics will be able to synthesize some or all of these areas of physics at a mature level of understanding into their primary field(s) of study, bringing an enriched array of intellectual and experimental tools to the pursuit of their professional goals.

Students must consult with the physics advisor, meet physics faculty engaged in biophysics research, attend departmental biophysics-related seminars, and explore ways that biophysics relates to research undertaken by faculty in other disciplines - including both fundamental science and clinical medicine. Opportunities also arise to connect biophysics studies to outreach into regional high schools so that pre-college students can benefit from undergraduates sharing their experiences with connecting studies across disciplines.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

For more information, contact:
Masoud Asadi-Zeydabadi (Biophysics Minor Advisor)
Email: masoud.asadi-zeydabadi@ucdenver.edu
Office: North Classroom 3803

Michael "Bodhi" Rogers (Physics advisor)
Email: physics.chair@ucdenver.edu
Office: North Classroom 3123B

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 16 PHYS credit hours.
2. Students must complete a minimum of 6 upper-division (3000-level and above) PHYS credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 PHYS credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Requirements for the minor in biophysics may be used to fulfill the requirements of the major in physics.
2. A student majoring in physics who wants to minor in biophysics cannot use the 3000-level and above courses for the Biophysics minor for their Physics Major requirements.

Introductory Physics Lecture/Lab Courses

Code	Title	Hours
<i>Take the following courses</i>		<i>10</i>
PHYS 2010	College Physics I	
or PHYS 231 General Physics I: Calculus-Based		
PHYS 2321	Intro Experimental Phys Lab I	
or PHYS 235 Applied Physics Lab I		
PHYS 2020	College Physics II	
or PHYS 233 General Physics II: Calculus-Based		
PHYS 2341	Intro Experimental Phys Lab II	
or PHYS 236 Applied Physics Lab II		

Upper Division Biophysics Required Courses

Code	Title	Hours
<i>Take the following</i>		<i>2</i>
PHYS 3151	Biophysics Outlook I	1
PHYS 3161	Biophysics Outlook II	1

Upper Division Biophysics Electives

Code	Title	Hours
<i>Take at least one of the following</i>		4
PHYS 3251	Biophysics of the Body	4
PHYS 3252	Biophysics of the Body NM (NM) ¹	4
PHYS 3451	Biophysics of the Cell	4
PHYS 3452	Biophysics of the Cell NM (NM) ¹	4
PHYS 3880	Directed Research	1-3
PHYS 4351	Bioelectromagnetism	4
PHYS 4352	Bioelectromagnetism NM (NM) ¹	4
PHYS 4840	Independent Study: PHYS	1-3
PHYS 4880	Directed Research	1-6

¹ The courses containing "NM" are versions whose math and use of prior physics knowledge has been adjusted - in terms of grading and assignments - for students who have taken fewer math and physics courses than physics majors (NM stands for non-majors). Both versions are meant to be content rich and conceptually challenging, still require quantitative modeling, and are offered simultaneously by the same instructor. Students with strong math backgrounds are encouraged to take the "majors" (xx51) version. Either one or the other version can count toward the minor, but not both.

Note:

Additional biophysics-related special topics or elective courses may be approved by the department advisor. Such courses include topics such as Radiation Physics in Biomedicine, Computational Modeling in Biophysics, Nonlinear Dynamics in Biomedicine, and specialized courses in biophysics-related instrumentation.

To learn more about the Student Learning Outcomes for this program, please visit our website.

Physics Minor

Political Science

Chair: Kathleen Bollard

Program Assistant: Kelly Stritzinger

Digital & Print Communications Specialist: Elly Steinmetz Lewis

Undergraduate Advisor: Karen Breslin

Pre-law Advisor: Glenn Morris

Graduate Advisor: Michael Berry

Director, New Directions Program: Steve DelCastillo

Office: Student Commons, Room 3212

Telephone: 303-315-1770

Fax: 303-315-1780

Overview

Political science is the study of people, power and the public good.

Looking at a variety of societies, institutions and interpersonal situations, the discipline asks who has power, where this power comes from, how it is used, how it promotes or impairs the public good and how the public good is defined. Political science draws from other fields, such as psychology, philosophy, economics, sociology and world literature. Finally, it explores the relationship between idealism and realism, between theory and practice, between political thought and personal action.

Opportunities for students with a BA in political science include careers in business, teaching, journalism, community organizing and government service. A political science degree also serves as good preparation for professional training in law and public administration. Students' internship experiences increase their job opportunities. Students with an MA in political science may find careers in such areas as business, government research and administration and teaching at the community college level.

Please visit the Political Science Department website for detailed information on programs, faculty, students, courses and syllabi, community involvement and service learning, internships and photographs.

Departmental Honors

Requirements for honors in political science are an overall GPA (in all courses, not just political science courses) of 3.65 or better and the preparation and defense of an honors paper. Honors graduates with an overall GPA of 3.75 to 3.84 may graduate with high honors, and those with GPAs of 3.85 and higher may graduate with highest honors. Level of honors granted depends upon both the GPA and the quality of the honors paper. Students interested in departmental honors must secure a full-time faculty sponsor for their honors paper early in the semester in which they intend to graduate. For details, please contact the department undergraduate advisor.

Fourth World Center for the Study of Indigenous Law and Politics

Executive Director: Glenn T. Morris

Telephone: 303-315-1762

This center provides a research clearinghouse to students and faculty at CU Denver on legal and political issues that affect indigenous peoples (the Fourth World). In addition to supporting a modest library of rare books and periodicals on indigenous issues, the center also stocks video and audio resources on subjects of indigenous politics and a substantial news file archive on current developments in the Fourth World. The center has produced curricular materials, including the Fourth World Bulletin, for use in international relations and area-studies courses.

Center for New Directions in Politics and Public Policy

Director: Steve DelCastillo

This center provides academic programs, courses and research focused in the areas of politics and public policy with the purpose of developing the leadership capacities necessary to address changing public priorities for the 21st century within neighborhoods, communities, governmental jurisdictions, labor organizations, and nonprofit entities. Students in the Center's academic programs include working professionals in public and non-profit sectors; elected officials; community activists; interest-group stakeholders; educators from a wide range of demographic, occupational, and personal backgrounds; and simply concerned citizens. The New Directions program offers professional internships with a wide variety of political jurisdictions, community-based groups, and labor organizations across Colorado, including several funded internships.

The center offers both undergraduate and graduate degrees in political science with emphases in public policy and administration.

Graduate Information

Please go to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/political-science/>) catalog to read about our graduate programs.

Programs Offered

- Political Science, BA (p. 611)
- Political Science - Public Policy Option, BA (p. 614)

- Political Science, BA with Secondary Teaching Licensure Endorsement (p. 618)
- Political Science, 4 + 1 BA/ MA (p. 622)
- Political Science Minor (p. 623)
- Labor Leadership Undergraduate Certificate (p. 625)
- Middle Eastern Politics Undergraduate Certificate (p. 626)
- Public, Non-Profit and Community Leadership Undergraduate Certificate (p. 627)

Professors:

Christoph Stefes, PhD, Denver University

Associate Professors:

Michael J. Berry, PhD, University of Colorado

Bassem Hassan, PhD, University of Denver

Betsy Jose, PhD, University of Pittsburgh

Glenn T. Morris, JD, Harvard University School of Law

Tony Robinson, PhD, University of California, Berkeley

Thorsten Spehn, PhD, University of Denver

James Walsh, PhD, University of Colorado

Assistant Professors:

Sasha Breger-Bush, PhD, University of Denver

Political Science (PSCI)

PSCI 1001 - Introduction to Political Science: The Quest for Freedom and Justice (3 Credits)

Introduces the study of politics, its human importance, and its relationship to social institutions. Analysis of the relationship between individual political behavior and characteristics of the political system. Development of key concepts such as power, legitimacy, authority, political socialization, and revolution. Note: Required of all PSCI majors. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS1

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS1, Soc Behav Sci:Econ or Pol.

PSCI 1101 - American Political System (3 Credits)

General introduction to the American political system with emphasis upon citizen involvement, the relationships among the various levels and branches of government, formal and informal institutions, processes, and behavior. Note: Required of all PSCI majors. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS1

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS1, Soc Behav Sci:Econ or Pol.

PSCI 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

PSCI 2001 - Topics in Political Science (1-3 Credits)

Covers different areas of politics. Note: May be taken more than once for credit when topics vary. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PSCI 2006 - Global Political Issues (3 Credits)

Studies global political issues, exploring the broad forces at play in the world: international economics, national interests, military power, nationalism, ethnicity, the environment and human rights. Discussion of world events and underlying global issues, incorporating analytical tools used by political scientists. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2011 - Logic of Political Inquiry (3 Credits)

This course builds critical thinking techniques, logical habits of mind, and research skills necessary for political study. Includes argumentation basics, logical fallacies, evaluating evidence, understanding statistics, effective writing, and internet research. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2365 - Politics of Climate Change (3 Credits)

This course shows how Political Science addresses today's most severe threat to our planet. It analyzes how societies try to mitigate and adapt to climate change at various governance levels. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2410 - Political Science through Science Fiction (3 Credits)

Explore political science concepts by analyzing works of science fiction. Course examines utopian and dystopian communities, imagined futures, and political theorizing in both classic and unusual works of fiction. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 2840 - Independent Study (1-3 Credits)

An opportunity for lower division students who demonstrate academic potential to pursue the study of some subject of interest in greater detail, with supervision from a faculty member in the department. Subjects chosen and arrangements for assignments to be made between student and faculty. Prereq: One semester of course work at Downtown Denver Campus. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: 15 hours of 2.75 GPA. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 3000 - Topics: Conference Participation (1 Credit)

Max hours: 1 Credit.

Grading Basis: Letter Grade

PSCI 3002 - Topics in Political Science (1-3 Credits)

Covers different areas of politics. Note: May be taken more than once for credit when topics vary. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PSCI 3011 - Research Methods (3 Credits)

Design of political/social research, both qualitative and quantitative. Applications of statistical techniques and procedures to social and political phenomena. Use of computer and the Internet. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3022 - Political Systems of the World (3 Credits)

The class focuses on the analyses of various political systems around the world. Students will look at democracies and dictatorships, industrialized countries and developing countries. Though a structured comparison, students will assess and test key theories in Political Science. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PSCI 3034 - Race, Gender, Law and Public Policy (3 Credits)

Historical overview of race and gender relations in the U.S. and an examination of the treatment of issues of race and gender in the judicial system and public policy. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PSCI 3035 - Political Movements: Race and Gender (3 Credits)

Examines the emergence, growth, and decline of social movements for race and gender equality. Discussion of political issues of race and gender in the 1990s. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PSCI 3042 - Introduction to International Relations (3 Credits)

Basic background and theories of international relations with focus on the interaction between nation states, international organizations, regimes and transnational movements. Themes examined include foreign policy conduct, international security and political economy, human rights and environmental management. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

PSCI 3050 - Islamophobia (3 Credits)

Islamophobia depicts Islam and its followers as threats to civilization, human rights and progress. Course examines historical and current Islamophobia, including impacts on international relations and on domestic politics. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3064 - Power and Empowerment in the United States (3 Credits)

Introduces U.S. political economy. Analysis of the political and economic forces and structures that shape the opportunities available to the American people. Among topics included are reciprocal impacts of government and business, the federal budget, taxation, lobbying and special interests, community organizing, and elections. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3214 - Federal Law and American Indians (3 Credits)

Examines the legal and political history of the U.S. in relation to American Indian Nations. Focuses on specific laws and Supreme Court cases in federal Indian law, with analysis of U.S. policy. There will be some comparison with Indian policies of other countries. Cross-listed with ETST 3216. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3347 - Film and Politics (3 Credits)

Presents historical and contemporary films to introduce students to critical evaluation of film as a political medium. Whether designed as propaganda or entertainment, films shape and reflect critical issues in our political and social culture. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3840 - Independent Study: PSCI (1-3 Credits)

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PSCI 3914 - The Urban Citizen (3 Credits)

Course emphasis is community, the individual, and the good life. Experiential learning and classroom discussions about capacities of urban citizens. Focus is on social, political, and economic resources that individuals command, issues of equality and inequality, and possibilities of constructive change. Prereq: A willingness to spend a semester working and studying together as a team in both the classroom and the community. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 3939 - Internship (1-9 Credits)

Designed experiences involving application of political concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

PSCI 4002 - Topics in Political Science (3 Credits)

Specialized areas of politics. Note: May be taken more than once for credit when topics vary. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PSCI 4009 - Politics of the Budgetary Process (3 Credits)

Develops each student's understanding of budgeting and financial management in the public and nonprofit sectors. An overview of public sector and nonprofit fiscal management is provided, along with thorough exploration of the political influences that affect financial decision-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4011 - GIS in Political Science (3 Credits)

Computer lab course developing methodological skills in Geographic Information Systems (GIS) in political contexts. Geospatial computerized mapping skills are important in political fields such as urban planning, electoral analysis, environmental justice, demographics, public health, and criminal justice. Designed for beginners. Cross-listed with PSCI 5011. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4014 - Media and Politics (3 Credits)

Explores the impact of the news media on the American political system, including public policy and citizen participation, and addresses trends in news coverage and media ownership, and their impact on public opinion. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4024 - State Politics: Focus Colorado (3 Credits)

Examination of American state politics, with an emphasis on Colorado. Course examines the special role of state governments in the American federal system. Focus on dominant current issues facing Colorado state government. Term offered: fall, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4025 - Local Governance and Globalization (3 Credits)

Introduces international political economy, consequences of globalization for localities, interplay between wealth and power among nations, multinational corporations, NGOs and the UN, and impact of their actions on local governments. Topics include development, aid, trade, outsourcing, eco-sustainability and global equity. Cross-listed with PSCI 5025. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4034 - Political Parties and Pressure Groups (3 Credits)

Democrats, Republicans, third parties, and pressure groups in the United States. Analysis of pressure politics and political behavior. Impact of parties and pressure groups on the public good. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4044 - The Presidency (3 Credits)

An overview of the historical, constitutional, and functional aspects of the presidency. Focuses on the powers and vulnerabilities of the presidency and on the style and politics of the current president. Cross-listed with PSCI 5044. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4057 - Religion and Politics (3 Credits)

Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state;" (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Cross-listed with PSCI 5057 and RLST 4500, 5500. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4074 - Urban Politics (3 Credits)

The crisis and the promise of U.S. cities. Nature and roots of critical urban problems. Citizen involvement in urban decision making. Government as problem and as solution. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4075 - Gentrification and Social Equity (3 Credits)

Study causes and consequences of urban gentrification, and explore strategies of grassroots resistance and social equity solutions that are being mobilized to challenge the forces of gentrification. Contrast common celebrations of the waves of capital reinvestment that are fueling urban revitalization with the frequent claim of many low-income neighborhoods: "Gentrification is Class War!" Cross-listed with PSCI 5075. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4084 - Local Government and Administration (3 Credits)

Policy and administrative challenges faced by local government in the 21st century. Emphasis on cities under federalism, alternative forms of city governance, and new challenges from increasingly diverse constituents. Issues of poverty, public safety, health, transportation, environment, corruption, and accountability. Cross-listed with PSCI 5084. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4085 - Comparative Governance: Environment and Society (3 Credits)

Focuses on how public & private actors at various levels of governance address pressing social & environmental issues such as aging societies, drug abuse, air pollution & global warming. Students will learn to analyze the dynamics of conflict & cooperation, using main concepts and theories of governance literature. Cross-list PSCI 5085. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4094 - Seminar: American Politics (3 Credits)

Foundations of U.S. politics and contemporary political issues. Federal/state/community relations. Relationship among the three branches of the Federal government. Colorado controversies arising under the U.S. Constitution. Cross-listed with PSCI 5014. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4105 - Comparative Politics: Europe (3 Credits)

An intensive and comparative analysis of the political systems and processes of Europe. Emphasis on political culture and economy; executive-legislative relationships; electoral systems; political parties and interest groups; political conflict and citizen participation; and the impact of social changes on political institutions. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5105. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4115 - Third World Politics (3 Credits)

Examines the factors challenging political stability in low income nations and the prospects for democracy and economic development. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4124 - Denver Politics (3 Credits)

Surveys Denver's dominant political and economic forces and community agendas that compete with the downtown growth machine. Examines urban renewal strategies, gentrification and grass-roots resistance, and the role of officials in shaping Denver's distribution of wealth and life-opportunities. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4126 - Introduction to International Political Economy (3 Credits)

A short introduction to international economy, including classic readings of international political economy (such as Smith, Ricardo, Marx, Lenin), and more recent work on globalization, applying related theories to the current world economy. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.

PSCI 4144 - Indigenous Political Systems (3 Credits)

Surveys political theory and practice in indigenous societies in the Americas. Examines the impact of indigenous political thought on Euro-American politics, especially the U.S. Constitution, and explores the contemporary impact of indigenous people on current politics. Cross-listed with ETST 4144. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4146 - Indigenous Politics (3 Credits)

Surveys the status of the world's native peoples and nations, and the role of law and politics in the future of indigenous peoples in the global arena. Examines questions of human rights, economic development, and international law and politics. Cross-listed with PSCI 5145 and ETST 4146. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4150 - Gender Politics in the Middle East: Beyond Orientalism & Islamism (3 Credits)

This course is about Middle Eastern women's subjectivity and various forms of agency. It explores the nexus of domestic, regional and international forces that shapes the lives of Middle Eastern women, in particular in the Algerian, Egyptian, Iranian, Israeli and Palestinian contexts. Far from being silent observers of the contests among these forces, as is often assumed, Middle Eastern women have been active actors in the public arena since the 19th century colonial encounter and the importation of the modern state to the region using an array of means to make their voices heard. They were often more militant than those of their countrymen. The course is divided into two parts. The first part provides an overview of the theoretical notions discussed such as Orientalism, agency, colonialism and post-colonialism. Related to this theoretical section is a historical overview that is necessary to the understanding of the contemporary conditions of Middle Eastern women and the continuities and changes between past and present. The second part covers pressing topics in the lives of Middle Eastern women in the post-independence era such as the rise of Political Islam, the global trend of democratization, war and occupation. The emphasis in this section is on women as active participants in the debates surrounding these issues, rather than as objects of them. The readings assigned include both texts written by scholars from the region and by others from without. They provide analyses of the contexts within which Middle Eastern women's struggles take place. In addition, students will be exposed to materials produced by Middle Eastern women activists that express their own opinions and views in order to avoid misrepresentation and to reflect the diversity among them. Cross-listed with WGST 4150. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4155 - Political Systems of the Middle East and North Africa (3 Credits)

Comparative analysis of political processes in the Middle East and North Africa. Islamic political theory and its contemporary manifestations. The role of nationalism and the quest for modernity in the political development of this region. Parties and programmed modernization in transitional politics. Violent and nonviolent change. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4156 - The Arab-Israeli Peace Process (3 Credits)

Critical analysis of Arab and Israeli perspectives on the on-going peace negotiations in the Middle East. Historical background and religious-cultural aspects of current problems. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with ETST 4156. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4165 - Islamic Politics and Culture (3 Credits)

Comprehensive, in-depth study of Islam and Muslims. Islam is viewed as a "way of life" with social, economic, psychological, spiritual, and political implications. Among topics to be examined are: women in Islam, Jihad, fundamentalism, Islamic movements, Islam and the West. Cross-listed with RLST 3100. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4176 - Gandhi's Legacy: Non-Violent Resistance Today (3 Credits)

This course assesses the legacy of Gandhi's nonviolent struggle against systemic oppression. We examine Gandhi's ideas and practices, consider Western images of political violence, and then focus on questions and possible answers raised by empirical studies. Cross-listed with PSCI 5176. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4185 - Corruption in the U.S. and Abroad (3 Credits)

Explores the causes and consequences of administrative and political corruption in developed and developing countries, and evaluates various anti-corruption strategies. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4186 - East Asia in World Affairs (3 Credits)

Political and economic systems and foreign policies of East Asian powers, such as China, Japan, Taiwan, South Korea and Hong Kong; interactions of these powers and their collective economic and political roles in world affairs; major theoretical approaches to the study of East Asian powers. Max hours: 3 Credits. Grading Basis: Letter Grade
Additional Information: Teikyo.

PSCI 4195 - Political Systems of Sub-Saharan Africa (3 Credits)

Analysis of major types of political systems in sub-Saharan Africa and intensive case studies of selected countries exemplifying each type. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4206 - Social Movements, Democracy and Global Politics (3 Credits)

Examines global social movements as new political actors within world politics; how theoretical perspectives in international relations and democracy address these actors; and the forms of interaction among these actors, states, and global governance institutions. Cross-listed with PSCI 5206. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4207 - Theories of Social and Political Change (3 Credits)

Investigation of social and political power with respect to possibilities of change. Location of present barriers to change within ongoing histories of marginalization, exclusion, and violence. Critical examination of political inclusion and recognition. Imaginations and pursuits of just, equitable, and/or Utopian worlds. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4215 - Women's Rights, Human Rights: Global Perspectives (3 Credits)

Explores the global feminist movement's campaign to "engender" human rights. Examination of women's human-rights issues and the critique of this campaign as representing cultural imperialism. Note: this course assumes that students have completed at least two political science courses. Cross-listed with WGST 4215. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4216 - International Politics: Human Rights (3 Credits)

The system of nation states, concepts of national interest, goals of foreign policies, conduct of diplomacy, and the bearing of these elements on the problem of human rights. Presentation and evaluation of the solutions that have been offered for the securing of justice and the maintenance of peace. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4224 - Dictatorships in 21st Century (3 Credits)

Analyzes and classifies political systems of non-democratic regimes. Reviews earlier and contemporary theories that explain the origins, survival and death of authoritarian regimes. Discusses the impact of dictatorial rule on domestic developments as well as on international relations. Cross-listed with PSCI 5224. PSCI 3022 recommended for student success. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4225 - Democracy and Democratization (3 Credits)

Examines the conditions under which countries turn from authoritarianism towards democracy and become stable democratic regimes. Also examines the impact of foreign and international factors on new democracies. Cross-listed with PSCI 5225. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4226 - The United Nations in World Affairs (3 Credits)

Current operation and future potential of the United Nations as a complex actor in world affairs, both expressing conflicting interests of its participants and promoting universal goals, including world peace, human rights, and environmental protection. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits. Grading Basis: Letter Grade

PSCI 4235 - Politics and Markets in Latin America (3 Credits)

Explores political economic development in Latin America within the context of the world system. Includes the study of colonization, land tenure, foreign investment, authoritarianism, militarism, social and revolutionary movements, human rights and democratization. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 6.

PSCI 4236 - American Foreign Policy (3 Credits)

Examines the postwar events, controversies, and most recent challenges in U.S. foreign policy. Analyses of the major sources of U.S. foreign policy, such as ideology, national interests, and national power. Attention to the pattern and process of foreign policy-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

PSCI 4237 - American National Security (3 Credits)

Examines American national security, utilizing an interdisciplinary analysis of its domestic historical development and its function in the current global context. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4240 - International Security (3 Credits)

Examines old and emerging "threats" to national security, and policy responses, from theoretical, historical and geographical perspectives. Explores challenges of ethnic conflict, weapons of mass destruction, environmental and economic security. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4245 - Populist Movements around the World (3 Credits)

Political populism is on the rise in virtually every part of the world. Populist leaders, parties and movements exert direct influence when they are in power. However, they also create pressure on centrist leaders and parties and influence politics indirectly. This course explores the phenomenon of political populism around the world. We begin by defining populism and investigate cases of populist movements in the United States, Europe, the Middle East, Latin America and Asia. After that, we will engage the literature devoted to explaining the phenomenon. The course concludes with a discussion of the effects of populism and the dangers that some forms of it pose to democracy. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4248 - Gender, Globalization and Development (3 Credits)

Analyzes the effects of globalization on the gendered processes of international development and strategies to empower women to achieve gender justice across race, class and national divisions. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5245 and WGST 4248/5248. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4265 - Social Justice And Globalization (3 Credits)

Examines issues of justice and ethical responsibility in a globalizing world. Do moral obligations of individuals and institutions end at national borders or do they encompass all human beings and extend to the environment and to future generations? Cross-listed with PSCI 5265. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4266 - International Law (3 Credits)

Investigates the body of law that regulates relations between nations and provides a framework for solving common problems and disputes between nations. Note: this course is intended for political science majors. Cross-listed with PSCI 5266. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4274 - Conflict Resolution and Public Consent Building (3 Credits)

Alternative strategies for resolving or mediating conflicts facing public or nonprofit organizations and for building public consent, with emphasis on personal, interpersonal, organizational, interest-group, cross-cultural, and roots of conflict and bases for consent. Cross-listed with PSCI 5274. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4276 - Conflicts and Rights in International Law (3 Credits)

Explores contending interpretations and practices in international law regarding issues such as the legitimacy of humanitarian intervention, efficacy of truth commissions, tensions between truth and justice in cases of genocide and war crimes, and legal changes needed to devise viable rules. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5276. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4280 - The Politics of War Law (3 Credits)

Examines international laws governing armed conflict, including human rights law. Investigates the reasons for instances of compliance and violation within this international legal regime regulating war and conflict. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4286 - International Relations: War or Peace? (3 Credits)

Presents alternative theoretical frameworks for the explanation of war and peace. Investigations of the efficacy of international law, just-war norms and the UN in preventing or containing conflict. Cross-listed with PSCI 5286. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4326 - Advanced International Political Economy: Globalization (3 Credits)

Engages the current debate about globalization. Conceptualizes globalization and evaluates the pros and cons of global trade and finance for developed and developing countries. Develops a model for a sustainable and just global economy. Prereq: PSCI 4126. Cross-listed with PSCI 5326. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: PSCI 4126

PSCI 4330 - U.S. Health Policy (3 Credits)

The role of public health policy as legislated at the federal and state levels. Individual health policy (e.g. social security and managed care) and public health policy (e.g. mandatory immunizations, HIV testing, air and water quality). Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4354 - Environmental Politics (3 Credits)

Political, legal, and economic forces in environmental law and policy. Special emphasis on air and water pollution and on threats to public and agricultural land. Environmental groups and their opponents. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4365 - Global Ecological Crises (3 Credits)

Overview of global ecological problems such as climate change, transboundary pollutions, and loss of bio-diversity in an attempt to understand the political, economic, and cultural forces behind these problems and the status of legal and policy initiatives to address them. Cross-listed with PSCI 5365. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4407 - Early Political Thought (3 Credits)

Main currents of political thought in their historical setting from Plato to Machiavelli, with a critical evaluation of those elements of continuing worth. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4414 - Non-Profits and Social Change (3 Credits)

Explores role of non-profits in catalyzing social change. What are obstacles and opportunities to leveraging social change through nonprofits? What factors shape non-profits to be either transformational or systemstabilizing forces? Cross-listed with PSCI 5514. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4417 - Modern Political Thought (3 Credits)

Theories of modernity and its lasting social and political consequences. Topics may include liberalism and neoliberalism, capitalism and Marxism, humanism and posthumanism, racial slavery, colonialism, and ecology. PSCI 4407 is not a prerequisite for PSCI 4417. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4427 - Law, Politics and Justice (3 Credits)

Analysis of the relationship of politics, law, and justice, particularly the degree to which moral norms and political concerns should and do influence legal standards and their perceived legitimacy. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4437 - Coercion and the State (3 Credits)

An analysis of: (1) the historical emergence of the modern state; (2) the theoretical justifications for the concentration of political power and the activist state; (3) the internationalization of the European state system; and (4) anarchist and Fourth World challenges. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4444 - Contemporary Culture and Politics in America (3 Credits)

Intellectual and experiential investigation of the interplay of culture and politics in American society, as manifested in literature, social and political philosophy, psychological writings and trends, radical movements, popular culture, and daily behavior. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4446 - Advanced Indigenous Peoples' Politics (3 Credits)

Builds upon the theoretical and applied foundations of PSCI 4146. Intensive study of international legal and political developments are examined, particularly in the United Nations and the Organization of American States systems. Prereq: PSCI 4144 or PSCI 4146. Cross-listed with PSCI 5446. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: PSCI 4144 or PSCI 4146

PSCI 4457 - American Political Thought (3 Credits)

Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Cross-listed with PSCI 5457, ETST 4457, and ETST 5457. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4477 - Constitutional Law I (3 Credits)

Nature and scope of the following American constitutional principles as developed by the U.S. Supreme Court: federalism, jurisdiction of the federal courts, separation of powers, the taxing power, and the commerce power. Case method. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4487 - Constitutional Law II (3 Credits)

Continuation of PSCI 4477, with emphasis on the war powers of the president, citizenship, the Bill of Rights, and the Civil War amendments. (Case method.) Note: PSCI 4477 is not a prerequisite for PSCI 4487. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4494 - Judicial Politics (3 Credits)

Examines principal actors in the legal system: police, lawyers, judges, citizens. About half of this course is devoted to the study of judicial behavior, especially at the Supreme Court level. Political and personal influences on judicial behavior. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4505 - Political System of Russia and Its Neighbors (3 Credits)

The class focuses on the political values, institutions and actors of Russia and its neighboring countries, covering the political developments since the late 20th century. The relations between Russia, the European Union and the United States are also analyzed. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4535 - Labor and Working Class Politics (3 Credits)

Explores the status of the labor movement both in the U.S. and internationally, as well as the political, philosophical, and social implications of socioeconomic class status and identity. Cross-listed with PSCI 5535. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4545 - Immigration Politics (3 Credits)

Introduces students to central theories of migration and a survey of immigration law and policy in the 20th century. Highlights experiences of Mexican and Latin American immigrants and related topics, including: U.S.-Mexican foreign relations, bilingual education, undocumented immigration and globalization. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5545. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSCI 4550 - The Irish Diaspora (3 Credits)

While the population of Ireland today is roughly five million, there are an estimated 80 million people worldwide and nearly 50 million people in North America who claim some Irish identity. This course will explore this massive, nearly 5 century old, diaspora, beginning with the Plantations of Ulster and subsequent Ulster Scots emigration to North America, through the Great Hunger of the 19th century and massive exodus to the United States, Canada, Australia, and beyond. The course focus heavily on Irish immigrant communities in early Colorado, specifically Leadville, examining the history of our own community as a window into the larger political, social, and economic structures that drove such a migration. The course will conclude with an examination of the N. Ireland Peace Process, Good Friday Agreement, and BREXIT, inquiring about the role that Ireland and the Irish Diaspora plays today in global politics. Note: Students in this course will travel to parts of Colorado that once had significant Irish immigrant communities, places such as Leadville, Cripple Creek/Victor, Nevadaville, and various Catholic parishes and cemeteries in Denver. Students will also be expected to perform primary source research on Irish communities in early Colorado. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4554 - Chicano and Latino Politics (3 Credits)

Analysis of the social, cultural, and economic factors that affect political behavior of Latinos. Special attention is paid to the Mexican American cultural heritage and to relations between Mexican Americans and Anglo Americans. Cross-listed with ETST 4558. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4555 - International Women's Resistance (3 Credits)

Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Cross-listed with PSCI 5555, ETST 4555 and WGST 4555/5555. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4564 - Gender and Politics (3 Credits)

Inter-sectional examination of the personal and political life of gender. Exploration of constructions, performances, and creative reconfiguration of gender through a variety of texts, genres, and media. Cross-listed with WGST 4564. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4605 - Politics and Governments of South Asia (3 Credits)

Studies the political systems of Bangladesh, India, Pakistan, Sri Lanka and Nepal. The impact of British rule on the development of political institutions on the subcontinent as well as problems of political development at all levels. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4615 - Politics and Government of China (3 Credits)

Political and governmental changes within China, from the 19th century to the present. Primary emphasis on contemporary political systems and sociopolitical problems. China's struggle for independence and economic development. The Chinese revolutions, Maoist communism, and the post-Maoist period. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4645 - Comparative Political Leadership (3 Credits)

Comparative study of historical, socio-cultural, and psychological bases of political leadership. Leadership types in peasant societies, empires, and revolutionary movements. Dilemmas of democratic versus authoritarian leadership in modernizing and industrial states. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4726 - Seminar on U.S. and China Relations (3 Credits)

Detailed examination of historical context and current issues in U.S./China relations. Emphasis on modern period, with particular attention to changing relations in context of rising power of China. Cross-listed with PSCI 5726. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4736 - The Middle East in World Affairs (3 Credits)

Evolution and revolution in the Middle East. The character of nationalism in the area. Analysis of inter-regional and international problems affecting the Middle East, with special emphasis on current Arab-Israeli relations. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4757 - Legal Reasoning and Writing (3 Credits)

Introduces the fundamentals of legal reasoning and legal argumentation through intensive class discussion, formal debate and writing. Attention is given to the relationship between case and statutory law and their application in trial and appeals courts in the United States. Note: this course assumes that students have completed ENGL 1020, 2030, and any 3000-level English/writing course, or COMM 3120. Cross-listed with PSCI 5747, COMM 4750, 5750. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4807 - Political Violence (3 Credits)

Investigates different types of political violence including genocide, ethnic and religious conflict, revolution, terrorism, war, state repression and others. Introduces theories of individual, collective and institutional violence, applies them to a range of case studies and explores possible solutions. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4808 - Strategies of Peacebuilding (3 Credits)

The course investigates the theories and strategies of peacebuilding in societies that have endured intrastate conflict and/or massive human rights violations and asks whether peace and justice and democracy can or should work together and how forgiveness and reconciliation might develop. Cross-listed with PSCI 5808. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4827 - Women and the Law (3 Credits)

Examines the role of the courts in the development of public policy toward women; how the legal system affects the economic power, family roles, safety and political participation of women. Cross-listed with ETST 4827 and WGST 4827. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4837 - Contemporary Issues in Civil Liberties (3 Credits)

Conflicting rights of individuals and groups in several areas of civil liberties, including religious groups, free speech, sexual freedom, racial quotas, and anti-governmental actions and publications. This course includes case law, readings, guest speakers and case discussions. Cross-listed with PSCI 5837. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4840 - Independent Study: PSCI (1-3 Credits)

An opportunity for advanced students with good scholastic records, and with appropriate courses completed, to pursue independently the study of some subject of special interest to them. Subjects chosen and arrangements made to suit the needs of each student. Note: Primarily for seniors. Prereq: 15 semester hours in political science and permission of instructor. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PSCI 4878 - War, Film, and International Law (3 Credits)

This course examines interactions of culture, politics, and law by chronologically investigating 20th-century war movies and the ways experiences and norms have shaped and been shaped by cinematic representations. Cross-listed with PSCI 5878. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PSCI 4914 - Community Organizing and Community Development (3 Credits)

The theory and practice of community organizing strategies and community development innovations. How can social activists build power at the grassroots to build equitable, sustainable, and healthy communities? Cross-listed with PSCI 5914. Note: Students will not receive credit for this course if they have already earned credit for PSCI 3075. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4934 - CU at the Capitol (3 Credits)

Examines current year legislative session of Colorado General Assembly. Study of various elected leaders; Colorado party system; Governor-Assembly relations; citizen and lobbyist influence; corruption and virtue in politics; current affairs. Each student will be placed in a state government internship. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4944 - CU in the City (3 Credits)

Investigation of community development strategies through seminar discussions, urban walking tours, and student field placement with a local community based organization, non-profit, or public office engaged in community development work. Cross-listed with PSCI 5944. Recommended Preparation: PSCI 3075 Community Organizing and Development. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSCI 4960 - Capstone in Political Science (3 Credits)

Course facilitates independent student research in Political Science and assists students in developing advanced writing and communication skills. Students will design, execute and present advanced research project. Restriction: Students must have completed 27 credits hours in Political Science (PSCI) with a C- or higher in order to register. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Students must have completed 27 credits hours in Political Science (PSCI) with a C- or higher in order to register.

PSCI 4995 - Global Study Topics (1-3 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with PSCI 5995. Term offered: summer. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Political Science, BA

Introduction

Please click here (p. 602) to see Political Science department information.

Courses are distributed among the primary fields as listed in this section, i.e., American politics, comparative politics, international relations, political theory and public policy and administration.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This program can be completed online or on-campus.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 39 PSCI credit hours.
2. Students must complete a minimum of 21 upper division (3000-level and above) PSCI credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 PSCI credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Exceptions to the Experiential Learning Requirement
 - In lieu of taking one of the identified courses, students may complete a substantial experiential learning project in a different PSCI class. The course instructor must certify with a written submission to the departmental undergraduate advisor that the experiential learning project in that course fulfills the departmental experiential learning requirement.
 - Students with preexisting significant political or civic engagement experience in the community (i.e., community and civic leadership work, or work with government agencies, on political campaigns, or in non-governmental organizations) or for whom the experiential learning requirement poses a hardship may petition the undergraduate advisor to waive the requirement.
 - **Note:** In either of these cases of exception to the Experiential Learning coursework requirement, 39 total credit hours in political science are still required for graduation.

Required Courses

Code	Title	Hours
<i>Take the following</i>		9
PSCI 1001	Introduction to Political Science: The Quest for Freedom and Justice	3
PSCI 1101	American Political System	3
PSCI 2011	Logic of Political Inquiry ¹	3

¹ This course must be taken by all majors as part of their first 24 credit hours in the program. If this requirement poses a hardship due to such issues as late-declaring majors, scheduling problems, or students transferring in multiple credits, please contact the Department undergraduate advisor to craft a solution.

Political Theory

Code	Title	Hours
<i>Take two of the following:</i>		6
PSCI 4057	Religion and Politics	3
PSCI 4207	Theories of Social and Political Change	3
PSCI 4407	Early Political Thought	3
PSCI 4417	Modern Political Thought	3
PSCI 4427	Law, Politics and Justice	3

their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This program can be completed online or on-campus.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 39 PSCI credit hours.
2. Students must complete a minimum of 21 upper division (3000-level and above) PSCI credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 PSCI credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students with significant pre-existing political or civic engagement experience in the community, or for whom the experiential-learning requirement poses a hardship may petition the chair to waive the experiential-learning requirement; the overall requirement of 39 credit hours for Political Science graduation will still apply.

Political Science, BA with Secondary Teaching Licensure Endorsement

Introduction

Please click here (p. 602) to see Political Science department information.

Political science focuses on fundamental questions that go to the heart of the human experience. Political science students study critical issues such as war and peace, international affairs, environmental challenges, poverty and racism, and the struggles of oppressed peoples. Such study prepares students for various careers by building analytical and writing skills while encouraging independent thought, respect, and interest in current affairs. Graduates commonly work in fields such as law and government, nonprofit organizations, teaching, journalism, international organizations, business, and election campaigns.

The Political Science department prepares students for informed and creative activism by providing them an opportunity to develop analytical skills. The program incorporates historical, quantitative, experimental, ethnographic, psychological, and creative methodologies while aiming to sensitize students to the essential questions of politics and life. Many of our graduates are community organizers, attorneys or public servants in local, state or federal government. We have become nationally known for our programs in indigenous politics, international human rights, and inner-city community development. Students will find ample opportunity to explore the innovative community engagement programs while receiving real-world experience in a variety of professional and community settings.

The secondary licensure program is a partnership program between the College of Liberal Arts and Sciences (CLAS) and the School of Education & Human Development (SEHD). Secondary Education Licensure students choose a major within CLAS and complete all CORE, CLAS, major, and initial teacher education admission requirements before completing a final professional year of licensure coursework through the SEHD.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)

- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 39 PSCI credit hours. Students must complete courses to prepare for the Social Studies Praxis exam and complete SEHD teacher licensure requirements.
2. Students must complete a minimum of 21 upper division (3000-level and above) PSCI credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 15 PSCI credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

Students are responsible for meeting with the advisor in the SEHD to confirm teacher education and licensure requirements. In addition to completing all minimum program requirements above, SEHD secondary education students must complete the following minimum SEHD licensure (p. 712) requirements:

1. Complete the Education Declaration form and all subsequent processes and requirements, including a background check, prior to April 1st (for students intending to complete their clinical field experience in fall) or November 1st (for students intending to complete their clinical field experience in spring). Students must meet with the SEHD advisor for detailed information.
2. Student pursuing secondary education licensure must complete the following requirements to be admitted to the Professional (final) Year:
 - a. a minimum cumulative CU GPA of 3.0 or higher. Students with a lower GPA may be considered under certain conditions.
 - b. all CU Denver Core, CLAS, major, electives, and initial teacher education coursework requirements prior to the start of the Professional Year
 - c. the official application and interview process
 - d. Deadlines for Professional Year application are March 1st (for students intending to begin Professional Year in fall) or October 1st (for students intending to begin Professional Year in spring).
3. Students must complete all initial teacher education and professional (final) year coursework with a minimum grade of B- or higher.
4. Students must pass the appropriate Praxis exam before the start of the second semester of the Professional Year.

PSCI Required Courses

Code	Title	Hours
Take all of the following courses:		9
PSCI 1001	Introduction to Political Science: The Quest for Freedom and Justice	3

PSCI 1101	American Political System	3
PSCI 2011	Logic of Political Inquiry ¹	3

¹ This course must be taken by all majors as part of their first 24 credit hours in the program. If this requirement poses a hardship due to such issues as late-declaring majors, scheduling problems, or students transferring in multiple credits, please contact the Department undergraduate advisor to craft a solution.

Political Theory

Code	Title	Hours
<i>Take two of the following:</i>		6

Capstone

Code	Title	Hours
<i>Take the following course after completing at least 27 credit hours in the major.</i>		3
PSCI 4960	Capstone in Political Science	3

Secondary Social Studies Courses

Code	Title	Hours
<i>In order to prepare for the Social Studies Praxis exam, students should take all of the following courses:</i>		
These courses will also count toward Political Science CU Denver and CLAS graduation requirements, as identified.		

Anthropology

Code	Title	Hours
ANTH 1303	Introduction to Biological Anthropology	4
ANTH 2102	Culture and the Human Experience	3

* *ANTH 1303 Introduction to Biological Anthropology Will count as CU Denver Core Nat/Phys Science with lab. ANTH 2102 Culture and the Human Experience will count toward either CU Denver Behavioral Science or CLAS Behavioral Science.*

Economics

Code	Title	Hours
ECON 2012	Principles of Economics: Macroeconomics	3

* *Will count as CU Denver Core Social Sciences or CLAS Social Science.*

Geography

Code	Title	Hours
GEOG 1102	World Regions Global Context	3
GEOG 1202	Introduction to Physical Geography	3

- * GEOG 1202 Introduction to Physical Geography will count as CLAS Nat/Phys Science without lab and GEOG 1102 will count as CU Denver Core Social Science or CLAS Social Science.

History

Code	Title	Hours
HIST 1361	U.S. History to 1876	3
HIST 1362	U.S. History Since 1876	3

- * HIST 1361 U.S. History to 1876 and HIST 1362 U.S. History Since 1876 will fulfill the CU Denver Core Humanities and the CLAS Humanities requirements.

Political Science

Code	Title	Hours
PSCI 3022	Political Systems of the World	3
or PSCI 3042	Introduction to International Relations	
PSCI 3034	Race, Gender, Law and Public Policy	3
or PSCI 3035	Political Movements: Race and Gender	

- * PSCI 3022 Political Systems of the World or PSCI 3042 Introduction to International Relations will count as CU Denver Core International Perspectives.

PSCI 3034 Race, Gender, Law and Public Policy or PSCI 3035 Political Movements: Race and Gender will count as CU Denver Core Cultural Diversity.

Psychology

Code	Title	Hours
PSYC 1005	Introduction to Psychology II	3

- * Will count toward either CU Denver Behavioral Science or CLAS Behavioral Science.

SEHD Licensure Coursework Requirements

Students must complete SEHD licensure requirements located here (p. 712).

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/polisci/undergraduate/>).

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/clas/>).

Political Science, 4 + 1 BA/ MA

Graduate School Policies and Procedures (<http://catalog.ucdenver.edu/cu-denver/graduate/graduate-school-policies-procedures/>) apply to this program.

Introduction

Please click here (p. 602) to see Political Science department information.

The 4+1 accelerated Master's program in Political Science is an expedited program of study that allows students to complete a Bachelor's degree in Political Science and a Master's degree in Political Science in as few as 5 years. Students will follow the undergraduate curriculum for Political Science and work closely with their faculty advisor to begin taking Political Science graduate level coursework as they complete their undergraduate degree. They will complete no more than 15 credits as an undergraduate that will apply to both their undergraduate and graduate degrees. Students may officially declare their intent to complete this program in either their junior or senior year, and may apply to the graduate program during their senior year. Application requirements may differ from the traditional 2-year MA, which is why students need to work closely with faculty advisors and the political science graduate program director for more information and to ensure they are following the best track to complete coursework so that they only have one year after completing the undergraduate degree, to complete the graduate requirements.

Program Delivery

- This is an on-campus program.

Declaring This Program

- Click here (p. 63) to go to information about declaring a major.

The PSCI 4+1 BA/MA program is open to any PSCI major who has reached junior-level status (completed 60-credit hours of coursework) with a GPA greater than 3.0. Students eligible to declare the PSCI BA/MA degree program must be active CU Denver students who have competed at least one semester in residence at CU Denver, including at least two CU Denver PSCI courses.

In order to declare the PSCI 4+1 BA/MA program prior to completion of the BA degree, interested students should consult with both the PSCI undergraduate and PSCI graduate advisors. Students must complete a 4+1 BA/MA degree intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary. Completed 4+1 degree declaration forms are submitted to CLAS Advising for processing.

All students who have declared the 4+1 degree program option as undergraduates must submit a formal application through the CU Denver Graduate School's online application system during their final semester of undergraduate coursework. The department's preferred application deadlines are April 1 (summer term), May 1 (fall term), and November 1 (spring term).

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

While students are completing a BA degree in political science (p. 611), they may also complete some of the requirements for an MA degree in political science (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/political-science/political-science-ma/>) by participating in the BA/MA program using the following guidelines:

1. The student must apply and be accepted for participation in the BA/MA program prior to completion of the BA degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary.
2. A minimum of 39 undergraduate hours and 33 graduate hours of Political Science credits hours must be completed to earn both an undergraduate and a graduate degree through this 4+1 program.
3. A minimum of 21 PSCI credit hours applied toward the BA must be taken at the upper division (3000-level and above) level and all credits applied toward the MA must be completed at the graduate level.
4. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. Students must earn a minimum grade of B- (2.7) in any graduate level course for it to later be counted towards graduate degree requirements. All graded attempts in required and elective courses are calculated in the major GPA. No course taken as pass/fail may be counted.
5. A minimum of 15 semester hours applied toward the BA must be taken from CU Denver faculty and all graduate coursework must be completed with CU Denver faculty.

Program Allowances and Restrictions

1. Up to 15 graduate level credit hours in Political Science may be taken by Political Science undergraduates accepted to the 4+1 program, and these credits will count both towards completion of the undergraduate degree, and the graduate degree in political science, if the student is later accepted into the graduate program.
2. Complete all Political Science undergraduate major requirements. Refer to the undergraduate Political Science (p. 611) catalog page.
3. To secure admission to the Political Science graduate program, submit formal graduate application during the senior year.
4. No more than 15 undergraduate credit hours may "double-count" for the M.A.. Elective courses must be in accordance with Graduate School Policies. Therefore, meeting with an advisor regularly is recommended. Eligible students may declare the 4+1 BA/MA program after reaching junior-level standing as an undergraduate.

To learn more about the Student Learning Outcomes for the Undergraduate program, please visit our website (<https://clas.ucdenver.edu/polisci/undergraduate/>).

To learn more about the Student Learning Outcomes for the Graduate program, please visit our website (<https://clas.ucdenver.edu/polisci/graduate/>).

Political Science Minor

Introduction

Please click here (p. 602) to see Political Science department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is both an on-campus program and online program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 15 PSCI credit hours.
2. Students must complete a minimum of 12 upper-division (3000-level and above) PSCI credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 PSCI credit hours with CU Denver faculty.

Labor Leadership Undergraduate Certificate

Introduction

Please click here (p. 602) to see Political Science department information.

The Labor Leadership certificate is meant to develop the next generation of leaders in labor unions and civic organizations focused on labor and related issues of race, class and gender equity. The certificate is particularly relevant to labor union leaders, rank and file members, and community-based organizational staff who desire to receive continuing education regarding labor leadership. The labor leadership certificate will combine academic instruction with field learning and community-based research projects. The program features active partnerships with local labor organizations, such as unions and community-based groups focused on relevant labor, class and race issues (such as immigrant rights groups, workplace gender equity groups, etc.). Certificate students will enhance synergetic learning in the classroom, and enlarge networking opportunities among all students.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and

substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

The certificate can be earned either through our traditional on-campus courses, or entirely through classes offered in a weekend-intensive format in our New Directions program. Students may take classes in either format desired.

Declaring This Certificate

Any undergraduate admitted to CU Denver in a degree-seeking or non-degree seeking program may pursue this certificate.

To declare this certificate, students must meet with the Political Science Department advising faculty.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete 12 credit hours from the approved courses.
2. Students must complete 6 credit hours of upper division (3000 or 4000 level) level courses.
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All courses in this certificate must be taken in residency at CU Denver.

Required Courses

Code	Title	Hours
<i>Complete four of the following courses-substitutions may be approved by 12 the program advisor:</i>		
PSCI 4326	Advanced International Political Economy: Globalization	3
PSCI 4535	Labor and Working Class Politics	3
PSCI 4914	Community Organizing and Community Development	3
PSCI 5424	The Social Economy and Sustainable Development	3
PSCI 5434	The Cooperative Movement: Politics and Policy	3
PSCI 5548	Labor Law and Collective Bargaining	3
PSCI 5550	Labor, Trade Unions and the Global Economy	3

To learn more about the Student Learning Outcomes for this program, please visit our website.

Middle Eastern Politics Undergraduate Certificate

Introduction

Please click [here](#) (p. 602) to see Political Science department information.

The Middle East features often in statements made by politicians, and stories from the region are a constant staple of the media. However, the region is still considered by many to be a "mystery." This perception is in part a result of the misrepresentation of the region and its peoples, in addition to the incessant regional political developments, especially during the current decade. The purpose of this certificate is to provide students with a deeper understanding of the politics of the region that goes beyond stereotypes disseminated by the media and manipulated by political and interest groups. It will introduce students to current research and practice concerning the complex interplay among the different peoples and the states of the Middle East, as well as the interaction between the region and the rest of the world. While the certificate will be issued and managed by the Political Science department, students can take courses from other departments and programs, for instance Geography, History, Modern Languages, Religious Studies and Women and Gender Studies. Graduate courses in the Political Science with a Middle East focus can also count toward the certificate. Such an interdisciplinary approach will expose students to a variety of perspectives on the study of the Middle East. It will also train students to investigate the interconnections among the different aspects of politics in the region.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- The certificate is earned through our traditional on-campus courses.

Declaring This Certificate

- Any undergraduate admitted to CU Denver in a degree-seeking or non-degree seeking program may pursue this certificate.
- To declare this certificate, students must meet with the Political Science Department advising faculty.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click [here](#) (p. 93) for information about Academic Policies.

Program Requirements

- Students must complete a minimum of 15 credit hours from the approved courses.
- Students must complete all courses at the upper-division level (3000 or 4000 level). With the exception ARAB 2120 Intermediate Arabic II.

- Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail. All of the credit hours for this certificate must be earned at the CU Denver.

- All of the credit hours for this certificate must be earned at the CU Denver.

Program Restrictions, Allowances and Recommendations

- Only one course can be an independent study, which must be approved by Political Science Department as the certificate advisor.
- Students must complete at least three Political Science courses in the certificate.

Required Course

Code	Title	Hours
<i>Complete one introductory course:</i>		3
PSCI 4002	Topics in Political Science (any PSCI section with Middle East as part of the subtitle)	3
PSCI 4736	The Middle East in World Affairs	3
HIST 4461	The Modern Middle East	3

Electives

Code	Title	Hours

Public, Non-Profit and Community Leadership Undergraduate Certificate Introduction

Please click here (p. 602) to see Political Science department information.

The CU Denver Political Science Department's Public, Non-Profit and Community Leadership Certificate engages students in a focused curriculum in local public leadership, and in the community organizing and development field, including field placements in internships with local community partners. The certificate is tailored to meet the needs of individuals in public and non-profit positions that require development of their leadership competencies and for individuals in informal community leadership positions who want to build their knowledge, skills, and effectiveness.

The program curriculum is anchored around the study and practice of local civic engagement, especially in traditionally marginalized communities. Students will be connected to meaningful work and networking opportunities in local government or in community settings, through community-based coursework, professional internships and service-learning opportunities. The certificate program provides critical education and effective skills-based training for students seeking careers in local government, in non-profit organizations, or in community organizing and development work. Students will be prepared to become change agents in their communities, while developing possible career paths in community-based advocacy/service organizations, public agencies, or international development work.

The certificate is open to non-degree seeking students (with or without an undergraduate degree) as well as students formally pursuing an undergraduate degree at CU Denver. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Bachelor's Degree in Political Science.

The certificate can be earned either through our traditional on-campus courses, or entirely through classes offered in a weekend intensive format in our New Directions program. Students may take classes in either format desired.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Admissions and Declaring This Certificate

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of

the New Directions program or with the Departmental Undergraduate Advisor, in order to register their intent to pursue the Public, Non-Profit and Community Leadership Certificate and to develop a curriculum plan.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies

Certificate Requirements

1. Students must complete 15 credits in PSCI approved coursework.
2. Students must complete a minimum of 6 upper division (3000 level and higher) credit hours from approved coursework.
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. All credits must be taken in residence at CU Denver. No transfer credits may apply.

Required Courses

Code	Title	Hours
<i>Take the following</i>		3
PSCI 4914	Community Organizing and Community Development	3

Field Placement

Code	Title	Hours
<i>Take one of the following</i>		3
PSCI 3914	The Urban Citizen	3
PSCI 3939	Internship	3
PSCI 4934	CU at the Capitol	3
PSCI 4944	CU in the City	3

Public and Community Leadership Elective Courses

Code	Title	Hours
<i>Take 9 credits of the following</i>		9
PSCI 3035	Political Movements: Race and Gender	3
PSCI 3064	Power and Empowerment in the United States	3
PSCI 4002	Topics in Political Science ¹	3
PSCI 4025	Local Governance and Globalization	3
PSCI 4074	Urban Politics	3
PSCI 4075	Gentrification and Social Equity	3
PSCI 4084	Local Government and Administration	3
PSCI 4124	Denver Politics	3
PSCI 4206	Social Movements, Democracy and Global Politics	3
PSCI 4207	Theories of Social and Political Change	3
PSCI 4248	Gender, Globalization and Development	3
PSCI 4265	Social Justice And Globalization	3

PSCI 4274	Conflict Resolution and Public Consent Building	3
PSCI 4414	Non-Profits and Social Change	3
PSCI 4535	Labor and Working Class Politics	3
PSCI 4555	International Women's Resistance	3
PSCI 4840	Independent Study: PSCI ¹	1-3
PSCI 5424	The Social Economy and Sustainable Development	3
PSCI 5434	The Cooperative Movement: Politics and Policy	3
PSCI 5548	Labor Law and Collective Bargaining	3

¹ PSCI 4002 Topics in Political Science and PSCI 4840 Independent Study: PSCI, can only be applied with advisor approval.

Psychology

Chair: Peter S. Kaplan

Program Assistant: Kimberly Hill

BA and Psychology Minor Undergraduate Advisor: Mitchell Handelsman

BS and Behavioral and Cognitive Neuroscience Minor Undergraduate Advisor: David Albeck

Director of Undergraduate Studies: David Albeck

Office: North Classroom, 5002

Telephone: 303-315-7050

Fax: 303-315-7072

Overview

Psychology is the scientific study of behavior, consisting largely of the following major areas of study: experimental psychology, biopsychology, animal behavior, clinical psychology, developmental psychology, social psychology, cognitive psychology, personality, industrial/organizational psychology and abnormal psychology. The requirements for the major are designed to introduce the student to the spectrum of Psychology, including an early exposure to research methods and statistics.

The Psychology major prepares students for employment and for graduate study in Psychology and related fields. The Psychology department also offers a PhD in Clinical Health Psychology.

Honors

There are two ways in which a student graduating with a Bachelor of Arts or Bachelor of Science degree in Psychology can graduate with honors. First, the College of Liberal Arts and Sciences (CLAS) awards the honor of graduating "with distinction" primarily based on the student having a high overall grade point average.

The second form of honors, "Latin honors," is awarded by individual departments within CLAS, including psychology. The CU Denver Department of Psychology has approved a very rigorous set of requirements for Latin honors, also based on overall GPA. Level of Latin Honors will be awarded to both Bachelor of Arts and the Bachelor of Science graduates according to the following criteria:

- **Summa Cum Laude:** 3.9 - 4.0
- **Magna Cum Laude:** 3.75 - 3.89

- **Cum Laude:** 3.6 - 3.74

Students who wish to participate in Psychology research, please see the Gardner Psychology Research Scholar opportunity for the Bachelor of Arts (p. 640) or the Bachelor of Science (p. 639).

Curriculum Goals and Essential Learning Outcomes

Goal 1: Knowledge Base of Psychology

Students will recognize, explain, and distinguish the major concepts, theoretical perspectives, empirical findings, and historical trends in Psychology.

Essential Learning Outcome: The development of Knowledge of Human Cultures and the Physical and Natural World

Goal 2: Research Methods in Psychology

Students will demonstrate the statistical, organizational, writing, and analytical skills necessary to interpret and conduct meaningful and valid research in Psychology.

Essential Learning Outcomes: The development of Intellectual and Practical Skills, including Quantitative Literacy, Information Literacy, and Inquiry and Analysis skills.

Goal 3: Critical Thinking Skills

Students will use skeptical inquiry and scientific thinking skills to interpret and solve problems related to behavior and mental processes.

Essential Learning Outcomes: The development of Intellectual and Practical Skills, including Critical Thinking skills.

Goal 4: Application of Psychology

Students will apply psychological principles to solve personal, social, and/or organizational problems.

Essential Learning Outcomes: The development of Intellectual and Practical Skills, including Problem Solving skills.

Goal 5: Values in Psychology

Students will evaluate evidence, tolerate ambiguity, act ethically, recognize and respect diversity, and/or reflect other values that are the underpinnings of Psychology as a discipline.

Essential Learning Outcome: The development of Personal and Social Responsibility, including Ethical Reasoning and Intercultural Knowledge and Competence.

Graduate Information

Please go to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/psychology/>) catalog to read about our graduate programs.

Programs Offered

- Psychology, BA (p. 633)
- Psychology, BS (p. 635)
- Behavioral Cognitive Neuroscience Minor (p. 636)
- Psychology Minor (p. 637)
- Psychology, BS, Gardner Psych Research Scholar (p. 639)
- Psychology, BA, Gardner Psych Research Scholar (p. 640)

Faculty

Professors:

Elizabeth Sandlin Allen, PhD, University of North Carolina at Chapel Hill
Richard Allen, PhD, University of North Carolina at Chapel Hill
James Grigsby, PhD, University of Colorado, Boulder
Mitchell M. Handelsman, PhD, University of Kansas
Peter S. Kaplan, PhD, Indiana University
Kevin S. Masters, PhD, Brigham Young University

Associate Professors:

David Albeck, PhD, University of Colorado, Boulder
Sondra Bland, PhD, University of Texas
Kristin Kilbourn, PhD, University of Miami
Erik Oleson, PhD, Wake Forest University
Krista W. Ranby, PhD, Arizona State University
Amy Wachholtz, PhD, Bowling Green University
Jason Watson, PhD, Washington University
Michael Zinser, PhD, University of Wisconsin, Madison

Assistant Professors:

Benjamin Greenwood, PhD, University of Colorado, Boulder
Carly Leonard, PhD, Johns Hopkins University
Jonathan Schaffer, PhD, St. John's University

Associate Professor, Clinical Teaching Track:

Joan Bihun, PhD, Wayne State University
Edward Dill, PhD, University of Kansas
Kevin Everhart, PhD, University of South Carolina
Lindsey Hamilton, PhD, Wake Forest University
Vivian Shyu, PhD, University of Denver

Senior Instructors:

Athena Baca-Chieza, PsyD, Chicago School of Professional Psychology
Bethann Bierer, PhD, University of Denver

Emeritus Professors:

Rick M. Gardner, PhD, University of Nevada
Barbara Walker, PhD, The Ohio State University

Psychology (PSYC)

PSYC 1000 - Introduction to Psychology I (3 Credits)
 Introduces the scientific study of behavior, including an overview of the biological basis of behavior, sensation or perception, states of consciousness, learning and memory, thinking and language, intelligence, motivation and emotion. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3
 Grading Basis: Letter Grade
 Additional Information: Denver Core Requirement, Behavioral Sciences; GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul.

PSYC 1005 - Introduction to Psychology II (3 Credits)
 Introduces the scientific study of behavior, including an overview of the history of psychology, development, personality, psychological disorders, therapy, health psychology and social behavior. PSYC 1000 is not a prerequisite for this course. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3
 Grading Basis: Letter Grade
 Additional Information: Denver Core Requirement, Behavioral Sciences; GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul.

PSYC 1111 - First Year Seminar (3 Credits)
 Restriction: Restricted to Freshman level students. Term offered: fall. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to Freshman level students

PSYC 2050 - Improving Memory (2 Credits)
 Applies psychological principles of memory function and process to everyday settings and experiences. Covers topics such as how memory works, principles of memory improvement, and strategies for effective learning. Max hours: 2 Credits.
 Grading Basis: Letter Grade

PSYC 2060 - Psychology Applied to Everyday Life (3 Credits)
 A primer in psychological principles applied to everyday situations. Covers topics such as learning, stress and health, attraction and love, and personality. Max hours: 3 Credits.
 Grading Basis: Letter Grade

PSYC 2090 - Statistics and Research Methods (4 Credits)
 Introduces statistics and research methods in the field of psychology. Note: Intended for those who plan to major in psychology. Completion of college algebra or equivalent is recommended. Prereq: PSYC 1000 with a C- or higher. Term offered: fall, spring, summer. Max hours: 4 Credits.
 Grading Basis: Letter Grade
 Prereq: PSYC 1000 with a C- or higher

PSYC 2205 - Lifespan Developmental Psychology for Health Majors (3 Credits)
 This course will examine the normative physical, cognitive and socio-emotional changes and milestones that occur through the human lifespan highlighting health-related issues at each stage. Prereq: PSYC 1000 or PSYC 1005 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Prereq: PSYC 1000 or 1005 with a C- or higher

PSYC 2220 - Biological Basis of Behavior (3 Credits)
 Introduces the biological basis of behavior. This course will feature concepts like neurons, synaptic and hormonal transmission, and physiological set-points. Behavior of simple (invertebrate) and complex organisms (vertebrates) will be related to the activity of specific brain neural networks. Prereq: PSYC 1000 or BIOL 2051 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC2
 Grading Basis: Letter Grade
 Prereq: PSYC 1000 or BIOL 2051 with a C- or higher
 Additional Information: Denver Core Requirement, Biol Phys Sci - No Lab; GT courses GT Pathways, GT-SC2, Nat Phy Sci:Lec w/o Req Lab.

PSYC 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have completed 15 hours of PSYC courses with a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: 15 hours of PSYC courses with a 2.75 GPA in PSYC courses

PSYC 2990 - Topics in Psychology (1-3 Credits)

Studies special topics to be selected by the instructor. Note: May be repeated for credit. Repeatable. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

PSYC 3050 - Decision Making (3 Credits)

This course discusses current research on decision making/behavioral economics, as well as its application to individual well-being and public policy. You will gain insights on how and why people can be irrational in their daily decisions. Max hours: 3 Credits. Cross-listed with PBHL 3050 and ECON 3050.

Grading Basis: Letter Grade

PSYC 3090 - Research Methods in Psychology (3 Credits)

Covers principles of experimental methodology in Psychology. Includes active participation in data collection and interpretation, presentation of results, evaluation of scientific literature, scientific writing and advanced statistical concepts as they relate to the field of Psychology. Prereq: PSYC 1000, 1005 and 2090 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000, PSYC 1005, and PSYC 2090 with a C- or higher

PSYC 3144 - Human Cognition (3 Credits)

Studies information processing in humans, with emphasis on memory, thinking and language. Prereq: PSYC 1000 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 with a C- or higher

PSYC 3145 - Industrial and Organizational Psychology (3 Credits)

Surveys the fields of industrial and organizational psychology. These fields apply psychological principles to improving productivity and satisfaction in the workplace. Topics include motivation, leadership, group processes, team functioning, occupational health, selection and training of employees, and performance management. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3205 - Human Development I: Child Psychology (3 Credits)

Studies human development covering birth, infancy, toddler, preschool and school-aged child. Covers biological, cognitive and social processes. Prereq: PSYC 1000 and PSYC 1005 or PSYC 3215 with a grade of C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 1005 or PSYC 3215 with a grade of C- or higher.

PSYC 3215 - Human Development II: Adolescence and Adulthood (3 Credits)

Study of human development from adolescence through adulthood and aging. Covers biological, cognitive, and social processes. Prereq: PSYC 1000 and PSYC 1005 or PSYC 3205. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 1005 or PSYC 3205 with a grade of C- or higher.

PSYC 3222 - Principles of Learning and Behavior (3 Credits)

Introduces the scientific study of learning and behavior, focusing on "Behaviorism." Principles of operant and classical conditioning are discussed. A particular emphasis is placed on the relevance and application of these principles to understanding human behavior and psychopathology. Prereq: PSYC 1000 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 with a C- or higher

PSYC 3235 - Human Sexuality (3 Credits)

Examines the physiological, psychological, and social psychological bases of human sexuality. Research on the range of sexual behaviors, individual sexual response, sexual development, sexual dysfunction, and variants of sexual orientation. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3254 - Introduction to Animal Behavior (3 Credits)

Surveys the behavior of nonhuman animals, emphasizing the evolution through natural selection. One semester of general biology, biological anthropology, or other course emphasizing evolutionary perspective is strongly recommended as preparation for optimal student success. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSYC 3262 - Health Psychology (3 Credits)

An overview of the scientific study of attitudes, behaviors, and personality variables related to health and illness. Emphasis is on the interaction of biological, psychological, and social factors that cause illness and influence its treatment and prevention. Prereq: PSYC 1000 and 2220 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3263 - Hormones and Behavior (3 Credits)

The hormonal regulation of behavior will be the primary focus of this course. Topics include: hormonal basis of sexual differentiation and behavioral differences, parental behavior, biological rhythms, aggression, mood and stress. Prereq: PSYC 1000 and 2220 with a C- or higher. Cross-listed with PSYC 5263. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3264 - Exercise, Brain and Behavior (3 Credits)

This course explores the impact of physical activity status-being sedentary or physically active-on brain function and behavior. Topics include effects of exercise on cognitive function, mood disorders, stress, anxiety, sleep and drug addiction. Emphasis will be placed on understanding the neurobiological mechanisms by which exercise impacts behavior. Students who have received credit for this topic listed under PSYC 3600 may not receive credit for this course. Prereq: PSYC 1000 and PSYC 2220 with a C- or higher. Term offered: fall. Cross-listed with PSYC 5264. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3265 - Drugs, Brain and Behavior (3 Credits)

Explores the pharmacological, biological, and behavioral basis of drug effects. Topics include mechanisms of drug action, brain reward pathways, role of environment and history on drug effects, and the impact of science on drug abuse and medication development. Prereq: PSYC 1000 and 2220 with a C- or higher. Cross-listed with PSYC 5265. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3305 - Abnormal Psychology (3 Credits)

This course applies a scientific approach to the examination of the symptoms, etiologies, and treatments of mental illnesses, including disorders of mood, anxiety, stress, addictions and those seen in childhood and older age. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3385 - Psychology of Mindfulness (3 Credits)

This course will explore significant psychological, neurological, historical, societal and cultural aspects of mindfulness. It will integrate this current knowledge with more traditional aspects of the concept through classroom activities, guest lecturers, projects and field trips. Prereq: PSYC 1000 or 1005 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 or 1005 with a C- or higher

PSYC 3405 - Family Psychology (3 Credits)

Overview of theory and research pertaining to marital and family structure, functioning and dynamics. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3415 - Experimental Social Psychology (3 Credits)

Surveys the field of Social Psychology, the study of the way in which cognitions, emotions, and behaviors are influenced by the presence, or perceived presence, of others. Heavily focuses on experimentation and experimental methods within the field of Social Psychology. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3460 - Military Clinical Psychology (3 Credits)

This course focuses on clinical psychological issues facing service members, veterans, and military families. Topics include contemporary military culture, challenges of the military lifestyle/deployment/reintegration, specific types of military trauma, psychological issues of PTSD, TBI, depression, substance abuse, and suicidality, and psychological interventions for these issues. Prerequisite: PSYC 1005 with a C- or higher. Students will not earn credit for this course if they have already earned credit for PSYC 3600 with a similar topic title. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSYC 1005 with a C- or higher.

PSYC 3505 - Psychology and the Law (3 Credits)

Examines the legal and extralegal applications of psychology, such as assessment of insanity and competence, psychologists as expert witnesses, accuracy of eyewitness accounts, and issues relating to employment discrimination. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3600 - Topics in Psychology (1-3 Credits)

Studies special topics to be selected by the instructor. Note: May be repeated for credit. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

PSYC 3611 - Psychology of Women (3 Credits)

Reviews psychological theories and research of women's social, cultural, emotional and behavioral experience. Examines the sociocultural context of women's experience and explores women's socialization, developmental issues, cognitive abilities and achievement motivation, personality variables, stereotypes, psychological disorders, victimization, intimacy and sexuality. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3612 - Domestic Abuse (3 Credits)

Examines the nature and extent of domestic violence. Personal characteristics and dynamics that contribute to spouse abuse are reviewed. Theories and research in the general field of family violence, victims' and perpetrators' treatment, and child abuse are discussed. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3615 - Positive Psychology (3 Credits)

This course provides an introduction to the science of positive traits, subjective experiences and institutions. It focuses on the empirical study of the factors that enable humans to flourish, develop resilience, mature and master life's challenges. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 3724 - Developmental Psychobiology (3 Credits)

Explores the biological influences on the development of brain and behavior. Emphasis is on the evolution and development, the role of experience in prenatal and postnatal development, the ontogeny of sensory systems, learning and memory, and the biological bases of language acquisition. Prereq: PSYC 1000/1005 or BIOL 2051/2061 with a C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 or 1005 or BIOL 2051 or BIOL 2061 with a C- or higher

PSYC 3810 - Neuropsychology (3 Credits)

Brain organization and function and its relationship to human memory, language, perception, and other cognitive abilities. Covers the application of clinical neuropsychology to working with individuals that have neurological disorders. Prereq: PSYC 1000 and 2220 with a C- or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3822 - Aging, Brain and Behavior (3 Credits)

Examines the aging process, behavioral changes during senescence and the accompanying changes in the aged brain. Changes that are part of healthy aging are studied, as will age-related brain disorders. Prereq: PSYC 1000 and 2220 with a C- or higher. Cross-listed with PSYC 5822. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3832 - Neural Basis of Learning (3 Credits)

Survey of advances in neuroscience that further the understanding of how neurons within our brains are modified by experience and thus influence subsequent behavior. Includes discussions of how these mechanisms contribute to various psychopathologies. Prereq: PSYC 1000 and 2220 with a C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have Junior standing, have completed at least 12 hours in PSYC courses with a 2.0 GPA in PSYC courses and must work with Experiential Learning Center advising to complete a course contract and gain approval to enroll. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing and 12 hours of PSYC courses with a 2.0 GPA in PSYC courses

PSYC 4054 - Behavioral Neuroscience (3 Credits)

The morphological, neurochemical and physiological bases of behavior. Emphasis is on structure and function of the brain. Prereq: PSYC 1000/ PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000/PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher

PSYC 4090 - Research Design and Development (3 Credits)

This advanced writing and research methods course is designed to help students develop independent research ideas into formal products, such as a thesis proposal, grant application, presentation, and study protocols. Prereq: PSYC 3090 and instructor permission. Cross-listed with MARC 4090. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSYC 4101 - Applied Statistics Using SAS and SPSS I (3 Credits)

Teaches the practical statistical tools social scientists use to analyze real-world problems. It is split into four modules, each taught by a different instructor. The first module introduces SAS and SPSS; modules 2-4 are problem-based and cover topics such as ANOVA, multivariate regression, and cluster analysis. Students are recommended to have taken and completed at least one statistics course, at any level, as preparation for optimal success. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSYC 4102 - Applied Statistics Using SAS and SPSS II (3 Credits)

Students use the skills they learned in the previous semester to analyze a social issue of their choosing and present their findings. Note: A continuation of PSYC 4101. In addition to lectures, weekly one-on-one meetings between faculty and students are required. Prereq: PSYC 4101 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 4101 with a C- or higher

PSYC 4111 - Senior Seminar in Psychology: Career Capstone (3 Credits)

This course provides a focused integration of the skills and knowledge gained through the psychology major curriculum. As a capstone course, it will prepare students to apply what they have learned to their professional careers. Prereq: PSYC 3090 with a grade of C- or higher. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: PSYC 3090 with a grade of C- or higher.

PSYC 4164 - Psychology of Perception (3 Credits)

Studies sensory processes and perceptual variables. Covers processes related to vision, audition, gustation and olfaction. Prereq: PSYC 1000 and 2220 with a C- or higher. Cross-listed with PSYC 5164. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and PSYC 2220 with a C- or higher.

PSYC 4455 - Theories of Personality (3 Credits)

An in-depth look at several major theories of personality, including those from psychodynamic, behavioral, and humanistic schools of thought. Students are required to think actively and abstractly, and communicate their ideas in papers and classroom contributions. Prereq: PSYC 1000 and 1005 with a C- or higher. Term offered: fall, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000 and 1005 with a C- or higher

PSYC 4485 - Psychology of Cultural Diversity (3 Credits)

Studies diversity in the development of the individual across Asian, Black, Hispanic, and Native American cultures. The experience of self, role of the family, expression of emotions, and psychology of prejudice are emphasized. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

PSYC 4500 - Psychotherapy (3 Credits)

Overview of the major systems of psychotherapy, including psychoanalysis, person-centered therapy, family therapy, cognitive or behavioral approaches, and relationships among the various approaches. Prereq: PSYC 1000/PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000/PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher

PSYC 4511 - History of Psychology (3 Credits)

Development of psychological theories since 500 B.C. Schools of psychology and their adherents. Readings of primary and secondary sources. Prereq: PSYC 1000/PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000/PSCH 1001, 1005, 2090, 2220, 3090 and (6 credits hours or 2 courses from PSYC 3050-4990) with a C- or higher

PSYC 4680 - Behavioral & Biomedical Sciences Research Seminar (1-2 Credits)

Introduces research in the behavioral and biomedical sciences. Students will learn about research programs at CU Denver and other centers, present their own research, and interact with the local scientific community. Prereq: permission of the instructor. Cross-listed with MARC 4680. Term offered: fall, spring. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.

PSYC 4681 - Behavioral & Biomedical Sciences Research Seminar II (1-2 Credits)

Continuation of research in the behavioral and biomedical sciences. Students will learn about research programs at CU Denver and other centers, present their own research, and interact with the local scientific community. Prereq: PSYC/MARC 4680 and permission of the instructor. Cross-listed with MARC 4681. Repeatable. Max hours: 2 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 2.

Prereq: PSYC 4680 or MARC 4680 and instructor permission.

PSYC 4730 - Clinical Psychology: Ethics and Issues (3 Credits)

An in-depth exploration of the values and ideas that guide professional practice in psychology, including professional codes of conduct and philosophical ethical principles. Topics include confidentiality, informed consent, competence, integrity and respect. Prereq: 1000, 1005, 2090, 2220 and 3090 with a C- or higher. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000, 1005, 2090, 2220 and 3090 with a C- or higher

PSYC 4780 - Behavioral & Biomedical Sciences Research: Ethics & Issues (3 Credits)

Students will critically review and analyze some of the major ethical and policy issues that arise during the conduct of basic and applied behavioral research. Prereq: PSYC 1000, 1005, 2090, 2220 and 3090 with a C- or higher or instructor permission. Term offered: fall. Cross-listed with MARC 5780. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: PSYC 1000, 1005, 2090, 2220 and 3090 with a C- or higher

PSYC 4803 - Principles of Psychological Testing (3 Credits)

Principles underlying construction, validation, and use of tests of ability, intelligence, and personality and of attitude surveys. Covers statistical topics such as content and construct validity, item analysis, and reliability analysis. Students are recommended to have taken and completed at least one statistics course, at any level, as preparation for optimal success. Cross-listed with PSYC 5803. Max hours: 3 Credits.

Grading Basis: Letter Grade

PSYC 4840 - Independent Study: PSYC (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: Permission of instructor. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

PSYC 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

PSYC 4939 - Internship (1-3 Credits)

Prereq: Students must have Junior standing, have completed at least 12 hours in PSYC courses with a 2.0 GPA in PSYC courses and must work with Experiential Learning Center advising to complete a course contract and gain approval to enroll. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing and 12 hours of PSYC courses with a 2.0 GPA in PSYC courses

PSYC 4990 - Topics in Psychology (1-3 Credits)

Advanced study of special topics to be selected by the instructor. May be repeated for credit. Prereq: Permission of instructor. Cross-listed with PSYC 5990. Repeatable. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Psychology, BA

Introduction

Please click [here](#) (p. 628) to see Psychology department information.

The College of Liberal Arts and Sciences also offers a Psychology BS (p. 635) degree.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus and online program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 37 PSYC credit hours.
2. Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. PSYC 3939 Internship does **not** count toward the 37- hour minimum or the 16-hour upper-division requirement, but it does count as elective psychology credit.
2. PSYC 3600 Topics in Psychology: See your advisor to determine if they count as Group A or Group B courses.
3. Many courses have prerequisites. Refer to the course descriptions for prerequisite information.
4. Students may not apply more than 56 PSYC credit hours to their degree.

Psychology Major Course Requirements Required Courses

Code	Title	Hours
<i>Take all of the following</i>		19
PSYC 1000	Introduction to Psychology I	3
PSYC 1005	Introduction to Psychology II	3
PSYC 2090	Statistics and Research Methods	4

PSYC 2220	Biological Basis of Behavior	3
PSYC 3090	Research Methods in Psychology	3
PSYC 4511	History of Psychology	3

Upper Division Level PSYC Electives

Group A

Code	Title	Hours
Group A		6
<i>Take one of the following</i>		3
PSYC 3144	Human Cognition	3
PSYC 3222	Principles of Learning and Behavior	3
<i>Take one of the following, not already taken from the list above</i>		3
PSYC 3144	Human Cognition	3
PSYC 3222	Principles of Learning and Behavior	3
PSYC 3254	Introduction to Animal Behavior	3
PSYC 3262	Health Psychology	3
PSYC 3263	Hormones and Behavior	3
PSYC 3264	Exercise, Brain and Behavior	3
PSYC 3265	Drugs, Brain and Behavior	3
PSYC 3385	Psychology of Mindfulness	3
PSYC 3724	Developmental Psychobiology	3
PSYC 3810	Neuropsychology	3
PSYC 3822	Aging, Brain and Behavior	3
PSYC 3832	Neural Basis of Learning	3
PSYC 4054	Behavioral Neuroscience	3
PSYC 4164	Psychology of Perception	3

Group B

Code	Title	Hours
Group B		9
<i>Take two of the following</i>		6
PSYC 3205	Human Development I: Child Psychology	3
PSYC 3305	Abnormal Psychology	3
PSYC 3415	Experimental Social Psychology	3
<i>Take one of the following, not already taken from the list above</i>		3
PSYC 3145	Industrial and Organizational Psychology	3
PSYC 3205	Human Development I: Child Psychology	3
PSYC 3215	Human Development II: Adolescence and Adulthood	3
PSYC 3235	Human Sexuality	3
PSYC 3305	Abnormal Psychology	3
PSYC 3405	Family Psychology	3
PSYC 3415	Experimental Social Psychology	3
PSYC 3505	Psychology and the Law	3
PSYC 3611	Psychology of Women	3
PSYC 3612	Domestic Abuse	3
PSYC 3615	Positive Psychology	3
PSYC 4455	Theories of Personality	3
PSYC 4485	Psychology of Cultural Diversity	3
PSYC 4500	Psychotherapy	3
PSYC 4730	Clinical Psychology: Ethics and Issues	3

Additional PSYC Elective

Code	Title	Hours
<i>Take one additional course from either Group A or Group B not already taken to fulfill that group requirement.</i>		3

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/psychology/learning-goals/>).

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/clas/>).

Psychology, BS Introduction

Please click here (p. 628) to see Psychology department information.

The College of Liberal Arts and Sciences also offers a Psychology BA (p. 633) degree.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 54 credit hours, including a minimum of 31 PSYC credit hours and a minimum of 23 credit hours in ancillary course work.
- Students must complete a minimum of 16 upper division (3000-level and above) credit hours in the major.
- Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are

calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

- Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

- An experiential learning component is required and must be approved by the Bachelor of Science academic advisor. To fulfill the experiential learning requirement, some options have a minimum overall GPA of 2.5 or higher. Fulfilling this requirement with a project outside of the Psychology Department requires prior approval by the Bachelor of Science academic advisor. Independent study or internship credit hours taken outside of the Psychology Department will not count as Psychology credit hours. PSYC 4111 Senior Seminar in Psychology: Career Capstone can fulfill this requirement, and student does not need 2.5 GPA
- A maximum of 56 semester hours of PSYC coursework will count toward graduation.
- Successful (final grade of B or better) completion of PSYC 4680 Behavioral & Biomedical Sciences Research Seminar, PSYC 4681 Behavioral & Biomedical Sciences Research Seminar II and PSYC 4780 Behavioral & Biomedical Sciences Research: Ethics & Issues fulfills the experiential learning requirement for the Bachelor of Science in Psychology dept core graduation requirement. It is required for students to have instructor permission to enroll in both PSYC 4680 Behavioral & Biomedical Sciences Research Seminar and PSYC 4681 Behavioral & Biomedical Sciences Research Seminar II

Psychology Major Course Requirements Required Courses

Code	Title	Hours
<i>Take all of the following</i>		19
PSYC 1000	Introduction to Psychology I	3
PSYC 1005	Introduction to Psychology II	3
PSYC 2090	Statistics and Research Methods	4
PSYC 2220	Biological Basis of Behavior	3
PSYC 3090	Research Methods in Psychology	3
PSYC 4054	Behavioral Neuroscience	3

Upper Division Level PSYC Electives Group A

Code	Title	Hours
<i>Take two of the following group A courses</i>		6
PSYC 3222	Principles of Learning and Behavior	3
PSYC 3254	Introduction to Animal Behavior	3
PSYC 3262	Health Psychology	3
PSYC 3263	Hormones and Behavior	3
PSYC 3264	Exercise, Brain and Behavior	3
PSYC 3265	Drugs, Brain and Behavior	3
PSYC 3724	Developmental Psychobiology	3

Behavioral Cognitive Neuroscience Minor

Introduction

Please click here (p. 628) to see Psychology department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 PSYC credit hours.
2. Students must complete a minimum of 9 upper-division (3000-level and above) credit hours in the minor.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 PSYC credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. If a student is a Psychology major (either a Bachelor of Arts or Bachelor of Science), their PSYC 1000 Introduction to Psychology I and PSYC 2220 Biological Basis of Behavior courses do not count toward this minor. Psychology majors must instead take 2 substitute courses from the list of eligible courses for this minor to replace 1000 and 2220. Additionally, if a student is a Bachelor of Science Psychology major, the PSYC 4054 Behavioral Neuroscience course does not count toward this minor, nor do the two upper division Psychology elective courses they are using to fulfill their Psychology Department major requirements. As a substitution, for these courses Psychology (B.S.) majors must take an additional 3 courses from either the Cognitive Neuroscience and/or Behavioral Neuroscience category lists.
2. To fulfill this minor a non-Psychology major must successfully complete a total of 5 courses, including PSYC 1000 Introduction to Psychology I, PSYC 2220 Biological Basis of Behavior and 3 of the upper division courses from the 2 lists, with at least one course from each of the lists. Psychology majors must complete a total of 5 courses from the two lists with a minimum of 1 from each category. None of the 5 courses used toward the minor can also be used toward their Psychology major requirements.
3. Students can take both PSYC 4054 Behavioral Neuroscience and BIOL 4165 Neurobiology, but only one can count toward this minor.
4. Students must complete 9 upper-division (3000-level and above) credit hours with CU Denver faculty.

Required Courses

Code	Title	Hours
<i>Take all of the following courses</i>		6
PSYC 1000	Introduction to Psychology I	3
PSYC 2220	Biological Basis of Behavior	3

Cognitive Neuroscience

Code	Title	Hours
<i>Take one of the following</i>		3
PSYC 3144	Human Cognition	3
PSYC 3205	Human Development I: Child Psychology	3
PSYC 3222	Principles of Learning and Behavior	3
PSYC 3305	Abnormal Psychology	3
PSYC 3810	Neuropsychology	3

Behavioral Neuroscience

Code	Title	Hours
<i>Take one of the following</i>		3
PSYC 3254	Introduction to Animal Behavior	3
PSYC 3262	Health Psychology	3
PSYC 3263	Hormones and Behavior	3
PSYC 3264	Exercise, Brain and Behavior	3
PSYC 3265	Drugs, Brain and Behavior	3
PSYC 3724	Developmental Psychobiology	3
PSYC 3822	Aging, Brain and Behavior	3
PSYC 3832	Neural Basis of Learning	3
PSYC 4054	Behavioral Neuroscience	3
PSYC 4164	Psychology of Perception	3
BIOL 4165	Neurobiology	3

Cognitive or Behavioral Neuroscience Elective

Code	Title	Hours
<i>Take one additional course from either the Cognitive Neuroscience list or Behavioral Neuroscience list above.</i>		3

To learn more about the Student Learning Outcomes for this program, please visit our website (<https://clas.ucdenver.edu/psychology/learning-goals/>).

Psychology Minor

Introduction

Please click here (p. 628) to see Psychology department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their minor advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus and online program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 PSYC credit hours.
2. Students must complete a minimum of 6 upper-division (3000-level and above) PSYC credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor course requirements as pass/fail.
4. Students must complete a minimum of 9 PSYC credit hours with CU Denver faculty, at least 6 of which must be upper division (3000-level and above).

Program Restrictions, Recommendations and Allowances

1. Because minors are optional, there are no substitutions allowed to these requirements.
2. Students cannot earn a Psychology minor if they are also seeking a Psychology degree.

Psychology, BS, Gardner Psych Research Scholar

Introduction

Please click here (p. 628) to see Psychology department information.

The College of Liberal Arts and Sciences also offers a Gardner Psychology Research Scholars BA (p. 640) degree.

The Gardner Psychology Research Scholars Program consists of a rigorous set of criteria centered around a research project working with a Psychology faculty mentor.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum of 57 credit hours, including a minimum of 28 PSYC credit hours and a minimum of 23 credit hours in ancillary course work.
- Students must complete a minimum of 16 upper division (3000-level and above) credit hours in the major.
- Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver. Students must earn a minimum grade of B (3.0) in the 3 Behavioral & Biomedical Sciences Research courses and must achieve a minimum cumulative major GPA of 2.5. All graded

attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.

- Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

- An experiential learning component is required and must be approved by the Bachelor of Science academic advisor. To fulfill the experiential learning requirement a student must have a minimum overall GPA of 2.5 or higher. Fulfilling this requirement with a project outside of the Psychology Department requires prior approval by the Bachelor of Science academic advisor. Independent study or internship credit hours taken outside of the Psychology Department will not count as Psychology credit hours.
- A maximum of 56 semester hours of PSYC coursework will count toward graduation.
- Successful (final grade of B or better) completion of PSYC 4680 Behavioral & Biomedical Sciences Research Seminar, PSYC 4681 Behavioral & Biomedical Sciences Research Seminar II and PSYC 4780 Behavioral & Biomedical Sciences Research: Ethics & Issues fulfills the experiential learning requirement for the Bachelor of Science in Psychology dept core graduation requirement. It is required for students to have instructor permission to enroll in both PSYC 4680 Behavioral & Biomedical Sciences Research Seminar and PSYC 4681 Behavioral & Biomedical Sciences Research Seminar II

Psychology Major Course Requirements Required Courses

Code	Title	Hours
<i>Take all of the following</i>		<i>19</i>
PSYC 1000	Introduction to Psychology I	3
PSYC 1005	Introduction to Psychology II	3
PSYC 2090	Statistics and Research Methods	4
PSYC 2220	Biological Basis of Behavior	3
PSYC 3090	Research Methods in Psychology	3
PSYC 4054	Behavioral Neuroscience	3

Upper Division Level PSYC Electives Group A

Code	Title	Hours
<i>Take two of the following group A courses</i>		<i>6</i>
PSYC 3222	Principles of Learning and Behavior	3
PSYC 3254	Introduction to Animal Behavior	3
PSYC 3262	Health Psychology	3
PSYC 3263	Hormones and Behavior	3

Behavioral & Biomedical Sciences Research Requirements

Code	Title	Hours
<i>Take the following</i> ¹		6
PSYC 4680	Behavioral & Biomedical Sciences Research Seminar ²	1
or MARC 4680	Behavioral & Biomedical Sciences Research Seminar	
PSYC 4681	Behavioral & Biomedical Sciences Research Seminar II ³	2
or MARC 4681	Behavioral & Biomedical Sciences Research Seminar II	
PSYC 4780	Behavioral & Biomedical Sciences Research: Ethics & Issues ²	3
or MARC 4780	Behavioral & Biomedical Sciences Research: Ethics & Issues	

¹ Students must earn a minimum grade of B or better in all of the following courses.

² Take in the Fall.

³ Take in the Spring.

* It is required for students to have instructor permission to enroll in both PSYC 4680 Behavioral & Biomedical Sciences Research Seminar and PSYC 4681 Behavioral & Biomedical Sciences Research Seminar II

Additional Research Requirements

• The faculty mentor will work with students to guide fulfillment of these co-curricular requirements

- begin this course of study with at least 2 semesters remaining at CU Denver before graduation
- find a CU Denver Psychology faculty member who will mentor this project
- devote a minimum of 180 hours of work on this research project, completed during two semesters or more
- write a scientific paper describing the research
- present the results in an oral format
- present the results in poster format

Psychology, BA, Gardner Psych Research Scholar

Introduction

Please click here (p. 628) to see Psychology department information.

The College of Liberal Arts and Sciences also offers a Gardner Psychology Research Scholars BS (p. 639) degree.

The Gardner Psychology Research Scholars Program consists of a rigorous set of criteria centered around a research project working with a Psychology faculty mentor.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 43 credit hours with a minimum of 37 PSYC credit hours.
2. Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver. Students must earn a minimum grade of B (3.0) in the 3 Behavioral & Biomedical Sciences Research courses and must achieve a minimum cumulative major GPA of 2.5. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 16 upper division (3000-level and above) PSYC credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. PSYC 3939 Internship does **not** count toward the 43 hour minimum or the 16-hour upper-division requirement, but it does count as elective psychology credit.
2. PSYC 3600 Topics in Psychology: See your advisor to determine if they count as Group A or Group B courses.
3. Many courses have prerequisites. Refer to the course descriptions for prerequisite information.
4. Students may not apply more than 56 PSYC credit hours to their degree.

Religious Studies

Director: Alison Shah

Email: alison.shah@ucdenver.edu

Overview

An undergraduate minor is offered in Religious Studies, a discipline that overlaps with many other fields of study: anthropology, literature, philosophy, psychology and others. Religion has played a vital role in history and continues to do so in contemporary life. The degree of interaction between a religious tradition and its host society is profound. Knowledge of its religion(s) is essential for a genuine understanding of each culture. Students will study the nature of the belief systems of the world's great religious traditions. Specific courses will offer the possibility of focusing one's studies in the areas of ancient myth and shamanic traditions, Judaic and Christian studies, Islam, Asian religions, psychology of religion, philosophy of religion, anthropology and sociology of religion, religion and literature and biblical studies.

Click here (p. 646) to learn about the requirements for the Minor in Religious Studies.

Programs Offered

- Religious Studies Minor (p. 646)

Faculty

Professors:

Robert Metcalf (Philosophy)

Associate Professors:

Colleen Donnelly (English)

Sarah Hagelin (English)

Rachel Harding (Ethnic Studies)

Assistant Professors:

Dale Stahl (History)

Katherine Mohrman (Ethnic Studies)

Instructors:

Kari Alexander (Sociology)

Bassem Hassan (Political Science)

Daryl Mehring (Philosophy)

Richard Smith (History)

Lecturers:

Mary DeForest (Modern Languages)

AnnMarie Bridges (Religious Studies)

Albert McClure (Religious Studies)

Stephanie Yuhás (Religious Studies)

Religious Studies (RLST)

RLST 1610 - Introduction to Religious Studies (3 Credits)

Religion is a complex phenomenon which involves social norms, beliefs and fears, and overarching world view. Religious experiences are among the most profound an individual can have. The course examines religious phenomena from various perspectives, including philosophical, historical, psychological, anthropological, political, sociological, the symbolic and ritual. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH3

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-AH3, Arts Hum: Ways of Thinking; Denver Core Requirement, Humanities.

RLST 2660 - World Religions (3 Credits)

Provides an introduction to the basic beliefs and concepts of the world's great religious traditions. Covers the history, development, belief patterns, and institutional forms of the world's religions, including Judaism, Zoroastrianism, Christianity, Islam, Hinduism, Buddhism, Confucianism, Taoism and Shintoism. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-AH3

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities; GT courses GT Pathways, GT-AH3, Arts Hum: Ways of Thinking.

RLST 2680 - The American Indian Experience (3 Credits)

Surveys the relationships between Indian and non-Indian peoples, particularly in the context of the unique interaction between tribes and the federal government. Cross-listed with ETST 2606. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 2700 - The Bible as Literature (3 Credits)

Introduces students to biblical literature. Selections from the various genres of writing in Hebrew (history, wisdom, prophecy, literature) are read and discussed, as well as representative sections from the New Testament, including the gospels and the writings of Paul. Cross-listed with ENGL 2520. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3000 - Judaism, Christianity and Islam: Affinity and Difference (3 Credits)

Judaism, Christianity and Islam have much in common, beginning with their common patriarch Abraham. But there are also elements in each that are unrecognizable from the perspectives of the other two. This course will trace the relationships among the Children of Abraham across history and in today's turbulent world. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3060 - History of Early Christianity (3 Credits)

History of the rise of Christianity and the decline of paganism in the Roman Empire from the birth of Jesus of Nazareth to ca. 500 C.E. Special emphasis on social, historical, legal, and cultural context of Christianity's rise and paganism's decline. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3100 - Islamic Politics and Culture (3 Credits)

Comprehensive, in-depth study of Islam and Muslims. Islam is viewed as a "way of life" with social, economic, psychological, spiritual, and political implications. Among topics to be examined are: women in Islam, Jihad, fundamentalism, Islamic movements, Islam and the West. Cross-listed with PSCI 4165. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3120 - Islamic Traditions (3 Credits)

Examines birth and history of Islam, its evolution from beginning to current trends and issues. Covers core beliefs, practices, differences between Sunni and Shi'a sects, and relationship to other Western religions. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

RLST 3300 - Shamanic Traditions (3 Credits)

Explores shamanic religious traditions across the world. This form of religion, involving spiritism, animism, trance states, and "mind power," is the oldest and most widespread religion in world history. Cross-listed with ETST 3300. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3410 - Asian Philosophies and Religions (3 Credits)

We in the Western world encounter a vastly different world, a radically different "universe of meaning," when we examine the traditions of the East. Even what we tacitly assume to be "real" is claimed by the Hindus and Buddhists of India to be a grand illusion. The world of China is, again, very different from India. An examination of Tibetan and Japanese religious forms will conclude our study of Asian thought. Cross-listed with PHIL 3410. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

RLST 3486 - Renaissance and Reformation (3 Credits)

Explores the late 13th through middle 17th centuries when European art and culture changed dramatically, and when Europe was torn by explosive ideological conflicts and religious upheaval. Cross-listed with HIST 3486. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3500 - Religions of India (3 Credits)

Examines the transcendentalist philosophy of India, which rests at the foundation of the great Eastern religious traditions of Hinduism and Buddhism. The Indian ideas of God, the soul, time, the nature of the universe, and its ultimate goal are examined. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3660 - Chinese Philosophy and Culture (3 Credits)

China is a fascinating world with its own characteristic orientation to philosophical questions. Chinese thinkers produced the "Flowering of a Hundred Schools of Thought" in the Axial Age, the same period of time in which philosophy was coming to birth in ancient Greece. Covers some of the Chinese schools, including Confucianism, Taoism, Mohism, Legalism, Chinese "Logic," and the later schools of Neo-Confucianism, Neo-Taoism and Chinese Buddhism. Cross-listed with PHIL 3981. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3720 - Religious Narratives (3 Credits)

Investigates the language and structure of religious discourse in Western literature. Welcomes interdisciplinary and comparative perspectives with a focus on cultural constructions of the sacred. Cross-listed with ENGL 3520. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3740 - Biblical Traditions: Old Testament (3 Credits)

Investigates the history and nature of the Biblical text. Follows the tradition of critical scholarship beginning in the Enlightenment era and continued down to the present day, sometimes entitled "Secular Humanism." Topics include theories of authorship of the Torah, its general nature and content; the historical books of the Bible, the Prophets, and the Wisdom Literature. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3760 - Biblical Studies: New Testament (3 Credits)

Examines the books of the New Testament from a scholarly, historical-critical perspective, which views it as a historically and culturally conditioned text, reflecting the beliefs and attitudes of the authors who produced it. The course covers the canonical gospels, letters, and other writings of the New Testament. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3770 - Archaeological Discoveries Relating to the Bible (3 Credits)

Examines the revolutionary impact of archaeology on Biblical Studies. Among these discoveries are Egyptian, Mesopotamian, and Canaanite texts, the Dead Sea Scrolls, and the Gnostic texts. Through these investigations, the Bible will be placed in its appropriate historical, literary and cultural context. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 3800 - Spirituality and Ecology in Global Societies (3 Credits)

This course will examine the historical and contemporary attitudes and actions of religion in responding to the societal impacts of environmental concerns. We will investigate four worldviews in particular: indigenous traditions, Christianity, Judaism and Buddhism, and also consider how these traditions interact with public policy debates and their position on social justice and environmental issues. Religions both create and mitigate conflict. This course will consider ethical and moral approaches, philosophical principles and social movements including ecofeminism and ethics to provide tools for dialogue and critical thinking around ecological challenges. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

RLST 4000 - Religion and Cultural Diversity (3 Credits)

Religion is one of the key elements which creates multiculturalism. This course explores issues in religion and religious identity in contemporary America, including Native American spiritual traditions, Jewish-American traditions, Muslim-American traditions, Asian-American traditions, the African-American Pentecostal movement, and the growth of the Black Muslim movement. Attention is also given to the question of gender issues, as the traditional model for gender roles was formulated, in part, from a religious basis. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

RLST 4010 - Comparative Religious Systems (3 Credits)

A cross-cultural analysis of religious belief and behavior. Emphasis is placed on religions found among non-Western cultural groups and includes consideration of how major religions of the world are manifested on local levels. Cross-listed with ANTH 4130, 5130, RLST 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4020 - Sociology of Religion (3 Credits)

This course introduces students to the nature and functions of religion in society, emphasizing western religions in the U.S. Students will develop and apply an understanding of classic and modern sociological theories of religion to current events and disciplinary developments. Cross-listed with SOCY 4610, SOCY 5610, RLST 5020. Prereq: Junior or Senior standing or permission from instructor. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

RLST 4030 - Race, Religion and Belonging in the United States (3 Credits)

Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources #such as sermons, reality TV shows, court cases and graphic images#as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation#state, thereby constructing the boundaries of the state itself. Cross-listed with ETST 4030, ETST 5030, RLST 5030, HIST 4209 and HIST 5029. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4040 - Psychology of Religion (3 Credits)

Examines the theories developed by some of the great names in the field of psychology and their approaches to religion. Questions addressed include why people become religious, how religion functions in their lives, religious experience and assessment of the validity of religious claims. Key theorists studied include: William James, Sigmund Freud, Carl G. Jung, Abraham Maslow and Erich Fromm. Cross-listed with RLST 5040. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4060 - Philosophy of Religion (3 Credits)

Nature of religion and methods of studying it. Cross-listed with HUMN 5600, PHIL 4600, 5600, RLST 5060, and SSCI 5600. Term offered: summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4070 - Western Religious Thought (3 Credits)

Focuses on philosophers and theologians who have contributed to the evolution of the three great religious traditions of the West: Judaism, Christianity and Islam. Targets thinkers from three periods: the ancient or formative era, the medieval era, and the contemporary era. Note: Specific philosophers chosen may vary in different semesters. Cross-listed with PHIL 4710. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4080 - Eastern Religious Thought (3 Credits)

Parallels the course in Western religious thought. The great religious traditions of the East, including Hinduism, Buddhism, Confucianism, and Taoism, are examined as they are presented in the writings of key philosophical representatives of each tradition. Cross-listed with PHIL 4720. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4100 - Special Topics in Religion (3 Credits)

This special topics course allows for a variety of subjects to be explored in different semesters, including such issues as the nature of religious experience, communication with the divine, specific historical themes and events in religion. Term offered: spring. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9.

RLST 4152 - Religion & Communication (3 Credits)

This course focuses on the relational/coconstitutive dynamics between religion, culture, and communication and how that shapes the world in which people live; how the legacy of political religious conflict, in conjunction with international culture wars, instigate socio-cultural conflict and change; and how an in-depth study of the dynamics of religion, culture, and communication can improve intergroup/intercultural/international relations or even negotiation/conflict resolution processes. Students will develop capacity to critically analyze the socio-cultural and political implication of religious ideology (radical and moderate), ways in which these ideologies are performed and communicated, and their (students') agency/ability to contribute to intercultural/international understanding, conflict resolution, civic engagement, and/or social justice efforts. In addition, upon completion, students should be prepared to engage in complex conversations about the idea of religion, its role and relevance in human lives, and recognize several commonalities and differences between their (students') and non-Western/other societies' worldviews, cultures, and communicative dynamics. We will engage these topics through multiple and diverse readings, examples from television, film, and social media, reflexive writing assignments, research and analytical activities, critical discussions, and experiential learning activities. Cross-listed with INTS 4152, COMM 4152, COMM 5152, INTS 5152, and RLST 5152. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4160 - Mysticism (3 Credits)

Explores the mystical strains within the world's great religious traditions. Jewish, Christian, and Islamic mystics did not always express the same beliefs and attitudes as mainstream adherents. When mystics are placed side-by-side, amazing similarities appear. One cannot always tell whether a given mystical statement is Hindu, Jewish, Sufi, or Christian. This class examines these mystical traditions, East and West. Cross-listed with RLST 5160. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4300 - Myth and Symbol (3 Credits)

Approaches the field of classical Greek mythology and religion from the perspective of Jungian archetypal theory. The deities of the ancient Greeks are presented as archetypal patterns with universal correlates elsewhere in world religions. A foundation in C. G. Jung's archetypal theory will be offered to ground the course material. Cross-listed with RLST 5300. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4320 - Spirituality in the Modern World (3 Credits)

Examines the issue of spiritual currents in the modern world. Joseph Campbell claimed that Western culture long ago lost an active sense of the sacred and that the traditional religions have not been the spiritual center for the vast majority of moderns for centuries. This class looks at the modern spiritual awakening in Shamanism, Eastern thought, the New Age movement, the men's movement, paganism and Goddess religion, and the revival of traditional religious forms in recent decades. Max Hours: 3 Credits. Grading Basis: Letter Grade

RLST 4340 - The Hero's Journey (3 Credits)

The myth of the hero's journey serves as a metaphor for the vicissitudes life puts each of us through. The hero or her represents the ego-self who undertakes the journey—a grand adventure into the realm of the unknown—to seek the treasure. He or she is greatly transformed by the process, ultimately into the great self, who wins the boon to share with all humanity. Versions of the story are found all over the world, such as in the sagas of Gilgamesh, Odysseus, Psyche, King Arthur, Dorothy of Oz, and Luke Skywalker from a galaxy far, far, away. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4360 - Freudian and Jungian Perspectives in Dream Analysis (3 Credits)

Focuses on the phenomenon of dreams in a way that differs distinctly from the traditional approach to the subject in the field of psychology. "Spiritual" approaches to dreams are examined, as well as some major theorists on dreams, especially the work of Sigmund Freud and C. G. Jung. Cross-listed with RLST 5360. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4400 - Differing Concepts of God (3 Credits)

God, Gods, and Goddesses have been imagined in many different modes, forms, aspects, and guises throughout human history. This course investigates Paleolithic models of God, the Great Goddess of the Neolithic era, the Gods of mythological traditions, Biblical God, the abstract God of the philosophers, the God of the pantheists, the deists, and the God of the mystics. Cross-listed with RLST 5400, PHIL 4650 and 5655. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4420 - Goddess Traditions (3 Credits)

Explores the many forms which Goddesses have assumed through history, including the Neolithic Great Mother and her heiresses in the ancient Mediterranean cultures, such as: Isis, Ishtar, Demeter, Hecate, Aphrodite, Artemis, Athena and others, and their parallels in India. Goddess traditions have encompassed a full spectrum from virgins to Great Mothers to dark underworld Goddesses of death and destruction. Cross-listed with RLST 5420 and WGST 4420/5420. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4440 - Concepts of the Soul (3 Credits)

Asks the questions: What is the nature of the human being? What makes us "human?" Do humans have a "soul?" What is its nature? Is it different from the "spirit?" What is its ultimate fate? Examines the various theories put forward by philosophers of both Eastern and Western traditions. Cross-listed with RLST 5440 and PHIL 4470, 5470. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4460 - Death and Concepts of Afterlife (3 Credits)

Examines how the major religious traditions approach the issue of death. Where the Egyptians were fascinated by death, their Mesopotamian and Hebrew neighbors saw no kind of experience continuing after death. Concepts of the Final Judgment Day and the end of the world follow in Zoroastrianism, Christianity, and Islam, while Indian religions developed a sophisticated theory of reincarnation and the "art of dying." Finally, we will turn to Chinese belief in ancestral spirits. Cross-listed with RLST 5460. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

RLST 4462 - Islam in Modern History (3 Credits)

This course studies Islamic thought and practice over the last two centuries in terms of major historical processes that have operated at local, national, and global scales. Cross-listed with RLST 5462, HIST 4462, HIST 5462. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4480 - Perspectives on Good and Evil (3 Credits)

Examines "problem of evil" as formulated in the philosophical tradition. Presents classical formulation of the problem, traditional solutions & classical critiques of each answer. Considers perspectives of various religious orientations, which deal differently with the question of suffering. Cross-listed with PHIL 4480/5480, RLST 5480. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4500 - Religion and Politics (3 Credits)

Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state;" (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Cross-listed with PSCI 4057, 5057 and RLST 5500. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4710 - Women and Religion (3 Credits)

A sociological exploration of the contemporary roles of women in religion. Course examines American and world religious groups with an eye to women's involvement. Considers how women have changed these traditions as they take on leadership roles and discusses the tensions that arise within these traditions as a result of their expanded participation. Cross-listed with HUMN 5710, SSCI 4710/5710, WGST 4710/5710, RLST 5710. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4730 - Whores and Saints: Medieval Women (3 Credits)

Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. This course assumes that students have completed at least 9 hours of literature coursework. Cross-listed with ENGL 4510/5510, RLST 5730 and WGST 4510/5510. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4840 - Independent Study: RLST (1-3 Credits)

Various topics in religious studies pursued in independent research. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

RLST 4850 - Family Systems Therapy, Religion and Spirituality (3 Credits)

This course examines how the intersection between different religious and spiritual frameworks affects family systems. A strengths-based ecological perspective, family therapy theories and family systems theories will be used to understand religious and spiritual frameworks in working with families in schools and communities. Cross-listed with HDFS 4850. Max hours: 3 Credits.

Grading Basis: Letter Grade

RLST 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Religious Studies Minor

Introduction

Please click [here](#) (p. 642) to see Religious Studies department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor, or the Program Director, Sharon Coggan.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 18 credit hours of approved courses.
2. Students must complete a minimum of 9 upper-division (3000-level and above) credit hours of approved courses in the minor.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. Students cannot complete minor course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours of approved courses with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. A maximum of 9 credits hours of independent study courses may be applied to the minor.
2. Course lists in each category qualify as approved courses. Students may also seek approval from the Religious Studies program director to use a course not designated in the lists below, prior to completing the course.

Required Course

Code	Title	Hours
<i>Take the following required course</i>		
RLST 1610	Introduction to Religious Studies	3

Western Religion

Code	Title	Hours
<i>Take one of the following</i>		
RLST 2660	World Religions ¹	3
RLST 2700	The Bible as Literature	3
or ENGL 2520	The Bible as Literature	
RLST 3000	Judaism, Christianity and Islam: Affinity and Difference	3
RLST 3120	Islamic Traditions	3
RLST 3740	Biblical Traditions: Old Testament	3
RLST 3760	Biblical Studies: New Testament	3
RLST 3770	Archaeological Discoveries Relating to the Bible	3
RLST 4400	Differing Concepts of God ¹	3
RLST 4440	Concepts of the Soul ¹	3
or PHIL 4470	Concepts of the Soul	
RLST 4460	Death and Concepts of Afterlife ¹	3
RLST 4462	Islam in Modern History	3
or HIST 4462	Islam in Modern History	

¹ Fulfills requirement for either Eastern or Western religion, but not both simultaneously

Eastern Religion

Code	Title	Hours
<i>Take one of the following</i>		
RLST 2660	World Religions ¹	3
RLST 3410	Asian Philosophies and Religions	
or PHIL 3410	Asian Philosophies and Religions	
PHIL 3981	Chinese Philosophy and Culture	
RLST 4080	Eastern Religious Thought	
or PHIL 4720	Eastern Religious Thought	
RLST 4160	Mysticism	
RLST 4400	Differing Concepts of God ¹	
RLST 4440	Concepts of the Soul ¹	
RLST 4460	Death and Concepts of Afterlife ¹	

¹ Fulfills requirement for either Eastern or Western religion, but not both simultaneously

Elective Courses

Code	Title	Hours
<i>Take three courses from the following list. Other courses, such as certain special topics, art history courses featuring religious themes and others may count toward the minor with pre-approval from the minor advisor.</i>		
RLST 2660	World Religions	3
RLST 2700	The Bible as Literature	3
or ENGL 2520	The Bible as Literature	
RLST 3000	Judaism, Christianity and Islam: Affinity and Difference	3
PHIL 3981	Chinese Philosophy and Culture	3
RLST 3060	History of Early Christianity	3
RLST 3100	Islamic Politics and Culture	3
or PSCI 4165	Islamic Politics and Culture	
RLST 3120	Islamic Traditions	3
RLST 3300	Shamanic Traditions	3
or ETST 3300	Shamanic Traditions	
RLST 3410	Asian Philosophies and Religions	3
or PHIL 3410	Asian Philosophies and Religions	
RLST 3486	Renaissance and Reformation	3
or HIST 3486	Renaissance and Reformation	
RLST 3720	Religious Narratives	3
or ENGL 3520	Religious Narratives	
RLST 3740	Biblical Traditions: Old Testament	3
RLST 3760	Biblical Studies: New Testament	3
RLST 3770	Archaeological Discoveries Relating to the Bible	3
RLST 3800	Spirituality and Ecology in Global Societies	3
RLST 4000	Religion and Cultural Diversity	3
RLST 4020	Sociology of Religion	3
or SOCY 4610	Sociology of Religion	
RLST 4030	Race, Religion and Belonging in the United States	3
or ETST 4030	Race, Religion and Belonging in the United States	
RLST 4040	Psychology of Religion	3
RLST 4060	Philosophy of Religion	3
or PHIL 4600	Philosophy of Religion	
RLST 4080	Eastern Religious Thought	3
or PHIL 4720	Eastern Religious Thought	
RLST 4160	Mysticism	3
RLST 4300	Myth and Symbol	3
RLST 4340	The Hero's Journey	3
RLST 4360	Freudian and Jungian Perspectives in Dream Analysis	3
RLST 4400	Differing Concepts of God	3
RLST 4420	Goddess Traditions	3
or WGST 4420	Goddess Traditions	
RLST 4440	Concepts of the Soul	3
or PHIL 4470	Concepts of the Soul	
RLST 4460	Death and Concepts of Afterlife	3
RLST 4462	Islam in Modern History	3
or HIST 4462	Islam in Modern History	
RLST 4480	Perspectives on Good and Evil	3
or PHIL 4480	Perspectives on Good and Evil	

RLST 4500	Religion and Politics	3
or PSCI 4057	Religion and Politics	
RLST 4710	Women and Religion	3
or WGST 4710	Women and Religion	
RLST 4730	Whores and Saints: Medieval Women	3
or ENGL 4510	Whores and Saints: Medieval Women	
or WGST 4510	Whores and Saints: Medieval Women	
RLST 4840	Independent Study: RLST	1-3
RLST 4880	Directed Research	1-6

Overview

Undergraduate Information

The Social Justice Program is home to the Social Justice Minor and organizes innovative community and campus events to address the pressing social and economic issues of the 21st century. The Social Justice Minor is designed for students who are passionate about being engaged citizens and effecting change locally and globally. To this end, students will be exposed to global perspectives on social movements, conflict resolution, environmental stewardship, critical theory, and grassroots organizing.

Student Learning Goals

Earning a Social Justice Minor will make students competitive for graduate school as well as for jobs in NGOs, public health, political office, community leadership, and in the ever-increasing number of modern corporations that seek employees who are committed to sustainable and ethical vocations. We create learning opportunities that emphasize an integrated understanding of the social, political, economic, and cultural dimensions of the major challenges facing humanity in the new millennium. By cultivating engaged and informed citizens, we seek to create future leaders who will have the skills and knowledge necessary to effect meaningful change.

Social Justice (SJUS)

SJUS 2000 - Foundations in Social Justice (3 Credits)

Examines how well the United States, Colorado and Denver are doing in addressing issues of social justice, such as inequality and environmental degradation. Explores various modes of democratic participation – electoral politics, community activism, and lifestyle changes – in advancing social justice. Term offered: fall. Max hours: 3 Credits.

GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS1

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS1, Soc Behav Sci:Econ or Pol.

SJUS 2010 - Social Justice: Theories, Narratives, and Technologies (3 Credits)

How can citizens of a democracy address social justice issues? This course examines theoretical perspectives relevant to social justice, the narratives which express and question social order, and the technologies which alternately shape and reflect local, regional, and global cultures. Max hours: 3 Credits.

Grading Basis: Letter Grade

SJUS 3050 - Special Topics: Social Justice (1-3 Credits)

Special Topics in Social Justice will be covered. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

SJUS 3939 - Internship (3 Credits)

Internship/experiential learning involving work in the community that is centered upon social justice and which includes a reflective component and some type of public dissemination. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

SJUS 4000 - Social Justice Capstone (3 Credits)

Students design and carry out research projects that address important civic issues in collaboration with community partners and present their findings to the partners and academic community. This course also involves reflection on social justice means and goals. Note: Students may not receive credit for SJUS 4000 if they have already received credit for SJUS 4001 and may not receive credit for SJUS 4001 if they have already received credit for SJUS 4000. Prereq: Junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Credit; Upper Division.

SJUS 4001 - Social Justice Senior Project (3 Credits)

Students design and carry out research projects that address important civic issues in collaboration with community partners and present their findings to the partners and academic community. This course also involves reflection on social justice means and goals. This is an individually structured version of SJUS 4000 so students may not receive credit for SJUS 4001 if they have already received credit for SJUS 4000 and may not receive credit for SJUS 4000 if they have already received credit for SJUS 4001. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Max hours: 3 Credits. Grading Basis: Letter Grade

SJUS 4050 - Special Topics: Social Justice (3 Credits)

Special Topics in Social Justice will be covered. Cross-listed with SJUS 5050. Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12.

SJUS 4840 - Independent Study (3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Max hours: 3 Credits. Grading Basis: Letter Grade

SJUS 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.

Social Justice Minor

Introduction

Please click [here](#) (p. 648) to see Social Justice department information.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours from the approved courses.
2. Students must complete a minimum of 9 upper-division (3000-level and above) credit hours in the minor, chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty chosen from the approved courses below.

Required Course

Code	Title	Hours
<i>Take the following</i>		3
SJUS 2000	Foundations in Social Justice	3

Upper Division Electives

Code	Title	Hours
<i>Take three courses from those listed below. This is a sample list of upper-division courses, but other courses may be considered.</i>		9

Anthropology

Code	Title	Hours

Sociology

Chair: Teresa M. Cooney

Program Assistant: Rachel M. Gallegos

Office: Lawrence Street Center, Suite 420

Telephone: 303-315-2148

Fax: 303-315-2149

Overview

Undergraduate Information

Sociology is the scientific study of groups, social processes, social institutions and behavior. The major in sociology is designed to familiarize students with these areas through an understanding of theory, methods and data analytic procedures employed within them. Three certificate options at the undergraduate level allow students interested in gaining concentrated study in a sub-area of sociology to do so. They include: Criminology; Families and Social Welfare; and Sociology of Health and Medicine. All students majoring in sociology, regardless of whether they pursue a certificate (or multiple certificates), develop a strong foundation in the basics of the discipline, including the use of qualitative and quantitative research methodologies and theory.

The major prepares students for either graduate study or the pursuit of a career immediately upon completion of the BA degree. The required Senior Capstone course is a critical resource in preparing for either option. Graduates with a Sociology BA are employed in a variety of professional areas, including the criminal justice system, education, health and social services, and with state and local government agencies. The department has developed the following rationale for courses offered:

1. Lower-division courses (for majors and non-majors)
 - a. 1000-level courses provide an introduction to the broad sociological perspective as it applies to social life, social systems and society.
 - b. 2000-level courses introduce students to somewhat more specific content areas: social psychology, deviant behavior and social inequalities, etc.
2. Upper-division courses (3000 and 4000)
 - a. 3000-level courses serve as advanced surveys of some specific area of concentration. They are designed to acquaint students with the issues, methods, concepts and theoretical frameworks employed in the content area. Such courses as medical sociology, criminology, sociology of family, and race and ethnicity are offered at this level. Many of these courses are open courses, in that

students from other departments and colleges are encouraged to enroll in them.

- b. 4000-level courses are devoted to a more detailed in-depth examination of specific issues, approaches and concepts within the previously identified content areas. These are advanced courses and are geared more directly to sociology and social science majors.
- c. Sophomore standing is required for enrollment in all 3000-level courses, and junior standing is required for enrollment in 4000-level courses.

The department requires that SOCY 1001 Understanding the Social World be completed prior to any of the major's core requirements (SOCY 2001 Inequalities in Social World, SOCY 3115 Quantitative Methods & Analysis, SOCY 3119 Qualitative Methods, SOCY 3140 Sociological Theory and SOCY 4830 Senior Capstone: Worklife Practices & Policies).

Click here (p. 657) to learn about the requirements for the Major in Sociology.

Programs Offered

- Sociology, BA (p. 657)
- Sociology - Gender and Society Concentration, BA (p. 658)
- Sociology, 4 + 1 BA/ MA (p. 660)
- Sociology Minor (p. 661)
- Criminology Certificate (p. 662)
- Families and Social Welfare Certificate (p. 663)
- Sociology of Health and Medicine Certificate (p. 665)

Faculty

Professors:

Teresa M. Cooney, PhD, The Pennsylvania State University

Jennifer A. Reich, PhD, University of California, Davis

Associate Professors:

Candan Duran-Aydintug, PhD, Washington State University

Keith Guzik, PhD, University of Illinois at Urbana-Champaign

Assistant Professors:

Brenden Beck, PhD, City University of New York-Graduate Center

Edelina Burciaga, PhD, University of California-Irvine

Adam M. Lippert, PhD, The Pennsylvania State University

Esther Sullivan, PhD, University of Texas at Austin

Assistant Professor, Clinical Teaching Track:

Maren T. Scull, PhD, Indiana University

Jenny Vermilya, PhD, University of Colorado Boulder

Senior Instructor:

Kari Alexander, PhD, University of Colorado Boulder

Instructors:

Carlos Real, MA, University of Colorado Denver

Professors Emeritus:

Sharon K. Araj, PhD, Washington State University

Karl H. Flaming, PhD, Syracuse University

Associate Professor Emeritus:

Richard H. Anderson, PhD, University of Oregon

Sociology (SOCY)

SOCY 1001 - Understanding the Social World (3 Credits)

This survey course provides an introduction to the sociological study of society, including patterns of social relationships, social interaction, and culture. Typical course topics include socialization, the family, criminology, deviance, inequalities, sex and gender, race and ethnicity, health and medicine, self and identities, and globalization. Students gain an understanding of how organizations, institutions, and structures of society shape individual and group experiences. Max hours: 3 Credits.

GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences; GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul.

SOCY 1011 - From Killer Apps to Killer Bots: Technology and Social Change (3 Credits)

A young college student updates her social media page to stay in touch with family and high school friends while making new friends on campus.

An upstart automobile manufacturer builds a factory manned by robots to produce electronic vehicles designed to reduce the environmental impact of automobiles. The military deploys battalions of unmanned drones to engage with adversaries without risking the lives of their soldiers. Technology mediates nearly all aspects of social life, from reproduction and parenting to crime control and health care. This course is designed to provide students an introduction to the different social dimensions of technological innovation as well as the theoretical and methodological tools sociologists use to study them. Max hours: 3 Credits.

Grading Basis: Letter Grade

SOCY 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Term offered: spring, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

Typically Offered: Fall, Spring.

SOCY 2001 - Inequalities in Social World (3 Credits)

Introduces students to critical sociological perspectives on social inequality. Major sociological factors contributing to the production and reproduction of inequality in various social organizations and institutions are analyzed. Prereq: SOCY 1001 or permission of the instructor. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: SOCY 1001

SOCY 2440 - Deviance and Social Control (3 Credits)

This class explores different forms of deviance and ways in which deviant categories are created, and examines sociological theories of deviance, social order, and social power. The course also addresses how different groups gain control over social definitions and the consequences these definitions have in the form of norms, laws, and informal social sanctions. The impact of these definitions for individuals also is considered, namely for how people construct and manage their identities. Topics covered include drug smuggling, gang membership, computer hacking, shoplifting, homelessness, eating disorders, transability, BDSM, self-injury, and sex work. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SOCY 2462 - Introduction to Social Psychology (3 Credits)

Studies the development and functioning of persons, especially within a group context, and the dynamics of small groups. Emphasis on the import of symbols for human behavior, development of self-concepts, and processes of competition and cooperation in group dynamics. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul; Denver Core Requirement, Social Sciences.

SOCY 3001 - Urban Sociology (3 Credits)

Explores U.S. cities as built environments, cultural spaces, and sources of community. Topics include the history of urbanization; social and spatial organization of cities; race and residential segregation; suburbanization; and urban problems such as crime, environmental hazards, and gentrification. Prereq: Sophomore standing or higher. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3010 - Sociology of Human Sexuality (3 Credits)

Increases the understanding of differences in views of sexuality, specifically the link between sex and reproduction and its role as the motivation for gender roles and sex acts. Explores the history of sexuality, cross-cultural studies and primate modeling. Prereq: sophomore standing or higher or permission of instructor. Cross-listed with WGST 3010. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3020 - Race and Ethnicity in the U.S. (3 Credits)

A sociological examination of race and ethnicity in contemporary U.S. society. Includes a focus on the nature and causes of prejudice and discrimination. Dominant-minority relations are examined, with an emphasis on current status of minority groups and issues. Prereq: sophomore standing or higher or permission of instructor. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

Additional Information: Denver Core Requirement, Cultural Diversity.

SOCY 3040 - Drugs, Alcohol & Society (3 Credits)

Explores our culture's relationship with drugs and alcohol from a sociological perspective, investigating all spheres of substance use: recreational, medicinal, instrumental, & religious. Examines our long turbulent history with these chemicals, and ways in which they have shaped our society. Prereq: sophomore standing or higher or permission of instructor. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

Typically Offered: Spring.

SOCY 3050 - Sociology of Education (3 Credits)

Drawing from theories in the sociology of education, this course evaluates the relationship between race, ethnicity, gender, class, immigration status and educational experiences, aspirations, and outcomes. Topics include socialization, tracking, educational policy, college access, and educational equity. Prereq: sophomore standing or higher or permission of instructor. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3080 - Sex and Gender (3 Credits)

Causes and consequences of sex role differentiation at the individual, group and societal levels. Current issues related to changing norms and values concerning gender in modern society are examined. Prereq: sophomore standing or higher or permission of instructor. Cross-listed with WGST 3080. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3115 - Quantitative Methods & Analysis (4 Credits)

This course provides students with a basic understanding of survey methods and statistical analysis. In addition to learning the basics of inferential statistics and sampling methods, students will conduct their own survey research, analyze data, and produce reports. Prereq: SOCY 1001 with a C or higher. Term offered: fall, spring, summer. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: SOCY 1001 with a C or higher.

SOCY 3119 - Qualitative Methods (4 Credits)

This course focuses on the development of skills involved in designing qualitative research studies, collecting and analyzing qualitative data and evaluating qualitative research. Primary focus is on ethnography, in-depth interviewing, and content analysis. Students read, analyze, and conduct qualitative research. Prereq: SOCY 1001 with a C or higher. Term offered: fall, spring. Max hours: 4 Credits.

Grading Basis: Letter Grade

Prereq: SOCY 1001 with a C or higher.

SOCY 3140 - Sociological Theory (3 Credits)

An overview of major sociological theories and concepts. The emergence of the discipline and the contemporary development of sociological theories are examined. Preq: SOCY 1001. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: SOCY 1001

SOCY 3297 - Social History of Asian Americans (3 Credits)

Introductory-level course surveys the social history of Asian American groups from the mid-19th century to the present. Examines immigration patterns, the development of communities, social and economic problems, and anti-Asian movements and activities. Prereq: sophomore standing or higher or permission of instructor. Cross-listed with ETST 3297 and HIST 3297. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3300 - Social Problems (3 Credits)

Explores how societies define and attempt to solve "social problems." Possible topics: income disparities, race/ethnic relations, gender inequality, and sexuality, in addition to the relationship between these issues and social institutions such as education, religion, health care, and criminal justice. Prereq: sophomore standing or higher or permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3440 - Medical Sociology (3 Credits)

This course covers key issues in population health and emphasizes how sociological perspectives both challenge and augment biomedical perspectives on health and health care. We also discuss the social causes and consequences of race/ethnic, sex, and socioeconomic disparities in health. Prereq: sophomore standing or higher or permission of instructor. Cross-listed with PBHL 3440. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3490 - Criminology (3 Credits)

Theories, nature and causes of crime as a social phenomenon. Processes of making laws, breaking laws, and reaction toward the breaking of laws. Prereq: sophomore standing or higher or permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3500 - Topics in Sociology (1-3 Credits)

Special topics in sociology to be selected by the instructor. Note: Can be taken more than once when topics vary. Prereq: sophomore standing or higher or permission of instructor. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3510 - Topics in Sociology (1-3 Credits)

Prereq: sophomore standing or higher or permission of instructor.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3520 - Topics in Sociology (1-3 Credits)

Prereq: sophomore standing or higher or permission of instructor.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3530 - Topics in Sociology (1-3 Credits)

Prereq: sophomore standing or higher or permission of instructor.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3540 - Topics in Sociology (1-3 Credits)

Prereq: sophomore standing or higher or permission of instructor.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3550 - Topics in Sociology (1-3 Credits)

Prereq: sophomore standing or higher or permission of instructor.

Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3570 - Death & Dying: Social & Medical Perspectives (3 Credits)

Focusing on death, dying and bereavement using medical and social perspectives, this course explores how illness, prolonged dying and sudden death impact care providers, families and communities.

Discussion, film, readings and music address the connection of social and medical issues. Cross-listed with HEHM 3570. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

SOCY 3650 - Sociology of Music (3 Credits)

Focuses on the meaning/use of music in society. Explores censorship, organization of the recording industry, sociocultural contexts in which music is produced/distributed/listened to and the relationship between music and technology along with musical applications and associations. Prereq: sophomore standing or higher or permission of instructor. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3697 - Contemporary Asian American Experience (3 Credits)

Examines the contemporary Asian American experience, including the adaptation of new immigrants or refugees, economic and educational problems, ethnic identity, intermarriage, anti-Asian discrimination and other civil rights issues, and recent political activism. Prereq: sophomore standing or higher or permission of instructor. Cross-listed with ETST 3697. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3700 - Families and Society (3 Credits)

This course explores multiple dimensions of family as a social institution. Using a critical approach, we examine historical, cultural, and political views about families. We consider multiple forms of contemporary families, discuss the many issues facing families, and study how families and family life have become politicized. Cross-listed with WGST 3700.

Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3720 - Global Perspectives on Social Issues (3 Credits)

Various cultural and social frameworks are used in a sociological examination and international comparison of select social issues, such as globalization, terrorism, inequality and discrimination. Analysis of selected issues across cultures explores how societal and cultural characteristics shape these issues. Prereq: sophomore standing or higher or permission of instructor. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

Additional Information: Denver Core Requirement, International Perspectives.

SOCY 3750 - Animals and Society (3 Credits)

An examination into the category of "animal" as a social construct and the relationship between humans and non-human animals, which produces consequences of difference and subsequent inequality. The course utilizes different sociological perspectives to examine the social patterns, processes, and institutions that establish our lived experiences with non-human animals. Prereq: Sophomore standing or higher or by instructor permission. Max hours: 3 Credits

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

SOCY 3840 - Independent Study: SOCY (1-3 Credits)

Prereq: sophomore standing or permission of the instructor. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Restriction: Sophomore standing or higher.

SOCY 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: sophomore standing or higher or permission of instructor. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

SOCY 3995 - Global Study Topics (3-6 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Department consent required. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

SOCY 4020 - Race, Culture and Immigration (3 Credits)

In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Junior standing or higher or instructor permission. Cross-listed with SOCY 5020, ETST 4020 and ETST 5020. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4050 - Health Disparities (3 Credits)

This course focuses on social, economic, and political factors that shape the uneven distribution of health and illness in the United States. Social determinants of health are explored, including socioeconomic status, race and ethnicity, neighborhood environments, social relationships, and gender. Cross-listed with SOCY 5050. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SOCY 4110 - Sociology of Health Care (3 Credits)

Examines U.S. health care institutions and issues such as rising costs, the effects of class, racial and gender inequality, professionalization and monopolization of roles, construction of illness and health, managed care, for-profit health care, and ethics of health care decisions. Prereq: junior standing or higher or permission of instructor. Cross-listed with SOCY 5110. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4220 - Population Change and Analysis (3 Credits)

Concepts of population change, methods of analysis, and applications to contemporary social issues. Topics include age and sex distributions, fertility, mortality, and migration, and the social causes and consequences of these phenomena. Prereq: Junior standing or permission of the instructor. Cross-listed with SOCY 5220. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4270 - Social Meanings of Reproduction (3 Credits)

Reproduction involves more than biological processes, assuming symbolic, political, and ideological meanings. This course examines contested meanings of reproduction, including how people experience reproduction, controversies over who should reproduce (and under what circumstances), and how public policy mediates these conflicts. Prereq: Junior standing or permission of the instructor. Cross-listed with SOCY 5270, WGST 4270 and WGST 5270. Term offered: fall. Max hours 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4290 - Aging, Society and Social Policy (3 Credits)

A sociological examination of central issues (e.g., work, retirement, family support, health) pertaining to the aging population. Heterogeneity in aging, as shaped by gender, race, ethnicity and social class is addressed, as well as policies pertaining to the adult population. Prereq: Junior standing or permission of the instructor. Cross-listed with SOCY 5290. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4340 - Juvenile Delinquency (3 Credits)

Factors involved in delinquent behavior. Problems of adjustment for delinquents, and factors in treatment and post-treatment adjustment. Major theories covered include strain theory, social learning theory, control theory, and labeling theory. Course also reviews methods for testing these theories. Prereq: junior standing or higher or permission of the instructor. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

SOCY 4440 - Poverty and Social Inequality (3 Credits)

Investigates the distribution of wealth, income, and economic power in the United States with a focus on social institutions and factors that shape inequality. Prereq: Junior standing or permission of the instructor. Cross-listed with SOCY 5440. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4460 - Hate Groups and Group Violence (3 Credits)

Social sciences help us understand the phenomena of hate groups and group violence and contribute toward their elimination. Examples are examined using theoretical perspectives on different levels of analysis and within different areas of research. Prereq: Junior standing or permission of the instructor. Cross-listed with SOCY 5460. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4590 - Crime, Justice, and the City (3 Credits)

In this course, we will ask why inequality, crime, and police are unevenly spread across cities. We will examine why crime varies by neighborhood, whether place-based policing is racially biased, and why prisons are filled with people from just a few zip codes. We will study racial and economic segregation, gentrification, white flight, and suburbanization in the context of criminal justice. Spatial analysis is a growing field combining geography, sociology, and criminology. We will study it by reading cutting-edge researchers who use mapping, interviews, statistical analysis, and ethnography. Restriction: Restricted to students with Junior standing or higher or with instructor permission. Cross-listed with SOCY 5590. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4610 - Sociology of Religion (3 Credits)

This course introduces students to the nature and functions of religion in society, emphasizing western religions in the U.S. Students will develop and apply an understanding of classic and modern sociological theories of religion to current events and disciplinary developments. Cross-listed with SOCY 5610, RLST 4020, RLST 5020. Prereq: junior standing or higher or permission of instructor. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4640 - Sociology of Childhood and Adolescence (3 Credits)

An in-depth overview of the theories and research regarding the life course understanding of infancy, childhood and adolescence. Children's lives and cultures in relation to adults and their transition from childhood to adolescence are studied. Prereq: junior standing or higher or permission of instructor. Cross-listed with SOCY 5640. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4650 - Sociology of Adulthood and Aging (3 Credits)

Examination of the adult life course—post-adolescence to death, focusing on key social transitions of adulthood (e.g., independence from parents, marriage, retirement), and historical, institutional, and social factors that create variation in their timing, meaning, and individuals' role experiences. Prereq: junior standing or higher or permission of instructor. Cross-listed with SOCY 5650. Term offered: spring. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher
Typically Offered: Spring.

SOCY 4690 - Crime and Inequality Over the Life Course (3 Credits)

Life-course perspective on inequality and crime. Studies transitions, trajectories and turning points as key features of the life course. Considers how inequalities and criminal behavior are shaped by timing of experiences, historical and geographic contexts, others' lives, and human agency. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 5690. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SOCY 4700 - Sociology of Law (3 Credits)

Consideration of the formulation, interpretation, and legitimacy of legal rules within the context of social organization. The examination of a major social institution in modern society. Prereq: junior standing or higher or permission of instructor. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4740 - Courts & Society (3 Credits)

Courts are a centerpiece of modern legal systems that mediate social relationships and people's relationship to the state. This course explores the connection between courts and democratic society by considering the operation and evolution of courts in the U.S. Cross-listed with SOCY 5740. Restriction: Restricted to Junior standing or above. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4770 - Advanced Topics in Sociology (1-3 Credits)

Advanced study of special topics in sociology to be selected by the instructor. Note: May be repeated for credit when topics vary. Prereq: junior standing or higher or permission of instructor. Cross-listed with SOCY 5770. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: junior standing or higher

SOCY 4774 - Advanced Topics in Sociology (3 Credits)

Advanced study of special topics in sociology to be selected by the instructor. Note: May be repeated for credit when topics vary. Prereq: Junior standing or permission of the instructor. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: junior standing or higher

SOCY 4780 - Violence in Relationships (3 Credits)

Course focuses on the study of violence among individuals involved in intimate relationships; factors in society such as norms, laws and institutions that are related to creating violence among intimates; and social policies, prevention, intervention and treatment programs. Prereq: junior standing or higher or permission of instructor. Cross-listed with SOCY 5780, WGST 4780 and WGST 5780. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: junior standing or higher

SOCY 4830 - Senior Capstone: Worklife Practices & Policies (3 Credits)
Introduces students to tools and develops skills to facilitate internship and job search. Students gain understanding of work contexts, exploring employment laws and policies, dynamics of race and gender in job searching, and research on careers and job negotiation. Prereq: Must have earned a minimum of 75 credits. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SOCY 4840 - Independent Study: SOCY (1-3 Credits)
Prereq: junior standing or higher or permission of instructor. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Prereq: junior standing or higher

SOCY 4880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Prereq: junior standing or higher. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Prereq: junior standing or higher

SOCY 4910 - Research Practicum (1-3 Credits)
Practical experiences for undergraduates in application of principles of research design and data processing to a social research problem selected by the instructor. Prereq: junior standing or higher or permission of instructor. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: junior standing or higher

SOCY 4995 - Global Study Topics (3-6 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Department consent required. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Sociology, BA

Introduction

Please click [here](#) (p. 651) to see Sociology department information.

Sociology is the study of social relations, interactions, and institutions. Using quantitative and qualitative scientific methods, it offers a unique way of seeing and understanding the social world and how it shapes individual lives and history. Sociology's subject matter is broad and diverse. Some of the topics covered are criminology, religion, families, inequalities between social groups, childhood, youth, adulthood and old age, social stability and social change, urban issues, environment, technology, education, and health.

All prospective majors should contact the undergraduate advisor in Sociology as early in their academic careers as possible for information about the degree requirements. Transfer or returning students should consult with the undergraduate advisor in Sociology concerning completion of the core courses.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Sociology advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.
- This program is also offered online.

Declaring This Major

- Click [here](#) (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click [here](#) (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 32 SOCY credit hours.
2. Students must complete a minimum of 16 upper-division (3000-level and above) SOCY credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 13 SOCY credit hours with CU Denver faculty.

Program Allowances and Restrictions

1. The maximum number of hours allowed in sociology is 56.
2. Students must take a minimum of 3 credit hours in elective courses at the 4000 level.

Required Courses

Code	Title	Hours
<i>Take the following courses:</i>		<i>20</i>
SOCY 1001	Understanding the Social World	3
SOCY 2001	Inequalities in Social World	3
SOCY 3115	Quantitative Methods & Analysis	4
SOCY 3119	Qualitative Methods	4

SOCY 3140	Sociological Theory	3
SOCY 4830	Senior Capstone: Worklife Practices & Policies	3

SOCY 4910	Research Practicum	1-3
SOCY 4995	Global Study Topics	3-6

Sociology Electives

Code Title Hours

Take a minimum of 12 and a maximum of 36 SOCY elective credit hours. 12

At least 3 credit hours must be completed at 4000-level or higher.

SOCY 1011	From Killer Apps to Killer Bots: Technology and Social Change	3

Sociology - Gender and Society Concentration, BA

Introduction

Please click here (p. 651) to see Sociology department information.

A concentration in Gender and Society provides students with an understanding of the role of gender in the experiences of females, males, and gender non-conforming individuals. The interdisciplinary nature of the concentration enables students to develop the skills to critically evaluate the ways in which inequality, oppression, and social structure contribute to various social problems such as the pay gap, sexual assault, domestic violence, and human trafficking. The Gender and Society concentration equips students for jobs in a variety of areas such as advocacy, counseling, public health, policy-making and government, business, and criminal justice.

All prospective majors should contact the undergraduate advisor in Sociology as early in their academic careers as possible for information about the degree requirements. Transfer or returning students should consult with the undergraduate advisor in Sociology concerning completion of the core courses.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Sociology advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 38 credit hours, including a minimum of 20 SOCY credit hours and 18 ancillary courses.
2. Students must complete a minimum of 16 upper-division (3000-level and above) credit hours from the approved courses.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 13 SOCY credit hours with CU Denver faculty.

Program Allowances and Restrictions

1. The maximum number of SOCY credit hours allowed for the Sociology BA - Gender and Society concentration is 56.
2. Students must take four electives for the major. Three of these electives must be cross-listed as SOCY and WGST. The fourth elective must be a WGST course cross-listed with a department other than Sociology.
3. Students who pursue this concentration simultaneously earn a minor in Women's and Gender Studies.

Required Courses

Code	Title	Hours
<i>Take the following</i>		26
SOCY 1001	Understanding the Social World	3
SOCY 2001	Inequalities in Social World	3
SOCY 3115	Quantitative Methods & Analysis	4
SOCY 3119	Qualitative Methods	4
SOCY 3140	Sociological Theory	3
SOCY 4830	Senior Capstone: Worklife Practices & Policies	3
WGST 1050	Introduction to Women's and Gender Studies	3
WGST 4306	Survey of Feminist Thought	3
	or WGST 4308 Contemporary Feminist Thought	

WGST/SOCY Cross-listed Electives

Code	Title	Hours
<i>Take three courses (9 credit hours) cross-listed as SOCY and WGST¹</i>		9
SOCY/WGST 3010	Sociology of Human Sexuality	
SOCY/WGST 3080	Sex and Gender	
SOCY/WGST 3700	Families and Society	
SOCY/WGST 4270	Social Meanings of Reproduction	
SOCY/WGST 4780	Violence in Relationships	

¹ These courses are examples. Students should check course descriptions and the schedule to find courses that meet this requirement.

Additional WGST Elective

Code	Title	Hours
<i>Take one additional WGST Elective from the list¹</i>		3
WGST 3020	Gender, Sexuality and Race in American Popular Culture	3
WGST 3343	Women & Gender in US History	3
WGST 3450	Contemporary Women Writers	3
WGST 4010	Special Topics in Women's and Gender Studies	1-3
WGST 4150	Gender Politics in the Middle East: Beyond Orientalism & Islamism	3
WGST 4215	Women's Rights, Human Rights: Global Perspectives	3
WGST 4225	Urban America: Colonial Times to the Present	3
WGST 4230	Women in the West	3
WGST 4248	Gender, Globalization and Development	3
WGST 4303	Sex and Gender in Modern Britain	3
WGST 4306	Survey of Feminist Thought	3
WGST 4305	Women of Color Feminisms	3
WGST 4307	History of Sexuality	3
WGST 4308	Contemporary Feminist Thought	3
WGST 4345	Gender, Science, and Medicine: 1600 to the Present	3
WGST 4420	Goddess Traditions	3
WGST 4500	Feminist Philosophy	3
WGST 4510	Whores and Saints: Medieval Women	3
WGST 4511	French Women Writers	3
WGST 4540	Race, Class, and Gender in Spanish Golden Age Literature	3
WGST 4555	International Women's Resistance	3
WGST 4564	Gender and Politics	3
WGST 4610	Communication, Media, and Sex	3
WGST 4660	Queer Media Studies	3
WGST 4710	Women and Religion	3
WGST 4827	Women and the Law	3
WGST 4933	Philosophy of Eros	3

¹ These courses are examples. Students should check course descriptions and the schedule to find courses that meet this requirement.

Sociology, 4 + 1 BA/ MA

Introduction

The Combined BA/MA (4+1) program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. The BA/MA application process is competitive, as the program is designed for highly-qualified students who are capable of an expedited program. Students choose from two options for their Comprehensive Paper that completes the master's degree: either a 6-credit thesis, or a 3-credit applied experience plus a 3-credit paper. The program also offers 3 concentration areas (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

While students are completing a BA degree in sociology, they may also complete some of the requirements for an MA degree in sociology by participating in the BA/MA program using the following guidelines:

1. The student must apply and be accepted for participation in the BA/MA program prior to completion of the BA degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary.
2. Students should officially declare their intent to complete this program by their junior year and apply to the graduate program during the semester they intend to graduate with their BA.
3. Up to 12 semester hours of graduate-level course work may be taken as an undergraduate and applied toward the MA degree. With prior

approval, these courses may also be applied toward the Sociology BA (p. 657).

4. Students must apply to and complete the MA in Sociology (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/sociology/sociology-ma/>) requirements.
5. Students must complete a minimum of 32 SOCY credit hours.
6. Students must complete a minimum of 16 upper-division (400-level and above) with no more than 12 graduate (5000-level and above) SOCY credit hours.
7. Students must earn a minimum grade of C- (1.7) in all undergraduate major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 2.0. Students must earn a minimum grade of B (3.0) in all graduate courses taken at CU Denver. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
8. Students must complete a minimum of 13 SOCY credit hours and all graduate level coursework with CU Denver faculty.

Program Allowances and Restrictions

1. The maximum number of hours allowed to be applied to the BA in Sociology is 56.

Required Undergraduate Courses

Code	Title	Hours
<i>Take all of the following required courses</i>		<i>20</i>
SOCY 1001	Understanding the Social World	3
SOCY 2001	Inequalities in Social World	3
SOCY 3115	Quantitative Methods & Analysis	4
SOCY 3119	Qualitative Methods	4
SOCY 3140	Sociological Theory	3
SOCY 5000	Professional Seminar: Sociological Inquiry	3

Electives

Code	Title	Hours
<i>Take a minimum of 12 and a maximum of 36 SOCY elective credit hours.</i>		<i>12</i>
<i>At least 3 credit hours must be completed at 4000-level or higher. A maximum of 9 credit hours may be taken at the graduate level.</i>		
SOCY 1011	From Killer Apps to Killer Bots: Technology and Social Change	3
SOCY 2440	Deviance and Social Control	3
SOCY 2462	Introduction to Social Psychology	3
SOCY 3001	Urban Sociology	3
SOCY 3010	Sociology of Human Sexuality	3
SOCY 3020	Race and Ethnicity in the U.S.	3
SOCY 3040	Drugs, Alcohol & Society	3
SOCY 3050	Sociology of Education	3
SOCY 3080	Sex and Gender	3
SOCY 3297	Social History of Asian Americans	3
SOCY 3300	Social Problems	3

Sociology Minor

Introduction

Please click here (p. 651) to see Sociology department information.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with

their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This program is offered on-campus and online.

Declaring This Minor

- Please consult with College of Liberal Arts and Sciences (CLAS) Advising.
- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 SOCY credit hours.
2. Students must complete a minimum of 6 upper-division (3000-level and above) SOCY credit hours.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 SOCY credit hours with CU Denver faculty.

Program Allowances and Restrictions

- Students may count up to 9 semester credits of independent study or internship coursework toward the Sociology minor.

Required Courses

Code	Title	Hours
<i>Take the following</i>		3
SOCY 1001	Understanding the Social World	3

Code	Title	Hours
<i>Take one of the following</i>		3-4
SOCY 2001	Inequalities in Social World	
SOCY 3115	Quantitative Methods & Analysis	
SOCY 3119	Qualitative Methods	
SOCY 3140	Sociological Theory	

Sociology Electives

Code	Title	Hours
<i>Take nine additional credit hours of Sociology electives</i>		9
SOCY 1011	From Killer Apps to Killer Bots: Technology and Social Change	3

SOCY 2001	Inequalities in Social World	3
SOCY 2440	Deviance and Social Control	3
SOCY 2462	Introduction to Social Psychology	3
SOCY 3001	Urban Sociology	3
SOCY 3010	Sociology of Human Sexuality	3
SOCY 3020	Race and Ethnicity in the U.S.	3

Criminology Certificate

Introduction

Please click here (p. 651) to see Sociology department information.

Crime and society's responses to it represent core concerns for social scientists, policy makers, civic leaders, community organizations, and citizens across the globe. Criminology is the field of study dedicated to understanding crime as a social phenomenon. Criminologists study the social construction of laws, nature and causes of crime, reactions to the breaking of laws, and the prevention, control and treatment of crime. The Department of Sociology's Criminology Certificate offers an essential foundation for students pursuing careers in criminal justice, victim and community services, criminal law, and non-profit organizations in local and international contexts. The certificate also prepares interested students for law school and graduate programs in sociology and criminology. Students may ultimately use this training to conduct social research on crime, influence public policy, and inform government decisions about crime and law.

Upon successful completion of the certificate, students will:

- Understand the theoretical explanations for the social and behavioral causes of crime and crime reduction
- Possess a fundamental understanding of the criminal-legal and political institutions responsible for crime control and policy
- Be familiar with current trends in criminological thought, research, and activism
- Be able to apply the technical skills of their methodological training to conduct crime analyses and outcomes assessments for programs aimed at crime prevention
- Engage in original research projects involving criminological topics

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus or online program.

Declaring This Certificate

- **Eligibility:** While housed in Sociology, criminology is in fact a multidisciplinary field that draws from diverse liberal arts fields, including Psychology, Political Science, Communications, History, Philosophy, among others. Thus, CU Denver undergraduate students in any discipline can enroll in the certificate program. The certificate is also available to non-degree-seeking students who already have earned a BA or BS degree, either at CU Denver or elsewhere.

- Application procedures: Students are encouraged to apply for the Criminology Certificate at any point in their undergraduate studies. To apply, students should print and attach a completed Criminology Certificate Application to an unofficial transcript. These documents should be submitted to the Criminology Certificate Administrator. Once the application is approved, students will be contacted about their acceptance into the program.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 15 credit hours from the approved courses below.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all credits applied to the certificate at CU Denver chosen from the approved courses below. (If students have completed a course required for the certificate elsewhere, they may add the needed credits in the form of additional elective credits drawn from the approved elective courses.)

Certificate Restrictions, Allowances and Recommendations

1. The certificate will be awarded the semester in which the student completes all required courses for the certificate.

Required Courses

Code	Title	Hours
<i>Take the following</i>		9-11
SOCY 3490	Criminology	3
SOCY 3115 & SOCY 3119	Quantitative Methods & Analysis and Qualitative Methods ¹	8

- ¹ Students may take two approved methods courses in the student's major discipline, one on quantitative methods and one on qualitative methods: e.g. PSYC 2090 Statistics and Research Methods, PSYC 3090 Research Methods in Psychology, PSCI 3011 Research Methods, PHIL 3440 Introduction to Symbolic Logic, PHIL 2441 Logic, Language and Scientific Reasoning, ECON 3801 Introduction to Mathematical Economics, ECON 3811 Statistics with Computer Applications, GEOG 2080 Introduction to Mapping and Map Analysis, GEOG 4080 Introduction to GIS. Questions about eligible methods course substitutions should be directed to the criminology certificate administrator.

Elective Courses

Code	Title	Hours
<i>Take two of the following</i>		6
ANTH 4090	Drug Syndemic	3
COMM 4040	Communication, Prisons, and Social Justice ¹	3
COMM 4680	Mass Media Law And Policy	3
ECON 3400	Economics of Sex and Drugs ²	3
ETST 3704	Culture, Racism and Alienation	3
HIST 3231	Famous U.S. Trials	3
HIST 4308	Crime, Policing, and Justice in American History	3
PHIL 3280	War and Morality	3
PHIL 4260	Philosophy of Law	3
PHIL 4812	Special Topics in Philosophy	3
PSCI 3034	Race, Gender, Law and Public Policy	3
PSCI 4185	Corruption in the U.S. and Abroad ³	3
PSCI 4427	Law, Politics and Justice	3
PSCI 4807	Political Violence	3
PSYC 3265	Drugs, Brain and Behavior	3
PSYC 3612	Domestic Abuse	3
SOCY 2440	Deviance and Social Control	3
SOCY 3040	Drugs, Alcohol & Society	3
SOCY 4340	Juvenile Delinquency	3
SOCY 4460	Hate Groups and Group Violence	3
SOCY 4590	Crime, Justice, and the City	3
SOCY 4700	Sociology of Law	3
SOCY 4780	Violence in Relationships	3

¹ Prerequisite: COMM 2020 Communication, Citizenship, and Social Justice, or instructor consent

² Prerequisite: ECON 2022 Principles of Economics: Microeconomics

³ Prerequisite: PSCI 1001 Introduction to Political Science: The Quest for Freedom and Justice or PSCI 3022 Political Systems of the World

Families and Social Welfare Certificate Introduction

Please click here (p. 651) to see Sociology department information.

Families play a significant part in individuals' lives and society. In sociology, one approach is to view families as a small group, focusing on relational processes like support, socialization, conflict, and intimacy that constitute interactions among family members. Another approach views the family as a major social institution that interacts closely with other institutions including those affecting education, law, healthcare, religion, the economy, criminal justice, and welfare. The family-in its varied and diverse forms-is also key to understanding how inequality is experienced and reproduced in society, as substantial responsibility for caring, nurturing, and raising others is delegated to families. The interplay of these multiple levels-the micro or interpersonal, the meso or institutional, and the macro or structural-also interest sociologists, as

individuals influence social structures and institutions, and the latter, in turn, affect family interactions and relationships. This certificate provides students a foundation for understanding the complex role of families and family members at multiple levels, as well as the social systems and organizations responsible for supporting families and individuals. The content and methods courses will prepare students for direct service positions working with individuals and families (e.g., human and social services), or research, policy or advocacy positions addressing family issues (e.g., housing, violence and abuse, parenting, social welfare). Students earning the certificate also will be well-positioned to pursue advanced degrees in social work, public health, counseling, law, sociology, or related disciplines.

Upon successful completion of the certificate, students will:

- Recognize the diversity of family structures within and across cultures
- Understand the theoretical perspectives explaining family behavior and relationships, and those addressing differences in the institution of the family across cultures and over time
- Be familiar with current trends in family structure, and recent research on family functioning and well-being, and how family research informs advocacy and policy work, and social welfare programs
- Be able to apply the technical skills of their methodological training to conduct analyses about families and family life, and outcomes assessments for social welfare programs aimed at helping families
- Engage in original research projects involving family-related issues

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Once the application is approved, students will be contacted about their acceptance into the program.

General Requirements

Click here (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 15 credit hours from the approved courses below.
2. Students must complete a minimum of 6 upper-division (3000-level and above) credit hours chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all 15 credits applied to the certificate at CU Denver chosen from the approved courses below. (If students have completed a course required for the certificate elsewhere, they may add the needed credits in the form of additional elective credits drawn from the approved elective courses.)

Certificate Restrictions, Allowances and Recommendations

1. The certificate will be awarded the semester in which the student completes all required courses for the certificate.

Required Courses

Code	Title	Hours
<i>Take the following</i>		<i>9-11</i>
SOCY 3700	Families and Society	3
SOCY 3115 & SOCY 3119	Quantitative Methods & Analysis and Qualitative Methods ¹	8

¹ Students may take two approved methods courses in the student's major discipline, one on quantitative methods and one on qualitative methods: e.g. PSYC 2090 Statistics and Research Methods, PSYC 3090 Research Methods in Psychology, PSCI 3011 Research Methods, PHIL 3440 Introduction to Symbolic Logic, PHIL 2441 Logic, Language and Scientific Reasoning, ECON 3801 Introduction to Mathematical Economics, ECON 3811 Statistics with Computer Applications, GEOG 2080 Introduction to Mapping and Map Analysis, GEOG 4080 Introduction to GIS. Questions about eligible methods course substitutions should be directed to the families and social welfare certificate administrator.

Elective Courses

Code	Title	Hours
<i>Take two of the following</i>		<i>6</i>
CHIN 1000	China and the Chinese	3
COMM 1041	Interpersonal Communication	3
COMM 3275	Family Communication	3
COMM 4262	Mediation	3
ECON 1010	Economics of Social Issues	3
ECON 3100	Economics of Race and Gender	3
ECON 4210	Public Finance	3

ETST 3125	Multiracial Families and Communities	3
ETST 3230	African American Family	3
HIST 3488	Tudor-Stuart England	3
HIST 4219	Depression, Affluence and Anxiety: U.S. History, 1929 to the Present	3
HIST 4222	U.S. Society and Thought to 1860	3
HIST 4223	U.S. Society and Thought Since 1860	3
HIST 4303	Sex and Gender in Modern Britain	3
HIST 4492	United States History, 1919-1945	3
HIST 4493	United States History, 1945-1973	3
HIST 4494	Red and Blue America: U.S. History, 1973-Present	3
PHIL 3200	Social and Political Philosophy	3
PSCI 4009	Politics of the Budgetary Process	3
PSCI 4024	State Politics: Focus Colorado	3
PSCI 4084	Local Government and Administration	3
PSCI 4085	Comparative Governance: Environment and Society	3
PSYC 3205	Human Development I: Child Psychology ¹	3
PSYC 3215	Human Development II: Adolescence and Adulthood ²	3
PSYC 3235	Human Sexuality ¹	3
PSYC 3405	Family Psychology ¹	3
PSYC 4485	Psychology of Cultural Diversity	3
SOCY 3010	Sociology of Human Sexuality	3
SOCY 3080	Sex and Gender	3
SOCY 4270	Social Meanings of Reproduction	3
SOCY 4290	Aging, Society and Social Policy	3
SOCY 4640	Sociology of Childhood and Adolescence	3
SOCY 4780	Violence in Relationships	3

¹ Prerequisite: PSYC 1000 Introduction to Psychology I, PSYC 1005 Introduction to Psychology II

² Prerequisite: PSYC 1000 Introduction to Psychology I, PSYC 1005 Introduction to Psychology II or PSYC 3205 Human Development I: Child Psychology

Sociology of Health and Medicine Certificate

Introduction

Please click here (p. 651) to see Sociology department information.

Enhancing the health and quality of life for individuals and communities are central goals to societies the world over. Medical sociology is a subfield devoted to the study of population health, health care systems and policy, and the social dimensions of illness and healing. Medical sociologists study the causes of health inequalities, social constructions of health and illness, origins of medical authority, doctor-patient relationships, community influences on health, and the social forces that affect policy. The Sociology Department's Sociology of Health and Medicine Certificate provides training in the core research methodologies

and theories of medical sociology, examining individual experience, institutional structures, laws and policies that affect health, and broader systems of inequality that lead to unequal rates of illness and access to care. This certificate provides depth of training in these areas and is ideal for students interested in graduate-level study and social research on health and medicine as well as those interested in careers in public health, health care services, and non-profit organizations.

Upon successful completion of the certificate, students will:

- Articulate the central explanations for historical shifts in disease, including neighborhood effects and behaviors that may increase the risk of disease and mortality
- Identify social factors that contribute to population health inequalities, including race, ethnicity, gender, class, immigration status, sexuality, or disability
- Understand the social influences that shape medical authority, knowledge, and patient experiences with illness and treatment
- Be able to use different methodologies to understand the social aspects of health and medicine
- Know how to conduct original research, analyze policy, and evaluate community needs for organizations devoted to improving population health

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their faculty advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

This is an on-campus or online program.

Declaring This Certificate

- **Eligibility:** While housed in Sociology, the study of health and medical issues is in fact a multidisciplinary field that draws from diverse liberal arts fields, including Anthropology, Communications, Psychology, and History, among others. Thus, CU Denver undergraduate students in any discipline can enroll in the certificate program. This certificate is also available to non-degree-seeking students who already have earned a BA or BS degree, either at CU Denver or elsewhere.
- **Application procedures:** Students are encouraged to apply for the Sociology of Health and Medicine Certificate at any point in their undergraduate studies. To apply, students should print and attach a completed the Sociology of Health and Medicine Certificate Application to an unofficial transcript. These documents should be submitted to the Sociology of Health and Medicine Certificate Administrator. Once the application is approved, students will be contacted about their acceptance into the program.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

• Click here (p. 93) for information about Academic Policies.

Program Requirements

- 1. Students must complete a minimum of 15 credit hours from the approved courses below.
- 2. Students must complete a minimum of 6 upper-division (3000-level and above) SOCY credit hours.
- 3. Students must earn a minimum grade of C- (1.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
- 4. Students must complete all 15 credits applied to the certificate at CU Denver chosen from the approved courses below. (If students have completed a course required for the certificate elsewhere, they may add the needed credits in the form of additional elective credits drawn from the approved elective courses.)

Certificate Restrictions, Allowances and Recommendations

- 1. The certificate will be awarded the semester in which the student completes all required courses for the certificate.

Sustainability

Director: David Knochel
Office: North Classroom 3016 D
Telephone: 303-315-7534
Email: david.knochel@ucdenver.edu

Overview

Questions of sustainability are currently among the most important facing humankind and are receiving tremendous attention in the media. Because issues of sustainability do not arise from single causes, nor can solutions be developed from within narrow disciplinary frameworks, a multidisciplinary perspective is not only desirable but necessary to identify and understand problems, and create, evaluate and implement solutions.

Specializations in this critical area of study include: health and the environment, sustainable ecology, environmental ethics, environmental policymaking and policy analysis, institutional behavior, community-based and participatory approaches to sustainable development and conservation, environmental justice, sustainable food production and critical consumerism. The sustainability minor offers a holistic approach to development and daily living, which demands scientific, economic, environmental and social perspectives to understand and implement actions that can inform the public, business, industry, government and service organizations on how their activities affect the environment.

Click here (p. 667) to learn about the requirements for the Minor in Sustainability.

Programs Offered

- Sustainability Minor (p. 667)

Faculty

Professors:

Stephen Koester, Anthropology
Diana F. Tomback, Integrative Biology

Associate Professors:

Steven R. Beckman, Economics
John Brett, Anthropology
Greg Cronin, Integrative Biology
Larry Erbert, Communication
Randall P. Tagg, Physics
Deborah S. K. Thomas, Geography
John W. Wyckoff, Environmental Sciences

Assistant Professors:

Laurel Hartley, Integrative Biology
Rafael Moreno-Sanchez, Geography
Bryan S. Wee, Geography

Sustainability (SUST)

SUST 3010 - Sustainability: Past, Present, and Future (3 Credits)

This course draws on theoretical perspectives to critically analyze contemporary environmental issues across ecological, sociocultural, historical, political and economic contexts. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

SUST 3011 - Toward a Sustainable Future (3 Credits)

This is the second of a two-course sequence that examines the interrelations among the historical, political, cultural, ecological, and economic aspects of contemporary environmental issues. SUST II provides students with theoretical perspectives on sustainability through a series of current, problem-oriented case studies. Note: this course assumes that students have completed 1 Natural Science Core course and 1 Social Science Core course. Max hours: 3 Credits.

Grading Basis: Letter Grade

SUST 3840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

SUST 3939 - Internship (1-3 Credits)

This course will provide internships with agencies, businesses and programs involved in initiatives aimed at promoting a sustainable future. Internships could include work with concerns involved in addressing specific environmental issues or with projects aimed at raising awareness of issues related to sustainability. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

SUST 4840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

SUST 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

SUST 4960 - Capstone in Sustainability (3 Credits)

As the culmination of the Sustainability Minor, this course examines current research practices in sustainability and sustainability-related fields. Students work in teams to complete a sustainability/sustainability-related research paper and poster and present it to the campus community. Note: Topics variable depending on region under study, student interest, and faculty specialty. Prereq: SUST 3011. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: SUST 3011

SUST 4995 - Global Study Topics (1-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Sustainability Minor

Introduction

Please click here (p. 666) to see Sustainability department information.

The sustainability minor is interdisciplinary, drawing on the expertise across CLAS departments: anthropology, biology, chemistry, communication, economics, environmental sciences, geography, geology, history, economics, philosophy, physics and political science. The core

courses are taught by a faculty team who will present sustainability concepts from socio-ecological and systems perspectives.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Please see your advisor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a total of 18 credit hours chosen from the approved courses.
2. Students must complete a minimum of 12 upper-division (3000-level and above) credit hours in the minor, from the approved courses.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.5. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty chosen from the approved courses below.

Program Restrictions, Allowances and Recommendations

1. Students should consult with the Sustainability advisor before registering for any courses applicable toward the minor. *Graduate-level courses and cross-lists may be used with prior consent from the advisor.
2. Credits counted for another major or minor program can be counted toward the Sustainability Minor with approval from the advisor, though no course may be used to fulfill more than two graduation requirements.

Required Courses

Code	Title	Hours
Take the following		9
ENVS 1342	Environment, Society and Sustainability	3

SUST 3010	Sustainability: Past, Present, and Future	3

Women's and Gender Studies

Director: Sarah Hagelin (English)

Graduate Advisor: Margaret Woodhull (Humanities)

Office: 1050 9th Street, #102

Telephone: 303-556-5835

Overview

Women's and Gender Studies (WGST) is an interdisciplinary program that focuses on the centrality of gender and sexuality to understanding our past and present worlds. Students and faculty probe assumptions about men and women and question structures of inequality as they play out in local and global contexts. Through a study of gender and sexuality, we expand our thinking about other relations of power, such as race, class, ethnicity, nationality and physical ability. WGST fosters connections with the local community and promotes advocacy of human rights and social justice.

Undergraduate Information

Click here (p. 673) to learn about the requirements for the Minor in Women's and Gender Studies.

Individually Structured Major

Students interested in a major in Women's and Gender Studies may develop one through the Individually Structured Major (ISM). The ISM is an interdisciplinary major based on an individual contract rather than a preset list of courses. By choosing an ISM, students can pursue their interests in WGST across a variety of departments. For more information on an ISM in Women's and Gender Studies, contact Associate Dean

Marjorie Levine-Clark and see the Individually Structured Major (p. 468) section of this catalog.

Graduate Information

Please go to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/womens-gender-studies/>) catalog to read about our graduate programs.

Women Studies (WGST)

WGST 1050 - Introduction to Women's and Gender Studies (3 Credits)

This course provides an introduction to key concepts, themes and approaches to the interdisciplinary field of women's and gender studies. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

WGST 2900 - Smart Girl Leadership Training and Practicum (3 Credits)

Provides leadership and mentoring training, and a practicum in which UCD students mentor teenagers in their community or school settings. Following completion of the training, students work as near-peer mentors and coaches with groups of teenage girls in the Denver community and apply the skills learned in their training. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

WGST 3010 - Sociology of Human Sexuality (3 Credits)

Increases the understanding of differences in views of sexuality, specifically the link between sex and reproduction and its role as the motivation for gender roles and sex acts. Explores the history of sexuality, cross-cultural studies and primate modeling. Cross-listed with SOCY 3010. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 3020 - Gender, Sexuality and Race in American Popular Culture (3 Credits)

This course explores the impact of popular culture on the lived experience of diverse women and men in America. Students will examine how cultural media (including film, television, print ads, music & digital games) can both reproduce and challenge existing structural inequalities. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

WGST 3080 - Sex and Gender (3 Credits)

Causes and consequences of sex role differentiation at the individual, group and societal levels. Current issues related to changing norms and values concerning gender in modern society are examined. Cross-listed with SOCY 3080. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 3343 - Women & Gender in US History (3 Credits)

This course will explore women and gender as drivers of US history. From politics to popular culture, jobs to sexual empowerment, civil rights to economic restructuring, we will use gender as a lens to re-envision familiar stories about American history. Cross-listed with WGST 5343, HIST 3343, and HIST 5343. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 3450 - Contemporary Women Writers (3 Credits)

Examines how women write about a specific theme, such as home, work, family, the "other," as well as how women's writing may differ from men's. Theme and genre vary. Prereq: sophomore standing or higher. Cross-listed with ENGL 3450. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Sophomore standing or higher.

WGST 3700 - Families and Society (3 Credits)

This course explores multiple dimensions of family as a social institution. Using a critical approach, we examine historical, cultural, and political views about families. We consider multiple forms of contemporary families, discuss the many issues facing families, and study how families and family life have become politicized. Cross-listed with SOCY 3700. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 3840 - Independent Study: WGST (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

WGST 3939 - Internship (1-3 Credits)

Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Prereq: Students must have junior standing and at least a 2.75 GPA and must work with Experiential Learning Center advising to complete a course contract and gain approval. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: Junior standing or higher and at least a 2.75 cumulative GPA

WGST 4010 - Special Topics in Women's and Gender Studies (1-3 Credits)

Examines current topics in the field of Women's studies and Gender studies. Topics vary from term to term. May be repeated as long as the topic is distinct and different from courses student has already received credit for. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

WGST 4150 - Gender Politics in the Middle East: Beyond Orientalism & Islamism (3 Credits)

This course is about Middle Eastern women's subjectivity and various forms of agency. It explores the nexus of domestic, regional and international forces that shapes the lives of Middle Eastern women, in particular in the Algerian, Egyptian, Iranian, Israeli and Palestinian contexts. Far from being silent observers of the contests among these forces, as is often assumed, Middle Eastern women have been active actors in the public arena since the 19th century colonial encounter and the importation of the modern state to the region using an array of means to make their voices heard. Theirs were often more militant than those of their countrymen. The course is divided into two parts.

The first part provides an overview of the theoretical notions discussed such as Orientalism, agency, colonialism and post-colonialism. Related to this theoretical section is a historical overview that is necessary to the understanding of the contemporary conditions of Middle Eastern women and the continuities and changes between past and present. The second part covers pressing topics in the lives of Middle Eastern women in the post-independence era such as the rise of Political Islam, the global trend of democratization, war and occupation. The emphasis in this section is on women as active participants in the debates surrounding these issues, rather than as objects of them. The readings assigned include both texts written by scholars from the region and by others from without. They provide analyses of the contexts within which Middle Eastern women's struggles take place. In addition, students will be exposed to materials produced by Middle Eastern women activists that express their own opinions and views in order to avoid misrepresentation and to reflect the diversity among them. Cross-listed with PSCI 4150. Max hours: 3 Credits. Grading Basis: Letter Grade

WGST 4215 - Women's Rights, Human Rights: Global Perspectives (3 Credits)

Explores the global feminist movement's campaign to "engender" human rights. Examination of women's human-rights issues and the critique of this campaign as representing cultural imperialism. Prereq: 6 hours of political science or permission of instructor. Cross-listed with PSCI 4215. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4225 - Urban America: Colonial Times to the Present (3 Credits)
 Rise of the American city from colonial times to present. Major emphasis on the process of urbanization since 1840: town promotion, the industrial city, immigration, boss politics and reform, urban technology, transportation systems, minorities, city planning, and the future of urban America. Cross-listed with HIST 4225, HIST 5225, WGST 5225, GEOG 4625. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4230 - Women in the West (3 Credits)
 Focuses on ways in which women, from the mid-19th century through the mid-20th century, of different races, classes, and ethnic background, have interacted and been active participants in the development of the western states. Cross-listed with HIST 4230, HIST 5230 and WGST 5230. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4248 - Gender, Globalization and Development (3 Credits)
 Analyzes the effects of globalization on the gendered processes of international development and strategies to empower women to achieve gender justice across race, class and national divisions. Cross-listed with PSCI 4248/5245 and WGST 5248. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4270 - Social Meanings of Reproduction (3 Credits)
 Reproduction involves more than biological processes, assuming symbolic, political, and ideological meanings. This course examines contested meanings of reproduction, including how people experience reproduction, controversies over who should reproduce (and under what circumstances), and how public policy mediates these conflicts. Cross-listed with SOCY 4270, SOCY 5270 and WGST 5270. Prereq: junior standing or higher or permission of instructor. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Prereq: junior standing or higher

WGST 4303 - Sex and Gender in Modern Britain (3 Credits)
 Examines modern British history by focusing on sex and gender as central aspects in people's lives. Considers the ways gender shapes the realms of politics, economics, society and culture in Britain from the 18th century to the present. Cross-listed with HIST 4303/5303 and WGST 5303. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4305 - Women of Color Feminisms (3 Credits)
 This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the writing, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people of color, especially the politics of identity and representation; structural oppressions and violences; and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, (as well as how these systems of domination intersect), but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with WGST 5305, ETST 4305 and ETST 5305. Max hours: 3 Credits
 Grading Basis: Letter Grade

WGST 4306 - Survey of Feminist Thought (3 Credits)
 Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women's characteristics, experiences, and capabilities have been understood and challenged. Cross-listed with ENGL 4306, 5306, HIST 4306, 5306, WGST 5306. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4307 - History of Sexuality (3 Credits)
 Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political and economic history. Cross-listed with HIST 4307/5307 and WGST 5307. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4308 - Contemporary Feminist Thought (3 Credits)
 This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Cross-listed with ENGL 4308, ENGL 5308, PHIL 4308, PHIL 5308, WGST 5308. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4345 - Gender, Science, and Medicine: 1600 to the Present (3 Credits)
 Examines the ways science and medicine have both shaped and been shaped by ideas about gender. Pays particular attention to the relationship between scientific/medical ideas about the sexes and the social organization of gender. Cross-listed with HIST 4345/5345 and WGST 5345. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4420 - Goddess Traditions (3 Credits)
 Explores the many forms which Goddesses have assumed through history, including the Neolithic Great Mother and her heiresses in the ancient Mediterranean cultures, such as: Isis, Ishtar, Demeter, Hecate, Aphrodite, Artemis, Athena and others, and their parallels in India. Goddess traditions have encompassed a full spectrum from virgins to Great Mothers to dark underworld Goddesses of death and destruction. Cross-listed with RLST 4420/5420 and WGST 5420. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4500 - Feminist Philosophy (3 Credits)
 Seminar on key debates & figures in historical & contemporary feminist philosophy. Topics may include: rights, embodiment, gender, sexuality, race, reason, & violence. Figures may include: Wollstonecraft, Stanton, Beauvoir, Judith Butler, and bell hooks. Crosslisted with WGST 5500, PHIL 4500 & 5500.
 Grading Basis: Letter Grade

WGST 4510 - Whores and Saints: Medieval Women (3 Credits)
 Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Prereq: Nine hours of literature courses or instructor permission. Cross-listed with ENGL 4510/5510, RLST 4730/5730 and WGST 5510. Max hours: 3 Credits.
 Grading Basis: Letter Grade

WGST 4511 - French Women Writers (3 Credits)

Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Cross-listed with FREN 4510/5510 and WGST 5511. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4540 - Race, Class, and Gender in Spanish Golden Age Literature (3 Credits)

Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq or Coreq: SPAN 3101. Cross-listed with SPAN 4340/5340 and WGST 5540. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or Coreq: SPAN 3101

WGST 4555 - International Women's Resistance (3 Credits)

Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Cross-listed with PSCI 4555/5555, ETST 4555 and WGST 5555. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4564 - Gender and Politics (3 Credits)

Analysis of the political experience of women and of strategies for change. Emphasis on the U.S. Cross-listed with PSCI 4564. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4610 - Communication, Media, and Sex (3 Credits)

Develop the tools to think critically about representations of sexuality and to understand the social construction of sexuality, the role of sexual representations in mass media and society, and the complex relationships between sexual acts, identities, and desires. Cross-listed with COMM 4610. Restriction: Restricted to Junior, Senior, or permission of instructor. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

WGST 4660 - Queer Media Studies (3 Credits)

Queer Media Studies is a discussion-based, writing-intensive seminar that examines the history and development of U.S. LGBTQI media by focusing on media texts and production, sociocultural context, and media reception. Cross-listed with COMM 4660, COMM 5660, WGST 5660. Restriction: Restricted to students with junior standing or higher or permission from the instructor. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

WGST 4710 - Women and Religion (3 Credits)

A sociological exploration of the contemporary roles of women in religion. Course examines American and world religious groups with an eye to women's involvement. Considers how women have changed these traditions as they take on leadership roles and discusses the tensions that arise within these traditions as a result of their expanded participation. Cross-listed with HUMN 5710, SSCI 4710/5710, WGST 5710, RLST 4710/5710. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4780 - Violence in Relationships (3 Credits)

Course focuses on the study of violence among individuals involved in intimate relationships; factors in society such as norms, laws and institutions that are related to creating violence among intimates; and social policies, prevention, intervention and treatment programs. Cross-listed with SOCY 4780, SOCY 5780 and WGST 5780. Prereq: junior standing or higher or permission of instructor. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

WGST 4827 - Women and the Law (3 Credits)

Examines the role of the courts in the development of public policy toward women; how the legal system affects the economic power, family roles, safety and political participation of women. Cross-listed with PSCI 4827 and ETST 4827. Max hours: 3 Credits.

Grading Basis: Letter Grade

WGST 4840 - Independent Study (1-3 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Prereq: permission of instructor. Repeatable.

Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

WGST 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS undergraduate advising office for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

WGST 4933 - Philosophy of Eros (3 Credits)

What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato's dialogues-such as Lysis, Symposium and Republic-and then by reading texts from Sigmund Freud, Michael Foucault and others. Cross-listed with PHIL 4933/5933, WGST 5933, SSCI 5933 and HUMN 5933. Max hours: 3 Credits.

Grading Basis: Letter Grade

Women's and Gender Studies Minor

Introduction

Please click [here](#) (p. 670) to see Women's and Gender Studies department information.

The Women's and Gender Studies Minor gives students the opportunity to explore gender issues in the humanities and social sciences.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

For more information about this minor, contact the Women's and Gender Studies Director, Sarah Hagelin, 303-556-4529.

Program Delivery

- This is an on-campus program.

Declaring This Minor

- Click here (p. 63) to go to information about declaring a minor.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- CU Denver General Graduation Requirements (p. 109)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 18 WGST-related credit hours.
2. Students must complete a minimum of 12 upper-division (3000-level and above) credit hours in the minor, chosen from the approved courses below.
3. Students must earn a minimum grade of C- (1.7) in all minor courses taken at CU Denver and must achieve a minimum cumulative minor GPA of 2.0. All graded attempts in required and elective courses are calculated in the minor GPA. Students cannot complete minor or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 9 credit hours with CU Denver faculty chosen from the approved courses below.

Program Restrictions, Allowances and Recommendations

1. All courses for the minor must be approved by a WGST advisor. Students may double count up to six credits being applied to other graduation requirements (major, certificate or general education).
2. Students are strongly urged to take at least one course that focuses on international perspectives on women's and gender issues.
3. Students have the option to complete an internship working in the community around issues related to women and gender. The alternative to this is a WGST capstone course at the 4000 level.
4. Students who major in Sociology and complete the Gender and Society option will automatically earn a Women's and Gender Studies Minor

Required Course

Code	Title	Hours
Take the following		3
WGST 1050	Introduction to Women's and Gender Studies	3

Women's and Gender Studies Electives

Code	Title	Hours
Take 12 credits of WGST-related courses at the 3000-level or above.		12
Eligible courses include, but are not limited to:		
HUMANITIES		

PHIL 3500	Ideology and Culture: Racism and Sexism	3
WGST 3343	Women & Gender in US History	3
or HIST 3343	Women & Gender in US History	
WGST 3450	Contemporary Women Writers	3
or ENGL 3450	Contemporary Women Writers	
WGST 4010	Special Topics in Women's and Gender Studies	3
WGST 4225	Urban America: Colonial Times to the Present	3
or HIST 4225	Urban America: Colonial Times to the Present	
WGST 4230	Women in the West	3
or HIST 4230	Women in the West	
WGST 4303	Sex and Gender in Modern Britain	3
or HIST 4303	Sex and Gender in Modern Britain	
WGST/ENGL/ HIST 4306	Survey of Feminist Thought	3
WGST 4307	History of Sexuality	3
or HIST 4307	History of Sexuality	
WGST/ENGL/ PHIL 4308	Contemporary Feminist Thought	3
WGST 4345	Gender, Science, and Medicine: 1600 to the Present	3
or HIST 4345	Gender, Science, and Medicine: 1600 to the Present	
WGST 4420	Goddess Traditions	3
or RLST 4420	Goddess Traditions	
WGST 4500	Feminist Philosophy	3
or PHIL 4500	Feminist Philosophy

Dual Degrees

- Economics BA/Mathematics, BS - Dual Degree (p. 675)

Economics BA/Mathematics, BS - Dual Degree

Introduction

Please click here (p. 358) to see Economics department information or here (p. 520) for Mathematical and Statistical Sciences department information.

A solid training in the mathematical and statistical sciences is fundamental to optimally prepare economics students for graduate school. A dual degree in economics and mathematics will substantially increase program quality and career prospects for our students, as well as enhance the reputation of the economics program at CU Denver. Similarly, a solid training in quantitative and qualitative economic principles offers significant benefits to mathematics majors who seek industrial and/or consulting positions.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them

Program Delivery

- This is an on-campus program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- College of Liberal Arts & Sciences Graduation Requirements (p. 295)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 72 hours with a minimum of 30 ECON credit hours and a minimum of 39 MATH credit hours.
2. Students must complete a minimum of 27 upper division (3000-level and above) ECON credit hours and a minimum of 27 upper division (3000-level and above) MATH credit hours.
3. Students must earn a minimum grade of C- (1.7) in all major courses taken at CU Denver and must achieve a minimum cumulative GPA of 2.0 in ECON courses and a cumulative GPA of 2.25 in MATH courses. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as pass/fail.
4. Students must complete a minimum of 18 ECON credit hours including ECON 4811 Introduction to Econometrics, with CU Denver faculty. Once a student has enrolled at CU Denver, no more courses in the major can be taken outside the CU Denver Economics Department. This includes courses offered at Metropolitan State University. The department reserves the right to require a demonstration of competence for any core courses not taken from CU Denver faculty. Additionally, the Department of Mathematical and Statistical Sciences requires that at least 15 upper-division Mathematics credits must be taken at CU Denver.

Program Restrictions, Allowances and Recommendations

1. In addition to the CLAS residence requirements, the Economics Department requires that all courses other than ECON 2012 Principles of Economics: Macroeconomics and ECON 2022 Principles of Economics: Microeconomics require written department approval to be transferred in as satisfying major requirements.
2. A student who attempts the dual degree but who does not fulfill all requirements for the Mathematics BS will need to complete the requirements for the Economics BA as a stand-alone degree. A Mathematics elective will substitute for one of the six economics electives only if all requirements of the Mathematics major are met.

Required Courses

Economics

Code	Title	Hours
<i>Take all of the following Economics courses:</i>		<i>15</i>
ECON 2012	Principles of Economics: Macroeconomics	3
ECON 2022	Principles of Economics: Microeconomics	3
ECON 4071	Intermediate Microeconomic Theory	3
ECON 4081	Intermediate Macroeconomic Theory	3
ECON 4811	Introduction to Econometrics	3

Mathematics

Code	Title	Hours
<i>Take all of the following Mathematics courses:</i>		<i>30</i>
MATH 1401	Calculus I	4
MATH 2411	Calculus II	4
MATH 2421	Calculus III	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3191	Applied Linear Algebra	3
MATH 3200	Elementary Differential Equations	3
MATH 3382	Statistical Theory	3
MATH 4310	Introduction to Real Analysis I	3
MATH 4779	Math Clinic	3

Programming Requirements

Code	Title	Hours
<i>Take one of the following programming requirements:</i>		<i>3-4</i>
MATH 1376	Programming for Data Science	3
CSCI 1410 & CSCI 1411	Fundamentals of Computing and Fundamentals of Computing Laboratory	4

Electives

Economics

Code	Title	Hours
<i>Take six upper division level Economics elective courses or five Economics elective courses plus one Mathematics elective course from the list below.</i>		<i>15</i>

A minimum of four of these courses must be at the 4000-level.

ECON 3801 Introduction to Mathematical Economics and ECON 3811 Statistics with Computer Applications cannot be counted as electives.

One of the following approved Mathematics electives can be double counted as the sixth Economics elective.

ECON 3050	Decision Making	3
ECON 3100	Economics of Race and Gender	3
ECON 3300	Economics of Crime and Punishment	3
ECON 3366	Managerial Economics	3
ECON 3400	Economics of Sex and Drugs	3
ECON 3415	Issues in International Trade and Finance	3
ECON 3770	Issues in Economic Development	3
ECON 4001	Topics in Economics	3
ECON 4030	Data Analysis with SAS	3
ECON 4050	Special Economic Problems	3
ECON 4090	History of Economic Thought	3
ECON 4110	Money and Banking	3
ECON 4150	Economic Forecasting	3
ECON 4210	Public Finance	3
ECON 4240	Economic Policy Analysis	3
ECON 4310	Managerial Economics	3

Code	Title	Hours

Take four upper division level Mathematics elective courses or three Mathematics elective course plus one Economics elective course from the list of approved Economics electives below.

Excluding MATH 3195 Linear Algebra and Differential Equations, MATH 3511 Mathematics of Chemistry, MATH 3800 Probability and Statistics for Engineers, and MATH 4830 Applied Statistics.

One of the following approved Economics electives can be double counted as the fourth Mathematics elective.

ECON 4030	Data Analysis with SAS	3
ECON 4110	Money and Banking	3
ECON 4150	Economic Forecasting	3
ECON 4320	Financial Economics	3
ECON 4430	Economic Growth	3
ECON 4550	Game Theory and Economic Applications	3
ECON 4610	Labor Economics	3
ECON 4740	Industrial Organization	3
MATH 3041	Fundamental Mathematics: Algebra, Probability and Data Analysis	3
MATH 3210	Higher Geometry I	3
MATH 3301	Introduction to Optimization	3
MATH 3302	Simulation in Operations Research	3
MATH 3376	Data Wrangling & Visualization	3
MATH 3440	Introduction to Symbolic Logic	3
MATH 4010	History of Mathematics	3
MATH 4015	Capstone Course for Secondary Teachers	3
MATH 4027	Topics in Mathematics	3
MATH 4110	Theory of Numbers	3
MATH 4140	Introduction to Modern Algebra	3
MATH 4320	Introduction to Real Analysis II	3
MATH 4337	Intro to Statistical and Machine Learning	3
MATH 4387	Applied Regression Analysis	3

MATH 4388	Machine Learning Methods	3
MATH 4390	Game Theory	3
MATH 4394	Experimental Designs	3
MATH 4408	Applied Graph Theory	3
MATH 4409	Applied Combinatorics	3
MATH 4450	Complex Variables	3
MATH 4650	Numerical Analysis I	3
MATH 4660	Numerical Analysis II	3
MATH 4733	Partial Differential Equations	3
MATH 4791	Continuous Modeling	3
MATH 4792	Probabilistic Modeling	3
MATH 4793	Discrete Math Modeling	3
MATH 4794	Optimization Modeling	3
MATH 4810	Introduction to Probability	3
MATH 4820	Introduction to Mathematical Statistics	3
MATH 5350	Mathematical Theory of Interest	3

CLAS Interdisciplinary Certificates

- Allied and Professional Health Sciences Post Baccalaureate Certificate (p. 677)
- Civics, Public Policy and Equity (p. 681)
- Digital Studies Certificate (p. 682)
- Professional Skills Certificate (p. 684)

Allied and Professional Health Sciences Post Baccalaureate Certificate

Introduction

Please click here (p. 478) to see Integrative Biology Department information.

The health field offers job opportunities and rewarding careers. It is one of the fastest growing industries in the US and the Bureau of Labor Statistics has projected increasing demand and labor shortages for at least the next ten years. The CU Denver Post-Baccalaureate Allied and Professional Health Sciences Certificate was developed as an opportunity for the many students who already have a bachelor's degree and want to shift their career into this large and fast growing industry to improve employment opportunities and potential earnings.

In order to improve their position among many highly qualified applicants to health professions programs and for health science related jobs, we anticipate that many students will need to continue their higher education. The College of Liberal Arts and Sciences has developed a certificate that provides a broad foundation in STEM (Biology, Chemistry and Physics) and advanced health-oriented coursework that is essential

for both graduate and professional programs and the needs of the health industry.

Students who have already completed an undergraduate degree but need additional undergraduate pre-requisite courses to apply to health professions programs (including medicine, pharmacy, dentistry, nursing, lab technicians, health research jobs and more) can benefit from the CU Denver Post Baccalaureate Allied and Professional Health Sciences Certificate. CU Denver is well-known for preparing students for applications to health careers and acceptance to health professions programs. This certificate program offers high quality, rigorous preparatory classes and exceptional health careers advising including assistance with letters of evaluation, seminars on application processes, and assistance finding clinical, research, and community service experiences to enhance applications.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them. Exceptions and substitutions must be approved by the Director of the certificate.

Program Delivery

- This is an on-campus program.

Declaring This Certificate

When applying to CU Denver, students should select the Undergraduate Degree-Seeking option. After indicating that the student has or will have completed a bachelor’s degree, the applicant should be directed to a screen that allows selection into the Allied and Professional Health Sciences Certificate. After admission, students should meet with a Health Professions Advisor (NC 3002) to work collaboratively to develop a course plan that best meets their academic and career goals.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the certificate.

- Click here (p. 93) for information about Academic Policies

Certificate Requirements

1. Students must complete a total of 32 credit hours with a minimum of 15 credit hours from the approved courses at CU Denver.
2. Students must complete a minimum of 12 upper-division (3000-level and above) credit hours, from approved coursework.
3. Students must earn a minimum grade of C (2.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 2.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.

4. The 15 credit hours of approved courses must be completed at CU Denver. Other coursework (up to 17 credit hours) used as prerequisites or other courses applicable to the certificate program, may be taken at CU Denver or transferred from another university after evaluation and approval.

Program Restrictions, Allowances and Recommendations

1. All upper division level courses used to satisfy the requirements for the certificate must be completed at CU Denver.
2. Students may use prior/ transfer coursework to fulfill requirements and prerequisites, as long as departmental faculty evaluate the coursework and decide they are directly equivalent to the courses at CU Denver.
3. All courses used to satisfy the requirements for the certificate must be completed within a five-year period.
4. Individual courses used to earn the certificate may carry other prerequisites that must be met before enrolling.
5. Students must complete all of the following courses or demonstrate equivalent credit through transfer coursework taken within the last 10 years.
6. A prerequisite for any course must be transferred or completed at CU Denver before enrolling in that course.
7. Graduate level courses can substitute for their undergraduate counterparts with approval.
8. Specific requirements may exist pertaining to financial aid.
9. Students must already have earned a Bachelor’s degree to enroll for the certificate.
10. Students currently enrolled in Bachelor’s, Master’s or Doctoral degree programs are not eligible for the certificate.
11. Students who complete the certificate may not apply the courses used to earn the certificate toward a second degree, if they choose to return and seek a second degree at CU Denver.

Civics, Public Policy and Equity Introduction

This certificate is designed to help students from any disciplinary major develop competencies and skills regarding United States civics from diverse perspectives. The certificate provides students with many course options to complete introductory and advanced coursework tailored to their individual interests. Student demand for such a certificate will likely come from students who major in the social sciences, but also from students who have an interest in completing coursework in American civics, public policy, and equity from other disciplines. This certificate promotes civic engagement and participation in the political process.

Students will engage in the following focus areas:

Historical and Legal Context

Courses completed in this area facilitate the development of knowledge and skills related to the American founding, the United States Constitution, American political development, political actors and institutions, constitutional law and the legal system, and the rights and duties of citizenship, among others. Learning objectives for these courses vary depending on the department offering the course selections and the specific courses selected, but students should generally develop broad knowledge of historical and contemporary aspects of American political institutions and civic engagement. While many of these courses employ historical and/or legal approaches to the study of civics, additional or alternative approaches may also be utilized, such as analytical lenses that are theoretical or applied in nature. Courses typically emphasize critical thinking and written communication skills and may also involve independent or collaborative original research projects or experiential learning beyond the classroom.

Public Policy

Courses completed in this area facilitate the development of knowledge and skills pertaining to the formulation, analysis, and critique of public policy. Courses included in this category examine public policy from diverse perspectives using numerous methodological approaches. Individual courses may engage in the study of the primary actors, entrepreneurs, and institutions that formulate public policy, examine policy from a public administration perspective, and/or provide a focused analysis of policy within the context of a specific issue area, among others. Learning objectives for these courses vary depending on the department offering the course selections, but students should generally expect to engage in an immersive study of public policy as outlined in each course description.

Equity

Courses completed in this area facilitate the development of knowledge and skills regarding equity in politics and society. Topics of study may

include social movements, social justice, political reforms related to protected classes, criminal justice reform, societal inequalities, public goods, and responsible citizenship, among others. Courses may have a historical, contemporary, and/or futuristic focus and may approach the study of equity from theoretical, analytical, practical, critical, or aspirational perspectives, among others. Learning objectives for these courses vary depending on the department offering the course selections, but students should generally develop competencies in their particular area of study with each course addressing political or social equity in some meaningful capacity.

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery Declaring

This is an on-campus program.

Declaring This Certificate

All prospective students must contact Marjorie Levine-Clark, Associate Dean for Diversity, Outreach, and Initiatives, and the CLAS Advising Office to declare their interest and intent to complete the program.

Program Requirements

1. Students must complete a minimum of 12 credit hours, from approved coursework
2. Students must complete a minimum of 6 upper division (3000-level and above) credit hours, from approved coursework.
3. Students must earn a minimum grade of C (2.0) in all courses taken at CU Denver and must achieve a minimum cumulative GPA of 2.0. All graded attempts in required and elective courses are calculated in the GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all credit hours applying to the certificate with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must complete the specified number of courses from the designated certificate focus areas. Exceptions to the focus area distribution requirements are not permitted.
2. Courses completed in pursuance of the certificate may also count toward CU Denver major or minor requirements, however each course may count for a maximum of two graduation requirements.

Upon completion of this program, students will:

- develop critical thinking and written communication skills
- explain and analyze historical and contemporary aspects of American political institutions and civic engagement
- describe and examine the formulation, analysis, and critique of public policy
- discuss and evaluate how equity/inequity operates in politics and society

Digital Studies Certificate Introduction

From social media and mobile phones to the algorithms in self-driving cars, digital and information technologies are everywhere. The Digital Studies Certificate provides students with the opportunity to investigate the relationships between new communication technologies and society and to develop skills creating digital media messages and products.

Social sciences and humanities majors can use this certificate to develop and demonstrate their technical skills, while science and engineering students can use it to build expertise in understanding the social and cultural aspects of new technologies. Students from any CU Denver school or college who earn the Digital Studies Certificate will be able to demonstrate to a wide range of potential employers or graduate schools that they have both technical skills and the ability to critically analyze new media. Students who successfully complete the Digital Studies Certificate will be able to:

- Describe and analyze the relationships between digital media and their cultural, social, political, and ethical contexts
- Use digital media to communicate messages to a variety of audiences

- Use digital media to solve problems in a range of disciplines and situations
- Use digital media and related analytical skills as career-building tools

Program Delivery

- This is a hybrid program, with courses on-campus and online.

Declaring This Certificate

- Eligibility: CU Denver students in any discipline can enroll in the program at any point in their undergraduate studies.
- CLAS's Interdisciplinary Studies program sponsors the certificate, and the CLAS Director of Digital Initiatives will provide advising and administrative management.
- Application Procedures: Students are encouraged to apply for the Digital Studies Certificate at any point in their undergraduate studies. To apply, students should print and complete a Digital Studies Certificate Application and submit it to the CLAS Director of Digital Initiatives.

General Requirements

- Click [here](#) (p. 93) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 12 credits of required courses chosen from the approved courses in each cluster: 1 course (3 credits) from each of the 3 clusters (for a total of 9 credits), plus the remaining 3 credits from any one of the three clusters.
2. Students must complete a minimum of 6 upper division (3000-level and above) credits, taken from the approved courses below.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all credits applied to the certificate with CU Denver faculty.

Program Restriction, Allowances and Recommendations

1. The certificate will be awarded when a student graduates with the bachelor's degree.
2. Co-curricular requirement: Students must attend at least 3 Career Center sessions, which can include events, workshops, or 1-on-1 appointments.

Digital Studies Certificate Course Clusters

- **Theory and Analysis:** Courses in this cluster focus on theorizing, explaining, and describing the relationships between digital, media, and communication technologies and society. They enable students to critically assess and analyze digital media and information,

such as understanding the biases in seemingly neutral Google search results or examining how people use Twitter to build social movements

- **Digital Media Production:** Courses in this cluster focus on developing hands-on skills in the use of digital, media, and communication technologies. They provide opportunities for students to develop their skills with a variety of digital tools, such as digital photography, mapping, and social media management.
- **Integration:** Courses in this cluster bring together both understanding and using digital, media, and communication technologies.

Other courses may apply to each cluster with the approval of the Director of Digital Initiatives certificate advisor.

Theory and Analysis Cluster

Code	Title	Hours
<i>Take one</i>		3
ANTH 2400	Exploring Culture through Social Media	3
BUSN 6610 & ISMG 6180	Information Systems Strategy and Information Systems Strategy	6
COMM 2030	Digital Democracy	3
COMM 3650	Media and Society	3
COMM 4760/5760	New Media and Society	3
ENTP 6022	Digital Strategy for Entrepreneurs	3
GEOG 2080	Introduction to Mapping and Map Analysis	3
ISMG 2050	Introduction to Business Problem Solving	3
ISMG 3000	Technology In Business	3
MUSC 3700	Music and Entertainment Business in the Digital Age	3
PHIL 4920/5920	Philosophy of Media and Technology	3
INTE 5320	Games and Learning	3

Digital Media Production Cluster

Code	Title	Hours
<i>Take one</i>		3
COMM 2071	Media Writing Skills	3
COMM 2081	New Media Production and Management	3
ENGL 3084	Multimedia Composition	3
FINE 1810	PREDAC: 3D Foundations	3
FINE 1820	PREDAC: Animation Foundations	3
FINE 2155	Introduction to Digital Photography	3
FINE 2405	Introduction to Digital Design	3
GEOG 4080/5080	Introduction to GIS	3
GEOG 4081/5081	Cartography and Computer Mapping	3
INTE 5340	Learning with Digital Stories	3
INTE 5680	Producing Media for Learning	3
IWKS 2300/5350	Fundamentals of Computational Innovation	3
IWKS 3100/5170	3D Design, Computation and Prototyping	3

Integration Cluster

Code	Title	Hours
<i>Take one</i>		3
COMM 2051	Introduction to Strategic Communication	3
COMM 3660	Social Media for Social Change	3
COMM 4558/5558	Digital Health Narratives	3
ENGL 4190	Advanced Topics in Writing & Digital Studies	3
ENGL 5165	Literacy and Technology	3
HIST 3260/5260	Introduction to Digital Studies	3
INTE 5665	Learning with Social Media and Networking	3
INTE 5711	Creative Designs for Instructional Materials	3
IWKS 2100	Human-Centered Design, Innovation and Prototyping	3
IWKS 3180/5180	Inworks: Choose Your Own Adventure: Experiences in Design, Innovation and Prototyping	1-3
IWKS 3200/5200	Data Science for Innovators	3
IWKS 3700/5700	Innovation and Society	3
PUAD 4003	Effective Communication for Public Service	3

Elective

Code	Title	Hours
<i>Take one additional course from any one of the three course clusters.</i>		3

Professional Skills Certificate

Introduction

This certificate is designed for undergraduate students seeking to acquire and enhance diverse workplace skills that are highly valued by today's employers. Students will learn to communicate effectively, write persuasively, and develop proficiency in digital and media literacy or data literacy. Providing a strong foundation in communication skills, teamwork, critical thinking, and analytical writing, this certificate will help students cultivate success in the workplace.

On completion of this certificate, students will be able to:

- **Communicate their ideas** in a clear and organized manner.
- Use their **compositional and analytical skills** in a chosen professional writing field.
- Demonstrate proficiency in **digital and media literacy** or **data literacy**.
- Devise **problem-solving strategies** with the skills developed through the certificate.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their major advisor and CLAS advisor to confirm the best plans of study before finalizing them.

Program Delivery

- This is an on-campus program.

Declaring This Certificate

- All prospective students must contact Marjorie Levine-Clark (marjorie.levine-clark@ucdenver.edu), Associate Dean for Diversity, Outreach, and Initiatives, and the CLAS Advising Office (clas_advising@ucdenver.edu) to declare their interest and intent to complete the program.

Program Requirements

1. Students must complete a minimum of 12 credit hours, from approved coursework
2. Students must complete a minimum of 6 upper division (3000-level and above) credit hours, from approved coursework.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative GPA of 2.7. All graded attempts in required and elective courses are calculated in the GPA. Students cannot complete certificate or ancillary course requirements as pass/fail.
4. Students must complete all credit hours applying to the certificate with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must choose elective courses from at least two different disciplines.

Communication

Code	Title	Hours
<i>Take one Communication course</i>		3
COMM 2045	Workplace Communication	3
COMM 2050	Business and Professional Speaking	3
COMM 4240	Organizational Communication	3
COMM 4255	Negotiations and Bargaining	3
COMM 4270	Intercultural Communication	3

Writing

Code	Title	Hours
<i>Take one Writing course</i>		3
COMM 2071	Media Writing Skills	3
ENGL 3154	Technical Writing	3
ENGL 3416	Magazine Writing	3
ENGL 3170	Business Writing	3
ENGL 4280	Proposal and Grant Writing	3

Electives

Code	Title	Hours
Take two courses from one of the following groups: ¹		6
<i>Group 1: Digital and Media Literacy</i>		
COMM 2081	New Media Production and Management	3
COMM 3660	Social Media for Social Change	3
ETST 3272	Global Media	3

HIST 3260	Introduction to Digital Studies	3
INTE 2500	#Learning: Digital Spaces and Far Out Places	3
MKTG 3100	Marketing Research	3
<i>Group 2: Data Literacy</i>		
ECON 3811	Statistics with Computer Applications	4
ECON 4030	Data Analysis with SAS (prereq ECON 3811 or Math 2830)	3
IWKS 3200	Data Science for Innovators	3
ISMG 2050	Introduction to Business Problem Solving	3
MATH 2830	Introductory Statistics	3
MATH 4830	Applied Statistics (pre-req MATH 2830))	3

¹ Elective courses must be from different disciplines and may carry prerequisites that must be completed before enrolling.

Denver, CO 80217-3364

Overview

The School of Education & Human Development is a vibrant community of practicing educators and counselors, educational leaders and researchers who have a strong service ethic locally, nationally and globally and a dedication to excellence.

Mission

Leadership for Educational Equity

Prepare and inspire education and mental health leaders to have a profound impact in fostering student opportunity, achievement and success in urban and diverse communities.

Vision

A leading school of education providing national expertise on educational issues and socially-just solutions for urban and diverse communities. Through innovative research and partnerships, we strive to be passionate agents of change, inspiring upcoming generations to learn from the past and shape the future.

Our Role in the Community

We are committed to developing forward-thinking educators and counselors who have a deep sense of inquiry, a concern for pressing social problems, a great desire to live their lives purposefully, a passion for giving back to the community and the cultural competence needed to serve urban and diverse populations.

Diversity and Inclusion

At the School of Education & Human Development (SEHD), we believe strongly that all students-diverse in race, ethnicity, economic resources, language, fluency, abilities, geography, first-generation status, age, gender and sexual identities-deserve the opportunity to learn. To advance our mission and meet the changing interests of our local and global communities, the Office of Diversity and Inclusion has been established to create positive momentum towards educational access, equity, and success.

Accreditation

The University of Colorado Denver is institutionally accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. The commission can be contacted at: 230 South LaSalle Street, Suite 7-500 Chicago, IL 60604 Telephone: 1-800-621-7440

In addition, teacher education programs in the SEHD have been accredited by the Colorado State Board of Education.

School of Education & Human Development Admissions Information

For admission to the School of Education & Human Development, applicants whose cumulative high school GPA and test scores fall into the middle 50 percent range are strong candidates for admission to the School of Education & Human Development. A minimum 2.4 cumulative high school GPA is recommended, however, students with a 2.0 cumulative GPA are considered.

Note: The Professional Year, a two-semester (fall and spring) residency in the student's final year of the undergraduate degree with licensure programs, requires a separate application and acceptance is not guaranteed. For instructions and minimum requirements, please see the Education and Human Development website (<https://education.ucdenver.edu/academic-services/admissions/>).

All students apply online. Instructions for undergraduate students are found at <http://www.ucdenver.edu/admissions/>.

Information about all degrees, programs and admission requirements can be found on the school's website at <https://education.ucdenver.edu/>

(For Graduate Programs and information please refer to the Graduate (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/school-education-human-development/#departmentstext>) catalog.)

School of Education & Human Development Departments and Programs

Education and Human Development (p. 687)

Bachelor of Arts: Education and Human Development

- Early Childhood Education Licensure Track, BA (p. 700)
- Early Childhood Education Non-Licensure Track, BA (p. 701)
- Elementary Education with CLDE Added Endorsement, BA (p. 705)
- Special Education, BA (Elementary Education Endorsement) (p. 720)
- Middle School Mathematics License, BA (p. 711)
- Secondary Mathematics License, BA (p. 715)
- Secondary Social Studies License, BA (p. 719)
- Secondary English Language Arts License, BA (p. 713)
- Secondary Science License, BA (p. 716)

T-PREP at Otero Junior College Partnership Pathways

- Elementary Education, BA - Rural Partnership with Otero Junior College (p. 706)
- Middle School Math License, BA - Rural Partnership with Otero Junior College (p. 709)
- Secondary Science License, BA - Rural Partnership with Otero Junior College (p. 717)
- Special Education Generalist License, BA - Rural Partnership with Otero Junior College (p. 721)

T-PREP at Trinidad State Junior College Partnership Pathways

- Early Childhood Education License, BA - Rural Partnership with Trinidad State Junior College (p. 698)
- Elementary Education License, BA - Rural Partnership with Trinidad State Junior College (p. 703)

CLAS Secondary Teacher Education Programs

- Secondary Education Licensure - CLAS Major Pathway (p. 712)

Licenses and Endorsements

- Undergraduate Teacher Licensure (p. 707)
 - With Concentrations in the following:
 - Early Childhood Education (p. 700)
 - Elementary Education (p. 705)
 - Special Education Generalist (Ages 5-21) (p. 720)
 - English Education (Grades 7-12) (p. 713)
 - Mathematics (Grades 7-12) (p. 715)
 - Middle School Math (Grades 6-8) (p. 711)

- General Science (Grades 7-12) (p. 716)

- Social Studies (Grades 7-12) (p. 719)

- Added Endorsement in Culturally and Linguistically Diverse Education in Elementary Track (p. 705)

Minors

- Digital Media Design for Learning Minor (p. 723)
- Education Studies Minor (p. 723)
- Culturally and Linguistically Diverse Education Minor (p. 722)

Human Development and Family Relations (p. 724)

Bachelor of Science

- BS/MA 4+1 Program in Learning, Developmental, and Family Sciences: HDFS Concentration (p. 727)
- Human Development and Family Relations, BS (p. 728)
- Human Development and Family Relations, BS - Rural Partnership with Trinidad State Junior College (p. 729)

Minor

- Human Development and Family Relations Minor (p. 730)

School of Education & Human Development Graduation Requirements

For additional information regarding Graduation policies and procedures, please visit the Graduation section of the catalog.

Minimum Grade Requirements

Students must earn a final grade of at least a C (2.0) in major courses and a B- (2.7) or above in designated major courses and Professional Year Residency courses within the major. These courses/requirements must be repeated if the student fails to earn the grade required.

Classroom-Based Field Experiences

Students must complete required classroom-based field experiences.

Other Requirements

Students must complete all program assessments and professional milestones as outlined on the degree plans. For teacher education licensure students, this includes passing the appropriate Praxis exam.

Major

Students must complete all requirements associated with their SEHD major.

Applying for Graduation

All students should meet with their advisor at the beginning of their final term for a graduation check-out appointment. We recommend students schedule an appointment PRIOR to the add/drop deadline of their final term in case schedule adjustments need to be made to fulfill final degree requirements. After meeting with their advisor, students should apply for graduation online through the UCDAccess portal before the graduation application deadline.

Academic Honors

Academic honors are awarded at the time of graduation, based on the cumulative University of Colorado undergraduate GPA. To be eligible for honors, a SEHD student must have completed a minimum of 30 semester hours at the University of Colorado (on any CU campus). A cumulative CU GPA of 3.650-3.749 earns cum laude, a 3.750-3.849 earns magna cum laude and 3.850 or above earns summa cum laude honors designations.

Petitioning for Exceptions to Standing Academic Policy

Students are required to complete the degree requirements that were in effect when they began as a degree-seeking student at CU Denver, including CU Denver Core, major, and track requirements. If a program revises its curriculum, students have the option of following their original degree requirements or the revised curriculum. Courses under the original requirements may no longer be taught or may not be available for a set duration. In this case, the program will approve course substitutions. In cases where the Colorado Department of Education requirements for licensure or endorsements change, program plans may also change to align with these requirements.

Course substitutions in the major or minor must be approved by the Program Leader in the specific program area. Course substitutions in the SEHD major must be approved by the Program Leader.

The SEHD Student Committee reviews students' academic appeals regarding retention, disenrollment, dismissal and other academic matters such as grade appeal, academic dishonesty, or honor code issues. Instruction on how to submit an appeal can be found at <http://www.ucdenver.edu/academics/colleges/SchoolOfEducation/CurrentStudents/Resources/Pages/CurrentResources.aspx>.

School of Education & Human Development Policies

For additional information regarding policies and procedures, please visit the Records and Registration (p. 57) section and the Academic Policies and Procedures (p. 93) section of the catalog.

Undergraduates Taking Graduate Coursework

Undergraduate students are not typically permitted to take courses at the graduate level. SEHD undergraduate students interested in taking graduate-level courses should consult with the instructor and the program, as well as with their academic advisor. The exception to this policy is licensure students admitted into the BA/MA which requires students to take 9 semester credit hours at the graduate level during their final year (the professional year) and HDFS students admitted into the BS/MA.

Internships

Internships are a large part of our work in SEHD, but have varying requirements by program. Please refer to program handbooks and materials for policies regarding internships.

Grade Appeals

Students must follow the process below.

1. Discuss concerns with the faculty member.
2. If the issue is not resolved after a conversation with the faculty member, the student may appeal to the SEHD Student Committee. The process for submitting a student appeal can be found here (<https://education.ucdenver.edu/academic-services/student-resources/>).

Pass/Fail

Students must earn a final grade of at least a C/2.000 in major courses and a B- (2.700) or above in licensure or endorsement courses within the major. These courses/requirements must be repeated if the student earns a final grade below the minimum requirement. Program-required courses, unless designated as P/F, are not permitted to be taken as pass/fail.

Incomplete Grade

Students who wish to request a grade of Incomplete ("I"), should refer to the SEHD Course Completion Agreement for Incomplete Grade. The full policy and form are available on the SEHD Student Resources webpage (<https://education.ucdenver.edu/academic-services/student-resources/>).

Attendance Policy

Students are required to attend classes, including online classes, on a regular basis. Absences must be arranged with the instructor in advance and must conform to university and instructor policies on attendance.

Course Repeat Policy

Students may repeat any course. All courses, including repeated courses, remain on the transcript and all grades are included in the student's University of Colorado GPA calculation. Course credit toward graduation is counted only once for a typical course, no matter how many times the course is repeated. Some types of courses (e.g. Internships, Independent Studies, etc.) may be repeatable for applicable credit within a certain range of total semester hours. Special Topics courses may be repeatable for applicable credit within a certain range of total semester hours, as long as the topic is different. See course descriptions for the maximum semester hours applicable from each course.

Education and Human Development Programs

- Early Childhood Education License, BA - Rural Partnership with Trinidad State Junior College (p. 698)

- Digital Media Design for Learning Minor (p. 723)
- Education Studies Minor (p. 723)

Culturally & Linguistically Diverse Education (CLDE)

CLDE 1000 - Language, Identity, & Power: International Perspectives (3 Credits)

This course explores the relationship between language, identity, and power in various international contexts. The course considers how legacies of inequality for particular communities are reflected in societal attitudes about languages and language users and subsequent language planning. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

CLDE 2000 - CLDE Foundations (3 Credits)

This CLDE foundations course includes an overview of history and legislation related to bilingual education and second language education, and provides an overview of essential linguistics for educators and bilingual language development and assessment. Max hours: 3 Credits.

Grading Basis: Letter Grade

CLDE 3830 - Culturally and Linguistically Responsive Teaching through STEM (3 Credits)

In this course, you will develop your ability to plan for the opportunities and challenges for language development during science and math learning in preK-12 education settings. In doing so, you will develop linguistically responsive teaching practices for all subjects. Prereq or coreq: EDHD 3930 and SPED 4030. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: EDHD 3930 and SPED 4030

CLDE 4020 - Responsive Classroom Communities (3 Credits)

This course investigates how people learn and the implications of social and cultural learning for establishing engaging and culturally responsive learning communities. Through this course teacher candidates will better understand their roles in student learning and how their own cultural lenses impact their relationships with students and families, and influence student success in the classroom. Cross-listed with CLDE 5020. Prereq: EDFN 4010. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours or students in the Education Minor EDST-MIN or CLAS secondary students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: EDFN 4010. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours or students in the Education Minor EDST-MIN or CLAS secondary students.

CLDE 4700 - Social Studies for Multilingual Learners (3 Credits)

Participants will use a social justice lens to investigate the content and language demands of the four disciplines of social studies: History, Civics, Geography and Economics. This class focuses on Social Studies methods as well as essential practices for teaching multilingual students. Restriction: Restricted to students in Education and Human Development with between 40 and 180 cumulative credit hours. Cross-listed with CLDE 5700. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 40 and 180 cumulative credit hours.

CLDE 4835 - Special Topics: Culturally and Linguistically Diverse Education (1-3 Credits)

Advanced study of special topics that examine multilingualism, cultural pluralism, and community in Culturally and Linguistically Diverse Education. Repeatable. Max hours: 9 credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Early Childhood Education (ECED)

ECED 1000 - Introduction to Early Childhood Education (3 Credits)

This course provides an overview of early childhood education contexts and the historical roots of services to young children and families.

Trends, resources, foundational standards of practice, professionalism and code of ethical conduct are examined. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 1202 - Child Guidance (3 Credits)

This course explores and applies classroom strategies to promote social competence, build classroom community and facilitate emotional regulation. An emphasis is on understanding development within group contexts, observing children's behavior and engaging with families to make decisions about learning. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 2000 - Early Childhood Education as a Profession (3 Credits)

This course provides an overview of the ECE profession and its philosophical and historical foundations. Trends in early childhood care and education and professionalism are examined. Topics include developmental domains and appropriate practices, curriculum models, guidance strategies, family and community relationships, diversity and inclusion, and leadership skills to support quality early care and education work settings. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

ECED 2930 - Infant & Toddler Field Experience & Seminar (3 Credits)

ECED 2930 is designed to support teacher candidates in making theory-to-practice connections, focused on understanding infant and toddler development. Students will spend one day per week in an infant-toddler classroom and engage in a weekly seminar to mediate learning. Prereq or coreq: ECED 4070. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: ECED 4070. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

ECED 4010 - Inquiry and the Disciplines (3 Credits)

This course introduces students to the role, value and practices of inquiry in early childhood education and explores the integration of the visual arts and creative expression with the disciplines of mathematics, literacy, science, social studies, as well as young children's approaches to learning. Restriction: Professional Year Admission required for licensure students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required for licensure students. EDHD-BA-ECO or ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4020 - Science for P-2 Classrooms (3 Credits)

Focuses on teaching science in preschool, kindergarten and primary grades, including knowledge of state and district science content standards, process standards, assessment, effective instructional strategies, evidence-based practice for adapting the curriculum for diverse learners, and appropriate use of materials. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4030 - Nutrition, Health, and Safety (3 Credits)

This course focuses on nutrition, health, and safety as a key factor for optimal growth and development of young children. Content includes nutrient knowledge, menu planning, food program participation, health practices, management and safety, appropriate classroom activities and communication with families. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

ECED 4040 - Administrative Seminar (3 Credits)

Emphasizes topics required of administrators to effectively lead and manage early childhood inclusive classrooms or other related programs including leadership capacity, professionalism, administration, teaming/collaboration, communities of practice, staff management, safety, and professional development. Cross-listed with ECED 5040. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 4050 - Early Childhood Education Capstone: Planning, Instruction & Assessment (3 Credits)

This is the second course in this two-course sequence where students examine the essential features of instructional and curriculum design of developmentally appropriate and culturally sustaining inquiry based learning experiences, implementation, and assessment in the teaching and learning of young children. Prereq: ECED 4010. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ECED 4010. Restriction: Professional Year Admission Required. ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4060 - Working with Families, Professionals, and Communities (3 Credits)

The focus of this course is on the human relations component of an early childhood professional's responsibilities. Course content includes family-centered practice, culturally-responsive practices, home-school partnerships, staff development and communication, collaborative teaming and community interaction. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

ECED 4070 - Development and Education of Infant and Toddlers (3 Credits)

Focuses on the growth and development of infants and toddlers; responsive caregiving practices; observing development; relationship-based approach to curriculum and guidance; health, safety, and nutrition issues. Investigates state requirements for licensed infant/toddler homes and centers and accreditation and quality standards. Prereq or coreq: ECED 2930. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: ECED 2930. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

ECED 4102 - Developmentally Appropriate Curriculum Methods and Techniques (3 Credits)

Overview of early childhood curriculum development including processes for planning and implementing developmentally appropriate environments, materials, and experiences. Examines curriculum models and approaches for promoting development and learning in all developmental domains. Evidence-based practices for assessing young children. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 4200 - Assessment for Early Childhood Classrooms (3 Credits)

This course reviews observation/assessment of young children—purpose, tools, and methods for children birth-age 8. Defines measurable outcomes, progress monitoring and use of assessment data to improve early intervention, curriculum planning, intentional teaching, instructional design, and monitor child outcomes. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours

ECED 4202 - Child Guidance and Classroom Community (3 Credits)

This course presents evidence-based classroom strategies to promote social competence, build classroom community and reduce or prevent behavior problems. Emphasis is placed on understanding child development and observing behavior to make decisions for children ages birth through age 8. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours

ECED 4300 - Exceptional Learners in the Early Childhood Classroom (3 Credits)

Educating young children with disabilities in the early childhood setting: typical and atypical development, theoretical models, policy and legal requirements, evidence based research related to instructional design, intervention/curriculum planning and implementation. Introduction to embedded instruction and inclusive environments. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4410 - Coaching for Early Childhood Professionals: Foundations (3 Credits)

The Foundations course focuses on learning, understanding and using relationship and evidence-based coaching skills in early childhood settings. Students will practice the fundamentals of coaching using a systematic, individualized, reflective approach and sharing experiences with others in the course. Cross-listed with ECED 5410. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 4420 - Coaching Early Childhood Professionals: Awareness (3 Credits)

The Awareness course focuses on increasing coaches' skills at introspection, thoughtful planning, intentional application of coaching knowledge and skills, and continuous improvement. Students will integrate skills with effective application in class and real life coaching experiences, managing progress and accountability. Cross-listed with ECED 5420. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 4430 - Coaching for Early Childhood Professionals: Attuning (3 Credits)

The Attuning course will integrate skills from the Foundations and Awareness courses to complete the EC Coaching Certificate. Students practice refining and altering coaching based on needs and readiness. Students learn sustainable organizational change that embed coaching in all professional practice. Cross-listed with ECED 5430. Max hours: 3 Credits.

Grading Basis: Letter Grade

ECED 4650 - Dual Language Learners Learning and Development (3 Credits)

The course will review current research on the learning and development of young dual language learners (birth through 8) and the classroom environments and instruction that can promote their learning. The course uses a socio-cultural framework to view children's learning. Cross-listed with ECED 5650. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours

ECED 4800 - Workshop: Topics in Early Childhood Education (1-4 Credits)

Topics and credit hours vary from semester to semester. Cross-listed with ECED 5800. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ECED 4931 - Internship I & Collaborative Learning Community (2 Credits)

ECED 4931 is the first of 3 internships in the professional year of the ECE program plan that provides the necessary learning opportunities for candidates to gradually develop their practice in order to be licensed as an early childhood educator. Restriction: Professional Year Admission required. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4932 - Internship II & Collaborative Learning Community (2 Credits)

ECED 4932 is the second of 3 internships in the professional year of the ECE program plan that provides the necessary learning opportunities for candidates to gradually develop their practice in order to be licensed as an early childhood educator. Restriction: Professional Year Admission required. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4933 - Internship III & Collaborative Learning Community (2-8 Credits)

ECED 4933 is the final internship in a series of three completed during the professional year of the ECE program plan that provides the necessary learning opportunities for candidates to gradually develop their practice to be licensed as an early childhood educator. Cross-listed with ECED 5933. Restriction: Professional Year Admission required. Repeatable. Max Hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

ECED 4934 - Extended Internship & Collaborative Learning Community (4-8 Credits)

ECED 4934 is an extended internship that supports students who need extended time in an internship in order to complete their ECE program and fully develop their practice in order to be licensed as an early childhood educator. Repeatable. Max Hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Educational Foundations (EDFN)

EDFN 1000 - Equality, Rights & Education (3 Credits)

Examines the history of U.S. public schooling through landmark court cases. Investigates/analyzes how apartheid came to be institutionalized, how forces of desegregation achieved a series of momentous victories, and how those victories have been undermined through the resegregation of schools. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

EDFN 1010 - Lived Experiences and 21st Century Skills: An Introduction (1 Credit)

This internship course introduces the idea of 21st century skills embedded in various learning contexts and connecting them with lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1020 - Lived Experiences and 21st Century Skills: Environmental and Civic Literacies (1 Credit)

This internship course connects 21st century skills embedded in Environmental and Civic Literacies learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1030 - Lived Experiences and 21st Century Skills: Academic and Professional Skills (1 Credit)

This internship course connects 21st century skills embedded in academic and professional learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1040 - Lived Experiences and 21st Century Skills: Collaboration (1 Credit)

This internship course connects 21st century skills embedded in collaborative learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1050 - Lived Experiences and 21st Century Skills: Communication (1 Credit)

This internship course connects 21st century skills embedded in communication learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1060 - Lived Experiences and 21st Century Skills: Innovation and Critical Thinking (1 Credit)

This internship course connects 21st century skills embedded in innovation and critical thinking learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1070 - Lived Experiences and 21st Century Skills: Digital Literacies (1 Credit)

This internship course connects 21st century skills embedded in digital literacies learning contexts with students' lived experiences. Internships activities include entry level career experiences and workplace competencies. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 3.

EDFN 1111 - First Year Seminar (3 Credits)

Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

EDFN 3000 - Undocumented Mexican Immigration (3 Credits)

The socio-legal construction of Mexican undocumented immigration from the early decades of the twentieth century to the current era is addressed. Social justice questions including access to higher education arising from the racialization of Latino/a immigrants are also examined. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

EDFN 4000 - Food Justice in City & Schools (3 Credits)

Food justice examines systemic inequities in access to healthy food.

The history of school/community gardens, developments in urban agriculture and school/city policies are examined. The intersection of urban agriculture, hunger, and schooling/learning is examined in school gardens and school farmer's markets. Cross-listed with EDFN 5000. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

EDFN 4001 - Problematizing Whiteness: Educating for Racial Justice (3 Credits)

Critical Whiteness Studies provides a deeper analysis of race that accounts for both sides of the race coin: the plight of people of color AND how Whites are complicit. This class looks deeper into how race operates within White contexts and how that impacts people of color so we bridge how Whites AND people of color can work together towards a racially equitable society. Cross listed with ETST 4010 and EDFN 5001. Max hours: 3 Credits.

Grading Basis: Letter Grade

EDFN 4010 - Social Foundations and Cultural Diversity in Urban Education (3 Credits)

This course focuses on the role of cultural diversity in the United States school system and what this means for educators oriented toward social justice. The intention of this course is to have teacher candidates engage in exploring the most salient issues surrounding education in the United States, developing an understanding of the complex relationships between schools and the larger society of which they are a part. This course closely examines important contemporary and historical societal issues such as race, social class, gender, ethnicity, sexual identity, politics, and dynamics of power and privilege. Cross-listed with EDFN 5010. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours or students in the Education Minor EDST-MIN or CLAS secondary students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours or students in the Education Minor EDST-MIN or CLAS secondary students.

Education & Human Development (EDHD)

EDHD 1019 - Introduction to Urban Education (3 Credits)

In this course you will examine the sociological issues related to urban schools, communities, and teaching. We will look at such topics as school culture, diversity, ethnicity, and social realities in American schools. Students will critically examine current education issues that affect their lives, their local community, and P-12 classrooms throughout the state and the country. Max hours: 3 Credits.

Grading Basis: Letter Grade

EDHD 1030 - Early Field Experience and Seminar (3 Credits)

Working within the community to support children's learning requires competencies explored in this course. The experiences of seminar, paired with work at a local school or community-based context, will help students develop theoretical grounding as a community based educator. Max hours: 3 Credits.

Grading Basis: Letter Grade

EDHD 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshmen level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

EDHD 1930 - Community Based Field Experience & Seminar (3 Credits)

Students learn the dispositions of a community-grounded educator and develop an asset-based lens for working with students, families, & communities through 60 hours of required field experience and a mediated seminar. Prereq: Must have one semester successfully completed at UCD prior to enrollment unless a transfer student; must have completed CBI Background Check & Oath & Consent process prior to enrolling. Max hours: 3 Credits.

Grading Basis: Letter Grade

EDHD 2050 - Current Topics in Education and Human Development (1-3 Credits)

Current topics that explore community and educational settings in Education and Human Development (EDHD) to be selected by the instructor. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

EDHD 2840 - Independent Study in Education & Human Development (1-6 Credits)

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

EDHD 2910 - Service Learning in Education and Human Development (1-4 Credits)

This course prepares our students to become responsible and resourceful citizens who partner with community organizations and work to serve a wide range of needs and issues within culturally and linguistically diverse environments. Repeatable. Max Hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

EDHD 2930 - Learning & Development Field Experience & Seminar (2-3 Credits)

Teacher candidates engage in field experience 2, half-days per week in early childhood and primary classrooms working with children to support literacy learning while also observing, documenting and reflecting on how learning & development is facilitated. Prereq or coreq: LCRT 3720 and LCRT 4710. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: LCRT 3720 and LCRT 4710. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

EDHD 3930 - Diverse Learners Field Experience & Seminar (3 Credits)

EDHD 3930 is a comprehensive clinical block field experience designed to support teacher candidates' learning of issues and practices relevant to students with disabilities and English language learners. A seminar will mediate teacher candidates' experiences from their various classroom settings. Prereq or Coreq: SPED 4030. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or Coreq: SPED 4030.

EDHD 4050 - Special Topics in Education and Human Development (1-3 Credits)

Advanced study of special topics that examine community and educational settings in Education and Human Development (EDHD) to be selected by the instructor. Maybe repeated for credit. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Instructional Technology (INTE)

INTE 2000 - Digital Teaching and Learning (3 Credits)

Survey of technology for: (1) your own learning, informally and in classes; (2) your students' learning when you become a teacher; and (3) sharing with peers and colleagues. Use tools to address problems of equity, access, and learning needs. Max hours: 3 Credits.

Grading Basis: Letter Grade

INTE 2500 - #Learning: Digital Spaces and Far Out Places (3 Credits)

Digital media have transformed where, how, and why people learn. In this course we examine contemporary developments in digital media and learning. and explore topics such as social networking and media, virtual and augmented reality, civic media, gamified learning, and mobile learning. This is a hands-on and minds-on course where we immerse ourselves in digital spaces to build projects that support our civic, communication and collaboration, and creative interests. Come and learn to use digital media to enhance your life, community, and beyond! Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

INTE 4000 - Maker Studio (3 Credits)

The maker studio is a collaborative practicum within the context of makerculture, projectbased learning, and learning experience design. The course focuses on the practical translation of learning design theory to learning design reality, presenting learners with challenges to be resolved with creative solutions. Cross-listed with INTE 5000. Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

INTE 4100 - Learning Experience Design (3 Credits)

Instructional design is the process used to analyze, design, develop, and evaluate learning solutions. You will identify a gap in learning or performance and design a learning solution in the form of courses units, modules, and other instructional resources. Cross-listed with INTE 5100. Max hours: 3 Credits.

Grading Basis: Letter Grade

INTE 4300 - Media Literacy & Digital Citizenship (3 Credits)

In this course students learn to create, use, extend, and evaluate media products to support decision-making and real world problem-solving. Students also become more aware of the significant role of mass media, popular culture, and digital media in our lives. Cross listed with INTE 5300. Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

INTE 4320 - Games and Learning (3 Credits)

This course examines the use of games for learning and education across formal and informal environments. Students will survey contemporary learning theory, media, trends, and challenges related to designing and playing games in informal, community-based, online, and school settings. Cross listed with INTE 5320. Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

INTE 4340 - Learning with Digital Stories (3 Credits)

This course reviews the uses of digital storytelling for learning. Develop and publish a short digital story that tells something important about you and your interests. Explore ways that creating or using digital stories can aid learning and personal growth. Cross-listed with INTE 5340.

Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

INTE 4660 - Developing Self-Paced Online Modules (3 Credits)

Students use a variety of tools and strategies to develop self-paced eLearning courseware, such as tutorials. The course covers critical aspects of the instructional development process that support the creation of effective self-paced online learning experiences, materials and resources. Cross-listed with INTE 5660. Max hours: 3 Credits.

Grading Basis: Letter Grade

INTE 4665 - Learning with Social Media and Networking (3 Credits)

The focus of this course is on how educators leverage networked social tools, technologies, and environments to address educational needs, opportunities, and problems of practice; and establish and nurture their own professional learning through participation in digital cultures. Cross-listed with INTE 5665. Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

INTE 4680 - Producing Media for Learning (3 Credits)

Students develop and integrate media resources into eLearning environments, applying principles of media selection and multimedia learning. Students explore a variety of tools for producing audio, video, and multimedia content and examine ways to enhance eLearning courses through multimedia presentation and engagement resources. Cross-listed with INTE 5680. Max hours: 3 Credit Hours.

Grading Basis: Letter Grade

INTE 4711 - Creative Designs for Instructional Materials (3 Credits)

This course is a project-based exploration of design theories, principles, and best practices for communicating information to diverse learning audiences. Students apply unique design approaches and formats to the creation of materials for teaching, learning, and being of service to underrepresented communities. Cross-listed with INTE 5711. Restriction: Restricted to undergraduate students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate students

Literacy, Language & Culturally Responsive Teaching (LCRT)

LCRT 2000 - Rebels, Villains, & Superheroes: How Children's Literature Shapes Our Identities (3 Credits)

This course explores both classic and contemporary children's and adolescent literature and media in traditional and digital texts, specifically focusing on developing literary understandings, exploring perspectives and personal responses to literature, and inquiring into trends and issues. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities.

LCRT 3720 - Introduction to Writing Development and Teaching (3 Credits)

This course introduces students to writing development in children from early childhood through 5th grade. Students will learn how to analyze student writing for strengths and needs in order to design effective writing instruction. Prereq or coreq: EDHD 2930 and LCRT 4710. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: EDHD 2930 and LCRT 4710. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours.

LCRT 3815 - Once Upon a Time: Family Literacies in Culturally Diverse Communities (3 Credits)

This course uses sociocultural theory and perspectives as these relate to family systems and the intersection of culture, literacies, and education. Students develop an understanding about the ways reading, writing and language are embedded in family's homes, schools, and communities. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

LCRT 4000 - Elementary Literacy Instruction and Assessment Part 1 (3 Credits)

This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6 classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6 Students. Cross-listed with LCRT 5000. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

LCRT 4001 - Elementary Literacy Instruction and Assessment Part 2 (3 Credits)

This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6th classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6th Students. Cross-listed with LCRT 5001. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

LCRT 4100 - Secondary Literacy Instruction and Assessment (3 Credits)

Provides knowledge and practice in using specific literacy methods to enhance students' content learning and literacy development in middle schools and high schools. Various methods of literacy assessment to guide instruction for students are emphasized. Instructional strategies for special populations, especially speakers of English as a second language, are also addressed. Cross-listed with LCRT 5100. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

LCRT 4200 - Theory and Methods of Teaching Secondary English (3 Credits)

Focuses on teaching/learning theories and practical classroom strategies for teaching English Language Arts to adolescent learners in middle school, junior high school and high school classes. Cross-listed with LCRT 5200. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

LCRT 4201 - Adolescent Literature (3 Credits)

Reading and evaluating fiction and non-fiction appropriate for students in middle and senior high school. Emphasis is on modern literature. Cross-listed with LCRT 5201. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

LCRT 4210 - Literacy Development Pre K-3rd Grade (3 Credits)

Focuses on children's developing literacy understandings and proficiencies beginning in the preschool years. Attention is given to language development, assessment, and instruction in pre-kindergarten through third grade, partnerships with community literacy institutions provide information on their use for literacy development. Cross-listed with LCRT 5210. Max hours: 3 Credits.

Grading Basis: Letter Grade

LCRT 4220 - Literacy Routines & Assessment, Pre K-3rd Grade (3 Credits)

This course will focus on the routines and practices which allow for student specific instruction and assessment in the Early Literacy classroom. Participants will examine and critique current literacy routines and assessments needed to best meet the needs of culturally and linguistically diverse children. Cross-listed with LCRT 5220. Max hours: 3 Credits.

Grading Basis: Letter Grade

LCRT 4230 - Early Literacy Instruction (3 Credits)

Participants will examine Pre K-3rd grade literacy instruction to understand how to meet the needs of young students. The course will analyze instructional practices for young gifted, special needs and English language learning students to best meet the needs of all learners. Cross-listed with LCRT 5230 Max hours: 3 Credits.

Grading Basis: Letter Grade

LCRT 4710 - Primary Literacy for Diverse Learners: Pre K-3rd Grade (3 Credits)

This course provides teachers with a basic understanding of reading and writing development in preschool and early primary grades, while considering specific strategies for using and teaching reading and writing in early primary grades (pre-K-3). This course is cross-listed with LCRT 5710. Prereq or coreq: EDHD 2930 and LCRT 3720. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or coreq: EDHD 2930 and LCRT 3720. Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours.

LCRT 4720 - Writing Development, Instruction and Assessment (3 Credits)

This course combines examination of current research into effective practices of teaching writing with students' own writing projects. The curriculum serves teachers in all subjects and grades K-12. Readings, groupings, and discussions are differentiated according to specific grade(s) taught. Cross-listed with LCRT 5720. Max hours: 3 Credits.

Grading Basis: Letter Grade

Math Education (MTED)

MTED 3040 - Mathematics for Elementary Teachers (3 Credits)

Key mathematical concepts for K-6 teachers informed by NCTM & Common Core State Standards, such as place-value number systems, rational, proportional, & algebraic reasoning, geometrical concepts, & statistical/probability ideas. Students' meaningful, enjoyable learning is promoted via problem solving activities. Cross-listed with MTED 5400. Max hours: 3 Credits.

Grading Basis: Letter Grade

MTED 4002 - Elementary Mathematics Teaching I (3 Credits)

Prepares elementary teachers to teach mathematics to PreK-6 students while applying principles of the National Council of Teachers of Mathematics to mathematical learning. Teachers explore ways to help all elementary students become flexible and resourceful mathematical problem solvers. Cross-listed with MTED 5002. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

MTED 4003 - Elementary Mathematics Teaching II (3 Credits)

Develops the mathematical and pedagogical understandings and competence of elementary teachers, focusing on instructional assessment, principles, and practices. Cross-listed with MTED 5003.

Prereq: MTED 4002 or MTED 5002. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MTED 4002 or 5002. Restriction: Professional Year Admission Required. ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

MTED 4300 - Curriculum and Methods for Teaching Mathematics (3 Credits)

Fosters teachers' use of task-based mathematics pedagogy, including orchestrating students' mathematical discourse, to develop mathematics classrooms in which the teacher builds from students' current understandings, accommodates for students' differences, and has high expectations for all students. Cross-listed with MTED 5300. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

MTED 4301 - Assessment and Equity in Mathematics Instruction (3 Credits)

Examines mathematics assessment and equity from both a teacher's and a student's perspective. Focuses on assessment as a process, during which a teacher gathers evidence of students' mathematical knowledge and understanding and then uses that evidence to make instructional decisions. Restriction: Professional Year Admission required. Cross-listed with MTED 5301. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

MTED 4621 - A World of (Different) Numbers: Quantity and Operation (3 Credits)

Develops K-12 teachers' understanding of number systems and the ability to foster students' understanding. Focuses on number, quantity, and operation. Applicable to teaching students at all grade levels in line with the K-12 Common Core Standards. Cross-listed with MTED 5621. Max hours: 3 Credits.

Grading Basis: Letter Grade

MTED 4622 - Expanding Conceptions of Algebra (3 Credits)

Develops K-12 teachers' understanding of algebra concepts and the ability to foster students' understanding. Focuses on equivalence, variable, covariation, and function. Applicable to teaching students at all grade levels in line with the K12 Common Core Standards. Cross-listed with MTED 5622. Max hours: 3 Credits.

Grading Basis: Letter Grade

MTED 4623 - Geometrical Ways of Reasoning (3 Credits)

Develops K-12 teachers' geometrical reasoning and the ability to foster students' reasoning. Addresses transformation, measurement, classification, objects, imagery, formulas, and investigation. Applicable to teaching students at all grade levels in line with the K-12 Common Core Standards. Cross-listed with MTED 5623. Max hours: 3 Credits.

Grading Basis: Letter Grade

Science Education (SCED)**SCED 4004 - Elementary Science Teaching (3 Credits)**

This course explores issues in elementary school science learning and teaching. Teacher candidates will develop knowledge of the nature of science and science content, engage in scientific inquiry, work to identify student conceptions, and plan and enact science instruction. Cross-listed with SCED 5004. Restriction: Professional Year Admission required. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SCED 4050 - Introduction to Science Teaching and Learning (2 Credits)

Focus on conceptual development, conceptual change, collaborative learning, students' conceptions of various topics in science, practical issues encountered in facilitating learning, managing the classroom, formative and summative assessment, and differentiating instruction in a collaborative environment. Seminar for Learning Assistants. Student must be serving as a Learning Assistant in the CU Denver LA program. Max hours: 2 Credits.

Grading Basis: Letter Grade

SCED 4340 - Equity & Culture in Science Education: Local/Global (3 Credits)

This course examines literature in science education related to issues of culture and equity. Topics will be framed by an understanding of equity in diverse classrooms and how it informs research, curriculum and instruction. Cross-listed with SCED 5340 and ENVS 5340. Max hours: 3 Credits.

Grading Basis: Letter Grade

SCED 4350 - Issues and Trends in Science Education (3 Credits)

Explores the current issues and trends in science education related to theory, pedagogy, practices, curriculum, and other contemporary topics. Cross-listed with SCED 5350. Max hours: 3 Credits.

Grading Basis: Letter Grade

SCED 4400 - Theory and Pedagogy of Science Learning (3 Credits)

Examines current issues, strategies, materials, and technology related to the teaching and learning of science at the middle and secondary school levels. Science curriculum, teachers' pedagogical content knowledge, and research in science education are investigated. Cross-listed with SCED 5400. Restriction: Professional Year Admission required. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SCED 4401 - Inquiry Science Pedagogy and Practices (3 Credits)

An in-depth study of inquiry science pedagogy and practices and how inquiry science supports standards-based education to make science accessible to ALL learners. The course provides a review of research on pedagogy and practices that support student understanding, problem solving and creativity through the use of inquiry science. Prereq: Concurrent enrollment in an internship or permission of instructor is required. Cross-listed with SCED 5401. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

Special Education (SPED)

SPED 1030 - Understanding (dis)Ability in Contemporary Classrooms (3 Credits)

This course provides an overview of special education by examining the history of special education, construction of dis/ability, characteristics of individuals with disabilities, aspects of disproportionality, and introduction to evidence-based instructional practices. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPED 4010 - Intentional Interventions for Exceptional Learners (3 Credits)

This course provides instructional strategies and interventions for students with a wide variety of disabilities. Implications for targeted and intensive interventions and assessment are considered. Cross-listed with SPED 5010. Restriction: Professional Year Admission required. Max hours: 3 Credits

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SPED 4030 - Understanding (dis)Ability in Contemporary Classrooms (3 Credits)

This course provides an overview of special education by examining the history of special education, construction of dis/ability, characteristics of individuals with disabilities, aspects of disproportionality, and introduction to evidence-based instructional practices. Prereq or Coreq: EDHD3930 or ECED4933 or ECED4934. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq or Coreq: EDHD3930 or ECED4933 or ECED4934

SPED 4140 - Assessment: Inquiry, Instruction, & Intervention (3 Credits)

Using a variety of assessment tools, students will focus on the educational assessment methods and procedures used in decision making and program planning for students with exceptional learning needs, with attention to pervasive issues pertaining to students from culturally and linguistically diverse backgrounds. Cross-listed with SPED 5140. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SPED 4151 - Slashing Stigmas: Promoting Positive Behaviors (3 Credits)

This course works to transform perspectives and practices related to supporting student behavior in classrooms. Students will learn important considerations related to culture, race, gender and socioeconomic status, as they intersect with behavior and social emotional development. Cross-listed with SPED 5151. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours

SPED 4300 - Family, Professional, and Community Collaboration (3 Credits)

Focuses on the development of competencies in consultation and collaboration. The overall purpose is to encourage the development of understanding and skills that enhance a teacher's ability to work and communicate effectively with school personnel, including paraprofessionals and parents. The goal of collaboration is to support and determine together the instructional scenarios that best meet the needs of students. Specific competencies include problem solving, conflict resolution, data collection or observation skills, conferencing, facilitating meetings, and interacting with others while respecting diverse discourses and multicultural backgrounds. Cross-listed with SPED 5300. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

SPED 4400 - Universal Design for Learning (UDL) (3 Credits)

This course introduces Universal Design for Learning (UDL), an important educational philosophy and set of principles & techniques that focuses on strategies and tools to help ALL students by accommodating their differences in inclusive classroom settings. Cross-listed with SPED 5000. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 27 and 180 cumulative credit hours

SPED 4500 - Transition and Secondary Methods in Special Education (3 Credits)

This course provides school leaders and practitioner with an understanding of the special education transition process as specified by federal and state guidelines, as well as effective teaching and learning strategies for secondary youth with disabilities. Cross-listed with SPED 5500. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours, and Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours, and Professional Year Admission required.

SPED 4600 - Special Education Law: Ethics and Compliance (3 Credits)

Designed for school leaders and professionals to understand special education law and compare and contrast service delivery options. Cross-listed with SPED 5600. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPED 4740 - Intersections of Literacy, Culture, & Exceptionality (3 Credits)

This course provides a foundational understanding of the complex intersections between literacy, culture, language, learning, and students with (dis)abilities. A primary goal is to address the particular needs of culturally and linguistically diverse learners with exceptionalities, while also exploring the distinctions between language development and learning disabilities. Cross-listed with SPED 5740. Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to students in Education and Human Development with between 57 and 180 cumulative credit hours

SPED 4780 - Literacy Intervention for Exceptional Learners (3 Credits)

Provides the practitioner with an understanding of research-validated approaches, strategies, assessment tools and issues related to effective literacy instruction for students performing significantly below grade level. Cross-listed with SPED 5780. Max hours: 3 Credits.

Grading Basis: Letter Grade

SPED 4931 - Internship & Learning Community I (2 Credits)

SPED 4931 is the first internship in a series of three completed during the professional year of the SPED program providing the necessary learning opportunities for candidates to gradually develop their practice to be licensed as a special education teacher. Restriction: Professional Year Admission required. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SPED 4932 - Internship & Learning Community II (2 Credits)

SPED 4932 is the second internship in a series of three completed during the professional year of the SPED program providing the necessary learning opportunities for candidates to gradually develop their practice to be licensed as a special education teacher. Restriction: Professional Year Admission required. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

SPED 4933 - Internship & Learning Community III (6 Credits)

SPED 4933 is the final internship in a series of three completed during the professional year of the SPED program providing the necessary learning opportunities for candidates to gradually develop their practice to be licensed as a special education teacher. Restriction: Professional Year Admission required. Max hours: 6 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

Science, Technology, Engineering & Math Education (STME)

STME 4001 - Planning for Learning in Mathematics and Science (3 Credits)

This course explores aspects of complex curriculum and instructional concepts through the lens of mathematics and science educators. A focus will include: Socio-cultural learning theory in Math and Science; standards-based instruction; instructional design; formative & summative assessment, and differentiation so that meaningful instruction becomes accessible to all students. Cross-listed with STME 5001. Max hours: 3 Credits.

Grading Basis: Letter Grade

STME 4051 - STEM Capstone: Secondary Education (3 Credits)

This course provides Secondary STEM Education students with a capstone learning experience that integrates knowledge of STEM content, students, and school context into socially-just and culturally responsive practices. Cross-listed with STME 5051. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

Urban Teacher Education (UEDU)

UEDU 1930 - Introduction to Socially Just Education (3 Credits)

This course examines sociological issues concerning urban schools, communities and provides an overview of school culture, diversity and social realities in American schools. Students will critically examine education issues that affect their lives, their community and classrooms throughout the country. Max hours: 3 Credits.

Grading Basis: Letter Grade

UEDU 4040 - Planning for Learning (3 Credits)

This course explores multiple aspects of student learning: Including 1) standards-based instruction 2) cultural responsive instructional design, 3) assessment and data, and 4) differentiation in curriculum and instruction so that meaningful instruction becomes accessible to all students. Restriction: Professional Year Admission required. Cross-listed with 5040. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4050 - Elementary Capstone: Planning, Instruction & Assessment (3 Credits)

The purpose of this course is to re-visit multiple aspects of instructional and curriculum design, implementation, and evaluation. The goal is to promote access to knowledge for all learners, including those who are diverse linguistically and culturally and those identified with special needs. Cross listed with UEDU 5050. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4052 - English/LA & Social Studies Capstone: Secondary Ed (3 Credits)

Through teaching units of instruction in school placements, secondary English/LA and Social Studies teacher candidates learn both unit and lesson design, assessment of student learning, and differentiation of curriculum and instruction to promote access to knowledge for all learners. Cross-listed with UEDU 5052. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4464 - Methods of Teaching Social Studies (3 Credits)

One of two courses on linguistically and culturally relevant social studies teaching. Course content includes geography, economics, civics. Cross-listed with UEDU 5464. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4465 - Methods of Teaching History (3 Credits)

One of two courses on linguistically and culturally relevant history teaching. Cross-listed with UEDU 5465. Restriction: Professional Year Admission required. Max hours: 3 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4840 - Independent Study (1-3 Credits)

Independent Study in Urban Community Teacher Education, Topic of study varies according to project. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

UEDU 4931 - Internship & Lrng Comm I (2 Credits)

Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Cross-listed with UEDU 5931. Restriction: Professional Year Admission required. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4932 - Internship & Lrng Comm II (2 Credits)

Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Restriction: Professional Year Admission required. Cross-listed with UEDU 5932. Max hours: 2 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4933 - Internship & Lrng Comm III (6 Credits)

Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Restriction: Professional Year Admission required. Cross-listed with UEDU 5933. Max hours: 6 Credits.

Grading Basis: Letter Grade

Professional Year Admission required. Students must be enrolled in one of the following plans: ECED-LICU or EGLH-LICU or ELED-LICU or FWLF-LICU or FWLS-LICU or MATH-LICU or MSMA-LICU or SCIG-LICU or SPED-LICU or SSSS-LICU

UEDU 4934 - Extended Internship & Learning Community (4-8 Credits)

Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, they participate in the activities of a professional learning community. Cross-listed with UEDU 5934. Repeatable. Max Hours: 8 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Early Childhood Education License, BA - Rural Partnership with Trinidad State Junior College

Introduction

Please click [here](#) (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in early childhood education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, and supporting English language learners, as well as technology as it relates to teaching children in grades kindergarten through sixth grade. You'll

engage in powerful classroom experiences and benefit from our rich 20-year history of partnerships with local school districts.

We will prepare you to become a highly effective, innovative and compassionate early childhood teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

This program is a rural partnership with Trinidad State Junior College (TSJC) in campuses in Trinidad and Alamosa, Colorado. Students complete the first two years of the program at TSJC to complete an Associate of Arts degree and then transfer to CU Denver to complete their final two years to complete the BA - EDHD degree with an early childhood teaching license. During the final two years, students complete CU Denver coursework remotely from Trinidad and are not required to travel to Denver. Advising is provided during all four years of the program, whether students are TSJC or CU Denver students. Coursework is delivered in a variety of ways, including online, video conferencing, in-person in Trinidad or Alamosa, and fieldwork in rural Colorado in and around Trinidad or Alamosa.

Program Delivery

- This is an on-campus program in Trinidad and Alamosa with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum total of 126 semester hours for the EDHD Early Childhood Education Track.
- Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
- Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)
- A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD - Early childhood Education requirements unless otherwise specified.

- Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Students will receive transfer credit for all of the following major requirements:

Code	Title	Hours

Early Childhood Education Licensure Track, BA

Introduction

Please click [here](#) (p. 685) to see School of Education & Human Development information.

The Early Childhood Education (ECE) track in the Education and Human Development major has a strong focus on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn with innovative faculty members who are locally and nationally recognized for their research in early childhood education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, supporting dual language learners, inclusive and engaging classroom and curricular design and assessment and documentation of young children's learning. At the same time, you will benefit from strong school and community partnerships that are unmatched in the state. All ECE track students have the opportunity to take all required courses to fulfill the State of Colorado's Director qualifications and become leaders in the field of early learning.

The ECE track has two options: Licensure and Non-licensure.

Licensure Track

Students who select the 126 credit hour licensure track fulfill all requirements for a license to teach children Birth-Age 8 in Colorado's school districts and community-based early childhood centers. This track prepares students to become teachers of children up through third grade. Field-based experiences take place in the School of Education's Professional Development network of partner schools.

Students in this track have the opportunity to apply for the BAMA during their junior year. The BAMA allows students to take 9 credits of their professional year program at the graduate level and apply them to one of 8 MA degrees in the SEHD.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend and online courses.

Declaring This Major

Additional General Electives hours may be needed to reach the required hours for the BA

Total Hours 87-89

¹ Courses require a grade of B- or better; all other courses require a grade of C or better.

Non-Licensure Track

A 120 credit hour track is ideal for students who currently and/or intend to work in community-based early childhood environments that serve children from infancy-age five years is also available.

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/sehd/>).

Early Childhood Education Non-Licensure Track, BA

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Early Childhood Education (ECE) track in the Education and Human Development major has a strong focus on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn with innovative

faculty members who are locally and nationally recognized for their research in early childhood education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, supporting dual language learners, inclusive and engaging classroom and curricular design and assessment and documentation of young children's learning. At the same time, you will benefit from strong school and community partnerships that are unmatched in the state.

Non-Licensure Track

This 120 credit hour track is ideal for students who currently and/or intend to work in community-based early childhood environments that serve children from infancy-age five years. Courses include field-based experiences that can take place in settings where students currently work.

Students in this track have the opportunity to apply for the BAMA during their junior year. The BAMA allows students to take 9 credits of their professional year program at the graduate level and apply them to the ECE MA degree.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend and online courses.

Declaring This Major

- Click here (<http://catalog.ucdenver.edu/cu-denver/undergraduate/academic-policies-procedures/declaring-changing-major/declare-change-major-minor/>) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a total of 120 semester hours for the EDHD - Early Childhood Education Non-Licensure Track
- A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD - Early Childhood non-licensure requirements unless otherwise specified.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

HDFR 4260	Family Systems and Social Justice	

General Electives

Additional courses may be needed to reach the required 120 hours for the BA

Total Hours 74-85

¹ Courses require a grade of B- or better; all other courses require a grade of C or better.

Notes

An ECE Licensure track is also available for students interested in fulfilling the State of Colorado's ECE licensure requirements.

Students who select the 126 credit hour licensure track fulfill all requirements for a license to teach children Birth-Age 8 in Colorado's school districts and community-based early childhood centers. This track prepares students to become teachers of children up through third grade. Field-based experiences take place in the School of Education's Professional Development network of partner schools. Please see

Early Childhood Education BA - Licensure Track (p. 700) for more information.

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/sehd/>).

Education and Human Development BAMA with Multiple MA Options

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The EDHD BA to MA program (BAMA) in the School of Education and Human Development allows students to combine their BA in Education and Human Development with an MA suited to their needs. In this degree students can complete both the undergraduate degree and a master's degree in as little as five years.

This program is an uninterrupted enrollment plan that leads to both a bachelor's degree and a master's degree. A student follows a prescribed BA to MA program plan of study, from the EDHD BA and choosing from one of eight MA degree options:

- Culturally and Linguistically Diverse Education
- Literacy Education
- STEM Education
- Learning, Design and Technology
- Learning Developmental and Family Studies
- Early Childhood Education
- Special Education
- Research and Evaluation Methods

Program Delivery

- This is an on-campus program with a variety of delivery options for many courses including face-to-face, hybrid, evening, and online courses.

Declaring This Degree

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. To earn this degree, students must satisfy all requirements in the EDHD BA in addition to individual requirements for the chosen MA.
2. Up to nine credits of the EDHD BA will be taken at the master's level and apply to both the BA and the chosen MA.

3. Students will complete an additional 21 credits to finish the MA degree (the BAMA does not apply to added endorsements).
4. Students must select and apply to their chosen MA in their junior year during the professional year application period.
5. The process includes an essay, letters of recommendation and an interview.
6. A 3.0 GPA and good-standing in the program is required for admission.
7. Students interested in the BA to MA program should meet with an undergraduate academic advisor during their junior year. Students apply directly to CU Denver's School of Education & Human Development.
8. Students accepted into the BAMA must maintain a minimum 3.0 cumulative grade point average and receive a B- or better in all coursework.

Tuition and Fees

Graduate level tuition is on par with undergraduate tuition. Students are assessed tuition at the course level. Financial aid awards will cover graduate courses taken by undergraduate students. We offer a variety of scholarships and grants. For a complete list of financial aid opportunities visit www.ucdenver.edu/education/scholarships (<http://www.ucdenver.edu/education/scholarships/>).

Degree Confirmation

Students are eligible to receive the BA in Education and Human Development degree once they have successfully completed 126 semester hours and all CU Denver undergraduate degree requirements. The MA will be conferred once the student has completed all requirements for the Master of Arts degree. Students have 7 years from the semester in which the first graduate-level course was taken complete the MA.

Eight Master's Degree Options

Culturally and Linguistically Diverse Education

For those who are passionate about elevating the status of bilingualism and inclusivity in classrooms and championing the strengths and assets of children who speak and are learning multiple languages, this degree is the perfect option.

Early Childhood Education

This degree is for those who have a passion for working with young children, families and communities during the critically important stage of early childhood. The program prepares highly competent professionals who are leaders and advocates known for embracing the whole child in inclusive, culturally and linguistically diverse settings.

Learning Design & Technology

Students will complete fully online courses that address relevant, emerging learning technology topics such as active and experiential pedagogy, media and maker projects, integration of technology, blended and online learning, open educational resources, digital storytelling, creative instructional materials design, and technology adoption and leadership.

Learning, Developmental and Family Sciences

Through this program, you will be prepared to view culturally and linguistically diverse families from a strengths-based perspective and to serve them in a variety of contexts. Students will learn to facilitate the teaching/learning process and to lead and work in community-based environments.

Literacy Education

Literacy is often understood as a core competency and a gateway to all other learning. With this in mind, this degree provides educators with advanced knowledge and preparation to work with diverse student populations, K-12, as they develop reading, writing and oral language skills.

Research & Evaluation Methods

Our students come from a wide variety of backgrounds, but have the common thread of questioning status quo and striving to explore 'what works' in order to improve our educational system. This program is very practitioner-focused. There is a strong focus on improvement and evaluation of current practices, programs and policies.

Special Education

This degree prepares candidates for a holistic representation and understanding of the students from an academic and behavioral perspective. In the program, you will not only learn ways to accommodate, differentiate and assess materials for students, but you will also understand how to manage a caseload of students. From working with families to teachers to agencies, you will be able to develop skills in collaboration, consultation and transition. As a result, you will be an asset to your building and the families/students you serve.

STEM Education

When you decide to pursue this degree, you will learn practical and valuable knowledge and skills to help you engage your students in exciting STEM content. Our program focuses on understanding students' ideas, creating equitable STEM learning environments, assessing students' needs and providing high-quality instruction.

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/sehd/>).

Elementary Education License, BA - Rural Partnership with Trinidad State Junior College

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in Elementary education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, and supporting English language learners, as well as technology as it relates to teaching children in grades kindergarten through sixth grade. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnerships with local school districts.

We will prepare you to become a highly effective, innovative and compassionate Elementary teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader.

CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

This program is a rural partnership with Trinidad State Junior College (TSJC) in campuses in Trinidad, Colorado. Students complete the first two years of the program at TSJC to complete an Associate of Arts degree and then transfer to CU Denver to complete their final two years to complete the BA - EDHD degree with an Elementary teaching license. During the final two years, students complete CU Denver coursework remotely from Trinidad and are not required to travel to Denver. Advising is provided during all four years of the program, whether students are TSJC or CU Denver students. Coursework is delivered in a variety of ways, including online, video conferencing, in-person in Trinidad, and fieldwork in rural Colorado in and around Trinidad.

Program Delivery

- This is an on-campus program in La Junta with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum total of 126 semester hours for the EDHD Elementary Education Track.
2. Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
3. Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)
4. A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD - Elementary Education requirements unless otherwise specified.
5. Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
6. Transfer courses must be approved by faculty and/or advisor to apply to the major.

Students will receive transfer credit for **all** of the following major requirements:

Code	Title	Hours
Major Requirements		
EDHD 1930	Community Based Field Experience & Seminar ¹	3

Additional required courses from the community college pathway transfer in as electives to reach the required hours for the BA		
Total Hours		78

¹ Courses require a grade of B- or better; all other courses require a grade of C or better. Students who do not have a B- or better in the specified courses must consult with their advisors about a plan to retake the course or complete additional work.

To review the Degree Map for this program, please visit our website (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/sehd/>).

Elementary Education with CLDE Added Endorsement, BA

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in elementary education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, and supporting English language learners, as well as technology as it relates to teaching children in grades kindergarten through sixth grade. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnerships with local school districts.

We will prepare you to become a highly effective, innovative and compassionate elementary teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

A unique feature of this pathway is that you will be able to add a Culturally Linguistically Diverse Education, CLDE, endorsement to your credentials. Essentially, you will leave this program with both the Elementary Education License and CLDE Endorsement. This means you are prepared to teach K-6 and culturally & linguistically diverse students, making you highly employable and desirable to schools!

Students in this track have the opportunity to apply for the BAMA during their junior year. The BAMA allows students to take 9 credits of their professional year program at the graduate level and apply them to one of 8 MA degrees in the SEHD.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Undergraduate Teacher Licensure Introduction

Please click here (p. 685) to see School of Education & Human Development information.

Education and Human Development (EDHD) Major Pathways:

There are **many** pathways that CU Denver undergraduates can take to become a licensed teacher in Colorado. The BA major in Education and Human Development (EDHD) is within the School of Education and Human Development (SEHD) and includes licensure in the following areas:

- Early Childhood Education (p. 700)
- Elementary Education (p. 705)
- Special Education Generalist (Ages 5-21) (p. 720)
- English Education (Grades 7-12) (p. 713)
- Mathematics (Grades 7-12) (p. 715)
- Middle School Math (Grades 6-8) (p. 711)
- General Science (Grades 7-12) (p. 716)
- Social Studies (Grades 7-12) (p. 719)

The following licensure areas are available through our T-Prep partnerships with Otero Junior College (OJC) and Trinidad State Junior College (TSJC).

- Elementary Education (OJC, TSJC) (p. 703)
- Early Childhood Education (TSJC) (p. 698)
- General Science (7-12) (OJC) (p. 717)
- Middle School Math (Grades 6-8) (OJC) (p. 709)

In the College of Liberal Arts and Sciences (CLAS) pathway, students major in CLAS and earn their secondary teaching license in the SEHD.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in elementary education. They will provide you with a robust knowledge base and relevant learning experiences in children's thinking, culturally responsive education, and supporting English language learners, as well as technology as it relates to teaching children in grades kindergarten through sixth grade. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnerships that are a part of our Professional Development Schools. All of the teacher licensure pathways prepare educators who are culturally affirming and responsive, collaborate closely with families

and communities, and have the knowledge and skills to create engaging, relevant, and rigorous classroom communities where all students can learn, achieve and grow.

High Standards and Ongoing Assessment

The coursework and the internship experiences within each program have been created to align with the Colorado Teacher Quality Standards, as well as frameworks for culturally and linguistically responsive instruction and Universal Design for Learning. Students in all programs engage in a common set of learning opportunities and internship assessments. They also engage in Program Level Assessments at different stages of the program. Colorado mandates that all teacher education programs be "performance-based" in order to recommend candidates completing the program for licensure; thus all candidates must demonstrate proficiency in both the university-based coursework and their internships. Students must also pass state content exams prior to their final semester in the program.

Community College Articulation

CU Denver honors the community college articulation agreement in elementary and early childhood education to transfer the 60 designated semester hours from the community college to anyone admitted to the teacher licensure program. Students should make sure they are following the appropriate articulation agreement and should work with their SEHD or CLAS advisor early and often to ensure that all courses are transferred properly.

SEHD and T-PREP Pathways:

The CU Denver bachelor's degree with a major in Education and Human Development is a four-year, 126-credit-hour, interdisciplinary program with multiple licensure tracks. It focuses on engaging Colorado's rapidly diversifying student and family population and combines cutting-edge research with real classroom experiences.

The program is offered in a hybrid format with both in-class and online coursework that support the needs of talented students from all backgrounds, including nontraditional and underrepresented students.

Programs of Study

Additional information about the licensure tracks can be found on the SEHD website (<https://education.ucdenver.edu/academics/undergraduate/>).

Clinical Experiences in SEHD and T-PREP Pathways

Teacher candidates in the SEHD pathway work alongside community and P-12 partner educators from freshman to senior year. Students complete a community-based field experience block in their freshman year and school-based field experience blocks in years 2 and 3. Each block is carefully coordinated with 1-2 other teacher education courses and a bi-weekly seminar to provide a fully integrated learning experience between theory and practice. In their final, professional year they are placed in a full year internship within the CU Denver Professional Development School Network comprised of over 20 urban schools across numerous districts in the Denver metro region. Through these internships, teacher education students live the life of a teacher for an entire academic year while enrolled in the program. The internships begin gradually with two days a week early on and increase over time to five days per week by the end of the final semester of the program. University courses are closely integrated with the sequence of clinical internship experiences providing teacher candidates with multiple opportunities to engage in

the authentic work of teachers. Teacher candidates co-teach closely with practicing teachers in the school and gradually assume full responsibility for teaching by the end of the program. The schools are located in several Denver metropolitan districts serving large populations of low-income and/or culturally and linguistically diverse students, as well as a sizeable number of students for whom English is a second language and students with special needs. Each school is supported by a team of university and school-based educators who collaboratively support the development of each candidate through weekly coaching feedback and the facilitation of collaborative learning community seminars on-site at the school to integrate theory and practice.

Professional Year Admissions

After successfully completing all other Core, CLAS, major, and elective requirements, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)

Advising

Students in the SEHD have a dedicated team of staff and faculty committed to their success. This includes an academic advisor and teams of faculty who support the different licensure programs.

The SEHD accepts applications from incoming freshmen, current students at CU Denver, transfer students from community colleges or four-year institutions, individuals who are working as paraprofessionals, assistant teachers or developmental intervention assistants in early childhood centers or elementary schools and people who are interested in working in community-based organizations serving diverse families.

Email education@ucdenver.edu for more information. We encourage students to take advantage of the scholarships and grants that are available in this major.

CLAS Major Pathways:

The secondary undergraduate teacher education route at CU Denver is a joint effort between the College of Liberal Arts and Sciences and the School of Education & Human Development. Through this pathway, students earn a bachelor's degree through the College of Liberal Arts and Sciences and a teaching license through the School of Education & Human Development.

Please note: The admission into the School of Education & Human Development teacher education program for CLAS majors is a separate process from admission to the university or CLAS majors. See the SEHD website for application deadlines.

CLAS Undergraduate Teacher Education Pathways

The table below lists the CLAS bachelor's degrees and associated licensure areas available to CU Denver undergraduate students pursuing secondary education licensure.

CLAS Bachelor's Degree	Colorado Teaching License
BA in English, Literature Option	English Language Arts (grades 7-12)
BA in History	Social Studies (grades 7-12)
BA in Political Science	Social Studies (grades 7-12)
BA in Spanish	World Languages - Spanish (grades K-12)
BA in French	World Languages - French (grades K-12)

BA in Individually Structured Science (grades 7-12)
Major, General Science
Option

BA in Geography, Science (grades 7-12)
Environmental Science
Education Option

BS in Biology Science (grades 7-12)

BS in Mathematics Mathematics (grades 7-12)

Program Structure

The School of Education & Human Development collaborates closely with faculty and administration in the College of Liberal Arts & Sciences to ensure rigorous content preparation in areas of study aligned to the content knowledge necessary for licensed teachers. Students focus primarily on their major in CLAS during the first three years with the opportunity to engage in four early education courses and a semester-long internship in a partner school. If admitted to the final professional year of teacher education, students will then spend two semesters simultaneously enrolled in teacher education coursework specific to their licensure area and a sequence of year-long internships in one of the program's Professional Development Schools.

Clinical Experiences in CLAS Pathway

CLAS students engage in a full-semester early field experience block, spending one day a week in a metro area partner school in order to gain experience in a diverse classroom working with students with varying cultures, languages, and abilities. This field experience block also includes a coordinated teacher education course and a bi-weekly seminar. In their final, professional year students are placed in a full year internship within the CU Denver Professional Development School Network comprised of over 20 urban schools across numerous districts in the Denver metro region. Through these internships, teacher education students live the life of a teacher for an entire academic year while enrolled in the program. The internships begin gradually with two days a week early on and increase over time to five days per week by the end of the final semester of the program. University courses are closely integrated with the sequence of clinical internship experiences providing teacher candidates with multiple opportunities to engage in the authentic work of teachers. Teacher candidates co-teach closely with practicing teachers in the school and gradually assume full responsibility for teaching by the end of the program. The schools are located in several Denver metropolitan districts serving large populations of low-income and/or culturally and linguistically diverse students, as well as a sizeable number of students for whom English is a second language and students with special needs. Each school is supported by a team of university and school-based educators who collaboratively support the development of each candidate through weekly coaching feedback and the facilitation of collaborative learning community seminars on-site at the school to integrate theory and practice.

Professional Year Admissions

After successfully completing the first 3 years of the program, all students must apply for admission into the professional year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)

Advising

Undergraduate teacher candidates from CLAS will have a team of individuals who work with them throughout the completion of their

bachelor's degree and teacher licensure. The following are the members of the advising team:

College of Liberal Arts and Science (CLAS) Education Advisor

The CLAS advisor will assist you upon entry to the university through graduation. The CLAS advisor will monitor your progress through the core curriculum, pre-licensure curriculum, eligibility requirements for the licensure program and transfer credits.

Major/Faculty Advisor

A major/faculty advisor designated within the academic department works with undergraduate teacher education students pursuing secondary licensure regarding specific requirements within their academic major (i.e., English, history, mathematics, Spanish, French, and political science). See the CLAS advisor for specific names and contact information.

School of Education and Human Development (SEHD) Advisor

During the Professional Year, all CLAS teacher candidates will be supported by an SEHD advisor to ensure licensure completion (Lawrence St. Center Bldg., 701; 303-315-6300). The Advisor in SEHD is also available early on to help with questions about program completion, taking the state content exams and other general questions.

CLAS Pathway Undergraduate Academic Planning Sheets

Developed in collaboration with the academic departments and SEHD teacher education program faculty, advisors will work with the teacher candidates on an academic planning sheet. There is little flexibility in the program course requirements as these requirements meet and exceed the Colorado Department of Education's teacher education professional and content standards.

Programs of Study

Due to the complex nature of state mandated influences on teacher preparation courses and consistently evaluating this program for students, please refer to the most current version of the teacher education program handbook for academic requirements for this program.

Middle School Math License, BA - Rural Partnership with Otero Junior College

Introduction

Please click [here](#) (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in math education. They will provide you with a robust knowledge base and relevant learning experiences in transforming deep content knowledge into learning experiences for youth across multiple cultural contexts as it relates to teaching youth in grades 6 through 8. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnering with schools to prepare teachers.

We will prepare you to become a highly effective, innovative and compassionate middle school math teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

This program is a rural partnership with Otero Junior College (OJC) in La Junta, Colorado. Students complete the first two years of the program at OJC to complete an Associate of Arts degree and then transfer to CU Denver to complete their final two years to complete the BA - EDHD degree with Middle School Math License. During the final two years, students complete CU Denver coursework remotely from La Junta and are not required to travel to Denver. Advising is provided during all four years of the program, whether students are OJC or CU Denver students. Coursework is delivered in a variety of ways, including online, video conferencing, in-person in La Junta, and fieldwork in rural Colorado in and around La Junta.

Program Delivery

- This is an on-campus program in Trinidad and Alamosa with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum total of 126 semester hours for the EDHD Middle School Math Education Track.
- Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
- Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website (<https://education.ucdenver.edu/academic-services/student-resources/undergraduate/>)).
- A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD - Middle School Math Education requirements unless otherwise specified.
- Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure

requirements. Please see an advisor for more information on this requirement.

- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Students will receive transfer credit for all of the following content and major requirements:

Code	Title	Hours
Content and Major Requirements		
MATH 2830	Introductory Statistics	3
MATH 1401	Calculus I	4
MATH 3000	Introduction to Abstract Mathematics	3
MATH 3195	Linear Algebra and Differential Equations	4

Secondary Education Licensure - CLAS Major Pathway

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The following secondary undergraduate teacher education pathway at CU Denver are a joint effort between the College of Liberal Arts and Sciences (CLAS) and the School of Education & Human Development (SEHD). Through these pathways, students earn a bachelor's degree through CLAS and complete the requirements for teacher licensure through the SEHD.

The table below lists the CLAS bachelor's degrees and associated licensure areas available to CU Denver undergraduate students pursuing secondary education licensure

CLAS Bachelor's Degree	Colorado Teaching License
BA in English, Literature Option	English Language Arts (grades 7-12)
BA in History	Social Studies (grades 7-12)
BA in Political Science	Social Studies (grades 7-12)
BA in Spanish	World Languages - Spanish (grades K-12)
BA in French	World Languages - French (grades K-12)

BA in Individually Structured Science (grades 7-12)	
Major, General Science Option	
BA in Geography, Environmental Science Education Option	Science (grades 7-12)
BS in Biology	Science (grades 7-12)
BS in Mathematics	Mathematics (grades 7-12)

Please note: Admission into the final year of the SEHD teacher education program, called the Professional Year, is a separate process from admission to the university or admission to CLAS. See the SEHD website for application deadlines.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

ENGL 4730	Chaucer

Post-1900 ENGL Literature

Select one of the following: 3

ENGL 3450	Contemporary Women Writers
ENGL 3480	Modern Drama
ENGL 3750	American Literature after the Civil War
ENGL 4210	History of the English Novel II
ENGL 4235	Faulkner
ENGL 4240	Topics in Contemporary American Literature
ENGL 4308	Contemporary Feminist Thought
ENGL 4600	Modernism
ENGL 4460	Contemporary World Literature

Professional Year Courses

A minimum grade of B- is required in each course.

LCRT 4100	Secondary Literacy Instruction and Assessment	3
LCRT 4200	Theory and Methods of Teaching Secondary English	3
LCRT 4201	Adolescent Literature	3
LCRT 4720	Writing Development, Instruction and Assessment	3
UEDU 4040	Planning for Learning	3
UEDU 4052	English/LA & Social Studies Capstone: Secondary Ed	3
UEDU 4931	Internship & Lrng Comm I	2
UEDU 4932	Internship & Lrng Comm II	2
UEDU 4933	Internship & Lrng Comm III	6

General Electives

Additional General Electives hours may be needed to reach the required 126 hours for the BA.

Total Hours 90-91

¹ Courses require a grade of B- or better; all other courses require a grade of C or better.

Secondary Mathematics License, BA Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in secondary mathematics education. They will provide you with a robust knowledge base and relevant learning experiences in transforming deep content knowledge into learning experiences for youth across multiple cultural contexts as it relates to teaching youth in grades 7 through 12. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnering with schools to prepare teachers.

The secondary mathematics program ensures that you will develop deep content knowledge important to become a successful mathematics teacher with courses in calculus, abstract math, statistics and more. You will also be prepared with the methods and foundations coursework that will make you a highly effective, innovative and compassionate secondary mathematics teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- School of Education and Human Development Graduation Requirements (p. 686)
- Click here (p. 63) for information about Academic Policies

Program Requirements

- Students must complete a minimum total of 126 semester hours for the EDHD Secondary Mathematics Education Track.
- Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
- Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)
- A minimum of C- is required for all Math content courses.
- A minimum GPA of 2.0, grade of C or better, is required for all major courses applying to EDHD - Secondary Mathematics Education requirements unless otherwise specified.
- Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Secondary Science License, BA - Rural Partnership with Otero Junior College

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in secondary science education. They will provide you with a robust knowledge base and relevant learning experiences in transforming deep content knowledge into learning experiences for youth across multiple cultural contexts as it relates to teaching youth in grades 7 through 12. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnering with schools to prepare teachers.

We will prepare you to become a highly effective, innovative and compassionate secondary science teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

This program is a rural partnership with Otero Junior College (OJC) in La Junta, Colorado. Students complete the first two years of the program at OJC to complete an Associate of Arts degree and then transfer to CU Denver to complete their final two years to complete the BA - EDHD Secondary Science Education degree. During the final two years, students complete CU Denver coursework remotely from La Junta and are not required to travel to Denver. Advising is provided during all four years of the program, whether students are OJC or CU Denver students. Coursework is delivered in a variety of ways, including online, video conferencing, in-person in La Junta, and fieldwork in rural Colorado in and around La Junta.

Program Delivery

- This is an on-campus program in La Junta with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- School of Education and Human Development Graduation Requirements (p. 686)
- Click here (p. 63) for information about Academic Policies

Program Requirements

1. Students must complete a minimum total of 126 semester hours for the EDHD Secondary Science Education Track.
2. Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
3. Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website (<https://education.ucdenver.edu/academic-services/student-resources/undergraduate/>)).
4. A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD - Secondary Science Education requirements unless otherwise specified.
5. Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
6. Transfer courses must be approved by faculty and/or advisor to apply to the major.

Students will receive transfer credit for all of the following content and major requirements:

Special Education, BA (Elementary Education Endorsement)

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The need for highly qualified, culturally and linguistically responsive special education teachers is on the rise in Colorado and the nation. According to the United States Bureau of Labor Statistics, it is estimated that nearly 280,000 special education teaching positions will need to be filled over the next decade (2016). The Special Education track of CU Denver's bachelor's degree in Education and Human Development prepares students to step into these roles and address the exceptional learning needs of individuals ages five to 21.

The Special Education program combines cutting-edge research with real classroom experiences. You will learn from faculty who are locally, nationally and internationally recognized for their research and innovation. They will provide you with critical knowledge and interventions to teach students with exceptional learning needs. You will be able to apply your new knowledge through frequent, powerful hands-on classroom experiences, and benefit from the advantage of our rich 20-year history of school and community partnerships.

The program is designed to enhance your ability to effectively support diverse, urban students with disabilities in K-12 public schools and alternative settings. Faculty members will foster your growth as a teacher

and educational leader who promotes inclusion and equity for all. This program strives to help you:

- Gain a holistic understanding of special education
- Collaborate with schools and communities
- Engage in culturally and linguistically responsive teaching and leadership

A unique feature of this pathway is that you will be able to add the Colorado Department of Education's elementary endorsement to your credentials. Essentially, you'll leave this program with both the Special Education License and Elementary Education Endorsement through the Colorado Department of Education. This means you are prepared to teach Special Education AND K-6, making you highly employable and desirable to schools!

Students in this track have the opportunity to apply for the BAMA during their junior year. The BAMA allows students to take 9 credits of their professional year program at the graduate level and apply them to one of 8 MA degrees in the SEHD.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn this 126 credit hour BA, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements. Students should declare their intent to pursue this degree as early as possible to avoid taking classes that not count toward their degree.

- CU Denver General Graduation Requirements (p. 109)
- CU Denver Core Curriculum (p. 104)
- School of Education and Human Development Graduation Requirements (p. 686)
- Click here (p. 63) for information about Academic Policies

Program Requirements

1. Students must complete a total of 126 semester hours for the Education and Human Development, EDHD, - BA Special Education Track
2. Students must take the appropriate Praxis Test during their Junior year to complete licensure requirements.
3. An application process is required to continue into your last year/ Professional Year. After successfully completing the first 3 years of the program, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)
4. A minimum GPA of 2.0, grade of C or better, is required for all major courses applying to EDHD BA Special Education.

- Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Special Education Generalist License, BA – Rural Partnership with Otero Junior College

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Education and Human Development major focuses on engaging Colorado's rapidly diversifying student and family population. It combines cutting-edge research with real classroom experiences. You'll learn from innovative faculty members who are locally, nationally and internationally recognized for their research in special education as well as local teachers who are experts at working with students and families. They will provide you with a robust knowledge base and relevant learning experiences in supporting children of all abilities, universal design for learning, culturally sustaining education and more. You'll engage in powerful classroom experiences and benefit from our rich 20-year history of partnerships with school districts.

We will prepare you to become a highly effective, innovative and compassionate special education teacher skilled in improving student performance and reaching the needs of today's diverse learners in a variety of school settings. You will have the skills to be a teacher leader. CU Denver graduates often go on to acquire positions in educational leadership as their careers progress.

This program is a rural partnership with Otero Junior College (OJC) in La Junta, Colorado. Students complete the first two years of the program at OJC for an Associate of Arts degree and then transfer to CU Denver to complete their final two years to complete the BA - EDHD degree with a special education teaching license. During the final two years, students complete CU Denver coursework remotely from La Junta and are not required to travel to Denver. Advising is provided during all four years of the program, whether students are OJC or CU Denver students. Coursework is delivered in a variety of ways, including in-person in La Junta, online, remote/distance learning, and fieldwork in rural Colorado in and around La Junta.

Program Delivery

- This is an on-campus program in La Junta with a variety of delivery options for many of our courses including hybrid, evening, weekend, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)

- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum total of 126 semester hours for the EDHD Special Education Generalist Education Track.
2. Students must pass the appropriate Praxis Exam prior to beginning their final semester of their Professional Year. It is recommended students complete the exam in the year prior to their Professional Year.
3. Application to the last year of the program, the Professional Year Residency is required. After successfully completing all other Core, major, and elective courses, all students must apply for admission into the Professional Year. Requirements for admission include a 3.0 GPA, positive letters of recommendation, successful evaluations of earlier clinical experiences, and a successful interview. (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)
4. A minimum GPA of 2.0, grade of C or better, is required for all courses applying to EDHD – Special Education requirements unless otherwise specified.
5. Students must complete and maintain a 3.0 minimum grade point average in Professional Year coursework to complete licensure requirements. Please see an advisor for more information on this requirement.
6. Transfer courses must be approved by faculty and/or advisor to apply to the major.

Students will receive transfer credit for all of the following major requirements:

Code	Title	Hours
EDHD 1930	Community Based Field Experience & Seminar ¹	3
HDFR 2110	Child Ecology	3
EDFN 1000	Equality, Rights & Education	3
INTE 2000	Digital Teaching and Learning	3
SPED 4030	Understanding (dis)Ability in Contemporary Classrooms ¹	3
<i>Take all of the following:</i>		
EDHD 2930	Learning & Development Field Experience & Seminar (2 credits)	2
LCRT 3720	Introduction to Writing Development and Teaching	3
LCRT 4710	Primary Literacy for Diverse Learners: Pre K-3rd Grade	3
CLDE 2000	CLDE Foundations ¹	3
SPED 4740	Intersections of Literacy, Culture, & Exceptionality	3
SPED 4780	Literacy Intervention for Exceptional Learners	3

Culturally and Linguistically Diverse Education Minor

Introduction

Please click here (p. 685) to see School of Education and Human Development information.

The Culturally and Linguistically Diverse Education (CLDE) Minor is designed to provide students with an understanding of culturally and linguistically diverse students, families and communities, particularly in their relationship to public institutions. This minor is a powerful addition to majors in sociology, psychology, ethnic studies, gender studies, public health, communication, the humanities, and anyone in the field of education, as it provides professionals with a strong understanding of how to serve culturally and linguistically diverse students in school and community environments.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, and online courses.

Declaring This Minor

- If you are currently a CU Denver student please contact the Undergraduate Advisor in the School of Education & Human Development for specific meeting times to discuss the process.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 63) for information about Academic Policies

Program Requirements

1. To complete a minor in CLDE, a students must complete 15 credit hours of CLDE and other related courses with a minimum grade of C (2.0).
2. Of those CLDE courses, at least 9 credits must be completed at the University of Colorado Denver.
3. Transfer courses must be approved by faculty and/or advisor to apply to the minor.

Students will be able to create an emphasis that best suits their professional goals and needs. All CLDE minors must take a minimum of 3 CLDE courses from the list below. Students must select 2 additional courses either in CLDE or from other approved programs as listed below.

Minor Requirements

Code	Title	Hours
Select a minimum of three of the following:		9
CLDE 1000	Language, Identity, & Power: International Perspectives	
CLDE 2000	CLDE Foundations	
CLDE 3680	Spanish for Educators	
CLDE 3830	Culturally and Linguistically Responsive Teaching through STEM	
CLDE 3840	Independent Study in CLDE	
CLDE 4020	Responsive Classroom Communities	
CLDE 4700	Social Studies for Multilingual Learners	
Select two Approved Courses from outside CLDE of the following:		6
ECED 4650	Dual Language Learners Learning and Development	
EDFN 4000	Food Justice in City & Schools	
EDFN 4010	Social Foundations and Cultural Diversity in Urban Education	
HDFR 3250	Families in Global Perspectives	
HDFR 4040	Latino Families in School and Communities	
PSCI 1111	First Year Seminar (Immigration: The Struggle for Social Justice)	
SPED 4740	Intersections of Literacy, Culture, & Exceptionality	
SPAN 4020	Spanish Sociolinguistics	
SPAN 4040	Spanish Classroom Methods and Practice	
SPAN 4076	Spanish in Colorado	
SPAN 4080	Spanish in the United States	
Total Hours		15

Please contact the advisor for the complete course list.

Digital Media Design for Learning Minor

Introduction

Please click here (p. 685) to see School of Education and Human Development information.

Using digital and social media platforms and technologies, you will design and produce accessible materials and learning experiences for people in school, organizational, and community settings. People with

the Digital Media Design for Learning minor go on to be designers and producers of educational software in publishing and software companies; designers and producers of online training and training materials for organizations; designers and producers of educational exhibits in art and science museums; and designers and academic-technology consultants in K12 and college/university settings. When you select this completely online minor you become a part of an existing vibrant learning design community and professional network.

Program Delivery

- All of the courses for this minor are offered online.

Declaring this Minor

- If you are currently a CU Denver student please contact the Undergraduate Advisor in the School of Education and Human Development to set up a time to discuss the process.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 63) for information about Academic Policies

Program Requirements

1. To complete a minor in Digital Media Design for Learning, a student will need to complete 15 credit hours of Digital Media Design for Learning courses with a minimum grade of C+ (2.3).
2. Of those Digital Media Design for Learning courses, at least 12 credits must be completed at the University of Colorado Denver.
3. A transfer course must be approved by faculty and/or advisor to apply to the minor.
4. Your minor program of study is developed in consultation with an academic advisor and requires you to have previously completed a minimum of 15 credits of undergraduate courses.

Minor Requirements

Code	Title	Hours
INTE 4100	Learning Experience Design	3
INTE 4340	Learning with Digital Stories	3
INTE 4680	Producing Media for Learning	3
INTE 4660	Developing Self-Paced Online Modules	3
INTE 4665	Learning with Social Media and Networking	3
or INTE 4000	Maker Studio	
Total Hours		15

Education Studies Minor Introduction

Please click here (p. 685) to see School of Education and Human Development information.

The Education Studies Minor is a 15-credit undergraduate course of study that explores cognition and learning theory, teaching methods, development across the life span, and working with culturally and linguistically diverse learners.

The Education Studies Minor is useful across many disciplines and career paths. It is customized for two major audiences - those who plan to move into the teacher education program at CU Denver and students going into fields outside of K-12 teaching. Students outside of the K-12 teaching pathway will be able to create an emphasis that best suits their professional goals and needs as the minor is designed to enhance many disciplinary or career paths where there may be an educational component.

Students who are becoming teachers and have Elementary, Early Childhood, or Special Education as a declared major are not eligible for the Education Minor.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, and online courses.

Declaring This Minor

- If you are currently a CU Denver student, please contact Undergraduate Advising in the School of Education & Human Development at 303-315-6300 for an appointment to discuss the process.

General Requirements

The Education Minor is combined with an existing major and degree. Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 63) for information about Academic Policies

Program Requirements

Pathway 1: Education Studies Minor for students moving into the K-12 teaching licensure pathways at CU Denver. Students must complete 15 credits below with a minimum grade of B- or better. (Consult with advisor for timing and specific requirements of this minor.)

Human Development and Family Relations

Programs

- BS/MA 4+1 Program in Learning, Developmental, and Family Sciences: HDFR Concentration (p. 727)
- Human Development and Family Relations, BS (p. 728)
- Human Development and Family Relations, BS - Rural Partnership with Trinidad State Junior College (p. 729)
- Human Development and Family Relations Minor (p. 730)

Human Development and Family Relations (HDFR)

HDFR 1000 - Global Human Development & Learning (3 Credits)

The purpose of this course is to examine the contextual nature of human development and learning at the global level. Emphasis is placed on the ecological development of individuals and learning and schooling within familial, cultural and educational contexts. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

HDFR 1005 - Child Development (3 Credits)

This course focuses on the study of human growth, development and ecology from conception to adolescence. The emphasis is on the major theories of child growth and development and the implications of current research findings to better understand child development. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 1010 - Life Span Development in Ecological Settings (3 Credits)

This course is designed to introduce students to human development in ecological settings in particular family, school and community contexts as it occurs across the lifespan, including emotional, physical, and cognitive development, and emphasizes personal adjustment and achievement. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 1030 - Who am I? Cultural Identity, Family, Diverse Soc Sys (3 Credits)

This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latino families, schools and community systems and other critical issues that Latino family systems face in the United States. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 1050 - Trailblazing and Leading in Student Affairs: Student Affairs Leadership Dev (3 Credits)

This course provides a basic introduction to student affairs development practices and perspectives. The course provides an exploration of student affairs leadership identity and college student's leadership role in higher education environments. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 1080 - Lifespan Issues in Family Violence (3 Credits)

This course examines family violence over the lifespan from family system and ecological perspectives. The course explores development, definitions, theory, correlates, and the occurrence of family violence over the lifespan; including practice, interventions, and policy within school and community contexts. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

HDFR 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

HDFR 2000 - Introduction to Family and Community Services (3 Credits)

Through ecological systems theories this course is designed to provide students with an introduction to family and community services within community and educational environments. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 2080 - Sex, Human Development and Family Systems (3 Credits)

Students will become familiar with human sexuality across the life span through behavioral science and ecological perspectives. Different aspects of sexuality including behavioral, biological, developmental and cultural will be examined. Implications for working with individuals, families, and couples through a behavioral science context will be explored. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Behavioral Sciences.

HDFR 2110 - Child Ecology (3 Credits)

This course focuses on the study of human growth and ecology from conception to adolescence. The emphasis is on the major theories of child growth, development, and ecology and the implications of classic and contemporary research in the community. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 2200 - Love, Family and Human Development (3 Credits)

This course provides an introduction to understanding love, intimate relationships, and family relations through an ecological systems perspective. The course provides an exploration of contemporary diverse family systems and their relationships across the life span. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

HDFR 3002 - Preparing to be a HDFR Professional (3 Credits)

In a seminar format, students will examine the ethics, value systems, and family policies and law affecting the Human Development and Family Relations profession. Students will utilize tools of professional preparation including goal-setting, building/refining resumes, and marketing skills and abilities. Restriction: Faculty or Academic Advisor approval is required to register. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 3020 - Black and Latino Children in Families and Schools (3 Credits)

This course will use ecological systems theory perspectives as a foundation for students to develop their understanding about Black and Latino children as members of family systems, school systems and community systems within cultural contexts. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

HDFR 3050 - Children's Thinking and Assessment (3 Credits)

A review of the psychology of children's thinking emphasizing developmental changes in modes of thought. Topics include conceptual behavior, problem solving, intelligence, creativity, humor, play, and an introduction to diagnostic, formative and summative assessment. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 3100 - Adolescent Ecology (3 Credits)

Through ecological systems theories this course is designed to provide an understanding of adolescent ecological development and growth. Students will become familiar with adolescent development and growth from ecological perspectives in contexts of families, schools and communities. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 3250 - Families in Global Perspectives (3 Credits)

Students will become familiar with family life across the world. Through ecological systems theories, this course is designed to provide an understanding of families in global perspectives. The impact of family policy and practices on international families will be examined. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

HDFR 3400 - Love, Couples and Family (3 Credits)

This course examines the development and maintenance of couple and family relationships through family therapy based concepts, family systems theories and other family theories. Topics include communication patterns, stress and conflict management, decision making and goal-setting within the family. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 3500 - Introduction to Higher Education (3 Credits)

The course examines the history and structure of the institutions higher education in U.S. This course will also examine the relationship between institutions of higher education, students, faculty, administrators, and society at large. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4001 - Families and Parenting (3 Credits)

This course provides an advanced overview of theories and practices that impact culturally and linguistically diverse families and the parenting process through family systems and ecological perspectives. Specifically, there is a focus on the parent-child relationship through adolescence. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4002 - Family Life and Community Programming I (3 Credits)

This course teaches the principles, philosophies, models, and strategic methods of family life education for strengthening interpersonal and family relationships. Culturally competent students will learn about the development and implementation of effective educational programs and experiences within different community settings. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4003 - Leadership and Organizations (3 Credits)

This course provides an understanding of leadership theory and practice in community and educational environments. Students will learn about important aspects about leading diverse community and educational organizations including staff supervision, strategic planning, advancing the organization and maintaining integrity. Cross-listed with HDFR 5003. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4004 - Family and Comm. Prog. II Grant Writing/Fundraising (3 Credits)

This course provides an understanding of developing skills on grant writing and fundraising as related to family, community and educational organizations/agencies. Students will learn about important aspects about grant writing, fundraising fundamentals and funding models for sustainability. Cross-listed with HDFR 5004. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4010 - Family and Cultural Diversity (3 Credits)

The examination of familial, gender, cultural, linguistic, social and other ecological factors on diverse family systems in the United States will be covered. An ecological theoretical analysis of minority family systems within a familial, educational and social justice perspective will be explored. Cross-listed with HDFR 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4040 - Latino Families in School and Communities (3 Credits)

This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latino families, schools and community systems and other critical issues that Latino family systems face in the United States. Cross-listed with HDFR 5040. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4045 - Abuelos (Grandparents) Latino Families (3 Credits)

The course will focus on the social gerontology of Latinos families in later life. Specifically, the course will examine how ecological factors including familial, cultural, social, economic, health, cognitive and educational, impact the lives of Latino older person's in the contexts of family systems. Cross-listed with HDFR 5045. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4050 - Foundations of Student Affairs (3 Credits)

This course examines theories of college student development including student learning and growth during the postsecondary years. This course will provide an introduction to psychosocial, cognitive, moral, and social identity development theories used to explain college student development. Cross-listed with COUN 5050. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

HDFR 4075 - Family Policy & Law (3 Credits)

In this course students will identify, develop, implement and evaluate social policies and laws that effect the well-being of families. Through a family systems perspective, students will examine the law, social services, education, the economy, religion, and politics impact families. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4080 - Global Family Resource Management (3 Credits)

This course examines the allocation of family resources (social, financial and material assets), the influence of various ecological systems, the effect on family functioning and goal-setting from a global perspective. Practical applications for Family Relations professionals are included. Cross-listed with HDFR 5080. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4090 - Helping Profession Skills in HDFR (3 Credits)

This course is designed to provide an overview of essential skills required in a variety of helping situations and settings. Course content includes the development of accurate listening, empathy, reflection, and inquiry skills. Implications for working with individuals, families, and couples will be examined. Cross-listed with HDFR 5090. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4130 - College Student Development (3 Credits)

This course examines theories of college student development including student learning and growth during the postsecondary years. This course will provide an introduction to psychosocial, cognitive, moral, and social identity development theories used to explain college student development. Cross-listed with COUN 5130. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

HDFR 4200 - Adult Ecology (3 Credits)

The emphasis is on the major theories of adult ecology and growth and the implications of classic and contemporary research in the community. Specifically, biological, psychological, psychosocial, cognitive, and cross-cultural theories will be explored. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4260 - Family Systems and Social Justice (3 Credits)

Relying on ecological systems theories, this course will introduce students to families and family systems. Students will investigate how families experience (in)justice in the areas of access to education, community services, and employment. Cross-listed with HDFR 5260. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4300 - Families in Later Life (3 Credits)

Students will become familiar with the importance of families in later life. Through family systems and ecological systems theories, this course is designed to provide an understanding of the importance of family relationships and implications for practice, research, and policy. Cross-listed with HDFR 5300. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4500 - Diversity, Inclusion, Social Justice in Higher Education (3 Credits)

An examination of society, media, and public and educational policy and their impact on higher education access and persistence for marginalized groups. Students are called to consider how student affairs professionals might promote social justice for marginalized student groups. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4850 - Family Systems Therapy, Religion and Spirituality (3 Credits)

This course examines how the intersection between different religious and spiritual frameworks affects family systems. A strengths-based ecological perspective, family therapy theories and family systems theories will be used to understand religious and spiritual frameworks in working with families in schools and communities. Cross-listed with RLST 4850. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4860 - Trauma Informed Care for Diverse Populations and Co-occurring Disorders (3 Credits)

Trauma Informed Care is a treatment framework that involves understanding, recognizing and responding to effects of all types of trauma. The clinical shift is from “what’s wrong with you” to “what happened to you.” The need to address trauma is increasingly viewed as an important component of effective behavioral health service delivery. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4888 - LGBTQ Family Systems (3 Credits)

This course examines diverse Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) family systems through ecological systems perspectives and family theories. The course provides an exploration of contemporary research, policy and practice as it pertains to LGBTQ families. Max hours: 3 Credits.

Grading Basis: Letter Grade

HDFR 4930 - Human Development and Family Relations Internship (1-5 Credits)

This course provides supervised practicum/field experience to Human Development and Family Relations students. Students will apply theory and evidence-based knowledge in professional situations, enhancing the development of their professional identities and career goals by working within and evaluating community-based organizations. Prereq: HDFR 3002. Repeatable. Max Hours: 5 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 5.

Prereq: HDFR 3002

BS/MA 4+1 Program in Learning, Developmental, and Family Sciences: HDFR Concentration

Introduction

Students in the BS/MA 4+1 Program in Education and Human Development: HDFR Concentration will have a pathway to **complete a BS and MA in Learning Development and Family Sciences HDFR in 5 years**. LDFS HDFR students who pursue this BS/MA (4+1) option will likely have opportunities for accelerated opportunities to work and lead in community-based organizations with culturally and diverse families in community and educational settings.

LDFS HDFR undergraduate students may apply into the BS/MA program after completing 60 or more credits. A holistic admission process (following a comprehensive review of all admission materials) will be used including GPA, 2 letters of recommendation, demonstrate leadership experiences and an interview with HDFR faculty. A minimum of an overall cumulative GPA of at least 3.0 and a major GPA of 3.3 or better will be required and they have a faculty mentor who will strongly support his or her application to the program.

Program Delivery

- This is an on-campus program with some online options.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

HDFR students who are granted admission to the BS/MA (4+1) program and effectively subsequently admitted to the LDFS MA: HDFR concentration can substitute two undergraduate 4000 level HDFR major courses (6 credits) for two graduate level HDFR courses (6 credits) approved by HDFR faculty or HDFR advisor.

The content knowledge of the two courses substituted in the undergraduate program is addressed in greater depth and placed in larger scholarly context in the corresponding graduate courses. The student needs to earn a grade of B (3.0) or better in the two corresponding HDFR graduate courses.

Course Requirements

MA program in Learning, Developmental and Family Sciences: Human Development and Family Relations (HDFR) concentration

Code	Title	Hours
LDFS 6200	Human Development Over the Life Span	3
RSEM 5120	Introduction to Research Methods	3
LDFS 5110	Human Learning	3
HDFR 6000	Family Theories	3
RSEM 5100	Basic Statistics	3
HDFR/SEHD Electives	Professional Personalized Master's Electives (Completed at BS and MA level)	12
LDFS 6950	Culminating Capstone Experience	3
Total Hours		30

Human Development and Family Relations, BS

Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Human Development and Family Relations (HDFR) Bachelor of Science program prepares students to effectively serve individuals and families in a wide variety of environments. HDFR is committed to a curriculum rich in family diversity and social justice. This 120 credit-hour interdisciplinary program explores family systems and the ecological development of individuals across their life span. The HDFR program leads to certification in the field.

Program Delivery

- This is an on-campus or online program with a variety of delivery options for many of our courses including hybrid, evening, and online courses.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

HDFR Policies

Transfer Credit

HDFR is a transfer friendly major. HDFR will accept between 21-30 transfer elective credits that must be approved by the Registrar and the HDFR Academic Advisor. If a student is transferring from a Non-HDFR/HDFS major they are allowed to petition for an additional 6 credits. All transfer credits must be approved by the HDFR Academic Advisor and HDFR Program Chair. If a student is transferring from a HDFR/HDFS program from another university, they can petition for additional credits to count towards the HDFR major credit. The credits must be a match to be considered for official transfer.

HDFR Passing-Grade Requirements

HDFR courses (for majors/minors) must be passed with a C. C- does not constitute a passing grade; C- may be approved if overall GPA is 2.0 or above with HDFR Program Chair review and approval (an exception may be made in only one course, and this is handled on a case-by-case basis).

HDFR Professional Internship Contact Hours Update

Students will be required to complete 200 hours on-site beginning in Fall 2020 (an exception will be made for students who completed their HDFR 3002 Preparing to be a HDFR Professional in the Fall 2019 and Spring 2020 semester. These students will be granted the opportunity to complete their 155 on-site hours no later than Fall 2020). This is in addition to completing the HDFR 4930 Human Development and Family Relations Internship course (equivalent: 45 contact hours)

- On-Site Hours can be completed in 1 semester, 2 semesters or 1 semester and a summer session. Students can register for variable credits from 1-5 for a total of 5 credits.

Contact Hours:

Credit	On-site Hours
1.0	40
2.0	80
3.0	120
4.0	160
5.0	200

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum total of 120 semester hours for the Human Development and Family Relations BS.
- A minimum GPA of 2.0, C or better grade, is required for all courses applying to Human Development and Family Relations major requirements.
- Courses can be "double dipped" - i.e., used to satisfy both a general education requirement and a major course. If double dipping courses, additional HDFR courses in the electives will have to be taken to get to the 120 major required credits.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Major Requirements

Take **all** of the following Human Development and Family Relations major courses with a grade of C or better:

Code	Title	Hours
Required Courses		
HDFR 1010	Life Span Development in Ecological Settings	3
HDFR 2000	Introduction to Family and Community Services	3
HDFR 2080	Sex, Human Development and Family Systems	3
HDFR 2200	Love, Family and Human Development	3
HDFR 3002	Preparing to be a HDFR Professional	3
HDFR 3020	Black and Latino Children in Families and Schools	3

HDFR 3250	Families in Global Perspectives	3
HDFR 3400	Love, Couples and Family	3
HDFR 4001	Families and Parenting	3
HDFR 4002	Family Life and Community Programming I	3
HDFR 4003	Leadership and Organizations	3
HDFR 4004	Family and Comm. Prog. II Grant Writing/ Fundraising	3
HDFR 4010	Family and Cultural Diversity	3
HDFR 4075	Family Policy & Law	3
HDFR 4080	Global Family Resource Management	3
HDFR 4260	Family Systems and Social Justice	3
HDFR 4930	Human Development and Family Relations Internship	5
MATH 2830	Introductory Statistics	3
RSEM 4100	Research and Statistics in Families and Human Development	3

HDFR Family Diversity

Select one of the following (a grade of C or better is required): 3

HDFR 1030	Who am I? Cultural Identity, Family, Diverse Soc Sys	
HDFR 1080	Lifespan Issues in Family Violence	
HDFR 4040	Latino Families in School and Communities	
HDFR 4045	Abuelos (Grandparents) Latino Families	
HDFR 4888	LGBTQ Family Systems	
HDFR 4850	Family Systems Therapy, Religion and Spirituality	

HDFR Human Development and Learning

Select one of the following (a grade of C or better is required): 3

HDFR 1000	Global Human Development & Learning	
HDFR 2110	Child Ecology	
HDFR 3050	Children's Thinking and Assessment	
HDFR 3100	Adolescent Ecology	
HDFR 4200	Adult Ecology	
HDFR 4300	Families in Later Life	

Electives ²

HDFR concentration areas:

Pre-Individual, Couple, and Family Therapy/Counseling (p. 729)
Leadership and Community-based Organizations (p. 729)
Higher Education Environments (Pre-Higher Education and Student Affairs) (p. 729)
Educational Foundations and Social Justice (p. 729)
Early Childhood Development (p. 729)
Bilingual (Spanish) Family and Community Services (p. 729)
Family Gerontology (p. 729)

Total Hours 65

¹ Or other HDFR diversity core class

² In consultation with the HDFR advisor, students may choose courses to complete a minor and/or HDFR concentration area as long as it supports their career goals. 21 credits of electives are required. If double dipping (using a required HDFR major course to fulfill a general education requirement) more credits will be needed. Transfer students, depending on transferred courses, might not need any electives.

Pre-Individual, Couple and Family Therapy/Counseling

Provides an introduction to clinical helping professions through systems and strengths therapy perspectives, and includes English and bilingual tracks.

Leadership and Community-based Organizations

Provides a comprehensive understanding and preparation for students to work in and lead community-based organizations including secular, faith-based, for-profit, nonprofit, schoolbased, state, federal and international organizations.

Higher Education Environments (Pre-Higher Education and Student Affairs)

Provides students with an introduction to higher education and student affairs administration and possible careers at various universities, community colleges and liberal arts colleges.

Educational Foundations and Social Justice

Provides students with a foundation to understand justice within familial, educational and community settings. This concentration works well with the previously listed concentrations and is also offered in an English and a bilingual track.

Early Childhood Development

Bilingual (Spanish) Family and Community Services

Provides students with the linguistic ability to work with Spanish-speaking families and communities. Courses will be delivered in 70 percent Spanish and 30 percent English. Students in this concentration will also be able to complete any of the other concentrations in the program.

Family Gerontology

Provides students with an ecological understanding of culturally and linguistically diverse families in later life. This concentration provides students with insight about individuals' age in families and the community. It also exposes students to promising practices for better serving older adults.

See advisor for courses to take in the concentration areas and for more information.

Human Development and Family Relations, BS - Rural Partnership with Trinidad State Junior College Introduction

Please click here (p. 685) to see School of Education & Human Development information.

The Human Development and Family Relations (HDFR) Bachelor of Science program prepares students to effectively serve individuals and families in a wide variety of environments. HDFR is committed to a curriculum rich in family diversity and social justice. This 120 credit-hour interdisciplinary program explores family systems and the ecological

development of individuals across their life span. The HDFR program leads to certification in the field.

This program is a rural partnership with Trinidad State Junior College (TSJC) in Trinidad, Colorado. Students complete the first two years of the program at TSJC in an Associate of Applied Science degree in Human Services and then transfer to CU Denver to complete their final two years in online HDFR coursework for the BS in HDFR degree. Advising is provided during all four years of the program, whether students are TSJC or CU Denver students.

Program Delivery

- The courses in the first two years of the program are offered on campus in Trinidad at TSJC and the last two years of the BS degree are offered in an online format. High touch distance and local advising support is offered to students in the program.

Declaring This Major

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Education & Human Development Graduation Requirements (p. 686)
- Click here (p. 93) for information about Academic Policies

Program Requirements

- Students must complete a minimum total of 120 semester hours for the Human Development and Family Relations BS.
- A minimum GPA of 2.0, C or better grade, is required for all courses applying to Human Development and Family Relations major requirements.
- Courses can be "double dipped" - i.e., used to satisfy both a general education requirement and a major course. If double dipping courses, additional HDFR courses will have to be taken to get to the 120 major required credits.
- Transfer courses must be approved by faculty and/or advisor to apply to the major.

Take all courses with a grade of C or better.

Human Development and Family Relations Minor

Introduction

Please click here (p. 685) to see School of Education and Human Development information.

The Human Development and Family Relations (HDFR) minor prepares students to effectively serve and understand culturally and linguistically diverse family systems. For students who are interested in becoming family therapist, work in community based organizations or work as a university or college advisor/administrator this minor will provide excellent foundational courses in these areas. It also provides students with a family systems and ecological systems theories foundation of families and how they interact with community and educational contexts.

Program Delivery

- This is an on-campus program with a variety of delivery options for many of our courses including hybrid, evening, weekend and online courses.

Declaring This Minor

- If you are currently a CU Denver student please contact the Undergraduate Advisor in the School of Education and Human Development to set up an appointment to discuss the process.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 63) for information about Academic Policies

Program Requirements

1. To earn a minor, students must complete 15 approved credit hours specific to the minor, maintain good academic standing in the courses, must complete their undergraduate degree concurrently, must satisfy all requirements in each of the areas below, in addition to their individual major requirements.
2. To complete a minor in HDFR, a student will need to complete 15 semester hours of HDFR courses with a minimum grade of C (2.0) including 1 required and 4 electives.
3. Of those HDFR courses at least 9 credits must be completed at the University of Colorado Denver.
4. Transfer courses must be approved by faculty and/or advisor to apply to the minor.

Minor Requirements

Code	Title	Hours
HDFR 2000	Introduction to Family and Community Services	3
or HDFR 2200	Love, Family and Human Development	
Select four HDFR elective courses in Human Development and Family Relations and/or select from the following: ¹		12
ECED 4030	Nutrition, Health, and Safety	
ECED 4070	Development and Education of Infant and Toddlers	
EDFN 1000	Equality, Rights & Education	
EDFN 3000	Undocumented Mexican Immigration	
EDFN 4000	Food Justice in City & Schools	
EDHD 2050	Current Topics in Education and Human Development	
EDHD 2840	Independent Study in Education & Human Development	
EDHD 2910	Service Learning in Education and Human Development	
EDHD 4050	Special Topics in Education and Human Development	
LCRT 2000	Rebels, Villains, & Superheroes: How Children's Literature Shapes Our Identities	
LCRT 3815	Once Upon a Time: Family Literacies in Culturally Diverse Communities	
Total Hours		15

¹ Students will be encouraged to select courses that meet their interest and/or career aspirations. HDFR (p. 725) Courses

Overview

Lead. Solve. Change. The nationally-ranked School of Public Affairs at the University of Colorado Denver prepares leaders for government, nonprofit, and criminal justice professions. Driven by a public service mission, our students are committed to solving pressing public problems and improving their communities for the better. School of Public Affairs

graduates work as legislators, policy analysts, nonprofit leaders, law enforcement professionals, local government managers, community advocates, university faculty and administrators, and in many other fields and professions, linked by the common goal of contributing to the greater good.

The School of Public Affairs offers degree programs with optional concentrations, as well as minors and undergraduate and graduate certificate programs. All of our programs are committed to developing the rigorous and ethical thinking necessary for public service professionals. Courses integrate theoretical knowledge with the real-world application of important skills, and students frequently have the opportunity to work on behalf of government agencies and nonprofit organizations. Programs are offered in a variety of formats to accommodate both full-time students and working professionals, all taught by the same highly-regarded faculty. The size of the school means that all students can receive individualized advising and attention, and students and alumni benefit from in-house career and alumni services.

Highlights

The MPA program is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA), the authoritative accrediting body in the field of public policy, affairs and administration.

US News & World Report 2021 Rankings in the Nation:

- #25 – Best Graduate Public Affairs Schools
 - #10 – Environmental Policy and Management
 - #11 – Public Finance and Budgeting
 - #13 – Nonprofit Management
 - #22 – Public Management and Leadership
 - #25 – Public Policy Analysis
- #24 - Online Master of Criminal Justice

 - Victims and Victim Services Certificate (p. 758)

School of Public Affairs Graduation Requirements

For additional information regarding Graduation policies and procedures, please visit the Graduation section of the catalog.

Residency Requirement

A minimum of 30 credits must be taken through CU Denver. At least 21 of the final 30 credits of the degree must be earned through CU Denver. Please refer to your major program page for any additional major-specific residency requirements.

Social Sciences Requirement

The School of Public Affairs requires students to select three courses from the Social Sciences area of the CU Denver Undergraduate Core Curriculum. Please see your advisor for guidance on which courses will be most beneficial for your individual major.

Upper-Division Credits

Students must complete a minimum of 45 upper-division credits.

Foreign Language Requirement

School of Public Affairs students must demonstrate proficiency in a foreign language at the second semester college level prior to graduation. This is accomplished through course work, by examination, or through documented evidence that the student has attained the equivalent proficiency in a language other than English.

Students using high school credit to satisfy the proficiency requirement at CU Denver must have received a grade of C- (1.7) or higher in the final semester of the second-year course. Students using college-level transfer

credit or coursework at CU Denver to satisfy the proficiency requirement must receive a grade of C- (1.7) or better in the second-semester college-level course. There is no pass/fail option for any course taken for the foreign language requirement.

Student Placement in Lower-Division Language Courses

High School Background	Course Number/Level to Take
No language courses or background	1010
One year of high school	1020
Two years of high school	2110
Three years of high school	2120
Four years of high school	Upper-division courses

Note: High school programs vary substantially, and the above levels may not be appropriate for all students. Modern Languages departmental advisors will be happy to speak with any student who feels unsure about his or her placement (303-556-4893).

Prior College Courses

Students wishing to enroll in a lower-division course that does not directly follow their last completed college course in the regular sequence should consult with an appropriate faculty member of the Department of Modern Languages prior to enrollment, 303-556-4893.

Proficiency Testing

Students may also show their level of proficiency by taking a computerized placement/proficiency exam. Call the Department of Modern Languages, 303-556-4893, for scheduled exam times. The languages tested are French, German, and Spanish; students wishing to show proficiency in other languages should consult the Department of Modern Languages for documentation. Students may take an exam only once per semester.

Students who have achieved some proficiency in a foreign language through other means than academic courses should also consult with an appropriate faculty member of the Department of Modern Languages prior to enrollment. This is especially important for native and heritage speakers.

Major Requirement

Complete all requirements associated with your individual major. See the program page for detailed requirements.

Internship Requirement

Undergraduate students without professional experience in the field must complete a minimum 3-credit-hour internship under the direction of a faculty sponsor and the CU Denver Experiential Learning Center (ELC). In order to register for internship credit, students must work with the ELC. Students cannot register for internship credit on their own. Internships must align with the academic calendar and can be completed fall, spring, or summer semester.

Internships are beneficial for career exploration early in a student's academic career and/or for job experience after developing academic content in the major. Internships are considered a high-impact practice and consistently reported as one of the most beneficial experiences as part of the student's undergraduate academic career.

In order to be eligible for an internship, undergraduate students must have a minimum 2.0 cumulative GPA and a minimum of 15 semester hours completed at CU Denver. Bachelor of Arts in Criminal Justice

(BACJ) students must have successfully completed CRJU 1000 and CRJU 2041 before registering for the internship, and Bachelor of Arts in Public Administration (BAPA) students must have successfully completed PUAD 1001 and a 2000-level PUAD course before registering for the internship.

All students must work with the ELC, which provides support for students in all aspect of their internship search, including resume and cover letter help, search assistance, practice interviews, and general guidance and advice. Students are strongly encouraged to connect with the ELC at least one full-semester (~6 months) in advance of the semester in which they intend to complete their internship.

There is an internship waiver available for students with previous professional work experience related to the student's major. Previous volunteer and/or internship experience does not qualify as professional work experience for the purposes of the waiver. The waiver is not credit-bearing. When the internship requirement is waived, students will replace the 3-credit-hour internship with a major elective. Students eligible for the internship waiver are strongly encouraged to submit the internship waiver as soon as possible to have an accurate record of degree requirements. To discuss the internship waiver please contact your academic advisor.

School of Public Affairs Policies

For additional information regarding policies and procedures, please visit the Records and Registration (p. 57) section and the Academic Policies and Procedures (p. 93) section of the catalog.

Pass/Fail Policy

Core knowledge area and general electives are the only courses that can be completed pass/fail. A grade of D- or better is translated by the Records Office to a P (pass) grade. P grades do not affect students' GPA; F grades do affect students' GPA. Students interested in completing a course as pass/fail must submit a Schedule Adjustment Form during the add/drop period during the respective semester to the BACJ or BAPA Academic Advisor. Students need to consult the academic calendar posted on the Office of the Registrar's webpage for add/drop dates. Up to 16 credits may be completed as pass/fail and credited toward the bachelor degree. Students can complete a maximum of 6 credits as pass/fail in any one semester.

Academic Integrity Policy

This policy sets forth the definitions and procedures to be used in the School of Public Affairs for identifying and responding to instances of alleged academic misconduct by students. This policy should be read in connection with Campus Administrative Policy 7050, Academic Integrity.

1. **Definition of academic misconduct.** According to Campus Administrative Policy 7050, academic misconduct is defined as (1) a student's use of unauthorized assistance in an attempt to deceive an instructor of other person who is assigned to evaluate the student's work in meeting course and degree requirements, or (2) actions that interfere with the ability of the instructor to fairly judge the work of the student or other students. Academic misconduct includes any of the following behaviors:
 - a. **Plagiarism.** Plagiarism is the use of another person's distinctive ideas or words without acknowledgment. The incorporation of another person's work into one's own requires appropriate identification, regardless of the means of appropriation. Plagiarism includes but is not limited to the following, when the source is not disclosed:

- i. Word-for-word copying of another person's ideas or words;
 - ii. The mosaic (the interspersing of one's own words here and there while, in essence, copying another's work);
 - iii. The paraphrase (the rewriting of another's work, yet still using their fundamental idea or theory);
 - iv. Fabrication of references (inventing or counterfeiting sources);
 - v. Submission of another's work as one's own; or
 - vi. Neglecting quotation marks on material that is otherwise acknowledged.
- b. **Cheating.** Cheating involves the possession, communication, or use of information, materials, notes, study aids, or other devices not authorized by the instructor in an academic exercise, or communication with another person during such exercise for the purpose of obtaining or providing unauthorized information or materials. "Authorization" is legitimate only if given by the faculty member responsible for the evaluation of the student's work. Examples of cheating include but are not limited to:
- i. Copying from another's work or receiving unauthorized assistance from another person during an academic exercise or in the submission of academic assignments;
 - ii. Using an electronic device when not permitted;
 - iii. Collaborating with another student during an academic exercise without the prior consent of the instructor.
- c. **Fabrication or falsification.**
- i. Fabrication: inventing or counterfeiting information, such as creating results not obtained in a study or laboratory experiment.
 - ii. Falsification: deliberately altering or changing results to suit one's needs in an experiment, creative work, or other academic or creative exercise.
- d. **Multiple submissions:** The submission of academic work for which academic credit has already been earned, when such submission is made without instructor authorization.
- e. **Misuse of academic materials:** The misuse of academic material includes, but is not limited to, the following:
- i. Stealing or destroying library or reference materials or computer programs;
 - ii. Stealing or destroying another student's notes or materials, or having such materials in one's possession without the owner's permission;
 - iii. Receiving assistance in locating or using sources of information in an assignment when such assistance has not been authorized by the instructor;
 - iv. Possessing or using prior examinations or answer keys, unless authorized by the instructor;
 - v. Altering, forging, copying and pasting, or falsifying academic materials;
 - vi. Selling or purchasing prior examinations, digital media, quantitative formulae, papers, or assignments.
- f. **Complicity in academic misconduct:** Complicity involves knowingly allowing, or contributing to, another's academic misconduct.
- ## 2. Procedures
- a. **Discovery of alleged misconduct.** When a faculty member suspects that a student may have engaged in academic misconduct, the faculty member shall notify the student in writing and give the student an opportunity to respond. If the faculty member is satisfied that no academic misconduct has occurred, whether intentional or unintentional, the matter is ended.
- b. **Reporting alleged misconduct to the university.** If the faculty member concludes that academic misconduct may well have occurred, whether intentional or unintentional, the faculty member shall submit the allegation via an online form to the university Office of Student Conduct and Community Standards and notify the Associate Dean for Student Affairs via email. When submitting the online form, the faculty member should request that the Office of Student Conduct email a copy of the report to the faculty member and forward that copy to the Associate Dean (and to the Associate Dean of the Graduate School if the student's program is overseen by the Graduate School).
- c. **Determination of responsibility and assignment of sanctions.** The faculty member and the student may meet informally to discuss the misconduct and an appropriate sanction prior to the submission of the allegations to the Office of Student Conduct. If that meeting results in an agreement as to the sanction, the faculty member's report shall include the date of the informal meeting and a description of the sanctions. If the faculty member and the student have not met prior to the submission of allegations, the Office of Student Conduct will assist in setting up a meeting, and the faculty member will determine responsibility and appropriate sanctions after that meeting, and will notify the student in writing (and copy the Associate Dean for Student Affairs, and the Associate Dean of the Graduate School if appropriate).
- d. **Appropriate sanctions.** The faculty member is entitled to determine and impose appropriate academic sanctions for misconduct occurring in his or her course. For misconduct that appears to have been unintentional or careless, faculty are encouraged to provide an opportunity to help the student learn and grow so as not to repeat the misconduct in the future. This educational sanction may be in addition to or as a substitute for academic sanctions such as a lowered or failing grade. Faculty members may consider whether a student has previously been found to have engaged in academic misconduct in imposing sanctions. Faculty members who would like support in determining appropriate sanctions are encouraged to contact the SPA Associate Dean for Student Affairs.
- e. **Opportunity for appeal.** The student should be notified in writing of his or her right to appeal the faculty member's determination to the campus Academic Integrity Committee, pursuant to Campus Administrative Policy 7050.
- f. **Program or school level sanctions.** In cases of particularly egregious misconduct, or repeated misconduct, the faculty member, the Associate Dean for Student Affairs, and/or the Academic Integrity Committee may recommend to the Dean that the student be suspended or expelled from the program or the School.

Adopted by SPA Faculty Council on November 19, 2020

Procedures for Resolving Student Academic Grievances

These are the procedures by which a student may seek to resolve a dispute about an academic issue, such as a grade in a SPA course or a decision about academic standing in a SPA program.

Please note that faculty members have wide discretion in assigning grades, and this discretion will not be disturbed absent evidence that the faculty member has made a clear mistake, has failed to adhere to

stated standards, or has otherwise engaged in arbitrary behavior. It is the student's responsibility to provide evidence that the faculty member acted outside of their traditional discretion.

Disputes about grades in non-SPA courses or relating to non-SPA programs should be handled according to the grievance resolution process of the unit involved.

Informal Resolution of Academic Grievances

Absent unusual circumstances, students must first discuss the situation with the faculty member involved to see whether an informal resolution is possible.

Filing a Grievance

If the student and the faculty member are unable to reach resolution, the student may file a grievance with the Associate Dean for Student Affairs. All grievances should be filed as quickly as possible, preferably within the same or following semester but in no case to exceed six months after the decision that is the subject of the grievance.

The grievance may be filed via email or in paper format, and should contain all of the following information:

- The student's name, degree program, and student ID number
- The name of the faculty member involved, if any
- The course name and semester, if the dispute involves a course
- A brief statement of the nature of the grievance (not to exceed two pages)
- Any evidence that the student wishes to be considered in support of the grievance, such as a course syllabus, assignments, and communications with the faculty member
- The remedy requested by the student

The Grievance Investigation

The Associate Dean will acknowledge receipt of the grievance, forward a copy to the faculty member involved and to the faculty program director.

The faculty program director may decide to seek informal resolution by mediating between the student and the faculty member. If the faculty program director does not seek or obtain informal resolution, the Associate Dean will begin investigating the grievance. Investigation of the grievance will include speaking to the student and to the faculty member involved, and the Associate Dean may request additional information from the student or the faculty member. The Associate Dean of Student Affairs may also seek input or support on the investigation from the Associate Dean of Faculty affairs as needed.

In the event that the Associate Dean for Student Affairs is involved in the circumstances leading to the grievance, the grievance will be investigated by the Associate Dean for Faculty Affairs.

The Associate Dean will conclude the investigation and prepare a written report. The Associate Dean will strive to complete this report within 30 days of the filing of the grievance; however, please note that additional time may be required due to breaks between semesters or over the summer or efforts by the faculty program director to resolve the dispute informally.

Decision by the Dean

The Associate Dean's report shall be submitted to the Dean and shall include a recommendation about the disposition of the grievance. Within ten business days, the Dean will decide whether or not to follow the recommendation, and will forward a copy of the report together with the

Dean's decision on the disposition of the grievance to the student, the faculty member, and the faculty program director.

Appealing the Dean's Decision

If the student is not satisfied with the Dean's decision, he or she may make a written request to the Dean that a faculty panel be appointed to review the grievance and consider the appeal. This request should be submitted within ten business days after receipt of the Dean's decision, and may be submitted via email. The Dean shall appoint a panel consisting of three faculty members who were not involved in the original circumstances of the grievance. The faculty panel will consider the evidence and will make a written report with recommendations to the Dean within 30 days, unless additional time is required due to breaks between semesters or over the summer. The Dean will decide whether to uphold or deny the appeal, and will notify the student and faculty member of that decision in writing within ten business days.

The decision of the Dean is final with respect to students in the BACJ, BAPA, and MPA programs. Students in the MCJ and PhD programs may be permitted to appeal the Dean's decision to the Graduate School according to its procedures.

Resolution of Other Types of Disputes

This policy only relates to academic grievances at SPA. Other types of disputes are handled in different offices and/or with different procedures, as follows:

- Disputes relating to academic integrity are handled according to SPA's Academic Integrity Policy. Contact your advisor or the Associate Dean for Student Affairs for more information.
- Disputes related to protected category discrimination (such as race, sex, or disability discrimination) are handled by the Office of Equity.
- Disputes related to the conduct of other students are handled by the Office of Student Conduct.
- The Ombuds Office is available to discuss or mediate other types of interpersonal disputes if needed.

Criminal Justice (CRJU)

CRJU 1000 - Criminology and Criminal Justice: An Overview (3 Credits)
This course is designed to provide an overview of the criminal justice process and the criminal justice system in general. Concepts of crime, deviance and justice are discussed and general theories of crime causality are examined. Special emphasis is placed on the components of the criminal justice system: the police, the prosecutorial and defense functions, the judiciary and the field of corrections. Max hours: 3 Credits.
Grading Basis: Letter Grade
Additional Information: Denver Core Requirement, Social Sciences.

CRJU 2000 - Professional Development in Criminal Justice (2 Credits)
In this course, students will explore, examine, and reflect on their strengths, interests, and personality assessments as they relate to the criminal justice field and professional development. Participants will conduct career-related research and develop individualized action plans designed to bridge the gap between their current skills and experiences and those desired by employers in the criminal justice field. Prereq: UNIV 1110. Restriction: Restricted to Criminal Justice majors. Max hours: 2 Credits.
Grading Basis: Letter Grade
Prereq: UNIV 1110 Restriction: Restricted to Criminal Justice majors

CRJU 2041 - Criminological Theory (3 Credits)
This course examines the nature and causes of crime and policies within and outside the criminal justice system to predict, prevent, and correct criminal, delinquent, and deviant behavior. It involves a critical appraisal of biological, psychological, economic, and sociological theories and frameworks that explain crime, delinquency, and deviance. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3100 - Research Methods (3 Credits)
This course teaches students how to formulate research questions related to criminology and crime and justice. It addresses how to design research in the field, including choosing an appropriate method and sampling strategy and collecting, analyzing, interpreting, and reporting data and findings. Specific substantive elements are included in research design (e.g., various types of probability and non-probability sampling; strengths and weaknesses of surveys, interviews, and other methodological approaches; experimental and non-experimental designs; qualitative techniques; etc.) Other substantive topics are addressed, including research ethics, consuming research, and writing in different settings. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3150 - Statistics for Criminal Justice (3 Credits)
This course introduces descriptive and inferential statistics and the use of computer software to analyze criminal justice data. Course content includes hypothesis testing and the basic analysis of continuous and discrete dependent variables related to criminology and criminal justice. Prereq: CRJU 3100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre: CRJU 3100

CRJU 3160 - White-Collar Crime (3 Credits)
Employs social science and legal approaches to examine crime committed by corporations as well as by individuals in white-collar occupations. Topics include how such crimes are socially defined, who commits them, which social contexts promote them, who is victimized, and how society and the criminal justice system respond. Cross-listed with CRJU 5574. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3220 - Community Corrections (3 Credits)
This course focuses on innovative community-based strategies for dealing with criminal offenders. Correctional alternatives to imprisonment discussed in this course include probation and parole and various community programs, such as day reporting centers, electronic monitoring, half-way houses, and boot camp programs. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3250 - Violence in Society (3 Credits)
This course surveys the relationships between mass media, crime, offenders, victims, and criminal justice. It explores how the criminal justice system and its agents, accused and convicted offenders, and victims, are portrayed in the media and the influence of these depictions on society, public policy, and the criminal justice system. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3251 - Crime and the Media (3 Credits)
This course surveys the relationships between mass media, crime, offenders, victims, and criminal justice. It explores how the criminal justice system and its agents, accused and convicted offenders, and victims, are portrayed in the media and the influence of these depictions on society, public policy, and the criminal justice system. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3252 - Violent Offenders (3 Credits)
This course consists of a historical overview of violence in American society. Course content includes an examination of violent crime rates over time, societal explanations for changes in rates and an examination of the theoretical causes and preventative strategies for acts of violence. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3270 - Case Studies in Criminal Justice (3 Credits)
This seminar examines the lives of people who live on the margins of a society that perceives them as outsiders. Ethnographic studies that utilize observation, participant observations, and interviews as their primary research methodology are assigned in order to develop a critical understanding of the social marginalization and cultural aspects of the lives of real human beings living constantly on the edge of the law. Cross-listed with CRJU 5270. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 3280 - Trauma Among Correctional Populations (3 Credits)

This course provides a comprehensive overview of trauma and the relationship of trauma to criminal offending. Topics include the definition of trauma, the impact of trauma on development, lifelong consequences of chronic exposure to adverse events, and how to integrate knowledge about trauma into organizational policies in correctional settings. The class focuses on understanding the components of a trauma-responsive environment in correctional settings and incorporating trauma recovery principles into practice. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3285 - Trauma in the Criminal Justice System (3 Credits)

This course examines trauma as widely prevalent among those who are served by the criminal justice system and experienced disproportionately among criminal justice professionals. Trauma prevalence, theory, prevention, and interventions through a trauma stewardship lens for victims of multiple forms of trauma, including vicarious traumatization and secondary traumatic stress, will be emphasized through an all-inclusive view across the criminal justice continuum. Cross-listed with CRJU 5285. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3290 - Capital Punishment (3 Credits)

This course examines in-depth a comprehensive range of issues surrounding capital punishment. Specifically, it looks at the history of capital punishment, methods of execution, legal issues and case law, deterrence, miscarriages of justice, discrimination in the capital charging and sentencing system, and the role of the death penalty internationally. The coverage of these issues relies on many sources, including scholarly readings, non-fiction books, court cases, websites, videos and documentaries, speeches, and media. Cross-listed with CRJU 5290. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3310 - Contemporary Issues in Law Enforcement (3 Credits)

This course examines law enforcement's role in contemporary society and the impact of police interaction on other segments of the criminal justice system. Special attention is paid to controversies related to police training and education, career development and community relations. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3320 - Police-Community Relations (3 Credits)

This course focuses on the police and community response to crime. Course content includes an overview of the major concepts and issues involved in what many consider to be a major fundamental shift in the approach and operations of modern policing. The origins, meaning, development and experiences of community policing and various assessments of the advantages and disadvantages of community policing are emphasized. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3330 - Serial Killers (3 Credits)

This course looks at various aspects of serial killing, including definitions, statistics, and demographics of serial killers and their victims. It examines factors that are correlated with serial killing, as well as criminal justice responses to serial killers (e.g., investigative techniques, prosecuting and defending accused killers, etc.) It also includes cases of serial killers. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3410 - Probation and Parole (3 Credits)

This course is appropriate for students who have a specific interest in the role of probation and parole as correctional sanctions in community settings. Substantive topics, including the presentence investigation report, privatization, and the roles and responsibilities of probation and parole officers, are discussed. Particular attention is paid to research on the effectiveness of probation and parole, factors that contribute to the successful completion of probation and parole, and the role that the community and citizens play in these community corrections processes. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3420 - Pleas, Trials and Sentences (3 Credits)

This course analyzes case materials involving pleas, trials, and sentences. Course content includes the dimensions of criminality, the specific elements of major crimes, plea bargaining, the use of confessions, fair trial procedures, and various aspects of criminal sanctions, including cruel and unusual punishments. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3510 - Drugs, Alcohol, and Crime (3 Credits)

This course looks at the socially constructed nature of drugs and drug policy. It explores the connection between drugs and crime within the socio-historical context of contemporary U.S. drug policy. Special emphasis is placed on the relationship between drugs and alcohol abuse and criminal offending, including the criminal justice system responses to possessing, distributing, and using illegal substances. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3520 - Juvenile Justice (3 Credits)

This course examines the development, change, and operation of the American juvenile justice system and the social factors that shape the identification and treatment of juvenile offenders. Special emphasis is placed on juvenile law and methods of dealing with youthful offenders. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3530 - Juvenile Delinquency (3 Credits)

This course looks at deviant and delinquent behavior committed by minors in American society. It explores the social construction of juvenile delinquency and factors and conditions contributing to at-risk and delinquent behavior. Finally, it examines the control and treatment of juvenile offenders prevention programs. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3540 - Crime and Delinquency Prevention (3 Credits)

This course provides students with an overview of issues related to crime and delinquency prevention, both from criminological and criminal justice points of view. Crime prevention programs that encompass both the individual and community levels are examined. Responses to juvenile offenders-ranging from prevention and diversion to institutional corrections and after care are explored in context of youth policy generally. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 3575 - Offenders With Mental Health Disorders (3 Credits)

Examines the offender who may be mentally disordered. Special attention is paid to the various phases of the criminal justice system where psychiatrists are involved (e.g., diversion, fitness, insanity and sentencing), dangerous sex offender legislation, "not guilty by reason of insanity" and "guilty but mentally ill" statutes, and issues concerning confidentiality, informed consent, and treatment. Cross-listed with CRJU 7575 and 5575. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4010 - Public Service in Emergency Management and Homeland Security (3 Credits)

Introduces emergency management and homeland security including: management of hazards, emergencies, disasters, and the networks of government and nonprofit organizations providing services. Focuses on principles of emergency management and homeland security at state and local jurisdictional levels. Cross-listed with PUAD 4010, PUAD 5650, and CRJU 5650. Prereq: CRJU 1000. Max hours: 3 Credits.

Grading Basis: Letter Grade

Pre: CRJU 1000

CRJU 4012 - Principles of Emergency Management (3 Credits)

Introduces the discipline and practice of emergency management. Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Cross-listed with CRJU 5655, PUAD 4012, and PUAD 5655. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4015 - Intelligence Writing and Briefing (3 Credits)

This course provides an overview of intelligence analysis and aims to provide the skills and tools necessary to effectively communicate results to consumers. Students will be familiarized with the analytical, perceptual, and cognitive pitfalls of conducting intelligence analysis and learn a variety of strategies for overcoming these problems, preparing professional intelligence products, and presenting executive-level intelligence briefings. Cross-listed with CRJU 5015. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4042 - Corrections (3 Credits)

This course consists of an overview of the field of penology and corrections. Attention is paid to conflicting philosophies of punishment, criminological theory as it applies to the field of corrections, the selectivity of the process through which offenders move prior to their involvement in correctional programs, institutional corrections, alternative correctional placements, and empirical assessments of the short and long-term consequences of one's involvement in correctional programs. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4043 - Law Enforcement (3 Credits)

This course presents an overview of the role of police in the United States. Attention is placed on the origins of policing, the nature of police organizations and police work, patterns of relations between the police and the public, discretion, and the police role in a sociological context. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4044 - Courts and Judicial Process (3 Credits)

This course examines the basic functions, structure, and organization of the federal and state court systems, with special attention on the criminal court system. It looks at the courtroom workgroup and agents within it, including the prosecutor, defense attorney, and judge. It focuses on the influence of judicial behavior on the court process by examining judges' policy preferences, legal considerations, group processes within courts, and courts' political and social environments. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4100 - Administration of Criminal Justice (3 Credits)

Analyzes the policies and practices of agencies involved in the criminal justice process, from the detection of crime and arrest of suspects through prosecution, adjudication, sentencing and imprisonment, to release. The patterns of decisions and practices are reviewed in the context of a systems approach. Cross-listed with CRJU 5100. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4120 - Race, Class, and Justice (3 Credits)

This course examines the relationships between race, social class, and crime. Attention is given to theoretical explanations, empirical research, and patterns of criminal behavior. The class focuses on historical frameworks that are relevant to current perspectives on the impact and interactions of race, class, and crime in the field. It examines race, class, and race-by-class disparities and discriminatory practices at different phases of the justice system from detainment through sentencing and appeals. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4121 - Ethics in Criminal Justice (3 Credits)

This course is designed to prepare students to identify and critically examine ethical issues in the criminal justice system by applying ethical decision models. It also provides students with the opportunity to analyze how they would resolve these issues according to their own values and beliefs while staying within the boundaries of the law and formal and informal professional ethics. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4130 - Poverty, Crime, and Justice (3 Credits)

This course analyzes theories and empirical research related to the causes of criminal behavior committed by individuals of lower socioeconomic status. Further, it examines the economic and social costs of crimes committed by under-resourced individuals and crime-prevention strategies that are connected to crimes committed by under-resourced individuals. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4140 - Domestic Violence and Crime (3 Credits)

This course examines the criminal justice systems response to intimate partner violence by focusing on the interactions between victims, offenders, and components of the criminal justice system. By exploring the dynamics of intimate partner violence, this course addresses the theories, history, research, legislation, and policy implications related to the criminal justice system's response to intimate partner violence. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4150 - Sex Offenders and Offenses (3 Credits)

This course explores historical and current practices of the criminal justice system to address sex offenders and offenses. Topics include the history of sexual abuse, etiology of offenders, victims' issues, juvenile sex offenders, risk assessment, and treatment/supervision approaches to sex offenders and offenses. Prereq: CRJU 1000. Max hours: 3 Credits.

Grading Basis: Letter Grade

Pre: CRJU 1000

CRJU 4170 - Victimology (3 Credits)

This course involves the scientific study of crime victims and focuses on the physical, emotional, and financial harm people suffer at the hands of offenders. Emphasis is placed on victim-offender relationships, interactions between victims and the criminal justice system, and connections between victims and other social groups and institutions. Theories, history, research, legislation, and policy implications related to the social construction of "the victim" are explored. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4171 - Homicide Studies (3 Credits)

This class examines criminal homicide from all angles: the offenders, the victims, the police, prosecution, defense, jurors, and judges. It looks at investigative techniques and the latest science involved in criminal investigation, jury selection, and other criminal justice system issues. It focuses on what is arguably the most serious form of homicide, murder, exploring sensational cases that involve delving into the psyche of murderers. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4172 - Crime Forensics (3 Credits)

This course offers an overview of specialized knowledge, techniques, principles, and technologies of forensic sciences and criminal investigations. Students will explore the fundamentals of proper evidence collection, preservation, and evidence analysis techniques. Students in this course will develop an understanding of the practical application of forensic science to legal issues and disputes. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4173 - Crime Scene Investigation (3 Credits)

Crime Scene Investigation is a course that is designed to give the student a working knowledge of how to investigate and collect evidence on a variety of crime scenes. It demonstrates how different types of physical evidence is used to solve crimes, specifically looking at forms of evidence like gun shots, blood spatter, and finger-printing. It also looks at the importance of professional skills, such as academic knowledge, problem-solving, effective communication, and the use of technology. Other issues, such as historical context and ethics, will be discussed. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4180 - Comparative Study of Criminal Justice Systems (3 Credits)

This course analyzes the dynamics of criminality and the social responses to crime across countries. Special emphasis is placed on methods of comparative legal analysis utilized to examine international differences in crime and justice, international cooperation in criminal justice, and crime and development. Prereq: CRJU 1001. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4190 - Women, Crime, and Justice (3 Credits)

This course explores issues surrounding women as offenders and victims. It investigates explanations for women's involvement in illegal activities and looks at gender-based disparities and discrimination in the criminal justice system's treatment of women who are accused and convicted of crimes. The class also examines women's participation in criminal justice professions, including law enforcement, corrections, judicial processes, and law. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4200 - Wrongful Convictions (3 Credits)

Explores the continuum of justice-system errors ranging from persons who are falsely accused (arrested, prosecuted, and tried) to those who are wrongly convicted and imprisoned or sentenced to death row and erroneously executed. Cross-listed with CRJU 5200. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4210 - Prisoner Reentry (3 Credits)

Focuses on prisoner reentry, including strategies to prepare inmates for release, reduce recidivism, and facilitate adjustment in the community while meeting the demands of public safety. Cross-listed with CRJU 5210. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4230 - Treatment Approaches in American Corrections (3 Credits)

This course examines the origins and historical development of prisons and jails in America. Particular attention is given to the impact of reform movements; the rise of centralized correctional systems; and regional and other socially differentiated variations in the practice of punishment. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4252 - Criminal Offenders: Evidence-Based Decision-Making (3 Credits)

This course will introduce the core principles of evidence based programming and tools of motivational interviewing as it is used currently with the offender population. In addition, students will learn how to utilize these skills working with specific offender populations. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4310 - Leadership Roles in Criminal Justice (3 Credits)

The course is designed to enhance interest, experience, and knowledge in leadership that promotes professionalism and ethical behavior among criminal justice professionals. Individual and organizational dynamics are explored through a critical perspective, focusing on criminal justice roles and responsibilities. The class teaches effective leadership skills in areas such as team building, strategic planning, and decision-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4331 - Crime Analysis and GIS (3 Credits)

Serves as an introduction to the uses and applications of analysis within law enforcement, including the role of analysis in law enforcement, theories that guide analysis and police practices, commonly used data sources and technology, and techniques for various types of analysis utilized in law enforcement. Cross-listed with CRJU 5331. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4410 - Criminal Law and Constitutional Procedures (3 Credits)

This course focuses on substantive criminal law and constitutional rights of the accused in criminal proceedings. Course content includes the legal elements of major crimes. It also addresses legal aspects of investigation, search and seizure, arrest, custodial interrogation, the appointment of counsel, and constitutional rights that apply during trials (e.g., right to confront witnesses, be protected against self-incrimination, be tried by a jury of one's peers, etc.) Rules governing the admissibility of evidence in court are also examined. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4430 - Law and Society (3 Credits)

This course introduces students to the scholarly study of law. Students will become familiar with social scientific perspectives of the law, legal institutions, the legal process, and the impact of law on behavior. Particular emphasis is placed on the interplay between the social construction of crime through law, criminal behavior and individuals targeted in criminal justice processes in America. Additional topics include theories of law and legality, comparative legal systems, police, lawyers, judges, juries, and the use of social science expertise in the justice system. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4440 - Courts and Social Policy (3 Credits)

This course involves the study of emerging trends and issues in the administration of the courts, the emerging role of the judiciary in the administration of programs in the public and private sectors, and the implications of court administration on social policy. Course content includes the history of the judicial approaches to the criminal justice administrative process and substantive social policy. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4450 - Homeland Security (3 Credits)

This course is an in-depth analysis of homeland security in the U.S. Topics include the initial concepts and strategies of securing land borders, seaports, and airports, the establishment of the Department of Homeland Security, and the functions and operations of the DHS today and in the future. Prereq: Completion of CRJU 1000. Max hours: 3 Credits.

Grading Basis: Letter Grade

Pre: CRJU 1000

CRJU 4520 - Gangs and Criminal Organizations (3 Credits)

This course traces the origins and historical development of the activities known as "organized crime." These crimes are some of the most dangerous to American society and range from the commonly known offenses of gambling and narcotics to the more subtle and sophisticated, less understood but equally serious, crimes of extortion, commercial bribery, and political corruption. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4530 - Families and Intergenerational Violence (3 Credits)

This course focuses on the family as the primary institutional mechanism of social control. Structured around social learning theory, it explores the relationships between exposure to childhood violence and violence later in life, including dating relationships during adolescence and adulthood and violence in marital relationships. The course also looks at the impact of childhood violent victimization on juvenile delinquency, adult criminality, and violent behavior in general. Max hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4540 - Evidence-Based Approaches in Law Enforcement (3 Credits)

This course provides an introduction to the uses and applications of analysis within law enforcement, including the role of analysis in law enforcement, theories that guide analysis and police practices, commonly used data sources, technology, and a practical introduction to the techniques for various types of analysis utilized in law enforcement.

Prereq: CRJU 1000, 3100, and 4043. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: CRJU 1000, 3100, and 4043.

CRJU 4600 - Special Topics in Criminology and Criminal Justice (1-6 Credits)

This highly specialized seminar addresses cutting-edge and emerging developments in the fields of criminology and criminal justice and provides students and faculty with the opportunity to explore significant themes, issues, and problems from a broad interdisciplinary perspective. Topics vary from semester to semester. Prereq: CRJU 1000. Repeatable. Max hours: 18 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 18.

Pre: CRJU 1000

CRJU 4700 - Community-Based Field Experience and Seminar (3 Credits)

Students work in small groups to complete substantive projects for government agencies and community organizations, led by faculty instructor. Topics addressed will vary depending on the needs of the community partner. Prerequisite: Completion of CRJU 1000 and CRJU 3100. Restriction: Restricted to SPA students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prerequisite: Completion of CRJU 1000 and CRJU 3100. Restriction: Restricted to SPA students.

CRJU 4710 - Environmental Crime and Justice (3 Credits)

Environmental Crime and Justice will look at the disproportionate benefits and burdens of environmental "profits" (e.g., open spaces, clean air and water, etc.) and contamination (which results from behaviors that include, but are not limited to crime), as well as the implications of these disparities on certain areas, particularly communities of color and indigenous communities. The role of the government, the private sector, non-profit organizations, and the environmental justice movement in creating, perpetuating, and minimizing environmental crime and its disparities will be examined, with part of the focus being on theories within critical criminology that address issues of environmental crime injustices. The nature of environmental offenders and victims will be explored. Policies and programs that have been organized to address environmental crime and other injustices and their effects (e.g., quality of life, birth defects, childhood asthma, lead poisoning, cancer, etc.) will be reviewed, including responses by the criminal justice system to environmental crime. Students will examine critically the consistencies and inconsistencies in institutionalized mechanisms that are set up, either intentionally or more subtly, to create, reinforce, or minimize environmental crimes and injustices. Cross-listed with CRJU 5710. Max Hours: 3 Credits.

Grading Basis: Letter Grade

CRJU 4840 - Independent Study: CRJU (1-6 Credits)

This course consists of instructor-guided research in an area of mutual interest to the student and instructor or a student-driven project supervised by the instructor. Students are responsible for selecting their area of inquiry prior to contacting the instructor. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

CRJU 4939 - Internship (1-9 Credits)

Internships involve a career-related supervised experiential course in a criminal justice or related agency. Permission to enroll must be preceded by an application for an internship. Prereq: Permission of instructor and advisor is required for undergraduate students. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

CRJU 4961 - Capstone (1-10 Credits)

Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final project demonstrating their qualifications and expertise. Restriction: Restricted to undergraduate students in the School of Public Affairs. Max hours: 10 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 10.

Restriction: Restricted to undergraduate students in the School of Public Affairs.

Additional Information: Report as Full Time.

Public Administration (PUAD)

PUAD 1000 - Public Service Online Success and Career Exploration (1 Credit)

Offers Public Service majors the chance to explore their career field and adapt to an online learning environment. Topics will include Canvas tips, online course etiquette, community building for the online learner, how online students can utilize CU Denver student-success resources, writing and citation tips, and contemporary time management techniques.

Restriction: Restricted to freshmen or undergraduates with less than 30 credit hours. Max hours: 1 Credit.

Grading Basis: Letter Grade

Restriction: Restricted to freshmen or undergraduates with less than 30 credit hours.

PUAD 1001 - Introduction to Leadership and Public Service (3 Credits)

This course provides a broad introduction to public service and encourages exploration of personal values and interests related to leadership, community, and life choices. Multiple paths to advancing the public good are explored, including volunteerism, citizenship, and service in government and nonprofits. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Social Sciences.

PUAD 2001 - Management for Public Service (3 Credits)

Learn how managers in public sector organizations foster human capital and manage performance in a diverse, inclusive, and collaborative workforce. Examine strategic management techniques, human resource law and procedures. Explore the values of character and competence in creating effective organizations. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3001 - Financial Management for Public Service (3 Credits)

Explore topics in public financial management including budget preparation, monitoring, and reporting. Learn how to build public service capacity through sound fiscal discipline and equitable allocation of resources for the public good. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3002 - Program Design, Evaluation, and Decision-Making (3 Credits)

Effective public service program outcomes are systematically managed, monitored, and evaluated. Learn the analytical, critical thinking, and problem-solving skills required for program design, implementation, evaluation, and evidence based decision-making. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3003 - Introduction to Nonprofit Organizations (3 Credits)

Explore the historical background, development, role, auspices, organization, and purposes of nonprofit agencies. Expand awareness of the scope and breadth of the nonprofit sector in the U.S., examine the inner workings of nonprofit organizations as the foundation for further study. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3004 - Managing Nonprofit Organizations (3 Credits)

Examine leadership and decision-making theory and practice in the nonprofit sector. Explore classic and contemporary theories on leadership, management, governance and organizational effectiveness of nonprofit organizations. Techniques for effective board meetings, committee work, development of board members, and policy development. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3005 - Collaboration Across Sectors (3 Credits)

Organizations across sectors respond to complex problems with innovative and flexible responses through networks. Managing within and across organizations is essential to effective performance in a networked system. Explore collaborative governance across sectors—nonprofit, for-profit, and public—with analyses and applications. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3110 - Seminar in Nonprofit Management (3 Credits)

This course provides an overview of the principles and concepts that are unique to nonprofit management. Topics include executive management, funding diversity, human resource management, marketing, volunteer management and ethics. Students are also given an introduction to the history and the importance of the nonprofit sector. Cross-listed with PUAD 5110 and CRJU 5010. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3500 - Managing and Leading in Environmental Organizations (3 Credits)

Students will explore the intersections between management, science, regulations, policies, and sustainable programs, and issues associated with "being green." Students will also consider the intersection of environmental laws with efforts by businesses, governments, NGOs, and other organizations to protect natural resources, build collaborations for effective environmental management, and the deep-seated value conflicts over the causes, or even the existence, of environmental problems and the appropriate solutions to address them. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 3600 - Managing and Leading in International Development (3 Credits)

Students will learn about the history of development paradigms and understand the relationships among development actors and how they address persistent global problems such as poverty, human trafficking, trade, education, health, and human rights, as examples. Students will understand the impact of colonialism and the finite resources available to address complex social issues in the developing world. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4001 - Ethics in Public Service (3 Credits)

Understand ethics in public service, explore ethical concerns in public affairs, and confront ethical challenges in government and nonprofit organizations. Through theoretical and case study readings and applied projects, students analyze ethical issues and proposed responses. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4002 - Leading for the Public Good (3 Credits)

Explore how service and regulation intersect and challenge public servants to balance management, politics, and law. Investigate cultural competency, social justice, and citizenship, and issues related to organizational development, leadership, motivation, change management, and teamwork. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4003 - Effective Communication for Public Service (3 Credits)

Cultivate skills in making a well-reasoned argument, locating supporting evidence, speaking and writing persuasively, and effectively fostering partnerships across sectors and media. Address varied audiences with presentations that communicate diverse viewpoints in the public service context. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4004 - Building Public and Financial Support for Nonprofit Organizations (3 Credits)

Examines methods, techniques, and directed experience in fundraising for nonprofit agencies. Explores relationships with umbrella organizations, government funding, grantsmanship, budget control, and accountability. Discusses social entrepreneurship and social innovation. Examines communications, marketing, and public relations intersection with resource development. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4006 - Organizational Development (3 Credits)

Examine structures, life-cycles, and change dynamics of government and nonprofit organizations including organizational culture, the relationship between organizational structure and service provision, and organizational strategy and effectiveness. Learn diagnostic and assessment tools, methods, and processes for improving organizational performance. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4007 - Nonprofit HR: Governance, Staff, Volunteer Management (3 Credits)

Current issues in human resource administration for employees of nonprofit organizations. Topics include such areas as recruitment, staff development, volunteer management, performance, evaluation, labor-management issues, and affirmative action. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4008 - Current Issues in Public Sector Organizations (3 Credits)

Explore the impact on public sector organizations of emergent issues such as globalization, changing demographics of the citizenry and workforce, sustainability, declining budgets, and information technology. Examine ways public sector organizations adapt to these trends. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4009 - Human Service Organizations (3 Credits)

Provides an overview of human services delivery in government and nonprofit organizations. Explore causes and conditions that give rise to the need for effective and equitable human service organizations. Learn essential skills including cultural competencies, boundaries, and collaboration. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4010 - Public Service in Emergency Management and Homeland Security (3 Credits)

Introduces emergency management and homeland security including: management of hazards, emergencies, disasters, and the networks of government and nonprofit organizations providing services. Focuses on principles of emergency management and homeland security at state and local jurisdictional levels. Cross-listed with PUAD 5650, CRJU 4010, and CRJU 5650. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4012 - Principles of Emergency Management (3 Credits)

Introduces the discipline and practice of emergency management. Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Cross-listed with PUAD 5655, CRJU 4012 and CRJU 5655. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4020 - Social Entrepreneurship (3 Credits)

Social entrepreneurship, practices, theories, and allied concepts. Using private, nonprofit, and government examples, explore innovation, creativity, profit for social welfare, and innovative management. Advance an organization's social good mission, and increase effectiveness, accountability, and efficiency through market-based techniques. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4140 - Nonprofit Financial Management (3 Credits)

Provides a grounding in financial management for the "non-accountant" by focusing on an array of knowledge and management skill areas necessary for allocating and controlling resources and for analyzing, reporting and protecting the fiscal health of the organization. Topics include key accounting principles, understanding and using financial statements, the budget development process, cash flow analysis, banking relationships, using the audit report, maximizing investment policy and strategy, and understanding the boundaries of tax exemption. Cross-listed with PUAD 5140 and CRJU 5140. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4145 - Philanthropy (3 Credits)

Today, the organized field of philanthropy and its companion field, impact investing, are growing at a remarkable speed. This course will explore the origins of philanthropy and impact investing and provide students with an in-depth understanding of how philanthropy works today and the nuances that exist among different forms of philanthropy and investment: individual giving, foundations, corporate philanthropy, and impact investing. It will also explore new trends among individual and institutional investors and unpack the different approaches that funders are taking to influence how services are delivered and the striking efforts to affect systems changes. Cross-listed with PUAD 5145. Max hours: 3 credits

Grading Basis: Letter Grade

PUAD 4160 - Nonprofit Boards and Executive Leadership (3 Credits)

The important roles and responsibilities of a voluntary board of directors and the process of governing are often misunderstood. This course explores the special powers of a nonprofit board of directors as framed by and responsive to public policy. From the perspective of organizational behavior and theory, the course examines the leadership role and interplay between board members and the executive director. The examination includes a comparative analysis of different governing models, and explores fundamental questions of board composition, the role of advisor boards, achieving effective board meetings, the realm of liability, using committees, and the board's role in fundraising, among other special subject matter. Crosslisted with PUAD 5160. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4220 - Human Resource Management (3 Credits)

Covers human resource functions in public and nonprofit agencies. Topics include job analysis, compensation, recruiting, selection, rewarding, training and development. Contemporary issues concerning civil service reforms are also presented. Cross-listed with PUAD 5220. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4325 - Public Private Partnerships (3 Credits)

This course has been designed to introduce students to public private partnerships (PPPs) as a field of study and practice using Colorado as a laboratory for current practice, policy, strategy, management and finance. Students will engage current examples of PPPs as cases, learn and exchange in class presentations with guest lecturers currently leading PPPs and evaluate projects in class assignments doing research, analysis, and field interviews. Students will enhance their knowledge as well as skills commonly used in public, private, nonprofit and enterprise management and the public policy context and narrative of PPPs in international and U.S. practice. Cross-listed with PUAD 5325. Max hours: 3 credits

Grading Basis: Letter Grade

PUAD 4440 - Negotiation and Conflict Resolution (3 Credits)

Focuses on concepts and skills necessary to negotiate policy and management decisions and manage internal and external conflicts. Designed to help students understand the dynamics that affect negotiations and to apply the principles and strategies of negotiation in a variety of decision making and dispute resolution contexts. Cross-listed with PUAD 5440. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4600 - Special Topics in Public Service (1-6 Credits)

This highly specialized seminar addresses cutting-edge and emerging developments in the field of public service and provides students and faculty with the opportunity to explore significant themes, issues and problems from a broad interdisciplinary perspective. Topics vary from semester to semester. Repeatable. Max hours: 18 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 18.

PUAD 4628 - Social Problems and Policies in the Urban Environment (3 Credits)

Examines local government and nonprofit approaches to addressing common urban social problems. Topics covered may include urban poverty, crime, education, housing, and immigration. Max hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4630 - Economic Development (3 Credits)

As governments search for new ways to be efficient, improve performance and leverage resources, they are also looking at their communities, states and regions in terms of competitiveness, international trade and globalization innovation, collaboration and partnerships. This course will look at practices where economic development includes these elements: the Colorado Innovation Network, the Colorado Office of Economic Development and International Trade, the Metro Denver and Denver South Economic Development Partnerships, Mile High Connects, the Downtown Denver Partnership, and public-private partnerships across multiple sectors in transportation, broadband, water and innovation. Students will develop an economic development strategy based on knowledge and tools learned in the course. Political and professional leadership will be part of the dialog. Crosslisted with PUAD 5630. Max hours: 3 credits

Grading Basis: Letter Grade

PUAD 4633 - Economic Development (3 Credits)

As governments search for new ways to be efficient, improve performance and leverage resources, they are also looking at their communities, states and regions in terms of competitiveness, international trade and globalization innovation, collaboration and partnerships. This course will look at practices where economic development includes these elements: the Colorado Innovation Network, the Colorado Office of Economic Development and International Trade, the Metro Denver and Denver South Economic Development Partnerships, Mile High Connects, the Downtown Denver Partnership, and public-private partnerships across multiple sectors in transportation, broadband, water and innovation. Students will develop an economic development strategy based on knowledge and tools learned in the course. Political and professional leadership will be part of the dialog. Cross-listed with PUAD 5633. Max hours: 3 credits.

Grading Basis: Letter Grade

PUAD 4638 - Colorado Politics, Policy, and Administration (3 Credits)

This course focuses on the state-level policy-making process in Colorado, and how that process is affected by local, state, and federal politics, administration, and other policy-making constraints applicable to the state. Substantive topics covered will vary, but students will be exposed to a wide range of perspectives and experiences from practitioners and policy influencers engaged in state-level politics, policy-making, and administration. Cross-listed with PUAD 5638. Max Hours: 3 Credits.

Grading Basis: Letter Grade

PUAD 4740 - Sustainable Energy Policy (3 Credits)
 This course will cover the basic principles and operation of policy and regulation that impact the production and use of energy (with a focus on transportation and electricity generation) from all of the major sources currently available and used. We will analyze (and, through a sustainability lens, critically evaluate) energy from water (hydroelectric, hydrokinetic), coal, domestic and international petroleum, natural gas and nuclear reactors. A significant portion of the course will focus on electricity generation and associated policy, technologies and regulation. In the context of each energy source and use, we will review and discuss sustainability practices, policies, and, issues. Cross-listed with PUAD 5740. Max hours: 3 credits
 Grading Basis: Letter Grade

PUAD 4840 - Independent Study (1-6 Credits)
 This course consists of faculty-guided research in an area of mutual interest to the student and instructor. Students are responsible for selecting their area of inquiry prior to contacting the instructor. Permission of instructor is required. Repeatable. Max Hours: 6 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 6.

PUAD 4939 - Public Service Internship (1-9 Credits)
 The internship course, required for all Public Service majors unless waived, provides career-related experiential learning in a government agency or nonprofit organization. Students must apply to the internship course in the semester before they hope to enroll and obtain permission from their advisor and the instructor prior to enrolling. Prereq: PUAD 1001 plus any other 2000 level (or higher) PUAD course, a GPA of 2.0, and a minimum of 15 UCD credit hours completed. Repeatable. Max Hours: 9 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 9.

PUAD 4961 - Capstone (1-10 Credits)
 Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final project demonstrating their qualifications and expertise. Restriction: Restricted to undergraduate students in the School of Public Affairs. Max hours: 10 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 10.
 Restriction: Restricted to undergraduate students in the School of Public Affairs.
 Additional Information: Report as Full Time.

Criminal Justice, BA Introduction

Please click [here \(p. 731\)](#) to see School of Public Affairs information.

The School of Public Affairs’ Bachelor of Arts in Criminal Justice (BACJ) program is designed for students who are interested in studying the American criminal justice system. Coursework in the major includes the complex nature of crime causation; the history, framework, and operations of criminal justice organizations; the implications of public policies related to crime and justice; and special topics such as capital punishment, victimology, race and crime, and community corrections. Students also receive rigorous training in research methods and statistics, allowing them to understand how to frame important questions and become critical consumers of information. Students may choose to concentrate their electives in Law Enforcement (p. 745), Victims

and Victim Services (p. 746), or they may use electives to study other criminal justice-related topics.

As with all undergraduate degrees at CU Denver, BACJ students will also complete the requirements of the CU Denver core curriculum, ensuring that they have a well-rounded liberal arts education. The critical thinking skills provided by the degree are important to any future career path, but BACJ students are particularly well-prepared for careers in criminal justice organizations such as local, state, and federal law enforcement and criminal justice agencies and in nonprofit organizations working with people and communities affected by crime. Many graduates pursue advanced degrees in law, criminal justice, and related fields.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Major

- Please contact spa.advising@ucdenver.edu
- Click [here \(p. 63\)](#) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click [here \(p. 93\)](#) for information about Academic Policies

Program Requirements

1. The Bachelors of Arts in Criminal Justice degree requires 39 credit hours of coursework. Students must complete a minimum of 45 upper-division credit hours, 21 of which must be Criminal Justice credit hours.
2. A maximum of 15 transfer credits may be applied to the major. Transfer Criminal Justice credits above the 15 credits already applied to the major will count as general electives. CRJU courses taken from the University of Colorado, Colorado Springs are not subject to this transfer credit limit for the major.
3. Students must receive a minimum C- grade in each undergraduate course applied to satisfy major or minor degree requirements and must maintain a 2.0 GPA overall in major or minor courses.

Criminal Justice - Law Enforcement Concentration, BA Introduction

Please click here (p. 731) to see School of Public Affairs information.

Students interested in obtaining a concentration in Law Enforcement within the Bachelor of Arts in Criminal Justice (p. 744) (BACJ) program must apply and enroll in the BACJ program within the School of Public Affairs and must adhere to all of the degree program requirements.

The undergraduate concentration in Law Enforcement provides a detailed, comprehensive, and advanced education in the field of law enforcement. The program is designed to meet the needs of students who wish to work in law enforcement or who are currently working in the field and would like to enrich their professional development.

The program applies a multi-faceted approach to higher education that:

- Enhances analytical thinking and inclusive, relevant approaches to learning and the development of professional skills; and
- Focuses on specific, yet comprehensive, substantive areas of law enforcement that students can apply to their current or future careers in the field.

Students completing the Law Enforcement concentration will have the knowledge and skills to evaluate and respond to a variety of situations in law enforcement professions that require technical, analytic, substantive, and ethical decision-making. They will understand the

different environments and contexts in which law enforcement carry out their responsibilities.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Major

Criminal Justice - Victims and Victim Services Concentration, BA Introduction

Please click [here](#) (p. 731) to see School of Public Affairs information.

Students interested in obtaining a concentration in Victims and Victim Services within the Bachelor of Arts in Criminal Justice (p. 744) (BACJ) program must apply and enroll in the BACJ program within the School of Public Affairs and must adhere to all of the degree program requirements.

The undergraduate concentration in Victims and Victim Services provides a detailed, comprehensive, and advanced education in fields related to victims and victim services. The program is designed to meet the needs of students who wish to work in fields related to victim services or who are currently working in this field and would like to enrich their professional development.

The program applies a multi-faceted approach to higher education that:

- Enhances analytical thinking and inclusive, relevant approaches to learning and the development of professional skills; and
- Focuses on specific, yet comprehensive, substantive areas of victims and victim services that students can apply to their current or future careers in the field.

Students completing the Victims and Victim Services concentration will have the knowledge and skills to evaluate, manage, and respond to a variety of situations and issues that professionals in fields related to victims and victim services face. Specifically, they will possess technical, analytic, substantive, and ethical proficiencies that will facilitate their professional interactions and development. They will understand the different environments and contexts in which victim advocates and other professionals in this and related fields carry out their responsibilities.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. A concentration in Victims and Victim Services requires 12 semester hours of coursework.
2. A maximum of 6 transfer credits may be applied to the concentration.
3. Students must receive a minimum of C- grade in each undergraduate course applied to satisfy the certificate requirements.

Code	Title	Hours
Required Courses		
CRJU 4170	Victimology	3
CRJU 3285	Trauma in the Criminal Justice System	3
Elective Courses		
Select one course from each of the following categories:		6
<i>Violence Focus</i>		
Select *one* course from the Violence Focus list (p. 747)		
<i>Professional Setting</i>		
Select *one* course from the Professional Setting list (p. 747)		
Total Hours		12

Program Electives

There are two elective categories, Violence Focus and Professional Setting. The Violence Focus elective allows the student to learn about an area of violence in a more in-depth capacity. The Professional Setting electives allows the student to hone skills related to service delivery.

Violence Focus

Code	Title	Hours
CRJU 3250	Violence in Society	3
CRJU 3280	Trauma Among Correctional Populations	3
CRJU 4140	Domestic Violence and Crime	3
CRJU 4150	Sex Offenders and Offenses	3
ETST 2115	Genocide in the 21st Century: Darfur and Beyond	3
HDFR 1080	Lifespan Issues in Family Violence	3

HIST 4308	Crime, Policing, and Justice in American History	3
PSCI 4807	Political Violence	3
PSYC 3611	Psychology of Women	3
SOCY 4460	Hate Groups and Group Violence	3

Students must adhere to departmental pre-requisites, if applicable. Other electives not already listed may be considered, but the student must receive approval from the academic advisor prior to enrollment.

Professional Setting

Code	Title	Hours
HDFR 4003	Leadership and Organizations	3
HDFR 4004	Family and Comm. Prog. II Grant Writing/ Fundraising	3
HDFR 4090	Helping Profession Skills in HDFR	3
HDFR 4260	Family Systems and Social Justice	3
PUAD 3002	Program Design, Evaluation, and Decision-Making	3
PUAD 3110	Seminar in Nonprofit Management	3
PUAD 4002	Leading for the Public Good	3
PUAD 4009	Human Service Organizations	3

Students must adhere to departmental pre-requisites, if applicable. Other electives not already listed may be considered, but the student must receive approval from the academic advisor prior to enrollment.

To review the Degree Map for this program, please visit our website. (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/spa/>)

Criminal Justice, BA/MCJ

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The Pathway BA/MCJ program is designed to allow students to work concurrently toward the Bachelor of Arts in Criminal Justice (p. 744) (BACJ) and the Master of Criminal Justice (<http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/school-public-affairs/public-affairs/criminal-justice-mcj/>) (MCJ). Graduate credit hours earned while enrolled in the BA/MCJ program can be counted toward both the BACJ and MCJ. This program offers high-achieving students the opportunity to complete their undergraduate and graduate degrees in criminal justice in less time than completing both separately. The undergraduate and graduate degrees are conferred upon completion of each of the degree's requirements.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Major

- Please contact spa.advising@ucdenver.edu.

Both current CU Denver students and new transfer students are eligible to apply to the Criminal Justice BA/MCJ after meeting the following requirements:

- Currently enrolled in the School of Public Affairs as a Criminal Justice major
- Completed the University of Colorado Denver's undergraduate core curriculum
- Completed 60 credit hours
- Completed the following 12 credit hours in criminal justice:

Code	Title	Hours
CRJU 1000	Criminology and Criminal Justice: An Overview	3
CRJU 2041	Criminological Theory	3
CRJU 3100	Research Methods	3
CRJU 3150	Statistics for Criminal Justice	3
Total Hours		12

- Transfer Criminal Justice courses must have been approved and accepted toward the major
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in criminal justice courses

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete a minimum of 30 resident credit hours, 21 of which must be in resident coursework.
2. Students must receive a minimum B grade in each required core MCJ course.
3. A minimum of 3.0 GPA overall is required in all graduate-level coursework.
4. Students must successfully complete an MCJ capstone or thesis.
5. Students must fulfill all college and major requirements.
6. Students are eligible to receive the Bachelor of Criminal Justice degree once they have successfully completed 120 credit hours and all CU Denver undergraduate degree requirements.
7. Students must seek full acceptance to the Graduate School and the MCJ program.
8. For competitive admission to the Graduate School and the MCJ program, students must have a minimum of a 3.0 CU cumulative grade point average in undergraduate Criminal Justice courses.

9. The MCJ will be conferred once the student has completed all requirements of the Master of Criminal Justice degree.
10. Application to the pathway program is completed after the student is already admitted to the University of Colorado Denver and meets the requirements as listed above. Students must have an established CU Denver cumulative GPA and major GPA before they can seek approval in the pathway program. Students will work with their undergraduate academic advisor in seeking approval to the pathway program, which includes a separate application than the one used for general admission to CU Denver.

Public Administration, BA Introduction

The Bachelor of Arts in Public Administration (BAPA), offered by the School of Public Affairs, prepares the next generation of civic-minded leaders to take active roles in organizations that promote the common good, such as local, state, and federal government agencies and nonprofit and nongovernmental organizations. Coursework explores the history and values of public service while building real-world capacity in areas such as managing people and resources, designing and evaluating programs, collaborating with others and across sectors, making ethical decisions, and communicating effectively in diverse environments. All courses are available online, and many are also offered in person on campus. The program provides students with the flexibility to schedule courses around the reality of family and work demands while also engaging both local and fully online students in public service opportunities in their own communities. The BAPA program has been ranked #9 overall by SR Education Group's 2018 Best and Most Affordable Online Colleges, based upon a mix of #3 for quality and #22 for affordability.

Recognizing the breadth of career opportunities in public administration, students may choose to focus on emergency management (p. 749), environmental policy and management (p. 750), international development (p. 751), or nonprofit management (p. 751). Students who choose to focus on nonprofit management also have the option to earn the nationally recognized Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) credential through the Nonprofit Leadership Alliance. As workforce demand increases in the government and nonprofit sectors, students will be ready to apply critical thinking and analytical skills to make a difference in the world.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Major

- Please contact spa.advising@ucdenver.edu
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. The Public Administration major requires 48 credit hours of coursework, 36-39 of which must be PUAD courses offered by the School of Public Affairs.
2. A maximum of 12 transfer credits may be applied to the major.
3. Students must receive a minimum C- grade in each undergraduate course applied to satisfy major or minor degree requirements and must maintain a 2.0 GPA overall.

Code	Title	Hours
Required Courses		
PUAD 1001	Introduction to Leadership and Public Service ¹	3
PUAD 2001	Management for Public Service	3
PUAD 3001	Financial Management for Public Service	3
PUAD 3002	Program Design, Evaluation, and Decision-Making	3
PUAD 4001	Ethics in Public Service	3
PUAD 4002	Leading for the Public Good	3
PUAD 4003	Effective Communication for Public Service	3
PUAD 4939	Public Service Internship ²	3
Elective Courses		
Students must take a total of 24 credit hours of elective courses.		24
A maximum of 9 credit hours of electives can be taken outside of Public Administration electives.		
Total Hours		48

¹ This class also fulfills a Social Science requirement of the CU Denver core curriculum.

² The internship requirement may be waived by the BAPA program director in the case of prior significant professional public service experience, in which case an additional elective is required. See SPA Graduation Requirements (p. 732) for more information.

Public Administration Electives

Code	Title	Hours
PUAD 1000	Public Service Online Success and Career Exploration	1
PUAD 3005	Collaboration Across Sectors	3
PUAD 3110	Seminar in Nonprofit Management	3
PUAD 3500	Managing and Leading in Environmental Organizations	3
PUAD 3600	Managing and Leading in International Development	3
PUAD 4006	Organizational Development	3
PUAD 4008	Current Issues in Public Sector Organizations	3
PUAD 4009	Human Service Organizations	3
PUAD 4010	Public Service in Emergency Management and Homeland Security	3

PUAD 4012	Principles of Emergency Management	3
PUAD 4020	Social Entrepreneurship	3
PUAD 4140	Nonprofit Financial Management	3
PUAD 4145	Philanthropy	3
PUAD 4160	Nonprofit Boards and Executive Leadership	3
PUAD 4220	Human Resource Management	3
PUAD 4325	Public Private Partnerships	3
PUAD 4440	Negotiation and Conflict Resolution	3
PUAD 4600	Special Topics in Public Service	1-6
PUAD 4630	Economic Development	3
PUAD 4638	Colorado Politics, Policy, and Administration	3
PUAD 4740	Sustainable Energy Policy	3

Special Topics courses include Study Abroad in East Africa in addition to other topics, and new courses are frequently added. Please consult your advisor for any other PUAD course you are considering as an elective in advance of enrolling in the course.

Other Electives

All courses taken from another department that you would like to count as an elective for the Public Administration major must be approved by your advisor in advance. Please contact your advisor directly to discuss any class you may be considering for elective credit that is not listed above.

To review the Degree Map for this program, please visit our website. (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/spa/>)

Public Administration - Emergency Management Concentration, BA Introduction

Please click here (p. 731) to see School of Public Affairs information.

The Emergency Management concentration within the Bachelor of Arts in Public Administration (p. 748) (BAPA) degree program allows students to learn how emergency management aims to reduce the harmful effects of all hazards, including disasters. Public servants respond to emergencies but also focus on preparedness, mitigation, resilience, and recovery. Students will be prepared to apply this knowledge in careers with government and nonprofit agencies.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Concentration

- Please contact spa.advising@ucdenver.edu
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. A concentration in Emergency Management requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the concentration.
3. A minimum grade of C- must be earned in each undergraduate course applied to satisfy the concentration requirements.

Code	Title	Hours
Required Courses		
PUAD 4010	Public Service in Emergency Management and Homeland Security	3
PUAD 4012	Principles of Emergency Management	3
GEOG 2202	Hazards to Disasters: Perception and Management	3
GEOG 4230	Hazard Mitigation and Vulnerability Assessment	3
Elective Courses		
Select one elective from the list below (the mapping/GIS series is highly recommended):		3
GEOG 2080	Introduction to Mapping and Map Analysis	
GEOG 4080	Introduction to GIS	
CRJU 4450	Homeland Security	
Other 3000- and 4000-level electives approved by the concentration director		
Total Hours		15

To review the Degree Map for this program, please visit our website. (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/spa/>)

Public Administration - Environmental Policy and Management Concentration, BA Introduction

Please click here (p. 731) to see School of Public Affairs information.

The Environmental Policy and Management concentration within the Bachelor of Arts in Public Administration (p. 748) (BAPA) degree program allows students to study the laws, regulations, and policy mechanisms that the government and organizations use to manage environmental issues. Environmental policy balances protection, conservation, and sustainability of natural resources with affordable energy and economic growth while understanding how human activities affect the environment. Students will be prepared to apply this specialized knowledge in careers with government and nonprofit agencies.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Concentration

- Please contact spa.advising@ucdenver.edu
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. A concentration in Environmental Policy and Management requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the concentration.
3. A minimum grade of C- must be earned in each undergraduate course applied to satisfy the concentration requirements.

Code	Title	Hours
Required Courses		
PUAD 3500	Managing and Leading in Environmental Organizations	3
ENVS 1044	Introduction to Environmental Sciences ¹	3
ENVS 1342	Environment, Society and Sustainability	3
Elective Courses		
Select two courses from the following list:		6
COMM 4282	Environmental Communication	
ENVS 3082	Energy and the Environment	
GEOG 2080	Introduction to Mapping and Map Analysis	
GEOG 4080	Introduction to GIS (pre-req GEOG 2080)	
GEOG 4260	Energy and Natural Resource Planning	
GEOG 4265	Sustainability in Resources Management	
GEOG 4305	Water Quality and Resources	
GEOG 4335	Contemporary Environmental Issues	
GEOG 4440	Science, Policy and the Environment	
PSCI 4354	Environmental Politics	
Total Hours		15

¹ Co-requisite: ENVS 1045 Introduction to Environmental Sciences Laboratory

Public Administration - International Development Concentration, BA

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The International Development concentration within the Bachelor of Arts in Public Administration (p. 748) (BAPA) degree program allows students to learn about the history of international development paradigms and understand the relationships among development actors and how they address persistent global problems such as poverty, human trafficking, trade, and human rights, as examples. International development explores economic growth, alleviating poverty, and improving living conditions in less developed countries. Students will be prepared to apply this knowledge in careers with government and nonprofit organizations.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Concentration

- Please contact spa.advising@ucdenver.edu
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver University Core Curriculum (p. 109)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. A concentration in International Development requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the concentration.
3. A minimum grade of C- must be earned in each undergraduate course applied to satisfy the concentration requirements.

Code	Title	Hours
Required Courses		
PUAD 3600	Managing and Leading in International Development	3
PSCI 3042 or PSCI 3022	Introduction to International Relations Political Systems of the World	3
COMM 4270 or COMM 4720 or PUAD 4600	Intercultural Communication (study abroad course) Dynamics of Global Communication Special Topics in Public Service	3

INTS 2020	Foundations of International Studies	3

Electives Courses

Select one additional 3000- or 4000-level elective course: 3

ANTH 4460	Development and Conservation: Theory and Practice
ECON 3415	Issues in International Trade and Finance
ETST 4146	Indigenous Politics
GEOG 3412	Globalization and Regional Development
GEOG 4301	Population, Culture, and Resources
HIST 4032	Globalization in World History Since 1945
HIST 4220	U.S. Foreign Policy Since 1912
INTB 3000	Global Perspectives
IWKS 3600	Innovating for the Developing World
PBHL 3070	Perspectives in Global Health
PBHL 4080	Global Health Practice
PSCI 4266	International Law
PSCI 4365	Global Ecological Crises
SOCY 3720	Global Perspectives on Social Issues
SOCY 4020	Race, Culture and Immigration

Students must adhere to departmental prerequisites, if applicable. Other electives not already listed may be considered, but the student must receive approval from the academic advisor prior to enrollment.

Total Hours 15

To review the Degree Map for this program, please visit our website. (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/spa/>)

Public Administration - Nonprofit Management Concentration, BA

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The Nonprofit Management concentration within the Bachelor of Arts in Public Administration (p. 748) (BAPA) degree program prepares students for a wide variety of careers in the exciting world of nonprofit organizations. Students learn about the history and context of nonprofit organizations while gaining practical skills needed to manage and lead in this sector. The School of Public Affairs' affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the nationally recognized Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) credential.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Concentration

- Please contact spa.advising@ucdenver.edu
- Click here (p. 63) to go to information about declaring a major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. A concentration in Nonprofit Management requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the concentration.
3. A minimum grade of C- must be earned in each undergraduate course applied to satisfy the concentration requirements.

Code	Title	Hours
Required Courses		
PUAD 3110	Seminar in Nonprofit Management	3
PUAD 4140	Nonprofit Financial Management	3
Elective Courses		
Select three courses from the following:		9
PUAD 3005	Collaboration Across Sectors	
PUAD 4020	Social Entrepreneurship	
PUAD 4160	Nonprofit Boards and Executive Leadership	
PUAD 4600	Special Topics in Public Service (Study Abroad in East Africa)	
PUAD 4600	Special Topics in Public Service (Social Problems and Policies in the Urban Environment)	
Any other approved School of Public Affairs nonprofit elective		
Total Hours		15

Certified Nonprofit Professional Credential

Students completing the Nonprofit Management concentration may choose to simultaneously earn the national Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) credential from the Nonprofit Leadership Alliance by completing additional extracurricular requirements and an examination. Contact cnp@ucdenver.edu for more information.

To review the Degree Map for this program, please visit our website. (<https://www.ucdenver.edu/student/advising/undergraduate/degree-maps/spa/>)

Public Administration, BA/MPA Introduction

The Pathway Bachelor of Arts in Public Administration (BAPA)/Master of Public Administration (MPA) degree allows high-performing students to earn both degrees in an accelerated time frame, saving students both time and money. Students graduating with the Pathway BAPA/MPA degree are prepared for leadership and management roles in public service, including local, state, and federal governmental agencies and

in nonprofit and nongovernmental organizations. Both the BAPA and the MPA degrees are offered fully online, providing students with the flexibility to schedule courses around the reality of family and work demands while also engaging both local and fully online students in public service opportunities in their own communities.

The BAPA/MPA degree program offered by the School of Public Affairs allows high-performing students to count 12 credit hours towards both the BAPA and the MPA degrees. Eligible students are those who have completed at least 75 credits with a minimum 3.5 GPA in the BAPA major and a 3.0 overall GPA, completed the undergraduate Core Curriculum, and who meet the other requirements listed below.

Students are eligible to receive the BAPA degree once they have successfully completed 120 semester hours and all CU Denver undergraduate degree requirements. The MPA will be conferred once the student has completed all requirements of the MPA degree.

Pathway Application

Both current CU Denver BAPA majors and new transfer students are eligible to apply to the BAPA/MPA Pathway program after meeting the following criteria:

- Currently enrolled in the School of Public Affairs as an undergraduate Public Administration major
- Completed the University of Colorado Denver’s undergraduate core curriculum
- Completed at least 75 undergraduate credit hours
- Completed the following 15 credit hours in Public Administration or have a plan on when they will take each class:

Code	Title	Hours
PUAD 1001	Introduction to Leadership and Public Service	3
PUAD 2001	Management for Public Service	3
PUAD 3001	Financial Management for Public Service	3
PUAD 3002	Program Design, Evaluation, and Decision-Making	3
PUAD 4001	Ethics in Public Service	3
Total Hours		15

- All transfer courses must have been approved and accepted towards the major and degree at the time of application
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in the Public Administration major

Students do not apply for the pathway program at the time of application to CU Denver. Students will work with their assigned undergraduate academic advisor to apply for the pathway program after they have already matriculated to the university and have met the stated criteria.

BAPA/MPA Program Matriculation

After a student is admitted to the Pathway BAPA/MPA program, they will work with their assigned undergraduate academic advisor to enroll in MPA-level courses each semester. Students can complete up to 6 credit hours of MPA coursework each semester as an undergraduate and a maximum of 12 graduate semester credits can be completed as an undergraduate BAPA/MPA student overall. Students will continue to take undergraduate coursework while also completing graduate-level coursework.

Students in the Pathway BAPA/MPA program may be eligible to complete the MPA-level internship only after successfully passing two MPA-level courses. The MPA-level internship may fulfill both the BAPA and MPA internship requirement. The BAPA-level internship will not fulfill the MPA-level internship. Students must maintain a minimum 3.0 cumulative grade point average for all course work and a 3.5 grade point average for the BAPA major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 109)
- CU Denver Undergraduate Core Curriculum (p. 104)
- School of Public Affairs Graduation Requirements (p. 732)
- Click here (p. 93) for information about Academic Policies

Program Requirements

1. Students must complete all CU Denver, School of Public Affairs, and Public Administration degree requirements to earn their Bachelor of Arts in Public Administration degree. The Bachelor of Arts in Public Administration is conferred once students meets all degree requirements.
2. Students seek full admission to the Master of Public Administration program during their final semester as an undergraduate student. This application is different than the one used to apply for the pathway program. Students must receive a minimum of a B- grade in each required core MPA course, whether taken as an undergraduate or a graduate student.
3. Students must maintain a 3.0 GPA overall in all graduate-level courses.
4. In the MPA program students must successfully complete the MPA capstone or thesis.
5. Students must fulfill all college and major requirements.
6. The MPA will be conferred once the student has completed all requirements of the Master of Public Administration degree.
7. The School of Public Affairs reserves the right to rescind a BAPA/MPA student's admittance to the pathway program if at any point the student's grade point average falls below the requirements listed above.

Criminal Justice Minor

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The minor in Criminal Justice will provide students with foundational knowledge of criminology and criminal justice. Students majoring in sociology, psychology, political science, and related fields are likely to interact with the criminal justice system in their careers and would benefit from the addition of the Criminal Justice minor to their degree plan.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Minor

- Please contact spa.advising@ucdenver.edu.

General Requirements

Students must satisfy all requirements as outlined below and by the school offering the minor.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. The minor in Criminal Justice requires 18 credit hours of coursework.
2. A maximum of 9 transfer credits may be applied to the minor.
3. Students must receive a minimum C- grade in each course applied to satisfy the minor requirements.
4. Electives must be taken from outside the student's major.

Code	Title	Hours
Required Courses		
CRJU 1000	Criminology and Criminal Justice: An Overview	3
CRJU 2041	Criminological Theory	3
Select two of the following:		6
CRJU 4042	Corrections	
CRJU 4043	Law Enforcement	
CRJU 4044	Courts and Judicial Process	
Elective Courses		
Select two additional upper-division elective courses in Criminal Justice or ancillary fields		6
ANTH 4090	Drug Syndemic	
COMM 3231	Famous U.S. Trials	
COMM 4040	Communication, Prisons, and Social Justice	
COMM 4265	Gender and Communication	
COMM 4750	Legal Reasoning and Writing

SOCY 3700	Families and Society
SOCY 4340	Juvenile Delinquency
SOCY 4440	Poverty and Social Inequality
SOCY 4460	Hate Groups and Group Violence
SOCY 4700	Sociology of Law (Women & Crime)(Crime & Justice in the City)
SOCY 4770	Advanced Topics in Sociology
SOCY 4780	Violence in Relationships

Students must adhere to departmental pre-requisites, if applicable. Other electives not already listed may be considered, but the student must receive approval from the academic advisor prior to enrollment.

Total Hours 18

Law Enforcement Minor

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The minor in Law Enforcement provides a detailed, comprehensive, and advanced education in the field of law enforcement. This program is designed for students who are employed or will work in the field of law enforcement.

The program applies a multi-faceted approach to higher education that:

- Enhances analytical thinking and inclusive, relevant approaches to learning and the development of professional skills; and
- Focuses on specific, yet comprehensive, substantive areas of law enforcement that students can apply to their current or future careers in the field.

Students completing the Law Enforcement minor will have the knowledge and skills to evaluate and respond to a variety of situations in law enforcement professions that require technical, analytic, substantive, and ethical decision-making. They will understand the different environments and contexts in which law enforcement carry out their responsibilities.

Students must adhere to departmental prerequisites, if applicable. Other electives not already listed may be considered, but the student must receive approval from the academic advisor prior to enrollment.

Nonprofit Management Minor Introduction

The minor in Nonprofit Management is expected to be popular with students from fields in which nonprofit organizations play a significant role such as psychology, public health, arts and culture, environmental studies, education and human development, and ethnic studies. Through this minor, a student can focus on the fundamentals of nonprofit management and may also choose to earn the Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) credential through the Nonprofit Leadership Alliance.

Program Delivery

- All courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Minor

- Please contact spa.advising@ucdenver.edu.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. The minor in Nonprofit Management requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the minor.
3. Students must receive a minimum C- grade in each course applied to satisfy the minor requirements.

Code	Title	Hours
Required Courses

Elective Courses		
Select three courses from the following:		9
PUAD 3005	Collaboration Across Sectors	
PUAD 4020	Social Entrepreneurship	

PUAD 4600	Special Topics in Public Service (Study Abroad in East Africa)
PUAD 4600	Special Topics in Public Service (Social Problems and Policies in the Urban Environment)
Any other approved School of Public Affairs nonprofit elective	
Total Hours	15

Certified Nonprofit Professional Credential

Students completing the Nonprofit Management minor may choose to simultaneously earn the national Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) credential from the Nonprofit Leadership Alliance by completing additional extracurricular requirements and an examination. Contact cnp@ucdenver.edu for more information.

Public Administration Minor Introduction

The minor in Public Administration, offered by the School of Public Affairs, will provide needed competencies to a generation looking for meaningful work consistent with their values. Public Administration courses provide students with the skills and content knowledge to work in public, private, and nonprofit sectors and the emerging fourth sector that blends social concerns with business approaches. This minor is particularly useful for students majoring in substantive areas (such as environmental studies, education and human development, and criminal justice) who plan on applying their expertise in public service organizations such as governmental agencies or nonprofit organizations.

Program Delivery

- Most courses are offered online, although others may be offered on campus and in remote and hybrid formats.

Declaring This Minor

- Please contact spa.advising@ucdenver.edu.

General Requirements

Students must satisfy all requirements as outlined below and by the department offering the minor.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. The minor in Public Service requires 15 credit hours of coursework.
2. A maximum of 6 transfer credits may be applied to the minor.
3. Students must receive a minimum C- grade in each course applied to satisfy the minor requirements.

Victims and Victim Services Minor

Introduction

Please click [here](#) (p. 731) to see School of Public Affairs information.

The minor in Victims and Victim Services provides a detailed, comprehensive, and advanced education in fields related to victims and victim services. This program is designed for students who are employed or plan to work in a field related to victim services.

The program applies a multi-faceted approach to higher education that:

- Enhances analytical thinking and inclusive, relevant approaches to learning and the development of professional skills; and
- Focuses on specific, yet comprehensive, substantive areas of victims and victim services that students can apply to their current or future careers in the field.

Students completing the Victims and Victim Services minor will have the knowledge and skills to evaluate, manage, and respond to a variety of situations and issues that professionals in fields related to victims and victim services face. Specifically, they will possess technical, analytic, substantive, and ethical proficiencies that will facilitate their professional interactions and development. They will understand the different environments and contexts in which victim advocates and other professionals in this and other related fields carry out their responsibilities.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Minor

Nonprofit Management Certificate

Introduction

Please click here (p. 731) to see School of Public Affairs information.

The undergraduate certificate in Nonprofit Management is designed to appeal to students with a background in any major, or non-degree students, who are interested in working in the nonprofit sector. The certificate is designed to allow students to demonstrate to potential employers that they have the knowledge and skills necessary to succeed in the nonprofit workplace. Competencies covered by the certificate include foundations and management of the nonprofit sector, cultural

competence and diversity, and financial resource development, among others. In addition, students have the opportunity to gain real-world experience and connections through nonprofit internships and field experiences.

Completion of the coursework requirements of the certificate and associated extracurricular field experiences allow the student to earn the additional credential of Certified Nonprofit Professional (<https://www.nonprofitleadershipalliance.org/cnp/>) (CNP) pursuant to standards and competencies set by the National Leadership Alliance. Additional information about the undergraduate Certificate in Nonprofit Management may be obtained by contacting cnp@ucdenver.edu.

Program Delivery

- All courses are offered on campus, online, and in remote and hybrid formats.

Declaring This Certificate

- Please contact spa.advising@ucdenver.edu.

General Requirements

Students must satisfy all requirements as outlined below and by the school offering the certificate.

- Click here (p. 93) for information about Academic Policies

Program Requirements

1. The undergraduate certificate in Nonprofit Management requires 18 credit hours of coursework.
2. All credit hours for the certificate must be completed at CU Denver. Transfer credits are not accepted.
3. Students must earn a minimum C- grade in each undergraduate course applied to satisfy the certificate requirements.

- Music Industry Studies Minor (p. 202)

N

- Nonprofit Management Certificate (p. 757)
- Nonprofit Management Minor (p. 755)

P

- Painting and Drawing Minor (p. 230)
- Performance Emphasis, Music BS (p. 203)
- Philosophy Minor (p. 588)
- Philosophy of Science Minor (p. 590)
- Philosophy, 4 + 1 BA/ Humanities, MH (p. 587)
- Philosophy, BA (p. 584)
- Photography Emphasis, BFA (p. 231)
- Photography Minor (p. 232)
- Physics - Pure and Applied Physics Option, BS (p. 597)
- Physics Minor (p. 601)
- Political Science - Public Policy Option, BA (p. 614)
- Political Science Minor (p. 623)
- Political Science, 4 + 1 BA/ MA (p. 622)
- Political Science, BA (p. 611)
- Political Science, BA with Secondary Teaching Licensure Endorsement (p. 618)
- Professional Skills Certificate (p. 684)
- Psychology Minor (p. 637)
- Psychology, BA (p. 633)
- Psychology, BA, Gardner Psych Research Scholar (p. 640)
- Psychology, BS (p. 635)
- Psychology, BS, Gardner Psych Research Scholar (p. 639)
- Public Administration - Emergency Management Concentration, BA (p. 749)
- Public Administration - Environmental Policy and Management Concentration, BA (p. 750)
- Public Administration - International Development Concentration, BA (p. 751)
- Public Administration - Nonprofit Management Concentration, BA (p. 751)
- Public Administration Minor (p. 755)
- Public Administration, BA (p. 748)
- Public Administration, BA/MPA (p. 752)
- Public Health Demography Minor (p. 441)
- Public Health Minor (p. 441)
- Public Health, 5 year BA or BS/ Master in Public Health, MPH (p. 440)
- Public Health, BA (p. 436)
- Public Health, BS (p. 437)
- Public, Non-Profit and Community Leadership Undergraduate Certificate (p. 627)

R

- Recording Arts Emphasis, Audition Track, Music BS (p. 204)
- Recording Arts Emphasis, Non-Audition Track, Music BS (p. 205)

- Religious Studies Minor (p. 646)
- Risk Management and Insurance Minor (p. 150)
- Risk Management and Insurance, BS in Business Administration (p. 147)

S

- Secondary Education Licensure - CLAS Major Pathway (p. 712)
- Secondary English Language Arts License, BA (p. 713)
- Secondary Mathematics License, BA (p. 715)
- Secondary Science License, BA (p. 716)
- Secondary Science License, BA - Rural Partnership with Otero Junior College (p. 717)
- Secondary Social Studies License, BA (p. 719)
- Singer/Songwriter Emphasis, Music BS (p. 206)
- Social Justice Minor (p. 649)
- Sociology - Gender and Society Concentration, BA (p. 658)
- Sociology Minor (p. 661)
- Sociology of Health and Medicine Certificate (p. 665)
- Sociology, 4 + 1 BA/ MA (p. 660)
- Sociology, BA (p. 657)
- Songwriter Entrepreneur Emphasis, Audition Track, Music BS (p. 207)
- Spanish for International Business Certificate (p. 577)
- Spanish Language, Literature and Culture BA with Secondary Teaching Licensure Endorsement (p. 567)
- Spanish Language, Literature and Culture, BA (p. 564)
- Spanish Minor (p. 576)
- Spanish, 4 + 1 BA/ MA (p. 562)
- Spanish, International Language and Culture for the Professions Option, BA (p. 571)
- Special Education Generalist License, BA – Rural Partnership with Otero Junior College (p. 721)
- Special Education, BA (Elementary Education Endorsement) (p. 720)
- Sports Business, BS in Business Administration (p. 148)
- Strategic Communication Undergraduate Certificate (p. 357)
- Studio Art Minor (p. 232)
- Sustainability Minor (p. 667)
- Sustainable Urban Agriculture Undergraduate Certificate (p. 428)

T

- Teaching English Language Learners Certificate (CTELL) (p. 390)
- Technical and Professional Writing Certificate (p. 391)
- Theatre, Film & Television Minor (p. 176)
- Transmedia Sculpture Minor (p. 233)

U

- Undergraduate Certificate in Risk Management and Insurance Studies (p. 152)
- Undergraduate Teacher Licensure (p. 707)
- Urban and Regional Planning Minor (p. 426)

V

- Victims and Victim Services Certificate (p. 758)
- Victims and Victim Services Minor (p. 756)

W

- Women's and Gender Studies Minor (p. 673)

Undergraduate Courses A-Z

Catalog Course Definitions

Core – Course is approved for specific core curriculum (i.e. arts and sciences curriculum; quantitative reasoning and mathematical skills)

Cross-Listed – Class that is offered along with another class that has the same topic, title, and course content. Max Hours displayed for each cross-listed class is the total number of hours allowed for all courses completed within a particular cross-listed group. *See below for more information on Max Hours.*

GT - Course is approved by the Colorado Department of Higher Education for statewide guaranteed transfer as part of the gtPathways program.

Max Hours (in Course Description) – Total number of applicable credit hours that count toward a student's degree for a particular course or cross-listed group.

Requisite:

- **Prerequisite** – Specific course completed or “in progress” (i.e. ENGL 1020 Core Composition I or ENGL 1020 Core Composition I with C- or higher)
- **Corequisite** – Specific course taken at the same time (i.e. ENVS 1044 Introduction to Environmental Sciences taken same time as ENVS 1045 Introduction to Environmental Sciences Laboratory)
- **Restriction** – Restricted to a specific population (i.e. Restricted to MUSC majors or junior standing, etc.)

Course Number Definitions:

- 1000 - 4999 Undergraduate Level
- 5000 - 9999 Graduate Level

A

- Accounting (ACCT) (p. 764)
- Anthropology (ANTH) (p. 767)
- Arabic (ARAB) (p. 774)
- Architecture (ARCH) (p. 774)

B

- Bioengineering (BIOE) (p. 779)
- Biology (BIOL) (p. 782)
- Business (BUSN) (p. 790)
- Business Analytics (BANA) (p. 790)
- Business Law (BLAW) (p. 791)
- Business Minor for non-business majors (BMIN) (p. 791)

C

- Chemistry (CHEM) (p. 792)
- Chinese (CHIN) (p. 799)
- Civil Engineering (CVEN) (p. 800)
- CLAS Interdepartmental Courses (CLAS) (p. 805)
- Commodities (CMDT) (p. 805)
- Communication (COMM) (p. 806)
- Computer Science (CSCI) (p. 812)
- Construction Engineering and Management (CEMT) (p. 819)
- Criminal Justice (CRJU) (p. 820)
- Culturally and Linguistically Diverse Education (CLDE) (p. 826)

D

- Decision Sciences For Business (DSCI) (p. 827)
- Digital Animation (DACD) (p. 827)

E

- Early Childhood Education (ECED) (p. 828)
- Economics (ECON) (p. 830)
- Education and Human Development (EDHD) (p. 834)
- Educational Foundations (EDFN) (p. 835)
- Electrical Engineering (ELEC) (p. 836)
- Engineering (ENGR) (p. 841)
- English (ENGL) (p. 843)
- Entrepreneurship (ENTP) (p. 852)
- Environmental Sciences (ENVS) (p. 853)
- Ethnic Studies (ETST) (p. 855)

F

- Film and Television (FITV) (p. 860)
- Finance (FNCE) (p. 864)
- Fine Arts (FINE) (p. 867)
- French (FREN) (p. 879)

G

- Geography (GEOG) (p. 883)
- Geology (GEOL) (p. 890)
- German (GRMN) (p. 892)
- Greek (GREK) (p. 893)

H

- Health Humanities (HEHM) (p. 893)
- History (HIST) (p. 893)
- Human Development and Family Relations (HDFR) (p. 903)
- Humanities (HUMN) (p. 905)

I

- Information Systems (ISMG) (p. 906)
- Initial Teacher Education (ITED) (p. 909)
- Instructional Technology (INTE) (p. 910)
- Interdisciplinary Arts (ARTS) (p. 911)
- Interdisciplinary Major Course (ISMA) (p. 912)

- Interdisciplinary Studies (IDST) (p. 912)
- International Business (INTB) (p. 913)
- International Studies (INTS) (p. 914)
- inWorks Innovation Initiative (IWKS) (p. 915)

L

- Landscape Architecture (LDAR) (p. 917)
- Latin (LATN) (p. 918)
- Linguistics (LING) (p. 919)
- Literacy, Lang, & Culturally Responsive Teaching (LCRT) (p. 919)

M

- Management (MGMT) (p. 920)
- Marketing (MKTG) (p. 925)
- Math Content Knowledge for Ed (MCKE) (p. 928)
- Math Education (MTED) (p. 928)
- Mathematics (MATH) (p. 929)
- Maximizing Access to Research Careers (MARC) (p. 936)
- Mechanical Engineering (MECH) (p. 936)
- Modern Languages (MLNG) (p. 942)
- Music (MUSC) (p. 942)

P

- Performance Music (PMUS) (p. 947)
- Philosophy (PHIL) (p. 963)
- Physics (PHYS) (p. 968)
- Political Science (PSCI) (p. 974)
- Pre-Nursing (PRNU) (p. 981)
- Psychology (PSYC) (p. 981)
- Public Administration (PUAD) (p. 986)
- Public Health (PBHL) (p. 989)

R

- Religious Studies (RLST) (p. 992)
- Research & Eval Methods (RSEM) (p. 996)
- Risk Management (RISK) (p. 996)

S

- School Library Program (SCHL) (p. 997)
- School Psychology (SPSY) (p. 997)
- Science Education (SCED) (p. 997)
- Science, Technology, Engineering & Math Education (STME) (p. 998)
- Social Justice (SJUS) (p. 998)
- Social Sciences (SSCI) (p. 999)
- Sociology (SOCY) (p. 1000)
- Spanish (SPAN) (p. 1004)
- Special Education (SPED) (p. 1012)
- Sustainability (SUST) (p. 1015)

U

- University Honors and Leadership (UNHL) (p. 1016)
- University Skills & Engagement (UNIV) (p. 1020)

- Urban & Regional Planning (URPL) (p. 1020)
- Urban Teacher Education (UEDU) (p. 1020)

W

- Women's Studies (WGST) (p. 1021)

Accounting (ACCT)

ACCT 2200 - Financial Accounting and Financial Statement Analysis (3 Credits)

The financial accounting process, the role of the profession and the analysis of financial statements. Principal focus on interpretation of financial statements, with emphasis on asset and liability valuation problems and the determination of net income. Prereq: MATH 1060, or MATH 1070, or MATH 1080, or MATH 1109, or MATH 1110, MATH 1130, or MATH 1401 with a grade of C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 1060, or MATH 1070, or MATH 1080, or MATH 1109, or MATH 1110, MATH 1130, or MATH 1401 with a grade of C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher.

ACCT 2220 - Managerial Accounting and Professional Issues (3 Credits)

Introduces managerial accounting. Shows managers how to use accounting information to make decisions. Principal focus on cost behavior analysis, budgeting and product costing. Prereq: MATH 1070, or MATH 1060, or MATH 1080, or MATH 1110, or MATH 1120, or MATH 1130, or MATH 1401 with a grade of C- or higher and ACCT 2200 with a C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: MATH 1070, or MATH 1060, or MATH 1080, or MATH 1110, or MATH 1120, or MATH 1130, or MATH 1401 with a grade of C- or higher and ACCT 2200 with a C- or higher. Restriction: Restricted to undergraduate students at a sophomore standing or higher. Typically Offered: Fall, Spring, Summer.

ACCT 2550 - Introductory Accounting for Entrepreneurs and the Arts (3 Credits)

An integration of financial and managerial accounting processes as they relate to Entrepreneurs, Arts & Media managers and similar applications. This course will cover the analysis and interpretation of financial statements, asset and liability valuation and the determination of net income. Incorporates the use of accounting information to make decisions focusing on cost behavior analysis, budgeting and product costing in entrepreneurial and arts related businesses. Prereq: MATH 1070 or 1110. Max hours: 3 Credits.

Grading Basis: Letter Grade

ACCT 3220 - Intermediate Financial Accounting I (3 Credits)

A foundation course in financial accounting, this course provides an intensive analysis of generally accepted accounting principles, accounting theory and the construction and interrelation of financial statements for public corporations. Encourages critical thought and application of financial accounting standards to business transactions. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

ACCT 3230 - Intermediate Financial Accounting II (3 Credits)

Continuing the intensive coverage of financial accounting from ACCT 3220/ACCT 6031, this course covers concepts of financial accounting theory and generally accepted accounting principles not covered in 3220/6031. This typically includes detailed coverage of liabilities and equity, especially the topics of leases, deferred taxes, pensions and stock-options. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 3220, completed with a grade of a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6032. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher Typically Offered: Fall, Spring.

ACCT 3320 - Intermediate Cost Accounting (3 Credits)

Cost accounting links financial and managerial accounting and emphasizes communication between accountants and managers. Topics include managerial uses of cost data for decision making, analysis of activities and cost behavior, the role of accounting in planning and control, and computer-assisted decision modelling. A grade of C or higher is required in this course to proceed to the next level ACCT course or receive credit for the CPA license. Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6070. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 2220 and DSCI/BANA 2010 both with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Typically Offered: Fall, Spring, Summer.

ACCT 3939 - Internship (1-3 Credits)

Supervised experiences involving the application of concepts and skills in an employment situation. To enroll in an internship, students must work with the Experiential Learning Center on campus and have a 2.40 GPA or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Pass/Fail Only

Repeatable. Max Credits: 9.

ACCT 4030 - Financial Accounting (3 Credits)

Analysis of financial accounting concepts, the development of accounting thought and principles and critical review of generally accepted accounting principles. (Not recommended for candidates planning to sit for the CPA examination.) Note: Students who have taken ACCT 3220 or ACCT 3230 (or equivalent) may not take this course.

Prereq: ACCT 2200 and ACCT 2220 or equivalent. Must have a 'C' or better in courses. Strictly enforced. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restrictions: Restricted to undergraduate majors within the Business School.

ACCT 4054 - Accounting Information Systems (3 Credits)

This course focuses on the analysis, design, implementation and control of accounting information systems. Emphasis is placed on primary business processes including documentation, modeling, retrieving information to support managerial decisions and controlling risks.

Topics include transaction cycles, relational database modeling, data analytics and information systems risks and controls. Must earn a grade of C or better to qualify for graduation at the UG level and to receive credit for the CPA license. Prereq: ACCT 3220 with a grade of C or higher and ISMG 2050 with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6054. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a grade of C or higher and ISMG 2050 with a grade of 'C-' or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

ACCT 4070 - Management Accounting (3 Credits)

Designed to provide students with a foundation in management accounting models and information, with emphasis on management decision making uses of accounting information. (Not recommended for candidates planning to sit for the CPA examination.) Prereq: ACCT 2200 and 2220 or equivalent with a grade of a 'C' or better. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Note: Students who have taken ACCT 3320 or its equivalent may not take this course. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate Business majors with junior standing or higher

Typically Offered: Spring.

ACCT 4240 - Advanced Financial Accounting (3 Credits)

Advanced financial accounting concepts and practices with an emphasis on accounting for equity investments, business combinations, and foreign currency. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6024. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher

ACCT 4280 - Accounting Ethics (3 Credits)

This course examines the ethical responsibilities of accounting professionals from a personal and professional perspective, including examples of ethical dilemmas accounting professionals confront. The course utilizes various authoritative codes of conduct, professional standards and applied ethical theory as ethical guidance for auditors, accountants, tax professionals, and accounting management. A variety of case studies are employed to give students practice in developing a decision making approach in dealing with difficult ethical scenarios.

Prereq ACCT 4620. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq ACCT 4620 Restriction: Restricted to undergraduate Business majors with junior standing or higher.

ACCT 4282 - Capitalism, Accounting and Ethical Choices (3 Credits)

Examines the development of the U.S. economy from 1850 to today with emphasis on the ethics of accounting, capitalism, and government controls. Prereq: ACCT 3220 with a C or higher or permission. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher

ACCT 4330 - Managerial Accounting Problems and Cases (3 Credits)

Critical analysis of advanced topics in managerial accounting. Considerable use of cases and current readings. Prereq: Completion of ACCT 3320 with a grade of 'C'. Strictly enforced. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate Business majors with junior standing or higher

ACCT 4370 - International Accounting (3 Credits)

Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context, international auditing practices and procedures, international tax implications and the implications of operating within the regulations of the Foreign Corrupt Practices Act, the European Union, North American Free Trade Agreement and General Agreement on Tariffs and Trade. Prereq: Completion of ACCT 3220 with a grade of 'C' or better. Strictly enforced. Cross-listed with ACCT 6370 and INTB 6370. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate Business majors with junior standing or higher

Typically Offered: Spring.

ACCT 4410 - Fundamentals of Federal Income Tax (3 Credits)

Provisions and procedures of federal income tax laws and requirements affecting individuals and business organizations, including problems of tax planning and compliance. Note: Students cannot receive credit for both ACCT 4410 and ACCT 6140. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6140. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

Typically Offered: Fall, Spring.

ACCT 4420 - Taxation of Business Entities (3 Credits)

A federal tax course stressing tax planning issues affecting corporations (both C corporations and S corporations) and partnerships. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4420 and ACCT 6150. Cross listed with ACCT 6150. Prereq: ACCT 2220 with a C- or higher. Prereq: ACCT 4410 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 4410 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher

ACCT 4442 - Accounting: Professional Research and Communications (3 Credits)

This course provides students with a structured approach to researching and communicating practice-oriented financial accounting, auditing, and tax-related issues. After completing this course, students should be able to effectively: (1) Communicate (both oral and written) solutions to practice-oriented financial accounting, auditing, and tax-related issues. (2) Navigate through U.S. and international accounting, auditing, and tax authorities. (3) Conduct systematic research for all types of accounting-related problems then reach and communicate efficient conclusions using a variety of techniques. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Prereq: ACCT 4620 and ACCT 4410 both with a grade of C or higher. Cross-listed with ACCT 6442. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate Business majors with junior standing or higher Prereq: ACCT 4620 and ACCT 4410 both with a grade of C or higher

ACCT 4490 - Experiential Learning (3 Credits)

Designed to provide practical knowledge on developing a professional practice in accounting or financial management. Topics: Marketing, operating a professional practice. Lectures, guest speakers student projects. Prereq: ACCT 3220 completed with a 'C' or better, or permission of instructor. Cross-listed with ACCT 6490. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Restriction: Restricted to undergraduate Business majors with junior standing or higher

ACCT 4520 - Oil and Gas Accounting (3 Credits)

The Oil and Gas Accounting course is designed to give students an overview of the oil and gas industry and the particular accounting issues this industry faces. The focus is on the oil and gas industry but many of the issues discussed are appropriate and applicable to all energy-related entities. This is a valuable learning experience for those interested in acquiring an understanding of the accounting issues for energy management firms in preparation for entry into public accounting. The course enjoys support from the energy industry in the form of guest speakers and project ideas. Prereq: ACCT 3220 with a grade of C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6520. Max Hours: 3 credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

ACCT 4620 - Auditing Theory (3 Credits)

Auditing Theory: Focus on the professional responsibilities of CPAs, generally accepted auditing standards, and PCAOB auditing standards, with emphasis on the theory underlying the development of standards, objectives and procedures. Students cannot receive credit for both ACCT 4620 & ACCT 6020. Note: A grade of C or higher must be earned to receive credit for the CPA license. A grade of B or higher must be earned if planning to take 6025 in the future. Prereq: ACCT 3220 with a grade of C or higher. Coreq: ACCT 4054. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6020. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a grade of C or higher. Coreq: ACCT 4054.

Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

Typically Offered: Fall, Spring.

ACCT 4625 - Auditing Practice (3 Credits)

Focus on the application of generally accepted auditing standards and PCAOB auditing standards to practice. Emphasis on procedures used by CPAs to gather and document audit evidence. Prereq: ACCT 4620 with a grade of C (2.0) or higher. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4625 and ACCT 6025. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 4620 with a grade of C (2.0) or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher

Typically Offered: Fall, Spring.

ACCT 4780 - Accounting and Information Systems Processes and Controls (3 Credits)

The course is designed to develop knowledge and skills used to understand and evaluate corporate accounting processes and systems. It focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach is used to present concepts and techniques for evaluating the adequacy of system processes and controls. Cross-listed with ACCT 6510, ISMG 4780, and ISMG 6510. Prereq: Completion of ACCT 2200, ACCT 2220 and ACCT 3054 with a grade of 'C' or better (strictly enforced). Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: Completion of ACCT 2200, ACCT 2220 and ACCT4054 with a grade of 'C' or better. Restriction: Restricted to undergraduate Business majors with junior standing or higher.

ACCT 4800 - Accounting for Government and Nonprofit Organizations (3 Credits)

Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 with a C or higher. Restriction: Restricted to undergraduate Business majors at a junior standing or higher. Cross-listed with ACCT 6080. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ACCT 3220 with a C or higher Restriction: Restricted to undergraduate Business majors at a junior standing or higher.

ACCT 4840 - Independent Study (1-8 Credits)

Restricted to undergraduate Business majors with junior standing or higher. Max hours: 8 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate Business majors with junior standing or higher

ACCT 4900 - Professional Certification in Accounting (3 Credits)

This course will prepare students for the Uniform Certified Public Accountant Examination, including the Auditing and Attestation (AUD), Business Environment and Concepts (BEC), Financial Accounting and Reporting (FAR), and Regulation (REG) sections. Topical coverage will include a balance of most-tested topics, difficult topics, and exposure to topics not addressed in required accounting degree courses. Note: there will be a materials fee of \$1,100 for this course. All materials will continue to be available until successful passage of the CPA Exam. Note: Undergraduate Accounting students typically perform better in this class when taking it during the final semester prior to graduation. Restriction: Restricted to Undergraduate and MS Accounting students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Undergraduate and MS Accounting students.

ACCT 4915 - Accounting for the Public Interest (3 Credits)

Applies accounting knowledge and concepts in a not-for-profit organization. Student volunteers help with functions or special projects and are supervised by both faculty members and personnel from the agency to which they are assigned. Prereq: Permission of instructor. Cross-listed with ACCT 6015. Restricted to undergraduate Business majors with junior standing or higher. Max hours: 3 Credits.

Grading Basis: Pass/Fail Only

Restriction: Restricted to undergraduate Business majors with junior standing or higher

Typically Offered: Fall, Spring, Summer.

ACCT 4950 - Special Topics (3 Credits)

Research methods and results, special topics and professional developments in accounting. Consult the current 'Schedule Planner' for semester offerings. Prereq: Varies according to topic and instructor requirements. Restriction: Restricted to undergraduate Business majors with junior standing or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restrictions: Restricted to undergraduate majors within the Business School.

Anthropology (ANTH)

ANTH 1000 - Anthropology: Past and Present (3 Credits)

Anthropology is the study of humankind in all of its diversity and complexity. Anthropologists have traditionally approached the study from four distinct perspectives: biological, cultural, linguistic and archaeological. This course considers how anthropologists study humankind from these four perspectives and the robust picture of humanity that emerges. Max Hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 1111 - First Year Seminar (3 Credits)

Restriction: Restricted to Freshman level students. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to Freshman level students

ANTH 1302 - Introduction to Archaeology (4 Credits)

Introduces the study of past cultures and their environments. Emphasis is on the scientific method, aspects of research design and analytical techniques used by archaeologists to determine chronology, taphonomy, source production areas, exchange networks, and human-environment interactions. Note: Three hours of lecture and a two-hour lab each week. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul; Denver Core Requirement, Behavioral Sciences.

ANTH 1303 - Introduction to Biological Anthropology (4 Credits)

Introduces the study of human biological evolution, both processes and outcomes, from primate ancestors to fossil hominids to contemporary human populations. Methods of obtaining and interpreting data concerning the genetic, biological and evolutionary basis of physical variation in living and skeletal populations. Note: 3 hours of lecture and a 2 hour lab each week. Term offered: fall, spring, summer. Max hours: 4 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SC1

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Biol Phys Sci - Lec/Lab; GT courses GT Pathways, GT-SC1, Nat Phy Sci:Course w/Req Lab.

ANTH 2102 - Culture and the Human Experience (3 Credits)

An application of the concept of culture to several aspects of the human experience, including gender relations, emotion and personality, cognition, language, health and healing and economic behavior. In exploring these dimensions of the human experience, the course focuses on selected cultures from each of the world's major geographic areas. Term offered: fall, spring, summer. Max hours: 3 Credits. GT: Course is approved by the Colorado Dept of Higher Education for statewide guaranteed transfer, GT-SS3

Grading Basis: Letter Grade

Additional Information: GT courses GT Pathways, GT-SS3, Soc Behav Sci:Hmn Behav, Cul; Denver Core Requirement, Behavioral Sciences.

ANTH 2400 - Exploring Culture through Social Media (3 Credits)

Introduction to social media and analysis applied to cultural change. Focus on theories and practices of non-fiction image-making and "doing digital ethnography" to examine a range of experience and knowledge among different societies, communities, technologies, policy discourses and ourselves. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 2840 - Independent Study (1-3 Credits)

Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

ANTH 2939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Sophomore standing. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Restriction: Sophomore standing or higher.

ANTH 3000 - Globalization, Migration and Transnationalism (3 Credits)

Examines the cultural dynamics of globalization, including: the development of special economic zones in the global south, rural to urban migration, transnational migration, the maintenance of transnational ties, and cross-border social formations. Reviews the dynamics of globalization through case studies and film. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, International Perspectives.

ANTH 3006 - Sustainable Development and Equity (3 Credits)

Investigates theories, policies and discourses of development and equity and their relationship to health, socio-environmental problems. Considers the connections between green environmental knowledge and neoliberalism, the success and failures of development along public health, economic equality, social justice and ecological lines. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Teikyo.

ANTH 3008 - Contemporary World Problems: An Anthropological Perspective (3 Credits)

This course examines contemporary problems confronting humanity from an anthropological perspective - a historical, holistic and comparative framework that will be used to critically assess these issues and identify forces driving them. Problems to be addressed include climate and environmental change, resource depletion, and poverty and inequality. Prereq: Junior standing or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 3042 - Lost Worlds and Crystal Skulls (3 Credits)

This class explores the differences between science and pseudoscience specifically within the realm of anthropology. Scientific method and critical thought are employed in a way that trains students to question and recognize the difference between fact and fiction in data. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3045 - Cannabis Culture (3 Credits)

Familiarizes students with anthropological approaches to the culture of cannabis, including medicinal and recreational. Topics: history, cultural uses, legalization, cannabis capitalism, health effects, race and inequality, regulatory policies, retailing and consumption. Ethnographic research for data collection emphasized. Term offered: summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3101 - Foundations of Cultural Anthropology (3 Credits)

Covers current theories in cultural anthropology and discusses the nature of field work. Major schools of thought and actual field studies are explored with an emphasis on anthropological data gathering, analysis and writing. Prereq: ANTH 2102 with a C- or higher. Term offered: fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 2102 with a C- or higher.

ANTH 3121 - Language, Culture, and Communication (3 Credits)

Definitions of language and communication and their relationship to human behavior, thought and culture. The classification of languages, linguistic universals, language acquisition, multilingualism, and nonhuman communication, with consideration of the evolutionary implications of such studies. Prereq: ANTH 2102 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 2102 with a C- or higher.

ANTH 3142 - Cultural Diversity in the Modern World (3 Credits)

An in-depth analysis of the phenomena of culture and application of the culture concept to understanding cultural diversity in the modern world. Applies the concept of culture to several basic aspects of human social life, for example: social class and gender relations, ethnicity, racism and sexism, education, health and economic behavior. Students explore these issues in the context of case studies of particular groups and/or communities, focusing primarily on the diversity of cultural expression in contemporary U.S. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Term offered: fall, spring, summer. Max hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Cultural Diversity.

ANTH 3150 - Special Topics in Medical Anthropology (3 Credits)
Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: ANTH 2102 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 2102 with a C- or higher.

ANTH 3200 - Human Migration: Nomads, Sojourners, and Settlers (3 Credits)

Explores the relationship between human migration, voluntary and forced and social organization and culture in the modern world. Case studies include pastoralists, foragers, refugees, immigrants, sojourners and settlers and their impact on health, culture, identity, ethnicity, tradition and nationality. Cross-listed with PBHL 3200. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3202 - Anthropology of Health Care Policy (3 Credits)

Uses the tools and methods of cultural anthropology to analyze health care reform in the U.S. We examine analyses of the current health care system, debates over its reform, compare the US health care system to that of health care systems worldwide. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3210 - Urban Food Systems and Sustainability (3 Credits)

Urbanites are increasingly removed from the complex of factors that provide us food. Being concerned about sustainability, we need to understand the complex webs in food systems and their implications for the health and natural systems. This problem-based course will wrestle with urban food systems organized to address the 3 E's of sustainability: environmental, economic, and equity. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3250 - Climate, Environment and Society (3 Credits)

This course will engage social theory and case studies to examine Climate Change, its impact and consequences for human life, and what communities and societies are doing to address it. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3301 - World Prehistory (3 Credits)

Explores of 3.5 million years of human cultural development that examines the prehistory of Africa, Asia, Europe and the Americas. Patterns and processes that underlie the earliest hominid expansion out of Africa, tool use, origins of fire, the peopling of the Americas, the development of metallurgy, the domestication of plants and animals and the rise of cities and the state are examined. Emphasis is on both regional developments and landmark projects that have helped clarify prehistory. Note: Introductory course in Archaeology (ANTH 1302) recommended. Term offered: fall, spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3310 - Colorado Archaeology (3 Credits)

A survey of the prehistoric and protohistoric peoples of the five major culture areas of Colorado: the Four Corners, Great Basin, Rocky Mountains, High Plains, and Front Range. Of special interest will be the study of the initial peopling of Colorado, economic and political organization, ethnic interaction and the history of archaeological work in the region. Prereq: ANTH 1302 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 1302 with a C- or higher.

ANTH 3315 - North American Archaeology (3 Credits)

Course provides a survey of the prehistoric and historic archaeology of the United States, Canada and Northern Mexico. Current knowledge of the subject and current debates are discussed. Prereq: ANTH 1302 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ANTH 1302 with a C- or higher.

ANTH 3316 - History of Human Environmental Impacts (3 Credits)

Humans exist as active members of an ecosystem. There is increasing awareness that human actions have changed the environment and continue to do so. While ecologists, climatologists, and engineers work to address current and future environmental problems, the discipline of archaeology can provide a time depth and crosscultural breadth of perspective on how such issues have impacted human societies. This course will investigate and critically assess the claim that environmental and ecological factors have played a key role in the dissolution of once thriving civilizations. Examples will be drawn from across time and space, specifically emphasizing the archaeological record and the perspective it provides on a problem that is of critical relevance today. In this course students will: 1) Learn how humans have engaged with their environments over the course of our species' evolutionary history; 2) Critically assess contemporary discussions of collapse and ecocide by contextualizing humanenvironment interactions within the frameworks of resilience, niche construction, and ecosystem engineering; 3) Use 'lessons from the past' to inform contemporary ecological debates; 4) Objectively evaluate the factual basis of various claims made about how humans affect, have affected, and likely will affect their environments; 5) Actively engage with the community to build sustainable gardens. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3320 - Southwestern Archaeology (3 Credits)

Considers the origins, characteristics, and interrelationships of the major culture areas in the American southwest, including the Anasazi, Hohokam, Mogollon, Sinagua and Northern Mexico. Note: ANTH 1302 recommended but not required. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3330 - Topics in Archaeology (3 Credits)

A flexible format for addressing specific topics in archaeology. Examples include the archaeology of the Great Plains, the Mediterranean Region, etc. Prereq: ANTH 2102 with a C- or higher. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: ANTH 2102 with a C- or higher.

ANTH 3410 - Anthropology of Work (3 Credits)

Explores the culture of workforces and workplaces. Ethnographic methods and collaborative research practices comprise the framework of the course to examine people, occupations and work cultures engaged in production and consumption of commodities at local and global levels. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3420 - Anthropology and Politics of the Global Tobacco Epidemic (3 Credits)

Examines anthropological perspectives on tobacco, tobacco-related health policy making, and cigarette manufacturers and leaf-buying companies in the global tobacco epidemic. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3500 - Human Osteology (4 Credits)

Provides in-depth knowledge of human osteology, including the following topics: skeletal anatomy; age, sex and stature determination; skeletal trauma/pathology; and taphonomy. Recitation component provides hands-on experience with skeletal material. Prereq: ANTH 1303 with a C- or higher. Max Hours: 4 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 3512 - Human Evolution (3 Credits)

Provides an overview of the fossil and archaeological evidence for human origins. Theory and method in paleoanthropology is emphasized. The goal is to outline current knowledge of human biological evolution and the lifeways of our evolutionary relatives. Prereq: ANTH 1303 with a C- or higher. Term offered: fall, spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 3550 - Forensic Anthropology (3 Credits)

Provides an introduction to methods used in forensic anthropology for investigating human remains in cases of medicolegal importance, including recovery, attribution of demographic characteristics, analysis of disease and trauma and determination of personal identity. Prereq: ANTH 1303 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 3560 - Human Variation and Adaptation (3 Credits)

This course explores the nature of modern human biological variation and adaptation. We address the evolutionary and biological theory that informs our study of contemporary human anatomy and physiology. Topics covered include, the nature vs. nurture debate, variation in skin pigmentation and the concept of "race", skeletal adaptations, adaptations to extreme environments and sexbased variation. Term offered: every other year. Prereq: ANTH 1303 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 3590 - Primate Behavior Research at the Zoo (3 Credits)

Students will review information on primates, learn about data collection models, design a behavior observation project on captive primates, collect and analyze behavior data, write and present a formal scientific paper. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3666 - Anthropology of Death (3 Credits)

The primary goal of the course is to identify and understand the range of human expression through the treatment of human remains in anthropological literature with focus on burials, mortuary practices, and associated rituals. Along with more theoretical papers, specific case studies will be used to address a variety of topics and issues, such as historic and prehistoric social organization, bio-archaeology, cannibalism, human sacrifice, mummification, the ethics of studying human remains, and the treatment of pets in prehistory. The time range that we will cover in the course will span from the Neolithic to the early 20th century, and numerous cultures from all parts of the globe will be our subject matter. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 3700 - Current Topics in Anthropology (3 Credits)

This undergraduate course offers a flexible format for addressing specific topics of special interest in anthropology, such as: aging, race and prejudice, class, warfare and aggression, ethnicity, myth and folklore, language and communication, Colorado prehistory and topics in evolutionary theory. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

ANTH 3910 - Cross-Cultural Field Experience (3-6 Credits)

An intensive contact with another culture through supervised travel in the U.S. or in a country other than the United States. Written reports required. Note: Class includes pre-trip orientation lectures; in-country lectures by local resource people and supervising CU-Denver faculty. Max Hours: 6 Credits.

Grading Basis: Letter Grade

ANTH 3939 - Internship (1-3 Credits)

Experiences involving application of specific, relevant concepts and skills in supervised employment situations. Note: students must work with the Experiential Learning Center advising to complete a course contract and gain approval. Prereq: Junior standing or higher. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

ANTH 4000 - Special Topics in Anthropology (1-4 Credits)

Designed to give students a chance to evaluate critically some practical or theoretical problem under faculty supervision and to present results of their thinking to fellow students and instructors for critical evaluation. Prereq: Junior standing or higher. Cross-listed with ANTH 5000.

Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

ANTH 4010 - Medical Anthropology: Global Health (3 Credits)

This course is concerned with the underlying biological and cultural determinants of health throughout the human life cycle in global and cross-cultural perspective. Note: The first of a two-course sequence in medical anthropology and global health studies; the second is ANTH 4020. Prereq: Junior standing or higher. Cross-listed with ANTH 5014. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4030 - Ethnobiology (3 Credits)

Considers the relationship between human society and plants and animals in the natural world. Primary focus on the perception and cognitive organization of the environment and how that affects the definition and use of plants and animals as resources. Prereq: Junior standing or higher. Cross-listed with ANTH 5030. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4040 - Anthropology of Food and Nutrition (3 Credits)

Examines the myriad relationships between food as a biological necessity and eating as a socially and culturally conditioned activity. Takes a biocultural perspective that considers not only the tremendous variety of foods we eat, but also the complex meanings and importance attached to food and eating. Prereq: Junior standing or higher. Cross-listed with ANTH 5040. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4050 - Quantitative Methods in Anthropology (3 Credits)

Surveys the ways of deriving meaning from anthropological data by numerical means, including, but not confined to basic statistical procedures. Prereq: Junior standing or higher. Cross-listed with ANTH 5053. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4060 - Evolutionary Medicine (3 Credits)

Evolutionary medicine is a relatively new approach for understanding patterns of human health and disease. In this course, students will learn how human evolutionary history has shaped our susceptibility and resistance to both chronic and infectious diseases. Prereq: ANTH 1303 with a C- or higher. Cross-listed with ANTH 5060 and PBHL 4060. Max Hours: 3 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 4070 - Culture of Development and Globalization (3 Credits)

Anthropological critiques of development and globalization point out that they have occurred without regard for the diversity of human culture and human need. Beginning with this analysis, this course goes one step further by examining culture and values of development and how they affect the way development gets done. Note: students should consult with the instructor prior to enrolling in this course. Prereq: Junior standing or higher. Cross-listed with ANTH 5070. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4080 - Global Health Practice (3 Credits)

A travel-study course that provides students the opportunity to work on global health issues in the context of a supervised internship experience. In addition to a formal internship placement or directed research opportunity, students attend formal lectures and participate in seminars devoted to addressing those health issues most relevant to the country in which the course is being taught. Prereq: Junior standing or higher. Cross-listed with ANTH 5080 and PBHL 4080. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4090 - Drug Syndemic (3 Credits)

Psychotropic drugs, both legal and illicit, are a predominant part of our everyday lives. This course examines their use and meaning within cultures, and the social, political and economic issues that surround their production, use and misuse. Prereq: Junior standing or higher. Cross-listed with ANTH 5090 and PBHL 4090. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4121 - Zooarchaeology (3 Credits)

Introduction to the theory and methods of zooarchaeology through lectures, readings, and hands-on lab work identifying and analyzing mammalian skeletal material. Students will learn what mammalian remains indicate about biological and cultural evolution of humans. Cross-listed with ANTH 5121. Prereq: ANTH 1303 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

D-CL-Pre: ANTH 1303 with a C- or higher.

ANTH 4150 - Human Biocultural Adaptability (3 Credits)

The chief concern of this course is the relationship between ourselves and our surroundings and the very immediate ways the environments in which we live affect us. The view is of ourselves as a part of, not apart from, these environments. Prereq: Junior standing or higher. Cross-listed with ANTH 5150. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4170 - Culture and the Environment (3 Credits)

Examines the historical origins of Western and non-Western ideas of the environment and the place of people within it. The imposition of Western ideas on non-Western groups regarding environmental policy is also examined, with special attention given to practices of conservation, development and transnational monetary policy. Prereq: Junior standing or higher. Cross-listed with ANTH 5170. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4180 - The Nature of Power (3 Credits)

Introduces the major theories of power used in contemporary anthropology, with an emphasis on cross-cultural perspectives. Explores how power is defined, determined and exercised globally and locally and how different systems of power articulate with one another. Prereq: Junior standing or higher. Cross-listed with ANTH 5180. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4200 - Gender in Cross-Cultural Perspective (3 Credits)

A comparative analysis of gender-based status and social roles of women and men, with women's status and roles emphasized due to their near-universal construction as the "Other" sex. Examines in cross- and sub-cultural context the relations among women's status and their subsistence and reproductive activities; and the division of labor by sex, ideology and political economy. Prereq: Junior standing or higher. Cross-listed with ANTH 5200. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4230 - Anthropology and Community Based Participatory Research (3 Credits)

The seminar explores anthropological critiques, knowledge production and multi-media approaches to community based participatory research (CBPR) such as photovoice and digital storytelling to understand the history of CBPR and analyze partnerships between university researchers and community representatives. Cross-listed with ANTH 5230. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 4260 - Human Reproductive Ecology (3 Credits)

Considers the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, marriage patterns, birth seasonality, duration of birth intervals and reproductive senescence. Prereq: Junior standing or higher. Cross-listed with ANTH 5260. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4270 - Anthropology of the Body (3 Credits)

Explores how society, through culture, creates collective and individual bodies; embodied experience across the life course; and the body as an expression of social power, bodily modification and adornment. Note: ANTH 2102 or ANTH 3101 are recommended be taken before this course for undergraduate students. Cross-listed with ANTH 5270. Max Hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 4290 - Anthropology and Public Health (3 Credits)

"This course critically explores anthropological approaches to public health problems. Through a number of key issues and case studies, we examine how public health practice can be enhanced through anthropological research, theory and methodology. Prereq: Junior standing or higher. Cross-listed with ANTH 5290. Max hours: 3 Credits."

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4300 - Migrant Health (3 Credits)

This course examines health issues associated with transnational migration from an anthropological point of view. Drawing upon case studies, we examine the health of migrant communities in both host and sending nations. Prereq: Junior standing or higher. Cross-listed with ANTH 5300. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4320 - Archaeology of Mexico and Central America (3 Credits)

Surveys the major prehistoric and protohistoric cultures and societies of that area of Mexico and Central America identified with the evolution of Meso-American civilization. Major topics include early human colonization of the Americas, the domestication of plants and animals, the emergence of regionally-based cultures and societies, trade and exchange and the evolution of urbanism and the state. Primary emphasis on such ancient cultures and societies as those of the Olmec, Zapotec, Maya, Teotihuacan, Toltec and Aztec. Prereq: Junior standing or higher. Cross-listed with ANTH 5320. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4330 - Lithic Analysis (3 Credits)

Examines the theoretical basis and methodological tools used by archaeologists in the analysis of prehistoric stone tools. Topics of discussion include the mechanics of stone fracture, typologies, use wear analysis and core reduction techniques. Prereq: Junior standing or higher. Cross-listed with ANTH 5330. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4350 - Anthropology of Globalization (3 Credits)

This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Prereq: Junior standing or higher. Cross-listing ANTH 5350. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4380 - Archaeology of Hunters-Gatherers (3 Credits)

Explores the theory and methods used by archaeologists to investigate prehistoric hunter gatherers. Topics of concern include mobility, subsistence, procurement, and socio-political organization. Prereq: Junior standing or higher. Cross-listed with ANTH 5380. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4390 - Laboratory Methods in Archaeology (3 Credits)

Methods and theories of archaeology are used to scrutinize the collection and interpretation of data and the relationships of archaeology to other disciplines. Core materials emphasize the critique of basic archaeological assumptions. Note: Course content varies slightly each time it is offered, in response to student needs and the availability of projects (e.g., laboratory work, urban excavation, survey and mapping). May be repeated for credit when topics change. Prereq: Junior standing or higher. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: junior standing or higher

ANTH 4400 - Archaeology of Power and Inequality (3 Credits)

Addresses inequality and power through a long-term archaeological and theoretical perspective. Discusses explanations for the origins of power and inequality and their role in early small-scale societies and emerging complex politics. Prereq: Junior standing or higher. Cross-listed with ANTH 5400. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4440 - Museums in the 21st Century (3 Credits)

This is an advanced course on natural history/anthropology museums. It will examine practical issues facing museums, and consider the complex questions that museums raise. The class includes lectures, discussions, and hands-on collection work, and exhibit/ outreach development. Cross-listed with ANTH 5440. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ANTH 4450 - Development and Conservation: Contemporary Issues (3 Credits)

Applies the theoretical paradigms of political ecology to contemporary issues of sustainable development. Case studies are chosen illustrating topics based on faculty expertise and student interaction. The first part of the course presents theoretical perspectives relevant to the chosen topic. In the second half, students participate in directed problem solving activities. Prereq: Junior standing or higher. Cross-listed with ANTH 5450. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4460 - Development and Conservation: Theory and Practice (3 Credits)

Examines the praxis of anthropological knowledge of human ecosystem interaction and development of economic opportunities. Issues of biodiversity, resource conservation, sustainable development and globalization are studied. Prereq: Junior standing or higher. Cross-listed with ANTH 5460. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4500 - Advanced Issues in Human Evolution (3 Credits)

This flexible course offers an advanced treatment of issues in human biological evolution. Topics may emphasize morphological evolution, behavioral evolution, the environment of human evolution, non-human primate comparative information. Prereq: Junior standing or higher. Cross-listed with ANTH 5500. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4550 - Primate Comparative Anatomy (3 Credits)

Examines human and non-human primate anatomical diversity. Students learn primate anatomy and the morphological differences among species. Explanations for the evolutionary origins of differences are reviewed, focusing on evolutionary theory, comparative methods and biomechanics. Prereq: Junior standing or higher. Cross-listed with ANTH 5550. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4560 - Human Ecology (3 Credits)

Studies demographic and ecological variables as they relate to human populations. Aspects of natural selection, overpopulation and environmental deterioration are considered. Prereq: Junior standing or higher. Cross-listed with ANTH 5560. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4570 - Landscape Archaeology (3 Credits)

Introduces spatial archaeology through intrasite analysis and regional studies. Methods treated include site location and quantitative spatial organization. Theoretical topics include definitions of community, ancient urbanism and the impact of subsistence and politics on relations to the landscape. Prereq: Junior standing or higher. Cross-listed with ANTH 5570. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4580 - Neanderthals and the Origin of Modern Humans (3 Credits)

Focuses on the human fossil record for the taxon *Homo sapiens*, including the earliest members of this group ("early" or "archaic" *Homo sapiens*), the Neanderthals and so-called "anatomically modern" *Homo sapiens*. The goal of the course is to survey the major issues within the area of modern human origins, and to learn about the evolutionary relationships, lifeways and behaviors of these groups. Prereq: Junior standing or higher. Cross-listed with ANTH 5580. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4590 - Primate Behavior (3 Credits)

Studies nonhuman primate behavior with emphasis on understanding social behavior, ecology and issues related to human evolution. Prereq: Junior standing or higher. Cross-listed with ANTH 5590. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4600 - Medical Anthropology (3 Credits)

Introduces students to the theories and concepts of medical anthropology, the study of human health and illness. Explores conceptions of the body, modalities of healing, the clinical encounter, and new medical technologies. Prereq: Junior standing or higher. Cross-listed with ANTH 5600. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4640 - Darwinian Approach to Human Behavior (3 Credits)

The evolution of human behaviors from a Darwinian perspective, focusing on the natural selection of behaviors that maximize reproductive success. Includes topics such as male and female reproductive strategies, female mate choice, male violence and resource acquisition and control. Prereq: Junior standing or higher. Cross-listed with ANTH 5640. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4800 - Special Topics in Medical Anthropology (3-9 Credits)

Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: Junior standing or higher. Repeatable. Cross-listed with ANTH 5800. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

ANTH 4810 - Integrating Anthropology (3 Credits)

Designed to build on specialized course work in the subdisciplines of anthropology, this course emphasizes the basic concepts that integrate and unite the discipline and give it unique perspective. These are the concepts of culture, adaptation and human evolution. In the last several weeks of the course, students consider the applicability of the anthropological perspective to specific human issues. Note: Centers on the critical examination and discussion of presentations made by department faculty and graduate students. Note: this course assumes that students have completed course work equivalent to a minor in anthropology. Prereq: Junior standing or higher. Cross-listed with ANTH 5810. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: junior standing or higher

ANTH 4840 - Independent Study (1-3 Credits)

Directed study based on a specific subfield of anthropology. Note: Permission of instructor required. Term offered: fall, spring, summer. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ANTH 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

ANTH 4910 - Field Experience in Archaeology (3-6 Credits)

Students participate in archaeological field research and data recovery and conduct laboratory analysis of materials recovered in the field. Emphasis is placed on excavation technique and accuracy of record keeping. Prereq: Junior standing or higher. Cross-listed with ANTH 5910. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

Prereq: junior standing or higher

ANTH 4995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education.

Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

Arabic (ARAB)

ARAB 1000 - Introduction to Cultures of the Arabic-Speaking World (3 Credits)

Introduces students to the Arabicspeaking cultures of North Africa, some Asian countries, and the Gulf States, with a focus on politics, culture, economics, literature and the arts. Taught in English. Term offered: spring, fall. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Additional Information: Denver Core Requirement, Humanities.

Typically Offered: Fall, Spring.

ARAB 1010 - Beginning Arabic I (5 Credits)

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Term offered: spring, fall. Max Hours: 5 Credits.

Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

ARAB 1020 - Beginning Arabic II (5 Credits)

Beginning course in Modern Standard Arabic (MSA) designed for students who have not had any experience with the language. Note: This course assumes that students have passed ARAB 1010 or equivalent, or have taken one year of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1010 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 5 Credits.

Grading Basis: Letter Grade

ARAB 2110 - Intermediate Arabic I (3 Credits)

Third-semester course in Modern Standard Arabic (MSA) designed for students who have had two semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 1020 or equivalent, or have taken two years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 1020 is recommended for success in this course. This course is not intended for native speakers. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARAB 2120 - Intermediate Arabic II (3 Credits)

Fourth-semester course in Modern Standard Arabic (MSA) designed for students who have had three semesters or comparable proficiency in the language. Note: This course assumes that students have passed ARAB 2110 or equivalent, or have taken three years of high school Arabic, or possess equivalent proficiency. A grade of C- or higher in ARAB 2110 is recommended for success in this course. This course is not intended for native speakers. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARAB 2840 - Independent Study (1-3 Credits)

Independent study for students wishing to pursue nonoffered studies in Arabic language and culture. Repeatable. Max Hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.

ARAB 4880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Architecture (ARCH)

ARCH 1110 - Introduction to Architecture (3 Credits)

Introduces students to the essential ways of looking at and thinking about buildings, sites and cities, exposing students to the various perspectives, positions and practices that they will encounter in both an architecture curriculum and in architectural practice. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARCH 1710 - Architectural Drawing: Analysis and Representation (3 Credits)

This course explores the development of graphic skills emphasizing drawing as a means to analyze and represent architectural ideas throughout the design process. Using freehand and mechanical drawing methods students will learn the conventions and opportunities of the three architectural projections. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARCH 1711 - Architectural Visualization I (3 Credits)

First in the sequence of two visual studies courses, this course introduces students to the fundamental principles of two and three-dimensional visual analysis and communication. Students are taught basic drawing and model-making conventions, both mechanical and digital, and how to use drawings and models as design and communication tools. No co-credit with ARCH 2110. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARCH 1721 - Architectural Visualization II (3 Credits)

Second in the sequence of two visual studies courses, this course introduces students to advanced principles of two and three-dimensional visual analysis and communication. Students are introduced to advanced mechanical and digital communication techniques and the use of drawings and models as design and communication tools. Prereq: ARCH 1711. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. No co-credit with ARCH 3801. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 1711. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning.

ARCH 2110 - Design Studio I (3 Credits)

Introduces students to the principles of design and composition through studies of architecture's formal, spatial, and geometric systems. Students explore these using a variety of drawing techniques including diagramming and drawings that are exploratory, analytical and developmental. No co-credit with ARCH 1711. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARCH 2111 - Design Studio I - Foundational (6 Credits)

First in the sequence of two foundational design studio courses, this course introduces students to the fundamental principles of three-dimensional design and composition. Students learn to translate and express ideas through willful manipulation of form and space, in a sequential series of exercises. Prereq or Coreq: ARCH 1711. No co-credit with ARCH 3110. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq or Coreq: ARCH 1711.

ARCH 2121 - Design Studio II - Foundational (6 Credits)

Second in the sequence of two foundational design studio courses, this course introduces students to the formal and spatial vocabulary of Architecture and its organizational principles through a series of micro-scale architectural design exercises. Prereq: ARCH 2111 and ARCH 1711. Coreq or Prereq: ARCH 1721. No co-credit with ARCH 3120. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2111 and ARCH 1711. Coreq or Prereq: ARCH 1721.

ARCH 2230 - Architectural History I (3 Credits)

Introduces architecture and urbanism from prehistory to the mid-seventeenth century by exploring the social, cultural, technical, philosophical and aesthetic ideas that shaped buildings and other architectural and urban settings in different parts of the world. Max hours: 3 Credits.

Grading Basis: Letter Grade

ARCH 3110 - Design Studio II (6 Credits)

Introduces students to the expressive potential of architecture's elements and systems. Students explore techniques for translating and expressing ideas in buildings through the static, dynamic and sequential manipulation of architectural form and space. Prereq: ARCH 2110. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. No co-credit with ARCH 2111. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2110 Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 3111 - Design Studio III - Elemental (6 Credits)

First in the sequence of two foundational design studio courses, this course introduces students to the fundamental principles of three-dimensional design and composition. Students learn to translate and express ideas through willful manipulation of form and space, in a sequential series of exercises. Prereq: ARCH 2121 and ARCH 1721. No co-credit with ARCH 4110. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2121 and ARCH 1721.

ARCH 3120 - Design Studio III (6 Credits)

Focuses on the design of buildings in their relationship to physical, natural and cultural contexts. Students explore non-formal concepts and translate them into architectural experiences that integrate program, site and climate. Prereq: ARCH 3110. Restriction: Must be an undergraduate Architecture student. No co-credit with ARCH 2121. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3110 Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 3121 - Design Studio IV - Elemental (6 Credits)

Second in the sequence of two elemental design studio courses, this course focuses on the design of small-scale buildings to advance students' understanding of the role of context in design communication. Students learn to translate non-formal concepts into sequential architectural experiences in deference to program and site. Prereq: ARCH 3111. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. No co-credit with ARCH 4120. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3111. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning.

ARCH 3130 - Construction Practices: Material and Structural Systems (3 Credits)

Provides an overview of the materials, systems, assemblies and processes that inform the design and construction of buildings, reviewing the building technologies and developing student understandings of the interrelationship between the interconnected elements and systems that define buildings and spaces. Prereq: PHYS 2010/2030 and MATH 1130 are recommended. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restrictions: Restricted to sophomore standing or higher.

ARCH 3230 - Architectural History II (3 Credits)

Introduces architecture and urbanism from the mid-seventeenth century to the present, exploring the forces that shaped buildings and other architectural and urban settings in different parts of the world. Prereq: ARCH 2230. Restriction: Open to all undergraduate majors. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2230 Restriction: Open to all undergraduate majors.

ARCH 3330 - Building Systems I (3 Credits)

Introduces the concepts of thermal behavior of buildings, climate as a determinant of building design, energy use in buildings, natural and mechanical means of environmental control, plumbing, electrical, communication systems, water supply and sanitation systems. Recommended Prereq: MATH 1130 OR MATH 1110 & 1120; PHYS 2010/2030 OR PHYS 2311/2321. Restriction: Restricted to undergrad students in B.S. Architecture, B.S. Construction Management, and B.S. Construction Engineering Management. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergrad students in B.S. Architecture, B.S. Construction Management, and B.S. Construction Engineering Management.

ARCH 3340 - Theory of Structures I (3 Credits)

Introduction to the analysis and design of structural elements and focuses on the principles of statics and the strength of materials. Topics include stress determination, deflection and the behaviors of tension, compression and shear in various structural elements. Recommended Prereq: MATH 1130 OR MATH 1110 & 1120; PHYS 2010/2030 OR PHYS 2311/2321. Restriction: Restricted to undergrad students in B.S. Architecture, B.S. Construction Management, and B.S. Construction Engineering Management. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergrad students in B.S. Architecture, B.S. Construction Management, and B.S. Construction Engineering Management.

ARCH 3430 - Construction Practices: Building Envelope (3 Credits)
 Discusses the principles and processes of building construction and introduces the major systems and assemblies that inform construction practices. Stresses the relationship between architectural concepts and emerging building technologies, teaching students how to select appropriate materials, systems and assemblies. Prereq: ARCH 3130. Restricted to sophomore standing or higher. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Prereq: ARCH 3130. Restricted to sophomore standing or higher.

ARCH 3600 - Special Topics Cultural (3 Credits)
 Special topics in architecture studies related to cultural inquiries including theory, cultural diversity, and/or cross cultural thinking. Repeatable. Max hours: 24 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 24.
 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3602 - Architecture Photography (3 Credits)
 Architecture elective in photography of space, interior, and exterior with an emphasis on design composition of architecture. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3690 - Cultural Research Abroad (3 Credits)
 Topics in architecture studies related to cultural inquiries including theory, cultural diversity, and/or cross cultural thinking in other cultures. Work shall include preparation in culture, history and language skills in other countries. Repeatable. Max Hours: 6 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 6.
 Restrictions: Restricted to Junior standing or higher.

ARCH 3691 - Cultural Design Abroad (3 Credits)
 Design topics in architecture studies related to cultural inquiries including design, cultural implications of design, and/or cross cultural application of design. Repeatable. Max Hours: 6 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 6.
 Restrictions: Restricted to Junior standing or higher.

ARCH 3692 - International: Project Delivery (3 Credits)
 This course is the delivery of the design solution developed in ARCH 3703. Critical thinking skills will be honed as students respond to construction material and technology limitations during the 10 day build in a South American cultural setting. Prereq ARCH 3703. Restriction: Restricted to undergraduates with a Junior standing or higher. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Prereq ARCH 3703. Restricted to undergraduates with a Junior standing or higher.

ARCH 3693 - Rome: Architecture & Urbanism (3 Credits)
 The objective of this course is to provide a broad overview of the city's major architectural sites, topography, infrastructure and systems of urban design and organization through the study of the rich palimpsest of buildings, piazzas and landscapes from antiquity to the present day. Coreq. ARCH 3694 Restricted to undergraduate BS-ARCH students with Junior standing or higher. Cross-listed with ARCH 6755. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Coreq: ARCH 3694. Restriction: Restricted to undergraduate BS-ARCH students with Junior standing or higher.

ARCH 3694 - Rome: Documentation, Analysis and Design (3 Credits)
 With graphic representation as the primary mode of inquiry, this course is an intensive study of a single building, piazza or landscape within the rich urban fabric of Rome. The graphical inquiry will be supported by pre-departure research and onsite observation and presentations. Coreq: ARCH 3693. Restricted to undergraduate BS-ARCH students with Junior standing or higher. Cross-listed with ARCH 6760. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Coreq: ARCH 3693. Restriction: Restricted to undergraduate BS-ARCH students with Junior standing or higher.

ARCH 3700 - Special Topics Design (3 Credits)
 Special topics in architecture studies related to design inquiries including theory, design skills, and/or analytical thinking. Repeatable. Max hours: 24 Credits.
 Grading Basis: Letter Grade
 Repeatable. Max Credits: 24.
 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3701 - Survival Sketching (3 Credits)
 The focus of this course will be the sketchbook and the keeping of a sketchbook. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning with sophomore standing or higher. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3702 - Design Thinking (3 Credits)
 Students will be introduced to tools that will enable them to reframe design dilemmas in favor of productive resolutions. Course content will include examples and specific techniques of design thinking, including empathy, abductive reasoning, testing, plussing and diagramming. Prereq: sophomore standing or higher. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restrictions: Restricted to sophomore standing or higher.

ARCH 3703 - International: Design in Context (3 Credits)
 The course is a project-based design seminar. In collaboration with a small community in Central America, students have the opportunity to engage in the context of another culture, environment, construction limitations and economic constraints. The course integrates architecture, engineering, and business. Restriction: Restricted to ARCH-BS majors with Junior standing. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to ARCH-BS majors with Junior standing.

ARCH 3704 - The Poetic Detail-Studies in Tectonics—Wood (3 Credits)
 This research seminar focuses on tectonics through traditional timber frame and wood construction case studies. The relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary concerns. Learning by making. Cross-listed with ARCH 6357. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.
 Grading Basis: Letter Grade
 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3705 - Human Centered Design, Innovation and Prototyping (3 Credits)

Introduces techniques for collaborative design by interdisciplinary teams: design thinking, problem solving, and rapid prototyping. Teams of students design and implement increasingly complex projects while acquiring essential innovation and problem-solving skills. The course will culminate in a final project chosen by each team. Cross-listed with IWKS 2100. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3706 - 3D Design, Computation, and Prototyping (3 Credits)

Introduces the design and computer-controlled fabrication of three-dimensional objects using both additive (3D printing) and subtractive (laser cutter, CNC router/mill) processes. Various commercial and open-source software tools for 3D design (CAD), manufacturing (CAM) and visualization will be explored. Increasingly complex projects throughout the semester will be used to illustrate fabrication techniques. The course will culminate in a final project. Restriction: Restricted to ARCH-BS majors with sophomore standing. Cross-listed with IWKS 3100 and 5170. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3707 - Color Theory + Application (3 Credits)

This course will explore Color perception and theory; media/medium technique/application and landscape/built-environment drawing preparation, composition and presentation. The objective is to develop your understanding of color interaction and interrelationship especially, as it pertains to the use of color in the design and implementation of the built environment. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3708 - Introduction to the Essentials of Biomimicry (3 Credits)

Biomimicry is the conscious emulation of nature's genius that can be applied to the fields of design, engineering, medicine, transportation, and social interaction. This class will be geared towards designers and will give an overview of the discipline, the (3) Essential Elements, the human-nature connection, The Biomimicry Thinking Methodology, and Life's Principles. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3709 - Furniture Design (3 Credits)

Students learn how to design and build furniture in the College's woodshop. Topics include ergonomics, properties of materials, principles and techniques of joinery and techniques of hand and machine tools. Cross-listed with ARCH 6180. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3800 - Special Topics - Technical (3 Credits)

Special topics elective will include coursework in either Digital Media In Design courses, Design-Build site Construction, or the Science and Art of Engineering Buildings. Additional topics will be develop in conjunction with the required undergraduate technical electives. Restriction: Must be an undergraduate Architecture student with sophomore standing or higher. Repeatable. Max hours: 24 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 24.

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3801 - Introduction to Digital Media (3 Credits)

Introduces Building Information Modeling (BIM) systems as a means to integrate and optimize design processes and building systems in the professional practice of architecture. Topics include creation of simulated, complex, three-dimensional environments in support of the architectural design studio sequence. No co-credit with ARCH 1721. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3802 - Arch Project Presentation (3 Credits)

Architecture elective in digital and analog methods of presentation and composition for various audiences and formats. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3804 - Green Tech Eco-Furniture Fabrication I (3 Credits)

Green Tech I is the first of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Restriction: Restricted to ARCH-BS majors with sophomore standing or higher. Coreq: ARCH 3806. Cross-listed with ARCH 6375. Max hours: 3 Credits.

Grading Basis: Letter Grade

Coreq: ARCH 3806 Restriction: Restricted to ARCH-BS majors with sophomore standing or higher

ARCH 3805 - Beginning Revit (3 Credits)

Introduction to Building Information Modeling through Autodesk's Revit Architecture software. The course explores fundamental architectural concepts as they are developed and expressed in Revit. Appropriate program use and team learning experiences are emphasized. Prereq: ARCH 3110 and 3130. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3110 and 3130 Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3806 - Green Tech Eco-Furniture Fabrication II (3 Credits)

Green Tech II is the second of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Restriction: Restricted to ARCH-BS majors with sophomore standing or higher. Coreq: ARCH 3804. Cross-listed with ARCH 6376. Max hours: 3 Credits.

Grading Basis: Letter Grade

Coreq: ARCH 3804 Restriction: Restricted to ARCH-BS majors with sophomore standing or higher

ARCH 3807 - Small Eco Home Design & Fabrication (3 Credits)

This unique, quick-paced seminar focuses on small-scale residential design, from tiny-homes, to prefab, and movable residences. Students learn Small Home design, methods, and techno-systems, then using green materials, they design and fabricate architectural elements and furniture for enhancing small-scale living. Restriction: Restricted to ARCH-BS majors with sophomore standing. Cross-listed with ARCH 6377. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 3808 - Architectural Design and Fabrication (3 Credits)

This course explores architectural production using advanced 3D-modeling, fabrication, and construction documentation techniques. The course connects contemporary design practice with material experimentation and architectural production. Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing.

ARCH 3809 - Architectural Design and Graphics (3 Credits)

This course explores the varied mediums of graphic representation in architecture. Using advanced tutorials in 3D-modeling, computer-generated rendering, and workflows through multiple software platforms, students will create work that is reflective of contemporary architecture culture. Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3801. Restriction: Restricted to ARCH-BS majors with sophomore standing.

ARCH 3949 - Internship I (1-3 Credits)

Experiential learning student internships sponsored by faculty in a field related to architecture. Minimum of 45 work hours per credit. Prereq: Permission of instructor, advisor and acceptance in BS Architecture program. Must also have sophomore standing. Minimum 15 credit hours with 2.75 GPA. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

ARCH 4110 - Design Studio IV (6 Credits)

Design Studio IV. Introduces students to analysis and design as complementary processes. Students learn how to form design intentions based on analytical research and close study of the relationship between architecture, precedent and culture, and to consider buildings as settings that address issues of culture, society, economy and ecol. Prereq: ARCH 3120. No co-credit with ARCH 3111. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3120 Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 4111 - Design Studio V - Analytical (6 Credits)

First in the sequence of two analytical design studio courses, this course introduces students to analysis and design as complementary processes. Students learn how to form design intentions based on analytical study of the relationship between architecture and culture. Focused on the design of small-scale buildings, students learn to incorporate structure, light, and material as expressive elements of an architectural composition. Prereq: ARCH 3121. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3121. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning.

ARCH 4120 - Design Studio V (6 Credits)

Explores the place and role of architecture as an instrument of critical social engagement and cultural change, the role of history and precedent in the design process, and the role of detail through projects that demonstrate student's proficiency as designers. Prereq: ARCH 4110. No co-credit with ARCH 3121. Max hours: 6 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 4110 Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 4121 - Design Studio VI - Analytical (6 Credits)

Second in the sequence of two analytical design studio courses, this course advances students' understanding of the relationship between architecture and culture and their ability to design intermediate scale buildings as effective settings for cultural rituals. Students explore the role of history and precedent in the design process along with the role of detail in architectural compositions. Prereq: ARCH 4111. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning. Max hours: 6 credits.

Grading Basis: Letter Grade

Prereq: ARCH 4111. Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning.

ARCH 4220 - A History of Theoretical Discourse on Architecture (3 Credits)

This course traces the history of theoretical discourse on architecture from the Renaissance to the present. It explore the genealogy of current theoretical stances and critical methodologies in the discipline of Architecture through the close reading of a select group of historic and contemporary texts. Prereq: ARCH 3230. Cross-listed with ARCH 6220. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 6220

ARCH 4340 - Theory of Structures II (3 Credits)

Focuses on the relationship between architectural concepts and the selection of structural systems. Addresses the qualitative and quantitative analysis of reinforced concrete, steel, and wood structural systems and members. Prereq: ARCH 3340. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 3340 Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 4440 - Building Systems II (3 Credits)

Focuses on the environmental systems in commercial and other nonresidential buildings. Discusses natural and artificial lighting, HVAC systems, acoustics, vertical transportation and fire protection.

Recommended Prereq: MATH 1130 OR MATH 1110 & 1120;

PHYS 2010/2030 OR PHYS 2311/2321. Restriction: Restricted to undergrad ARCH students within the College of Architecture and Planning. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Restricted to undergraduate ARCH students within the College of Architecture and Planning

ARCH 4610 - A History of American Architecture (3 Credits)

This course investigates the history of architecture in the United States as a chronological survey of buildings, architects, landscapes, and urban forms and as an exploration of the social, political, economic, technological, and similar issues that inform this built environment.

Prereq: ARCH 2230 and 3230. Cross-listed with ARCH 6210. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2230 and ARCH 3230.

ARCH 4612 - A History of Modern Architecture (3 Credits)

This course traces the various theoretical and formal developments in European and American Architecture from the end of the 19th century through the 20th century. The works of a select group of architects will be examined and discussed in relation to the diverse body of goals and objectives, ideas and ideals that constituted the Modern movements in architecture. Prereq: ARCH 2230. Restriction: Restricted to Sophomore standing or higher. Cross-listed with ARCH 6212. Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: ARCH 2230 Restriction: Restricted to Sophomore standing or higher

ARCH 4840 - Independent Study (1-3 Credits)

Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to architecture.

Prereq: Restricted to undergraduate ARCH students within the College of Architecture and Planning with sophomore standing or higher.

Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Restriction: Restricted to ARCH-BS majors with sophomore standing

ARCH 4949 - Internship II (1-3 Credits)

Experiential learning student internships sponsored by faculty in a field related to architecture. Minimum of 45 work hours per credit. Permission of instructor, advisor and acceptance in BS Architecture program. Must also have sophomore standing. Minimum 15 credit hours with 2.75 GPA. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Bioengineering (BIOE)

BIOE 1010 - Bioengineering Design and Prototyping I (3 Credits)

BIOE 1010 introduces students to bioengineering, and provides an introduction to possible careers and research topics in bioengineering.

Students also learn human anatomy by understanding how to incorporate visual human data sets into computer prototyping and design tools.

Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Repeatable. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing.

Typically Offered: Fall.

BIOE 1020 - Bioengineering Design and Prototyping II (3 Credits)

BIOE 1020 extends work from BIOE 1010 by introducing students to practical skills around computer-aided design (CAD), modeling and prototyping with focus on project-oriented work aimed at design, prototyping and metrology of specific medical devices. Prereq:

ENGR 1200 with a C- or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 3.

Prereq: ENGR 1200 with a C- or higher.

Typically Offered: Spring.

BIOE 2010 - Introduction to Programming for Bioengineers (2 Credits)

Digital computers are the primary tools of modern engineers. This class introduces the undergraduate to general computing concepts, computer languages, and programming techniques. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing.

Prereq: MATH 1401 with a C- or higher. Max Hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: MATH 1401 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing

BIOE 2020 - Introduction to Computational Methods for Bioengineers (2 Credits)

A modern engineer is required to solve problems involving the physical world not only on paper, but also using numerical tools implemented on digital computers. This class introduces the students a first set of numerical algorithms for the solution of calculus-based engineering problems. Prereq: BIOE 2010 and MATH 2411 with a C- or higher.

Restriction: Restricted to BIOE-BS majors. Max Hours: 2 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 2010 and MATH 2411 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design, and Computing.

BIOE 2840 - Independent Study in Bioengineering (1-6 Credits)

Covers topics which students may wish to pursue on their own initiative with guidance from department faculty. Credit is awarded upon completion of a project. Department consent required. Restriction: Restricted to BIOE-BS majors. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 6.

Department Consent Required. Restriction: Restricted to BIOE-BS majors.

BIOE 3010 - Bioinstrumentation (3 Credits)

This course is intended for junior bioengineering students to facilitate their development into bioengineering investigation. The course has been designed to introduce fundamental principles of circuit theory, analog and digital electronics and biological instrumentation techniques commonly used in biomedical research. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195, and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 1020, 2020; PHYS 2331,2341; CHEM 3411,3418, MATH 2421, 3195; BIOL 2061,2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3020 - Introduction to Biomechanical Analysis (3 Credits)

This course will offer an overview of solid and fluid mechanics, as applied to biomechanical systems. After completing this course, students should have enough understanding of biomechanics to: (1) perform and interpret basic analytical of biomech. systems: (2) analytically reason through a design: (3) and choose a specialty. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195 and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 1020, 2020; PHYS 2331,2341; CHEM 3411,3418, MATH 2421, 3195; BIOL 2061,2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3030 - Introduction to Biomaterials (3 Credits)

This course will cover different kinds of biomaterials in biomedical applications, and their physiological response in the biological environment. In addition, it will cover material properties, host response, and characterization techniques. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195, and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 1020, 2020; PHYS 2331,2341; CHEM 3411,3418, MATH 2421, 3195; BIOL 2061,2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3040 - Physiology for Bioengineering (3 Credits)

This course will introduce students to central concepts in human physiology. This includes the structure, function and homeostatic role of key organs within the body; the engineering principles governing these systems and processes; and designing engineering-based solutions to overcome dysfunction in disease. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195, and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 1020, 2020; PHYS 2331,2341; CHEM 3411,3418, MATH 2421, 3195; BIOL 2061,2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3050 - Cell & Molecular Bioengineering (3 Credits)

An examination of the structure and function of eukaryotic cells. Emphasis is placed on mechanisms of intracellular and transmembrane transport, cellular control, gene expression, and intercellular and intracellular signaling. Experimental methods and applications will be discussed. Prereq: BIOE 3010, 3020, 3030, 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 3010, 3020, 3030, 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors.

BIOE 3051 - Cell & Molecular Bioengineering Lab (1 Credit)

Laboratory experience in cell and molecular biology techniques. Experimental methods and applications will be discussed and performed including basic microscopy, PCR, purification and separation techniques, and protein assays. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Co-req: BIOE 3050. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 1 Credit.

Grading Basis: Letter Grade

Prereq: BIOE 3010, 3020, 3030, 3040 with a C- or higher. Co-req: BIOE 3050 Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3060 - Biostatistics, Measurement and Analysis (3 Credits)

Students will learn and apply parametric statistics, including t-tests, ANOVA, and regression methods, using commercially available statistical software to the analysis of clinical and/or biological data. Further, they will be introduced to measurement error and the propagation of error technique. Restriction: Restricted to BIOE-BS majors. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 3010, 3020, 3030, 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors.

BIOE 3070 - Bioengineering Lab I (3 Credits)

Core bioengineering lab required of all major students. This lab introduces students to experimental techniques in the areas of Biomaterials, Biomedical Instrumentation, and Biomechanics. Prereq: BIOE 1020, 2020; PHYS 2331/2341; CHEM 3411/3418, MATH 2421, 3195, and BIOL 2061/2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 1020, 2020; PHYS 2331,2341; CHEM 3411,3418, MATH 2421, 3195; BIOL 2061,2081 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering , Design and Computing

BIOE 3071 - Bioengineering Lab II (3 Credits)

Lab sequence 2 of 2. A series of modules focused on quantitative techniques relative to Bioengineering. Modules will include Physiological data acquisition and analysis, Medical Imaging and Assistive Technologies. Prereq: BIOE 3070 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: BIOE 3070 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing.

BIOE 3090 - Introduction to BioDesign (3 Credits)

BioDesign I is the first course in a three sequence design process that provides students with a framework for identifying medical needs through clinical observation, environment analysis and product screening. Prereq: BIOE 3010, 3020, 3030, and 3040 with a C- or higher. Restriction: Restricted to BIOE-BS majors within the College of Engineering, Design and Computing. Max Hours: 3 Credits.
